	Other a.c. motors (case diameter) (including subfractional and fractional synchronous and subsynchronous timing motors, other than clock type):		
36211 61	Less than 2-1/2" in diameter, all horsepower ratings built in this diameter.....	127	6,742
	2-1/2" in diameter and over but less than 3-3/4" in diameter:		
36211 62	Less than 16 mhp.....	380	6,755
36211 63	16 mhp. and over but less than 1/20 hp.....	261	4,015
36211 64	1/20 hp. and over but less than 1/10 hp.....	58	563
36211 65	1/10 hp. and over but less than 1/4 hp.....	85	1,673
36211 66	1/4 hp. and over.....	26	792
	3-3/4" in diameter and over but less than 4-3/8" in diameter:		
36211 67	Less than 16 mhp.....	30	617
36211 68	16 mhp. and over but less than 1/20 hp.....	94	1,764
36211 69	1/20 hp. and over but less than 1/10 hp.....	107	1,789
36211 70	1/10 hp. and over but less than 1/6 hp.....	27	466
36211 71	1/6 hp. and over.....	877	8,419
	4-3/8" in diameter and over but less than 5-3/8" in diameter:		
36211 72	Less than 1/20 hp.....	32	548
36211 73	1/20 hp. and over but less than 1/10 hp.....	401	5,662
36211 74	1/10 hp. and over but less than 1/6 hp.....	372	4,320
36211 75	1/6 hp. and over but less than 1/3 hp.....	165	3,664
36211 76	1/3 hp. and over.....	176	4,150
	5-3/8" in diameter and over but less than 6" in diameter:		
36211 81	Less than 1 hp.....	4,926	62,075
36212 03	1 hp. and over.....		
	6" in diameter and over but less than 7-1/8" in diameter:		
36211 83	Less than 1 hp.....	10,592	130,114
36212 05	1 hp. and over.....	109	3,925
	7-1/8" in diameter and over but less than 9" in diameter:		
36211 85	Less than 1 hp.....	161	7,523
36212 07	1 hp. and over.....		
36212 --	Integral horsepower motors and generators, other than for land transportation equipment (for a.c. and d.c. motors, 200 hp. and below, the horsepower shown is for open type frame at a speed of 1,800 r.p.m. Motors at other speeds and enclosures have been converted to equivalent ratings at 1,800 r.p.m.), total <sup>1</sup> .....	1,666,223	363,497
	Integral horsepower motors (excluding cranking motors for internal combustion engines; propulsion motors for land transportation; motors mounted on the same shaft as arc welding generators; and hermetics):		
36212 01	Aircraft and space motors (including a.c. and d.c. but excluding generators) all integral hp. ratings.....	51,202	4,140
	Alternating current:		
36212 11	Single phase, all hp. ratings.....	178,367	14,651
	Polyphase—induction:		
36212 21	1-5 hp.....	752,305	58,088
36212 22	5.1-20 hp.....	272,973	51,638
36212 23	21-50 hp.....	73,030	30,027
36212 26	51-125 hp.....	28,055	30,047
36212 27	126-200 hp.....	9,439	19,349
36212 28	201-500 hp.....	3,048	16,407
36212 29	Over 500 hp.....	1,119	18,117
	Synchronous motors:		
36212 31	450 r.p.m. or below (all hp. ratings).....	449	6,304
36212 32	Above 450 r.p.m. (all hp. ratings).....	917	8,480
	Direct current motors and generators (excluding all arc welding generators, battery charging generators for internal combustion engines and generators used as an integral part of land transportation equipment):		
36212 41	1-5 hp. (3/4-4 kw.).....	13,827	5,360
36212 42	5.1-20 hp. (4.1-15 kw.).....	10,746	11,352
36212 43	21-50 hp. (16-40 kw.).....	7,823	9,423
36212 46	51-200 hp. (41-150 kw.).....	4,337	14,227
36212 47	201-500 hp. (151-400 kw.).....	1,764	14,110
36212 48	Over 500 hp. (over 400 kw.).....	363	17,062

See footnotes at end of table.

TABLE 6A-4. Motors and Generators: 1963 and 1958--Continued

Product code	Product	Total shipments including interplant transfers	
		Quantity	Value (\$1,000)
		1963	
		(number of units)	
36212	Integral horsepower motors and generators, other than for land transportation equipment (for a.c. and d.c. motors, 200 hp. and below, the horsepower shown is for open type frame at a speed of 1,800 r.p.m. Motors at other speeds and enclosures have been converted to equivalent ratings at 1,800 r.p.m.)—Continued		
	Integral horsepower motors (excluding cranking motors for internal combustion engines; propulsion motors for land transportation; motors mounted on the same shaft as arc welding generators; and hermetics)—Con.		
	Alternating current generators (excluding all arc welding generators and generators used as an integral part of land transportation equipment and steam, gas-, and hydraulic-turbine driven generators):		
	450 r.p.m. and slower speeds (all kw. ratios).....	80	1,480
	Over 450 r.p.m.:		
36212 53	3/4-5 kw.....	8,051	1,306
36212 54	5.1-15 kw.....	4,854	3,258
36212 55	15.1-50 kw.....	5,848	6,389
36212 56	50.1-150 kw.....	2,937	3,448
36212 57	150.1-400 kw.....	863	3,582
36212 59	Over 400 kw.....	464	7,514
36213 --	Land transportation motors, generators, and control equipment and parts, total.....	(X)	89,468
36213 11	Railway motors and generators, including those used for control purposes (for trolley cars, trolley coaches, rapid transit cars, trolley locomotives, third-rail locomotives, multiple unit cars for railway service, and mining locomotives) and parts and supplies.....	(X)	33,672
36213 31	Motors and generators, including those used for control purposes, for gasoline-electric and Diesel-electric buses, trucks, locomotives, rail cars, and parts and supplies.....	(X)	31,392
36213 51	All other land transportation motors, including those used for control purposes, for storage-battery powered transportation equipment (for industrial trucks, mining locomotives, and other transportation equipment) and parts and supplies.....	(X)	6,556
36213 98	Other electrical apparatus for land transportation equipment.....	(X)	17,848
36214 --	Prime mover generator sets, except steam or hydraulic turbines, total <sup>1</sup> .....	63,556	102,694
	Generator set units, except steam, gas, and water turbine sets:		
	Gasoline-engine driven generator sets:		
36214 12	D.c. output (all ratings).....	6,459	4,300
	A.c. output:		
36214 13	Under 3/4 kw.....	528	115
36214 14	3/4 kw.-5 kw.....	41,112	13,313
36214 15	5.1 kw.-15 kw.....	4,836	6,480
36214 16	15.1 kw. and over.....	1,830	6,097
	Diesel-engine driven generator sets:		
36214 31	D.c. output (all kw. ratings).....	879	3,203
	A.c. output:		
36214 32	Less than 50 kw.....	4,122	8,904
36214 33	51-250 kw.....	3,190	24,845
36214 34	251 kw. and over.....	600	35,437
36215 --	Motor generator sets and other rotating equipment (including dynamotors, converters, inverters, and frequency changers), total <sup>1</sup> .....	(X)	239,111
36215 11	Synchronous converters and double current generators.....	14,939	5,292
36215 21	Other motor-generator sets:		
	Fractional horsepower, a.c. and d.c. output (less than 3/4 kw.).....	62,752	8,270
	Integral horsepower:		
	A.c. output, based on the rating of the largest a.c. generator:		
36215 32	3/4-150 kw.....	6,980	18,520
36215 33	Over 150 kw.....	145	2,131
	D.c. output, based on the rating of the largest d.c. generator:		
36215 34	3/4-170 kw.....	9,765	17,248
36215 36	Over 170 kw.....	417	16,041
	Other rotating equipment:		
36215 53	Synchros, servos, rate generators, resolvers, and combinations (including subfractional-under 1/100 hp. motors).....	(X)	50,199
36215 57	Synchro-type components.....	(X)	2,894
36215 97	All hermetic motors.....	11,249,370	106,956
36215 98	All other rotating equipment.....	(X)	11,560

See footnotes at end of table.

TABLE 6A-4. Motors and Generators 1963 and 1958--Continued

Product code	Product	Total shipments including interplant transfers	
		Quantity	Value (\$1,000)
		1958	
		(1,000 units)	
36211 --	Fractional horsepower motors <sup>1</sup> .....	(X)	435,820
36211 10	Aircraft (all types, except synchros, selsyns, and autosyns).....	(X)	34,761
	A.c. types:		
36211 12	Under 1/20 hp.....	366	15,979
36211 13	1/20 hp. and over but not including 1 hp.....	57	6,795
	D.c. types:		
36211 16	Under 1/20 hp.....	178	6,058
36211 17	1/20 hp. and over but not including 1 hp.....	52	5,929
36211 21	Clock-type synchronous and subsynchronous timing motors.....	5,984	8,292
36211 23	Subfractional (under 1/100 hp.) used with synchro and servo devices.....	57	2,552
	Universal (other than listed above):		
36211 24	Below 1/100 hp. (including toy motors).....	24	156
36211 25	1/100 hp. and over but not including 1/40 hp.....	712	4,376
36211 26	1/40 hp. and over but not including 1/20 hp.....	684	5,592
36211 27	1/20 hp. and over but not including 1/10 hp.....	2,412	10,684
36211 28	1/10 hp. and over but not including 1/6 hp.....	666	3,364
36211 29	1/6 hp. and over but not including 1 hp.....	2,037	21,511
	D.c. motors (other than listed above):		
36211 71	Below 1/100 hp. (including toy motors).....	2,039	6,796
36211 72	1/100 hp. and over but not including 1/70 hp.....	58	623
36211 73	1/70 hp. and over but not including 1/40 hp.....	201	889
36211 74	1/40 hp. and over but not including 1/20 hp.....	653	3,226
36211 75-79	1/20 hp. and over but not including 1 hp.....	8,025	36,807
	Shaded pole a.c. motors:		
36211 81	Below 1/100 hp. (including toy motors).....	7,587	20,363
36211 82	1/100 hp. and over but not including 1/70 hp.....	2,860	9,969
36211 83	1/70 hp. and over but not including 1/40 hp.....	2,222	6,777
36211 84	1/40 hp. and over but not including 1/20 hp.....	1,990	9,830
36211 87	1/20 hp. and over but not including 1/10 hp.....	1,485	9,853
36211 89	1/10 hp. and over but not including 1/6 hp.....	467	4,295
	Other a.c. motors:		
36211 91	Below 1/100 hp. (including toy motors).....	150	1,654
36211 92	1/100 hp. and over but not including 1/20 hp.....	1,258	6,038
36211 93	1/20 hp. and over but not including 1/10 hp.....	797	8,790
36211 94	1/10 hp. and over but not including 1/6 hp.....	1,722	17,705
36211 95	1/6 hp. and over but not including 1/3 hp.....	5,082	55,387
36211 96	1/3 hp. and over but not including 1/2 hp.....	7,052	88,608
36211 98	1/2 hp. and over but not including 1 hp.....	2,000	47,396
36211 00	Fractional horsepower motors, n.s.k.....	(X)	9,526
		(number of units)	
36212 --	Integral horsepower motors and generators, other than for land transportation equipment <sup>1</sup> .....	(X)	430,458
	Alternating current:		
36212 11	Single phase, all sizes.....	628,346	25,551
	Polyphase-induction:		
36212 21	1 to 5 hp.....	641,076	57,981
36212 22	5.1 to 20 hp.....	216,971	46,097
36212 23	21 to 50 hp.....	44,755	26,719
36212 26	51 to 125 hp.....	18,573	22,678
36212 27	126 to 200 hp.....	7,094	19,719
36212 28	201 to 500 hp.....	2,727	15,584
36212 29	Over 500 hp.....	2,159	34,595
	Synchronous and other a.c. motors:		
36212 36	1 to 50 hp.....	1,261	205
36212 37	51 to 500 hp.....	607	4,910
36212 39	Over 500 hp.....	497	12,461
	D.c. motors and generators (excluding all arc welding generators, battery charging generators for internal combustion engines, and generators used as integral part of land transportation equipment):		
36212 41	1 to 5 hp.....	12,218	4,441
36212 42	5.1 to 20 hp.....	18,238	13,239
36212 43	21 to 50 hp.....	4,156	8,189
36212 44	51 to 200 hp.....	3,075	17,847
36212 45	201 to 500 hp.....	1,134	12,273
36212 49	Over 500 hp.....	190	21,849
	A.c. generators (excluding all arc welding generators and generators used as integral part of land transportation equipment):		
36212 52	Under 16 kw.....	24,956	10,332
36212 55	16 to 150 kw.....	9,473	12,173
36212 56	151 to 400 kw.....	936	5,169
36212 59	Over 500 kw.....	338	37,586
36212 98	Other integral horsepower generators.....	(X)	20,860
36212 00	Integral horsepower generators, n.s.k.....		

See footnotes at end of table.

TABLE 6A-4. Motors and Generators: 1963 and 1958 -Continued

Product Code	Product	Total shipments including interplant transfers	
		Quantity	Value (\$1,000)
		1958	
		(number of units)	
36213 --	Motors, generators, and control apparatus (and parts) for land transportation equipment.....	(X)	52,367
36213 11	Railway motors, generators, and control equipment (for trolley cars, trolley coaches, rapid transit cars, trolley locomotives, third rail locomotives, multiple unit cars for railway service and mining locomotives) and parts and supplies.....	(X)	( <sup>2</sup> )
36213 31	Motors, generators, and control equipment for gasoline-electric and Diesel-electric buses, trucks, locomotives, rail cars, and parts and supplies....	(X)	29,277
36213 51	Motors and control equipment for storage-battery powered transportation equipment (for industrial trucks, mining locomotives, and other transportation equipment) and parts and supplies.....	(X)	4,769
36213 98	Other electrical apparatus for land transportation equipment.....	(X)	<sup>2</sup> 18,321
36214 --	Prime mover generator sets other than steam or hydraulic turbine <sup>1</sup> .....	(X)	73,865
	Generator set units, except steam, gas, and water turbine sets:		
36214 11	Gasoline-engine driven generator sets.....	53,449	56,541
36214 31	Diesel-engine driven generator sets.....	2,264	15,425
36214 75	Other generator set units, including wind-driven (except steam, gas, and water turbine sets and motor-generator sets).....	(X)	1,899
36215 --	Motor-generator sets and other rotating equipment <sup>1</sup> .....	(X)	164,057
	Motor-generator sets (including dynamotors, converters, inverters, and frequency chargers):		
36215 11	Synchronous converters and double current generators.....	35,805	9,068
	Other motor-generator sets:		
36215 21	Fractional horsepower (less than 3/4 kw.).....	43,258	6,744
	Integral horsepower:		
36215 31	3/4 to 150 kw.....	19,483	62,768
36215 33	151 to 400 kw.....		
36215 35	Over 400 kw.....		
	Other rotating equipment:		
36215 53	Synchros, servos, rate generators, resolvers, and combinations.....	(X)	34,694
36215 57	Synchro type components.....	(X)	2,191
36215 98	All other rotating equipment.....	(X)	48,592
36210 00	Motors, generators, and motor-generator sets, n.s.k.....	(X)	25,942

Source: Current Industrial Reports Series M35H, "Motors and Generators."

-- Represents zero.

n.s.k. Not specified by kind.

<sup>1</sup>Excludes parts and supplies, except as indicated.<sup>2</sup>Railway motors, generators, and control equipment are included under code 3621398, "Other electrical apparatus for land transportation equipment."

TABLE 6A-5. Motors and Generators--Total and Commercial Shipments: 1963 and 1958

Product code	Product	1963				
		Total shipments including interplant transfers		Shipments to other companies (commercial shipments)		Produced and incorporated (quantity)

36215 98	Other rotating equipment.....		48,592			( <sup>7</sup> )	
36210 00	Motors, generators, and motor-generator sets, n.s.k.....		25,942			(NA)	

- Represents zero.

(NA) Not available.

(X) Not applicable.

n.s.k. Not specified by kind.

<sup>1</sup>Excludes parts and supplies, except as indicated.<sup>2</sup>Commercial shipments represent over 95 percent of the total value of shipments.<sup>3</sup>Commercial shipments represent between 25 and 50 percent of the total value of shipments.<sup>4</sup>Commercial shipments represent between 80 and 90 percent of the total value of shipments.<sup>5</sup>Railway motors, generators, and control equipment are included under code 3621398, "Other electrical apparatus for land transportation equipment!"<sup>6</sup>Commercial shipments represent between 90 and 95 percent of the total value of shipments.<sup>7</sup>Commercial shipments represent between 60 and 80 percent of the total value of shipments.

TABLE 6A-6. Industrial Controls--Value of Shipments: 1963 and 1958

Product code	Product	Value of shipments including interplant transfers (\$1,000)	
		1963	1958
36220 --	Industrial controls, total.....	594,913	447,297
	General industry devices:		
36220 12	A.c. full voltage starters 600 volts or less, excluding controls for packaged adjustable speed drives and synchronous motor starters.....	80,593	75,367
36220 13	A.c. contactors, 600 volts or less, excluding controls for packaged adjustable speed drives and synchronous motor yield control.....	16,480	
36220 14	A.c. reduced voltage controls, 600 volts or less.....	21,036	12,528
36220 16	Motor control centers, 600 volts or less.....	50,481	35,808
36220 18	Starters and contactors for squirrel cage and wound rotor and synchronous motors, over 600 volts, air break and oil immersed.....	14,186	8,723
36220 19	D.c. general purpose controls.....	7,009	7,082
36220 41	Resistance welding controls, electronic and magnetic.....	8,169	3,048
36220 42	Pilot circuit devices, such as limit switches, interval timers, etc. (excluding relays).....	55,845	41,405
36220 44	Pushbuttons and pushbutton stations (excluding operators' desks and stations).....	27,949	
36220 81	Rheostats and resistors (except for electronic applications), sold separately <sup>1</sup> .....	8,538	17,279
36220 98	All other general industry devices (including brakes and low voltage synchronous motor starters).....	48,001	<sup>2</sup> 85,722
	Specific application controllers, including all systems:		
36220 45	Marine and Navy auxiliary controls and accessories.....	17,079	28,697
	Controls, constant and adjustable voltage, including all operators' desks and stations, for:		
36220 47	Metal mills.....	29,835	( <sup>2</sup> )
36220 48	Cranes and hoists.....	12,386	( <sup>2</sup> )
36220 49	Metal mill, crane, and hoist accessories, sold separately.....	2,388	( <sup>2</sup> )
36220 51	Electronic industrial controls, other than resistance welding controls, including automatic control equipment.....	35,129	40,021
36220 72	Engineered a.c. and d.c. control assemblies, including those for machine tool applications.....	38,158	28,569
36220 73	Other specific special purpose controllers, such as nonmetal mill and air-conditioning; specially engineered control assemblies; and all other controllers, whether magnetic or static.....	47,248	
36220 96	Controls for packaged adjustable speed drives, including electronic and nonelectronic and operators' desks and stations.....	26,710	( <sup>2</sup> )
36220 99	Renewal parts for industrial control equipment.....	47,693	17,279

Source: Current Industrial Reports Series MA-36A, "Switchgear, Switchboard Apparatus, and Industrial Controls."

<sup>1</sup>In 1963, quantity reported totaled 89,474.

<sup>2</sup>Combined with code 3622098, "All other general industry devices (including brakes and low voltage synchronous motor starters) in 1958.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

**TABLE 6D. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958**

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>Represents (a) total cost of materials for small establishments reporting on "Short forms" where separate figures for individual materials consumed were not requested and (b) total cost of materials reported for those establishments which failed to report costs of individual materials on "standard forms."

<sup>2</sup>An indeterminate amount of materials other than industrial electrical control equipment are included.

<sup>3</sup>Comparable data for 1958 not available.

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than 500 horsepower. n.e.c. Not elsewhere classified.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)

Shipping department, including packing and crating.	1	1	-	-	(D)	(D)	-	-
All other operations such as maintenance, warehousing, etc.....	2	1	1	-	(D)	(D)	(D)	-

Note: Very small establishments were not requested to report their metalworking operations and, in some instances, a few larger establishments failed to report. The significance of this undercoverage is shown in terms of production-worker employment on the last line of the table below:

Item	INDUSTRY							
	3611	3612	3613	3621	3622	3623	3624	3629
Total number of establishments in the industry.....	560	177	400	384	339	149	53	231
Number of establishments which reported one or more of the specified operations.....	200	82	213	222	189	68	26	80
Percent of industry production workers in these establishments.....	85-90	80-85	85-90	95-100	60-65	75-80	75-80	60-65
Number of establishments which reported "none" of the operations apply.....	28	27	39	24	36	21	16	40
Percent of industry production workers in these establishments.....	0-5	0-5	0-5	0-5	0-5	10-15	20-25	20-25
Percent of industry production workers in establishments which completed the metalworking operations inquiry.....	85-90	85-90	90-95	95-100	60-65	85-90	95-100	85-90

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

<sup>1</sup>These size groups are based on the number of employees engaged in each specific operation. They are not based on total employment in the establishment.

## HOUSEHOLD APPLIANCES

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3631—Household Cooking Equipment
- 3632—Household Refrigerators and Home and Farm Freezers
- 3633—Household Laundry Equipment
- 3634—Electric Housewares and Fans
- 3635—Household Vacuum Cleaners
- 3636—Sewing Machines
- 3639—Household Appliances, Not Elsewhere Classified

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### 3631—HOUSEHOLD COOKING EQUIPMENT

This industry comprises establishments primarily engaged in manufacturing household cooking equipment, such as stoves, ranges and ovens. Establishments primarily engaged in manufacturing household cooking appliances, such as hot plates, grills, percolators, and toasters are classified in industry 3634. Establishments primarily engaged in manufacturing commercial cooking equipment are classified in industry 3589. For a detailed list of products of industry 3631, refer to table 6A, product codes 3631111 to 3631298.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Household Cooking Equipment Industry totaled \$473 million. This amount included shipments of household cooking equipment (primary products) valued at \$384 million, shipments of other products (secondary products) valued at \$60 million, and miscellaneous receipts (mainly products bought and resold) at \$30 million.

This industry's shipments of household cooking equipment represented 87 percent of its total product shipments. The industry specialization ratio in 1958 was 88 percent.

Secondary products shipped by this industry in 1963 include other household appliances and parts (\$6 million), and domestic heating stoves (except electric) (\$5 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into subindustries represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 62 percent of the total industry shipments are represented by plants specializing in household ovens and ranges, equipment and parts, except electric; and 38 percent in electric household ranges and ovens.

Shipments of household cooking equipment by this industry represented 72 percent of all shipments of these products (\$537 million) by all industries. In 1958 the coverage ratio was also 72 percent. Other industries shipping household cooking equipment include industry 3433, Heating Equipment, Except Electric, \$10 million; and industry 3633, Household Laundry Equipment, over \$4 million.

The production index for the primary products of the industry increased to 114 in 1963 from the 1958 level of 90. The unit value index for 1963 was 104 compared to 107 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3632—HOUSEHOLD REFRIGERATORS AND HOME AND FARM FREEZERS

This industry comprises establishments primarily engaged in manufacturing household refrigerators and home and farm freezers. Establishments primarily engaged in manufacturing commercial and industrial refrigeration equipment, packaged room coolers, and dehumidifiers are classified in industry 3585. For a detailed list of products of industry 3632, refer to table 6A, product codes 3632111 to 3632229.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Household Refrigerators Industry totaled \$1,307 million. This amount included shipments of household refrigerators and freezers (primary products) valued at \$831 million, shipments of other products (secondary products) valued at \$432 million, and miscellaneous receipts (mainly products bought and resold) at \$44 million.

This industry's shipments of household refrigerators represented 66 percent of its total product shipments. The industry specialization ratio in 1958 was 74 percent. Secondary products shipped by this industry in 1963 include heat transfer equipment (\$148 million), and compressors and compressor units, all refrigerants (\$54 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 93 percent of the total industry shipments are represented by plants specializing in household refrigerators; and 7 percent in home and farm freezers.

Shipments of household refrigerators by this industry represented 99 percent of all shipments of these products (\$832 million) by all industries. In 1958 the coverage ratio was 98 percent.

The production index for the primary products of the industry increased to 156 in 1963 from the 1958 level of 112. The unit value index for 1963 was 72 compared to 87 in 1958. Both indexes were computed on a basis of 1954 = 100.

### 3633—HOUSEHOLD LAUNDRY EQUIPMENT

This industry comprises establishments primarily engaged in manufacturing laundry equipment such as washing machines, wringers, driers, and ironers for household use. Establishments primarily engaged in manufacturing commercial laundry equipment are classified in industry 3582. Although the SIC classifies coin-operated washing machines in industry 3582, data for these machines are included in the 1963 Census of Manufactures in industry 3633 as in 1958. For a detailed list of products of industry 3633, refer to table 6A, product codes 3633131 to 3633298.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Household Laundry Equipment Industry totaled \$760 million. This amount included shipments of household laundry equipment (primary products) valued at \$664 million, shipments of other products (secondary products) valued at \$79 million, and miscellaneous receipts (mainly products bought and resold) at \$17 million.

This industry's shipments of household laundry equipment represented 89 percent of its total product shipments. The industry specialization ratio in 1958 was 91 percent. Secondary products shipped by this industry in 1963 consisted mainly of commercial laundry, dry cleaning, and pressing machinery and equipment (\$7 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into subindustries represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 97 percent of the total industry shipments are represented by plants specializing in household mechanical washing machines, dryers, and washer-dryer combinations; and 3 percent in other household laundry equipment and parts.

Shipments of household laundry equipment by this industry represented 87 percent of all shipments of these products (\$766 million) by all industries. In 1958 the coverage ratio was 91 percent. Other industries shipping household laundry equipment include industry 3632, Household Refrigerators, over \$50 million.

The production index for the primary products of the industry increased to 134 in 1963 from the 1958 level of 117. The unit value index for 1963 was 96 compared to 103 in 1958. Both indexes were computed on a basis of 1954 = 100.

### 3634—ELECTRIC HOUSEWARES AND FANS

This industry comprises establishments primarily engaged in manufacturing electric housewares for heating, cooking, and other purposes; and electric fans. Important products of this industry include electric air heaters, bed covering, blenders, broilers, deep fat fryers, flat irons, food mixers, hot plates, percolators and coffee makers, roasters, toasters, desk and bracket fans, and hassock or floor fans. For a detailed list of products of industry 3634, refer to table 6A, product codes 3634111 to 3634431.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Electric Housewares and Fans Industry totaled \$850 million. This amount included shipments of electric housewares and fans (primary products) valued at \$658 million, shipments of other products (secondary products) valued at \$101 million, and miscellaneous receipts (mainly products bought and resold) at \$91 million.

This industry's shipments of electric housewares and fans represented 87 percent of its total product shipments. The industry specialization ratio in 1958 was 86 percent.

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into subindustries represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 24 percent of the total industry shipments are represented by plants specializing in electric fans, except industrial type; and 74 percent in other small household electric appliances except parts and electric razors.

Shipments of electric housewares and fans by this industry represented 81 percent of all shipments of these products (\$810 million) by all industries. In 1958 the coverage ratio was 82 percent. Other industries shipping electric housewares and fans include industry 3461, Metal Stampings \$31 million; and industry 3631, Household Cooking Equipment, over \$6 million.

The production index for the primary products of the industry increased to 189 in 1963 from the 1958 level of 108. The unit value index for 1963 was 86 compared to 101 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3635—HOUSEHOLD VACUUM CLEANERS

This industry comprises establishments primarily engaged in manufacturing vacuum cleaners for household use. Establishments primarily engaged in manufacturing vacuum cleaners for industrial use are classified in industry 3584. For a detailed list of products of industry 3635, refer to table 6A, product codes 3635011 to 3635071.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Household Vacuum Cleaners Industry totaled \$175 million. This amount included shipments of household vacuum cleaners (primary products) valued at \$146 million, shipments of other products (secondary products) valued at \$23 million, and miscellaneous receipts (mainly products bought and resold) at \$6 million.

This industry's shipments of household vacuum cleaners represented 87 percent of its total product shipments. The industry specialization ratio in 1958 was 93 percent.

Shipments of household vacuum cleaners by this industry represented 80 percent of all shipments of these products (\$183 million) by all industries. In 1958 the coverage ratio was 83 percent. Other industries shipping household vacuum cleaners include industry 3639, Household Appliances, N.E.C., over \$10 million; and industry 3634, Electric Housewares and Fans, over \$2 million.

The production index for the primary products of the industry increased to 145 in 1963 from the 1958 level of 119. The unit value index for 1963 was 93 compared to 96 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3636—SEWING MACHINES

This industry comprises establishments primarily engaged in manufacturing sewing machines for domestic and industrial use. For a detailed list of products of industry 3636, refer to table 6A, product codes 3636011 to 3636081.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Sewing Machines Industry totaled \$117 million. This amount included shipments of sewing machines (primary products) valued at \$101 million.

This industry's shipments of sewing machines represented 90 to 95 percent of its total product shipments. The industry specialization ratio in 1958 was 97 percent.

Shipments of sewing machines by this industry represented 96 percent of all shipments of these products (\$105 million) by all industries. In 1958 the coverage ratio was 94 percent.

The production index for the primary products of the industry decreased to 76 in 1963 from the 1958 level of 78. The unit value index for 1963 was 128 compared to 117 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3639—HOUSEHOLD APPLIANCES NOT ELSEWHERE CLASSIFIED

This industry comprises establishments primarily engaged in manufacturing household appliances, n.e.c., such as hot water heaters, dishwashers, and food waste disposal units. For a detailed list of products of industry 3639, refer to table 6A, product codes 3639111 to 3639391.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Household Appliances, N.E.C., Industry totaled \$435 million. This amount included shipments of household appliances, n.e.c. (primary products) valued at \$327 million, shipments of other products (secondary products) valued at \$90 million, and miscellaneous receipts (mainly products bought and resold) at \$18 million.

This industry's shipments of household appliances, n.e.c., represented 79 percent of its total product shipments. The industry specialization ratio in 1958 was also 79 percent. Secondary products shipped by this industry in 1963 include other heating equipment (except electric) and parts for nonelectric heating equipment (\$13 million), and household vacuum cleaners, including parts and attachments, over (\$10 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into subindustries represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 48 percent of the total industry shipments are represented by plants specializing in household water heaters, except electric.

Shipments of household appliances, n.e.c., by this industry represented 79 percent of all shipments of these products (\$415 million) by all industries. In 1958 the coverage ratio was 83 percent.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product classes of industry 3639, e.g., water heaters, electric, 87 percent; water heaters, except electric, 93 percent; and other household appliances and parts, 67 percent.

The production index for the primary products of the industry increased to 195 in 1963 from the 1958 level of 140. The unit value index for 1963 was 83 compared to 95 in 1958. Both indexes were computed on a basis of 1954 = 100.

# HOUSEHOLD APPLIANCES: SIC 363

## Value Added by Manufacture by State: 1963

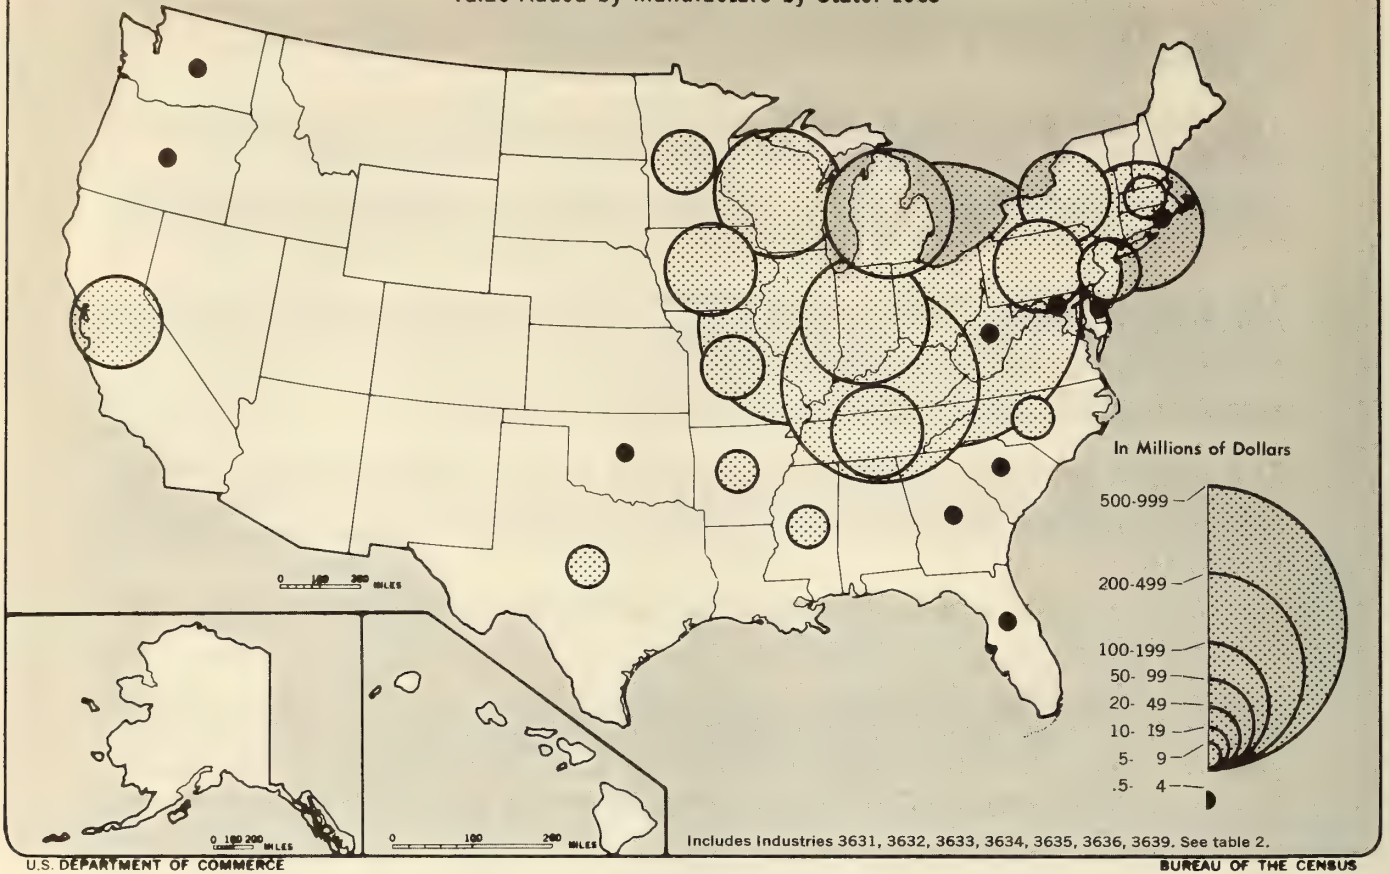

TABLE 1. General Statistics: 1963 and Earlier Years

Year	Com- panies  (number)	Establishments		All employees		Production workers			Value added by manufacture, adjusted  (\$1,000)	Cost of materials  (\$1,000)	Value of shipments  (\$1,000)	Capital expend- itures, new  (\$1,000)	Spe- cial- ization ratio (per- cent)	Cov- erage ratio (per- cent)

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: **All employees:** For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). **Production workers:** For 1947 and prior years figures represent an average of 12 monthly figures. **Value added:** Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. **Cost of materials:** Cost of materials prior to 1958 (except 1954) excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. **Value of shipments:** Value of shipments for years prior to 1958 (except 1954) excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>A revision in the definition of this industry was introduced in the 1957 Standard Industrial Classification. Accordingly, the data for 1963 and 1958 are not comparable with those for earlier years.

<sup>3</sup>A minor revision in the definition of this industry was introduced in the 1957 Standard Industrial Classification so that the industry is not strictly comparable. The 1957 and earlier figures are on the old SIC definition of the industry which included industrial vacuum cleaners and parts.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

<sup>1</sup>General statistics for some producing States have been withheld to avoid disclosing figures for individual companies. Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State.

SIC 3631, Household Cooking Equipment: New England—Massachusetts, 2 (20-99); Connecticut, 1 (100-249); Middle Atlantic—New York, 7 (1,338); East North Central—Ohio, 4 (1,000-2,499); Indiana, 1 (1-19); Michigan, 5 (1-19); Wisconsin, 2 (1,000-2,499); West North Central—Missouri, 1 (20-99); South Atlantic—District of Columbia, 1 (1-19); East South Central—Kentucky, 2 (1,000-2,499); Tennessee, 10 (3,143); Alabama, 1 (1-19); Mississippi, 1 (100-249); West South Central—Oklahoma, 3 (20-99); Texas, 3 (1-19).

SIC 3632, Household Refrigerators: New England—Massachusetts, 1 (1-19); Middle Atlantic—New York, 3 (100-249); East North Central—Ohio, 2 (10,000 and over); Indiana, 4 (5,000-9,999); Illinois, 3 (2,968); West North Central—Minnesota, 4 (2,105); Iowa, 1 (500-999); Missouri, 1 (1-19); East South Central—Kentucky, 1 (2,500-4,999); West South Central—Arkansas, 1 (1,000-2,499); Texas, 1 (100-249); Pacific—California, 2 (1-19).

SIC 3633, Household Laundry Equipment: Middle Atlantic—New York, 4 (250-499); Pennsylvania, 1 (250-499); East North Central—Ohio, 5 (6,486); Indiana, 1 (1-19); Illinois, 4 (2,882); Michigan, 6 (1,916); Wisconsin, 6 (1,000-2,499); West North Central—Minnesota, 1 (20-99); Iowa, 6 (2,599); Nebraska, 1 (1-19); East South Central—Kentucky, 1 (1,000-2,499); Pacific—Oregon, 1 (1-19); California, 2 (1-19).

SIC 3634, Electric Housewares and Fans: New England—Maine, 1 (1-19); New Hampshire, 1 (1-19); Rhode Island, 1 (1-19); Connecticut, 14 (5,130); Middle Atlantic—New Jersey, 18 (219); Pennsylvania, 9 (2,059); East North Central—Ohio, 9 (2,377); Indiana, 8 (765); Michigan, 16 (182); West North Central—Minnesota, 7 (152); Iowa, 1 (1-19); Kansas, 2 (1-19); South Atlantic—Delaware, 1 (100-249); Maryland, 2 (250-499); Virginia, 1 (20-99); West Virginia, 1 (20-99); South Carolina, 3 (458); Georgia, 2 (20-99); Florida, 5 (20-99); East South Central—Kentucky, 2 (500-999); Mississippi, 6 (1,000-2,499); West South Central—Arkansas, 3 (500-999); Louisiana, 3 (20-99); Oklahoma, 1 (1-19); Texas, 6 (359); Mountain—Colorado, 2 (1-19); Arizona, 1 (1-19); Pacific—Washington, 4 (20-99); Oregon, 3 (20-99).

SIC 3635, Household Vacuum Cleaners: New England—Connecticut, 1 (1,000-2,499); Middle Atlantic—New Jersey, 1 (1-19); Pennsylvania, 1 (20-99); East North Central—Ohio, 10 (3,155); Illinois, 3 (1,054); Michigan, 1 (1-19); Wisconsin, 1 (1-19); West North Central—Iowa, 1 (1-19); South Atlantic—Florida, 1 (1-19); West South Central—Oklahoma, 2 (20-99); Mountain—Colorado, 1 (1-19); Pacific—Oregon, 1 (20-99); California, 4 (188).

SIC 3636, Sewing Machines: New England—Maine, 2 (1-19); New Hampshire, 1 (1-19); Massachusetts, 8 (454); Connecticut, 2 (1,000-2,499); Middle Atlantic—New York, 45 (704); New Jersey, 6 (2,500-4,999); Pennsylvania, 4 (1-19); East North Central—Illinois, 5 (1,201); Michigan, 1 (1-19); West North Central—Minnesota, 2 (20-99); South Atlantic—Maryland, 1 (20-99); North Carolina, 1 (1-19); Florida, 1 (1-19); East South Central—Tennessee, 1 (1-19); Alabama, 1 (1-19); Mississippi, 1 (1-19); West South Central—Texas, 1 (1-19); Mountain—Arizona, 1 (1-19); Pacific—California, 2 (1-19).

SIC 3639, Household Appliances, N.E.C.: New England—Massachusetts, 2 (500-999); Rhode Island, 1 (100-249); Connecticut, 1 (20-99); Middle Atlantic—New Jersey, 1 (1-19); Pennsylvania, 4 (250-499); East North Central—Michigan, 5 (504); Wisconsin, 8 (855); West North Central—Iowa, 1 (20-99); Missouri, 1 (20-99); Nebraska, 1 (20-99); Kansas, 1 (1-19); South Atlantic—Maryland, 1 (100-249); Georgia, 1 (20-99); Florida, 4 (20-99); East South Central—Kentucky, 2 (1,000-2,499); Tennessee, 9 (500-999); Mississippi, 1 (1-19); West South Central—Oklahoma, 1 (20-99); Texas, 4 (284); Mountain—Colorado, 1 (1-19); Pacific—Washington, 5 (227); Oregon, 2 (20-99).

<sup>2</sup>This State or division was not shown as a separate line in table 2 in the 1958 report for this industry. A footnote to table 2 in the 1958 report showed the number of establishments and total employment (either actual or in size ranges) for such States.

Note: Detailed figures may not add to totals because of independent rounding or independent dropping of fractions of thousands rather than rounding in computer operations. See Introduction for an explanation of terms used.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>The proportion of product shipments (both primary and secondary) of the industry represented by primary products.

<sup>2</sup>The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.

<sup>3</sup>In addition respondents were requested to report total production workers for each month. This information is as follows: January, 33,689; February, 33,564; March, 34,078; April, 34,625; May, 35,652; June, 35,957; July, 34,407; August, 34,021; September, 35,766; October, 35,995; November, 37,177; December, 37,634; The average number of production workers for the year based on a 12 month average was 35,214. This average differs from that shown in this table, table 1, 2, and 8 because they are based on a four month average.

- Represents zero.

(D) Withheld to avoid disclosure. Data for this item are included in the underscored figures at the left.

n.e.c. Not elsewhere classified.

<sup>1</sup>Includes capital expenditures of approximately \$200-\$500 thousand for plants under construction but not in operation.

**TABLE 5A. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958**

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars except for ranges (shown in parentheses) which are expressed in millions of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c) miscellaneous

receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

<sup>1</sup>Product code 3631181 is included with product codes 3631153, 3631155, and 3631161 in 1958.

<sup>2</sup>See table 6A-2 for more detailed product data.

<sup>3</sup>In 1963 the value for product code 3633139 is between \$200 and \$400 thousand.

<sup>4</sup>For 1958, includes data for ironers, mechanical, including table, cabinet, and portable. The 1963 code for this product line is 3634310.

<sup>5</sup>See table 6A-3 for more detailed product data.

<sup>6</sup>Includes the value of shipments of household sewing machines.

<sup>7</sup>See table 6A-4 for product detail.

**TABLE 6A-2. Domestic Cooking Appliances (Except Electric)—Quantity and Value of Shipments: 1963 and 1958**

Product code	Product	Shipments			
		1963		1958	
		Quantity (number of units)	Value (\$1,000)	Quantity (number of units)	Value (\$1,000)
36312 pt.	DOMESTIC-COOKING APPLIANCES (EXCEPT ELECTRIC).....	(X)	219,497	(X)	196,863
	Cooking stoves and ranges:				
	Gas:				
	Standard type, free standing:				
36312 11	Over 32" cooking top and oven.....	461,696	49,146	1,546,682	146,057
36312 13	Over 24" to 32" cooking top and oven.....	747,197	79,224		
36312 15	Apartment ranges (24" cooking top and under).....	316,118	20,286		
36312 17	Standard type, for built-in installation (built-in or stack-on over-broiler unit).....	331,674	32,030	234,232	35,542
36312 19	Surface cooking tops, one or more burners (quantity in number of top units).....	324,658	14,056		
	Nonstandard types:				
36312 21	Wall hung.....	108,257	11,837		
36312 23	Slide-in or drop-in (including as one unit or drop-in cooking surface with a slide-in oven).....

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>Excludes parts and accessories for electric water heaters.

<sup>3</sup>These 4-digit totals represent the sum of 5-digit product class data obtained from census of manufactures or the Annual Survey of Manufactures and Current Industrial Reports.

<sup>4</sup>The source for these data are listed below:

Product class	Current Industrial Report
36341	M36E Electric Housewares and Fans
36342	
36343	
36392	M34N Heating and Cooking Equipment

**TABLE 6D. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958**

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>In addition, in 1963 establishments in industry 3631 produced 6,062 short tons of iron castings for incorporation into other items produced at the same establishment. The comparable figure in 1958 was 7,105 short tons.

<sup>2</sup>Represents estimates published in MC58(1)-7 (Supplement), "Selected Materials Consumed," from data collected in a supplemental survey on Form MA-131, "Consumption of Materials, Parts, Containers, and Supplies During 1958." This survey was limited to large establishments in selected chemical, machinery and equipment industries and resulted in estimates which are subject to greater error than are the figures on materials consumption collected as a regular part of the census of manufactures.

<sup>3</sup>Represents (a) total cost of materials for small establishments reporting on "short forms" where separate figures for individual materials consumed were not requested and (b) total cost of materials reported for those establishments which failed to report costs of individual materials on "standard forms."

<sup>4</sup>Includes bars and bar shapes; quantity, 9,418 short tons and value \$2,076 thousand.

<sup>5</sup>In addition, in 1963 establishments in industry 3634 produced 8,388 thousand all other fractional horsepower electric motors for incorporation into items produced at the same establishment. The comparable figure for 1958 was 5,527 thousand.

<sup>6</sup>In addition, in 1963, establishments in industry 3635 produced 2,536 thousand fractional horsepower electric motors produced and incorporated into items at the same establishment. The comparable figure for 1958 was 1,619 thousand.

Aggregate horsepower per 100 production workers.....	848	637	847	380	548	705	735

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than 500 horsepower. n.e.c. Not elsewhere classified.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)

See footnotes at end of table.

TABLE 9. Establishments, Production Workers, and Man-Hours for Selected Metalworking Operations: 1963—Continued

Metalworking operations	Number of establishments				Employment in the specified operation				Man-hours worked by production workers in the specified operation (1,000)
	Total	Number of production workers <sup>1</sup>			Total	Number of production workers <sup>1</sup>			
		1 to 4	5 to 19	20 or more		1 to 4	5 to 19	20 or more	
	INDUSTRY 3639.—HOUSEHOLD APPLIANCES, N.E.C.—Continued								
Plate or structural fabrication.....	7	2	4	1	102	(D)	(D)	(D)	207
Stamping, blanking and forming of metals.....	45	13	17	15	1,059	27	172	860	2,226
Painting, lacquering and enameling on metals.....	48	30	8	10	632	48	69	515	1,483
Plastics molding.....	5	3	1	1	(D)	(D)	(D)	(D)	(D)
Assembly of product.....	55	9	18	28	4,124	22	200	3,902	8,356
Shipping department, including packing and crating...	51	31	15	5	337	53	129	155	685
All other operations such as maintenance, warehousing, etc.....	39	14	9	16	1,324	21	112	1,191	2,795

Note: Very small establishments were not requested to report their metalworking operations and, in some instances, a few larger establishments failed to report. The significance of this undercoverage is shown in terms of production-worker employment on the last line of the table below:

Item	Industry						
	3631	3632	3633	3634	3635	3636	3639
Total number of establishments in the industry.....	83	34	39	312	34	86	112
Number of establishments which reported one or more of the specified operations	47	24	29	122	16	26	68
Percent of industry production workers in these establishments.....	80-85	90-95	95-100	80-85	90-95	85-90	80-85
Number of establishments which reported "none" of the operations apply.....	0	0	1	0	0	0	0
Percent of industry production workers in these establishments.....	0	0	0-5	0	0	0	0
Percent of industry production workers in establishments which completed the metalworking operations inquiry.....	80-85	90-95	95-100	80-85	90-95	85-90	80-85

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>These size groups are based on the number of employees engaged in each specific operation. They are not based on total employment in the establishment.

## ELECTRIC LIGHTING AND WIRING EQUIPMENT

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3641—Electric Lamps
- 3642—Lighting Fixtures
- 3643—Current Carrying Wiring Devices
- 3644—Noncurrent Carrying Wiring Devices

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1-4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### 3641—ELECTRIC LAMPS

This industry comprises establishments primarily engaged in manufacturing electric bulbs, tubes, and related light sources. Important products of this industry include incandescent filament lamps, vapor and fluorescent lamps, photoflash and photoflood lamps, electrotherapeutic lamp units for ultra-violet and infra-red radiation, and other electric light sources. Establishments primarily engaged in manufacturing glass blanks for bulbs are classified in industry 3229; and lamp components, such as supports, filaments, lead-in wires and cold cathode fluorescent lamp electrodes in industry 3699. For a detailed list of products of industry 3641, refer to table 6A, product codes 3641021 to 3641063.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Electric Lamps Industry totaled \$575 million. This amount included shipments of electric lamps (primary products) valued at \$523 million, shipments of other products (secondary products) valued at \$30 million, and miscellaneous receipts (mainly resales) at \$22 million.

This industry's shipments of electric lamps represented 95 percent of its total product shipments. The industry specialization ratio in 1958 was 94 percent. Secondary products shipped by this industry in 1963 consisted mainly of other special industry machinery and equipment, and lamp bulb components.

Shipments of electric lamps by this industry represented 96 percent of all shipments of these products (\$546 million) by all industries. In 1958 the coverage ratio was 98 percent.

The production index for the primary products of the industry increased to 153 in 1963 from the 1958 level of 116. The unit value index for 1963 was 111 compared to 110 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3642—LIGHTING FIXTURES

This industry comprises establishments primarily engaged in manufacturing lighting fixtures and equipment of any type, including electric and gas lighting fixtures; carbide, kerosene, and gasoline lamps; and metal reflectors and fittings. Establishments primarily engaged in producing glassware for lighting fixtures are classified in Major Group 32; and electric light bulbs, tubes, and related light sources in industry 3641. For a detailed list of products of industry 3642, refer to table 6A, product codes 3642110 to 3642761.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Lighting Fixtures Industry totaled \$1,159 million. This amount included shipments of lighting fixtures (primary products) valued at \$1,039 million, shipments of other products (secondary products) valued at \$84 million, and miscellaneous receipts (mainly resales), at \$36 million.

This industry's shipments of lighting fixtures represented 93 percent of its total product shipments. The industry specialization ratio in 1958 was 91 percent. Secondary products shipped by this industry in 1963 included specialty transformers and fluorescent ballasts (\$6 million) and current-carrying wiring devices (\$4 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 28 percent of the total industry shipments are represented by plants specializing in product class 36422; 15 percent each in product classes 36421 and 36427; and 14 percent in product class 36424.

Shipments of lighting fixtures by this industry represented 93 percent of all shipments of these products (\$1,116 million) by all industries. In 1958 the coverage ratio was 94 percent. Another industry shipping lighting fixtures was industry 3644, Noncurrent Carrying Wiring Devices, \$11 million.

#### 3643—CURRENT CARRYING WIRING DEVICES

This industry comprises establishments primarily engaged in manufacturing current-carrying wiring devices. Important products of this industry include attachment plugs and caps, convenience outlets, lamp sockets and receptacles, snap switches, conductor connectors, overhead trolley line material, rail bonds for both propulsion and signal circuits, lightning arrestors, and other lightning protective equipment. For a detailed list of products of industry 3643, refer to table 6A, product codes 3643001 to 3643098.

The code number for this industry in the Standard Industrial Classification Manual is unchanged, but the content of the industry has been changed from the classification system used in 1958. The change in the composition of the industry as now constituted, compared with that under the classification system followed in the 1958 census, is due to the reclassification of electronic connectors into industry 3679, Electronic Components, N.E.C. In 1958 electronic connectors were included in this industry.

Value of shipments and other receipts of the Current Carrying Devices Industry totaled \$616 million. This amount included shipments of current carrying devices (primary products) valued at \$464 million, shipments of other products (secondary products) valued at \$117 million, and miscellaneous receipts (mainly resales) at \$35 million.

This industry's shipments of current carrying devices represented 80 percent of its total product shipments. The industry specialization ratio in 1958 was 85 percent. Secondary products shipped by this industry in 1963 included other electronic components, n.e.c. (\$17 million), and appliance wire and cord (made from purchased materials) (\$13 million).

Shipments of current carrying devices by this industry represented 83 percent of all shipments of these products (\$562 million) by all industries. In 1958 the coverage ratio was 79 percent. Other industries shipping current carrying devices included industry 3644, Noncurrent Carrying Devices, \$24 million; and industry 3679, Electronic Components, N.E.C., \$11 million.

The production index for the primary products of the industry increased to 191 in 1963 from the 1958 level of 169. The unit value index for 1963 was 116 compared to 106 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3644--NONCURRENT CARRYING WIRING DEVICES

This industry comprises establishments primarily engaged in manufacturing noncurrent carrying wiring devices. Important products of this industry include conduits and fittings, electrical insulators and insulation materials, except porcelain insulators (industry 3624) and glass insulators (industry 3229); outlet, switch and fuse boxes; and pole line hardware. For a detailed list of products of industry 3644, refer to table 6A, product codes 3644111 to 3644323.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Noncurrent Carrying Devices Industry totaled \$479 million. This amount included shipments of noncurrent carrying devices (primary products) valued at \$352 million, shipments of other products (secondary products) valued at \$103 million, and miscellaneous receipts (mainly resales) at \$24 million.

This industry's shipments of noncurrent carrying devices represented 77 percent of its total product shipments. The industry specialization ratio in 1958 was 78 percent. Secondary products shipped by this industry in 1963 included current carrying devices (\$24 million) and outdoor lighting equipment (\$11 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 50 percent of the total industry shipments are represented by plants specializing in product class 36442.

Shipments of noncurrent carrying devices by this industry represented 80 percent of all shipments of these products (\$439 million) by all industries. In 1958 the coverage ratio was 89 percent. Other industries shipping noncurrent carrying devices included industry 3317, Steel Pipe and Tube, \$10 million; industry 3352, Aluminum Rolling and Drawing, \$12 million; and industry 3643, Current Carrying Devices, \$11 million.

The production index for the primary products of the industry increased to 186 in 1963 from the 1958 level of 107. The unit value index for 1963 was 99 compared to 112 in 1958. Both indexes were computed on a basis of 1954 = 100.

# LIGHTING AND WIRING DEVICES: SIC 364 Value Added by Manufacture by State: 1963

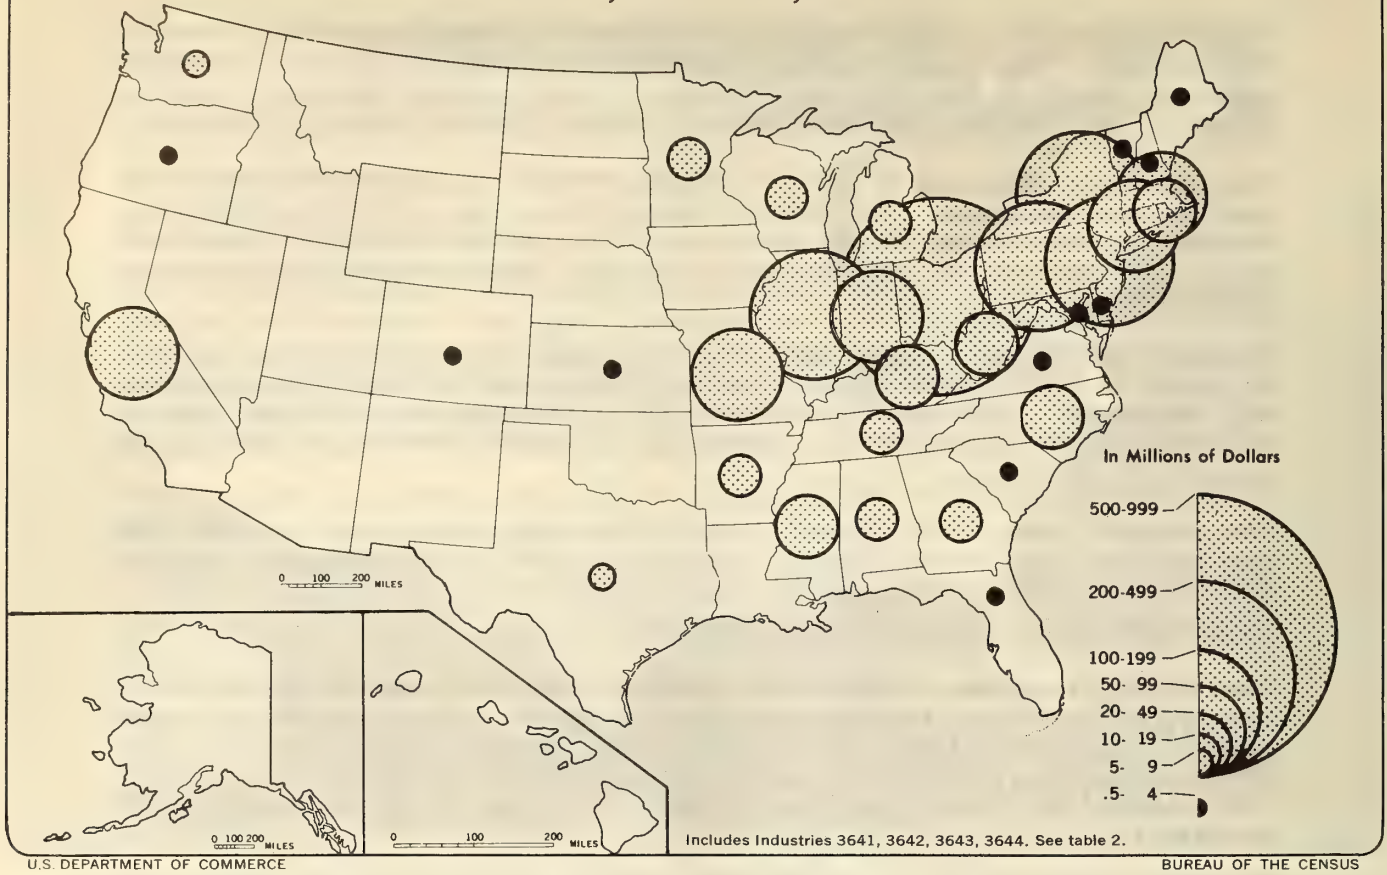

TABLE 1. General Statistics: 1963 and Earlier Years

Year	Com- panies  (number)	Establishments		All employees		Production workers			Value added by manufacture, adjusted  (\$1,000)	Cost of materials  (\$1,000)	Value of shipments  (\$1,000)	Capital expend- itures, new  (\$1,000)	Spe- cial- ization ratio (per- cent)	Cov- erage ratio (per- cent)
		Total  (number)	With 20 employ- ees or more (number)	Total  (number)	Payroll  (\$1,000)	Total  (number)	Man-hours  (1,000)	Wages  (\$1,000)

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: All employees: For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). Production workers: For 1947 and prior years figures represent an average of 12 monthly figures. Value added: Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. Cost of materials: Cost of materials prior to 1954 excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. Value of shipments: Value of shipments for years prior to 1954 excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

<sup>2</sup>Comparable data are not available for earlier years.

<sup>3</sup>Data for 1958-1960 include establishments primarily engaged in the manufacture of electronic connectors. For 1961-1963 these establishments are included in industry 3679, Electronic Components, N.E.C.

<sup>4</sup>The two industries (3643 and 3644) shown were basically a single industry in 1957 and earlier years. However, due to a revision in the Standard Industrial Classification, a net gain of 16 establishments occurred in new industry 3643. These establishments were excluded from 1958 data for "old industry," so that comparable historical data may be presented.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>General statistics for some producing States have been withheld to avoid disclosing figures for individual companies. Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State.

SIC 3641, Electric Lamps: New England—New Hampshire, 1 (100-249); Massachusetts, 5 (2,500-4,999); East North Central—Ohio, 10 (2,500-4,999); Indiana, 1 (1-19); Illinois, 6 (983); Michigan, 1 (1-19); Wisconsin, 1 (1-19); West North Central—Minnesota, 1 (1-19); Missouri, 2 (500-999); Kansas, 1 (1-19); South Atlantic—West Virginia, 1 (1,000-2,499); Florida, 1 (1-19); East South Central—Kentucky, 5 (1,366); Tennessee, 1 (500-999); Alabama, 1 (500-999); Mississippi, 1 (100-249); West South Central—Arkansas, 1 (500-999); Louisiana, 1 (1-19); Oklahoma, 1 (1-19); Mountain—Colorado, 1 (1-19); Arizona, 1 (1-19); Pacific—California, 1 (1-19).

SIC 3642, Lighting Fixtures: New England—New Hampshire, 1 (1-19); Vermont, 1 (250-499); Rhode Island, 4 (100-249); East North Central—Indiana, 12 (2,500-4,999); Wisconsin, 17 (1,000-2,499); West North Central—Iowa, 2 (1-19); Kansas, 3 (20-99); South Atlantic—Delaware, 2 (100-249); Maryland, 8 (20-99); District of Columbia, 4 (1-19); Virginia, 1 (20-99); West Virginia, 2 (250-499); North Carolina, 7 (945); South Carolina, 1 (20-99); Georgia, 9 (500-999); East South Central—Kentucky, 6 (500-999); Tennessee, 2 (20-99); Mississippi, 3 (1,000-2,499); West South Central—Arkansas, 4 (250-499); Louisiana, 4 (1-19); Oklahoma, 2 (1-19); Mountain—Colorado, 5 (133); Arizona, 3 (1-19); Utah, 2 (20-99); Pacific—Washington, 6 (529); Oregon, 6 (20-99); Hawaii, 2 (1-19).

SIC 3643, Current Carrying Devices: New England—Maine, 1 (250-499); New Hampshire, 1 (1-19); Rhode Island, 10 (2,500-4,999); East North Central—Ohio, 29 (1,000-2,499); Indiana, 18 (1397); Wisconsin, 6 (20-99); West North Central—Minnesota, 8 (245); Iowa, 2 (20-99); Kansas, 1 (20-99); South Atlantic—Maryland, 2 (20-99); District of Columbia, 1 (1-19); North Carolina, 7 (284); South Carolina, 1 (20-99); Florida, 4 (20-99); East South Central—Kentucky, 1 (20-99); West South Central—Louisiana, 1 (1-19); Oklahoma, 1 (1-19); Texas, 5 (20-99); Mountain—Wyoming, 1 (1-19); Colorado, 2 (20-99); Arizona, 2 (1-19); Pacific—Oregon, 1 (1-19).

SIC 3644, Noncurrent Carrying Devices: New England—Massachusetts, 8 (278); East North Central—Indiana, 1 (250-499); Illinois, 21 (3,695); Michigan, 7 (250-499); Wisconsin, 3 (100-249); West North Central—Minnesota, 2 (250-499); Missouri, 5 (500-999); South Atlantic—Maryland, 1 (20-99); West Virginia, 2 (500-999); Georgia, 1 (100-249); Florida, 2 (20-99); East South Central—Kentucky, 1 (20-99); Tennessee, 2 (20-99); Mississippi, 1 (1,000-2,499); West South Central—Louisiana, 1 (1-19); Texas, 6 (250-499); Mountain—Colorado, 2 (1-19); Pacific—Oregon, 2 (1-19); California, 30 (1,000-2,499).

<sup>2</sup>This State or division was not shown as a separate line in table 2 in the 1958 report for this industry. A footnote to table 2 in the 1958 report showed the number of establishments and total employment (either actual or in size ranges) for such States.

- Represents Zero.

(D) Withheld to avoid disclosure. Data for this item are included in the underscored figures at the left.

<sup>1</sup> Includes capital expenditures for plants under construction but not in operation which constitute \$1,000-2,000 thousand of the total for the size class.

**TABLE 5A. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958**

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		(\$1,000)	(\$1,000)	(\$1,000)	(\$1,000)	Col. B Col. B+C (percent)	(\$1,000)	(\$1,000)	(\$1,000)	Col. B Col. F (percent)

NOTE: See Introduction for an explanation of terms used.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>Not strictly comparable with 1963 because of the reclassification of electronic connectors. See text for further explanation.

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c)

miscellaneous receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>Includes shipments of over \$2 million by each of the following industries, but the exact values are withheld to avoid disclosing figures for individual companies: 3642, Lighting Fixtures; 3661, Telephone; Telegraph Apparatus; and 3699, Electrical Products, N.E.C.

<sup>2</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 35595, Other special industry machinery and equipment, and 36992, Lamp bulb components (except glass blanks) and electrical products.

<sup>3</sup>Includes shipments of over \$2 million by industry 3229, Pressed and Blown Glass, N.E.C. However, the exact value is withheld to avoid disclosing individual company figures.

<sup>4</sup>Includes shipments of over \$2 million by each of the following industries, but the exact values are withheld to avoid disclosing individual company figures: 3229, Pressed and Blown Glass, N.E.C., and 3644, Noncurrent Carrying Devices.

<sup>5</sup>Includes shipments of over \$2 million by industry 3717, Motor Vehicles and Parts. However, the exact value is withheld to avoid disclosing individual company figures.

<sup>6</sup>Includes shipments of \$11,461 thousand by industry 3644, Noncurrent Carrying Devices. In addition, includes shipments of over \$2 million by industry 3441, Fabricated Structural Steel. However, the exact value is withheld to avoid disclosing individual company figures.

<sup>7</sup>Includes shipments of \$2,651 thousand by industry 3692, Primary Batteries, Dry and Wet. In addition, includes shipments of over \$2 million by industry 3433, Heating Equipment, Except Electric. However, the exact value is withheld to avoid disclosing individual company figures.

<sup>8</sup>Includes shipments of over \$2 million for each of the following product classes, the exact values of which are withheld to avoid disclosing individual company figures: 32315, Mirrors; 24990, Fabricated metal products, n.e.c.; 36112, Test equipment for testing electrical, radio, and communication circuits and motors; 26391, Capacitors for industrial use (except for electronic applications); 36410, Electric lamps (bulbs only) including sealed beam lamps; 36920, Primary batteries, dry and wet; 37175, Parts and accessories for passenger cars, trucks, and busses, shipped to motor vehicle manufacturers.

Footnotes continued on next page.

## Footnotes for Table 5B—36C—Continued

<sup>9</sup>Includes \$5,824 thousand shipped by industry 3613, Switchgear and Switchboards; \$4,204 thousand shipped by industry 3642, Lighting Fixtures; \$24,327 thousand shipped by industry 3644, Noncurrent Carrying Devices; and \$10,615 thousand shipped by industry 3679, Electronic Components, N.E.C. In addition, the following industries each shipped \$2 million or more but are withheld to avoid disclosing individual company figures: industry 3264, Porcelain Electric Supplies; industry 3356, Rolling and Drawing, N.E.C.; industry 3544, Special Dies and Tools; industry 3612, Transformers; industry 3622, Industrial Controls; industry 3629, Electric Industrial Goods, N.E.C.; industry 3661, Telephone; Telegraph Apparatus; industry 3694, Engine Electrical Equipment; and, industry 3871, Watches and Clocks.

<sup>10</sup>Includes the following product classes each of which total \$2 million or more, but are withheld to avoid disclosing individual company figures: 34990, Fabricated metal products, n.e.c.; 36131, Switchgear, including power switchgear assemblies and other switching and interrupting devices 2,300 volts and over; 36134, Fuses and fuse equipment under 2,300 volts; 36220, General industry power circuit devices and controls; 36233, Resistance welders, components, accessories, and electrodes; 36945, Other complete electrical equipment for internal combustion engines; 36992, Lamp bulb components (except blanks) and other electrical products; and, 39120, Jewelers' findings and materials.

<sup>11</sup>Includes \$9,742 thousand shipped by industry 3317, Steel Pipe and Tube; \$12,161 thousand shipped by industry 3352, Aluminum Rolling and Drawing; \$4,182 thousand by industry 3357, Nonferrous Wire Drawing; \$5,799 thousand by industry 3613, Switchgear and Switchboards; and, \$7,083 thousand shipped by industry 3643, Current Carrying Devices. In addition, the following industries each shipped \$2 million or more, but exact values are withheld to avoid disclosing individual company figures: industry 3312, Blast Furnaces and Steel Mills, and industry 3351, Copper Rolling and Drawing.

<sup>12</sup>Includes \$4,040 thousand shipped by industry 3643, Current Carrying Devices.

<sup>13</sup>Includes the following product classes each of which total \$2 million or more but are withheld to avoid disclosing individual company figures: 30692, Rubber hose and tubing; 33126, Steel pipe and tube (produced in steel mills); 33579, Other insulated wire and cable, n.e.c.; 34231, Mechanics' hand service tools; 34522, Special industrial fasteners (nonstandard); 35616, Parts and attachments for pumps, air and gas compressors, and pumping equipment; 36131, Switchgear, including power switchgear assemblies and other switching and interrupting devices 2,300 volts and over; 36423, Industrial type electric fixtures; 36623, Intercommunication equipment (except telephone and telegraph) and electric alarm and signal systems and devices; and, 37294, Receipts and development on missile parts and components, n.e.c.

36410 63	Cold cathode fluorescent lamps for illumination and decoration, including custom built lamps, but excluding sign applications....	(X)	(X)	2,382	(X)	(X)	3,211

See footnotes at end of table.

TABLE 6A. Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued

Product code	Product	Value of shipments including interplant transfers (\$1,000)	
		1963	1958
3642- --	LIGHTING FIXTURES.....	1,116,064	765,413
36421 10	Electric lighting fixtures, residential type (except portable): As reported in the census of manufactures.....	158,799	6114,804
	As reported on Census Annual Form MA-36L.....	153,616	(X)
	Incandescent (excluding PAR lamp holders and floodlights): Interior (including bath or kitchen):		
36421 11	Ceiling or pendant.....	103,001	50,194
36421 13	Wall or bracket.....	16,512	9,358
	Outdoor:		
36421 15	Designed for attachment to house.....	17,051	} 11,929
36421 17	Not designed for attachment to house (garden, patio, walkway, or yard lights).....	7,362	
36421 61	Fluorescent.....	9,690	12,970
36421 00	Electric lighting fixtures, residential type, n.s.k.....	(X)	630,353
36422 10	Electric lighting fixtures, commercial and institutional type (except spotlights): As reported in the census of manufactures.....	299,181	7168,083
	As reported on Census Annual Form MA-36L.....	302,366	(X)
	Incandescent: Utilitarian type and ornamental type (except portable) (primarily for public buildings, banks, stores, office buildings, schools, auditoriums, churches, theaters, etc.):		
36422 11	Surface or pendant.....	27,673	20,848
36422 15	Recessed.....	24,460	18,815
36422 18	Specialized custom lighting fixtures, chandeliers, church lighting, etc. (except portable).....	9,017	} 5,262
36422 19	Other incandescent fixtures, such as interior display, portable lamps, and PAR lamp holders.....	20,552	
	Fluorescent (except portable):		
36422 51	Recessed air handling.....	19,434	} 28,895
36422 53	Recessed nonair handling.....	44,506	
36422 54	Striplights.....	33,413	} 94,263
36422 55	Luminous or louvered ceiling systems.....	11,568	
36422 57	Other (such as plastic wrap around, surface and pendant type metal or plastic louvered ceiling systems, etc.).....	109,009	
36422 61	Indoor signs, including electro-luminescence (exit, directional, etc.).....	2,734	(NA)
36423 10	Electric lighting fixtures, industrial type: As reported in the census of manufactures.....	76,134	62,393
	As reported on Census Annual Form MA-36L.....	77,864	(X)
	Incandescent:		
36423 11	General lighting (except portable).....	7,639	} 11,553
36423 15	Other industrial types (except portable) such as explosion-proof, vapor-proof, dust-tight, etc..	8,665	
36423 21	Portable.....	3,483	
	Fluorescent:		
36423 13	General lighting (except portable).....	50,646	} 40,880
36423 17	Other industrial types (except portable) such as explosion-proof, vapor-proof, dust-tight, etc..	4,735	
36423 23	Portable.....	586	
36423 14	Mercury (general lighting).....	2,110	} 9,960
36423 00	Electric lighting fixtures, industrial type, n.s.k.....	(X)	
36424 10	Vehicular lighting equipment (electric): As reported in the census of manufactures.....	157,390	105,970
	As reported on Census Annual Form MA-36L.....	157,426	(X)
	Motor vehicle lighting equipment, incandescent:		
	Spot, fog, auxiliary lighting equipment:		
36424 11	Shipments to motor vehicle manufacturers (auto, truck, bus, trailer, etc.).....	5,040	2,968
36424 15	Shipments to all other customers.....	4,175	5,338
	Other motor vehicle lighting equipment (headlight fixtures, except bulbs, parking lights, dome lights, taillights, etc.):		
36424 21	Shipments to motor vehicle manufacturers (auto, truck, bus, trailer, etc.).....	124,265	} 879,839
36424 25	Shipments to all other customers.....	8,000	
36424 29	Other vehicular lighting equipment (including fluorescent fixtures, such as aircraft, watercraft, railway, locomotive railroad car, street car, etc.).....	15,946	915,950
36424 00	Vehicular lighting equipment, n.s.k.....	(X)	1,875
36425 10	Outdoor lighting equipment (excluding lamps): As reported in the census of manufactures.....	134,764	1076,308
	As reported on Census Annual Form MA-36L.....	131,547	(X)
	Street and highway lighting luminaries:		
36425 11	Incandescent (filament and quartz iodine).....	7,456	12,410
	Mercury (including integrally-mounted ballasts):		
36425 13	Open.....	11,859	} 5,104
36425 14	Closed.....	23,586	
36425 15	All other light sources, including fluorescent.....	6,086	3,784

See footnotes at end of table.

TABLE 6A. **Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued**

Product code	Product	Value of shipments including interplant transfers (\$1,000)	
		1963	1958
3642- --	LIGHTING FIXTURES—Continued		
	Outdoor lighting equipment (excluding lamps)—Continued		
	Area and sports lighting luminaries:		
	Floodlights (excluding PAR lampholders) (including service stations floodlights, underwater, fountain, and swimming pool):		
36425 17	Incandescent, filament.....	8,897	13,245
36425 18	Incandescent, quartz iodine.....	2,692	
36425 19	Mercury (including integrally-mounted ballasts).....	8,024	
36425 21	All other light sources, including fluorescent.....	10,707	
	Post top decorative area lighting fixtures (including PAR lampholders):		
36425 23	Incandescent (filament and quartz iodine).....	1,490	9,051
36425 25	Mercury (including integrally-mounted ballasts).....	1,339	
36425 27	All other light sources (including fluorescent).....	4,481	
	Poles, standards, newels, brackets, and accessories:		
36425 39	For area and sports lighting.....	3,457	9,051
36425 41	For other outdoor lighting.....	5,191	
	Aviation ground lighting equipment (for fixed based airports):		
36425 31	Runway approach lighting.....	2,485	4,693
36425 33	Runway (except runway approach), taxiway, and ramp lighting.....	1,773	
	Poles, standards, newels, brackets, and accessories, for street and highway lighting:		
36425 35	Metal, concrete, and integral brackets.....	21,143	22,304
36425 37	Wood pole brackets.....	2,180	
	Other floodlighting and area lighting equipment:		
36425 43	Spotlights (including indoor and stage lighting equipment but excluding vehicular spotlights).....	4,544	3,852
36425 45	All other floodlighting and area lighting equipment.....	4,159	812
36425 00	Outdoor lighting equipment (excluding lamps), n.s.k.....	(X)	1,053
36426 --	Other electric and nonelectric lighting equipment (including hand portable equipment) and parts and accessories.....	84,683	68,872
	Incandescent hand portable lighting equipment, except parts:		
36426 11	Flashlights and flashlight lanterns (one to five cells).....	20,063	13,661
36426 19	Other, such as miners' lights, emergency warning lights, generator flashlights, etc.....	5,966	3,650
36426 21	Other electric lighting equipment, including electrical discharge such as mercury vapor (other than street and highway lighting equipment), sodium vapor etc. excluding signs.....	5,315	3,621
36426 31	Other incandescent electric lighting equipment including marine markers or beacons, railway and other vehicular route lighting equipment, parts and accessories such as reflectors, etc., but excluding wire devices sold separately.....	11,054	8,309
36426 71	Parts and accessories for fluorescent lighting equipment, excluding tubes, ballasts, starting switches, and lampholders, but including reflectors, etc.....	7,548	3,118
36426 75	Other fluorescent lighting equipment, complete units, including processing and technical equipment..	8,815	2,216
	Nonelectric lighting equipment, including parts:		
36426 81	Kerosene and gasoline lamps and lanterns.....	8,247	6,456
36426 85	Parts and accessories for nonelectric lighting equipment, including reflectors and fittings, incandescent mantles, etc.....	6,160	7,612
36426 89	Other nonelectric lighting fixtures and equipment, complete units, including carbide lamps of all types.....	3,264	3,454
36426 91	Ultraviolet and infrared health lamp fixtures, excluding lamp bulbs sold separately.....	1,121	1,885
36426 00	Other electric and nonelectric lighting equipment (including hand portable equipment) and parts and accessories, n.s.k.....	7,130	14,890
36427 --	Residential type electric fixtures (portable only).....	160,188	<sup>6</sup> 112,540
	Incandescent portable lamps, complete:		
	Complete with shade:		
36427 21	Floor, bridge, and torch lamps.....	36,110	25,765
36427 22	Wall lamps, including adjustable types.....	5,094	6,664
36427 23	Table lamps.....	70,688	61,275
36427 29	Other, including boudoir.....	16,004	12,715
36427 32	Lamps sold without shades, including floor, bridge, table, etc.....	5,687	2,933
36427 61	Portable lamps (desk, etc.) fluorescent.....	10,454	3,188
36427 00	Residential type electrical fixtures (portable only), n.s.k.....	16,151	( <sup>6</sup> )
36420 00	Lighting fixtures, n.s.k.....	44,925	56,443

See footnotes at end of table.

TABLE 6A. Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued

Product code	Product	Unit of measure	Total shipments including interplant transfers			
			1963		1958	
			Quantity	Value (\$1,000)	Quantity	Value (\$1,000)
3643- --	CURRENT CARRYING WIRING DEVICES.....	.....	(X)	561,845	(X)	<sup>12</sup> 448,491
	Current carrying wiring devices:					
36430 00	As reported in the census of manufactures.....	.....	(X)	561,845	(X)	514,921
	As reported on Census Annual Form MA-36K.....	.....	(X)	533,033	(X)	(X)
	Lampholders, except automotive:					
	Incandescent:					
36430 01	Brass or metal shell lampholders (excluding outlet box) all sizes.....	1,000 units...	66,876	10,975	47,751	6,672
36430 02	Outlet box lampholders.....	...do.....	11,109	3,022	14,049	4,200
36430 03	Other incandescent lampholders (including lumilane and weatherproof).....	...do.....	206,962	18,201	151,205	12,931
36430 05	Fluorescent (all types).....	...do.....	135,270	12,008	81,928	7,922
	Convenience and power outlets:					
	Flush (all types, designed for mounting in outlet boxes):					
36430 11	15 amperes and under.....	...do.....	90,909	21,620	87,660	18,088
36430 13	Over 15 amperes.....	...do.....	20,655	5,569	14,976	3,330
36430 17	Appliance and special application outlets (installed generally as a component part of an electrical appliance or piece of electrical equipment).....	...do.....	18,880	3,134	13,806	2,864
36430 14	Surface raceway outlets.....	...do.....	39,380	6,252	29,361	4,329
36430 19	Surface (except raceway) outlets, and all other outlets (including pin and sleeve, and circuit breaking types).....	...do.....				
36430 21	Attachment plug caps, connector bodies, and motor bases, adapters, and miscellaneous current taps.....	.....	(X)	26,998	(X)	34,001
	Switches (except knife, time, solenoid, and automotive):					
36430 23	Appliance and special application switches (installed generally as a component part of an electrical appliance or piece of electrical equipment--except precision snap-acting switch type).....	1,000 units...	93,497	58,170	73,558	43,155
	General purpose flush switches, except low voltage remote control (designed for mounting in outlet boxes):					
36430 25	15 amperes and under.....	...do.....	66,852	17,636	45,628	14,103
36430 27	Over 15 amperes.....	...do.....	12,021	5,411	6,025	3,008
36430 36	Precision (1/8" gap or less) snap-acting switches excluding limit switches.....	...do.....	43,556	46,083	(X)	( <sup>13</sup> )
36430 28	All other (including low voltage (remote control), surface canopy, fixture, and portable lamp switches-except knife, time, solenoid, and automotive switches).....	.....	(X)	15,053	(X)	8,855
36430 39		.....	(X)	15,053	(X)	8,855
36430 51	Fluorescent starters.....	1,000 units...	78,594	8,374	66,072	8,789
36430 71	Lighting arresters and choke coils for power transmission and distribution circuits and for railway signaling power circuits.....	.....	(X)	25,021	(X)	20,514
36430 73	Rail bonds for both propulsion and signal circuits.....	.....	(X)	1,677	(X)	3,623
36430 75	Metal contacts, precious and other.....	Billion units.	4.0	57,239	(NA)	34,201
	Wire connectors:					
36430 81	Solderless (including industrial and service).....	1,000 units...	(NA)	87,646	5,929,566	59,359
36430 85	Other (including solder lugs and splicing sleeves).....	...do.....	(NA)	44,435	176,074	57,000
36430 98	Other current carrying wiring devices, including rosettes, etc..	.....	(X)	49,733	(X)	<sup>13</sup> 60,995
36430 91	Lightning rods.....	.....	(X)	4,149	(X)	<sup>14</sup> 40,546
36430 92	Overhead trolley line material (except pole-line hardware and expansion shells and plugs for roof bolting in mines).....	.....	(X)	4,627		
3644- --	NONCURRENT CARRYING WIRING DEVICES.....	.....	(X)	439,343	(X)	341,570
	Pole-line and transmission hardware:					
36441 10	As reported in the census of manufactures.....	.....	(X)	97,901	(X)	81,178
	As reported on Census Annual Form MA-36K.....	.....	(X)	95,572	(X)	(X)
36441 01	Pole-line hardware.....	.....	(X)	74,613	(X)	69,241
36441 51	Transmission hardware high voltage porcelain products (including clamps, end fittings, strain yokes).....	.....	(X)	8,563	(X)	11,241
36441 00	Pole-line and transmission hardware, n.s.k.....	.....	(X)	(X)	(X)	696
	Electric conduit and conduit fittings:					
36442 10	As reported in the census of manufactures.....	.....	(X)	242,181	(X)	201,266
	As reported on Census Annual Form MA-36K.....	.....	(X)	241,472	(X)	(X)
	Rigid conduit (standard weight), including couplings, nipples, bends, and elbows:					
36442 21	Steel.....	Short tons...	251,265	66,328	( <sup>15</sup> )	( <sup>15</sup> )
36442 22	Other.....	...do.....	27,527	19,947	( <sup>15</sup> )	( <sup>15</sup> )
	Electrical metallic tubing (thin wall conduit), including couplings, nipples, bends, and elbows:					
36442 23	Steel.....	...do.....	157,512	42,314	(15)	(15)
36442 24	Other.....	...do.....				

See footnotes at end of table.

n.s.k. Not specified by kind.

<sup>1</sup>The total shipments of photoflash lamps for 1963 includes 148.2 million blue photoflash lamps, valued at \$11,619 thousand; the comparable 1958 figures are 85.7 million blue photoflash lamps, valued at \$7,011 thousand.

<sup>2</sup>Includes lamps for special services such as sign and display lighting; aviation; street; railway; spot and flood lighting; train and country home lighting; showcase; other items for special application; and large incandescent lamps under 15 watts and other than 100-130 volts.

<sup>3</sup>Includes lamps for use in toys, pin games, surgical, medical, and dental instruments, and for special applications.

<sup>4</sup>Includes power groove VHO, SHO lamps.

<sup>5</sup>Includes pre-heat rapid starting lamps.

<sup>6</sup>In the 1958 Census of Manufactures product class 36427 was part of product class 36421. Accordingly the 1958 value for portable residential type electrical fixtures, not specified by kind, are included in product code 3642110.

<sup>7</sup>Excludes indoor signs.

<sup>8</sup>Of this total, shipments of other motor vehicle lighting equipment (such as parking lights, dome lights, taillights, etc.) to motor vehicle manufacturers accounted for \$48,863 thousand; shipments of such equipment to all other customers for \$12,493 thousand. Shipments of headlight fixtures (exclusive of bulbs) accounted for the remaining \$18,483 thousand.

<sup>9</sup>Includes \$14,020 thousand of incandescent fixtures and \$1,930 thousand of fluorescent fixtures.

<sup>10</sup>For 1958, figures probably exclude components (sold separately) and renewal parts for outdoor lighting equipment.

<sup>11</sup>Excludes ballasts.

<sup>12</sup>Differs from previously published data. Electronic connectors valued at 66,436 thousand are now included in industry 3679, Electronic Components, N.E.C., rather than this industry.

<sup>13</sup>For 1958, figures for "Precision (1/8" gap or less) snap-acting switches" are included with "Other current carrying wiring devices," product code 3643098.

<sup>14</sup>Includes current carrying wiring devices, not specified by kind.

<sup>15</sup>For 1958, data for codes 3644221, 3644222, 2644223, and 3644224 are included with code 3644236.

**TABLE 6B. Product Classes—Indexes of Production and Unit Value for Primary Products Shipped by All Producers: 1963 and 1958**

36440	Noncurrent carrying devices, n.s.k.....	6,425	(X)	(X)	(X)	(X)	(X)	(X)	(X)

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

n.s.k. Not specified by kind.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

<sup>2</sup>For 1959-1962, product classes 36427, Portable lamps (residential: table, floor, wall, etc.) was included with product class 36421, Residential type electric fixtures, except portable. For 1947, 1954, and 1958, the comparable product class figures have been derived from the detailed product statistics.

<sup>3</sup>This product class previously included electronic connectors but has been redefined in the 1963 Census of Manufactures to exclude this product. The value of shipments including electronic connectors are as follows: 1963, \$828,235 thousand; 1962, \$768,718 thousand; 1961, \$636,748 thousand; 1960, \$622,336 thousand; 1959, \$615,715 thousand; 1958, \$514,921 thousand; 1954, \$285,163 thousand; and 1947, \$170,266 thousand.

**TABLE 6D. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958**

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

			(X)	11,718	(X)	2,607

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.s.k. Not specified by kind.

<sup>1</sup>Represent estimates published in MC58(1)-7 (Supplement) "Selected Materials Consumed" from data collected in a supplemental survey on Form MA-131 "Consumption of Materials, Parts, Containers, and Supplies During 1958." This survey was limited to large establishments in selected chemical, machinery and equipment industries and produced data which are subject to greater qualification than those collected in the census of manufacturers itself.

<sup>2</sup>Represents (a) total cost of materials for small establishments reporting on "short forms" where separate figures for individual materials consumed were not requested and (b) total cost of materials reported for those establishments which failed to report costs of individual materials on "standard forms."

<sup>3</sup>Does not include castings produced and consumed in the same establishment.

<sup>4</sup>Quantity is not available for bare wire. However, between 1,000 and 1,500 thousand pounds of insulated wire and cable were consumed by industry 3644.

<sup>5</sup>The quantities of aluminum and aluminum-base alloy castings produced for incorporation into other items produced at the same establishment cannot be published. The 1958 figure was 3,082 thousand pounds.

**TABLE 7B. Fuels and Electric Energy Consumed and Horsepower Rating of Power Equipment: 1962**

Other fuels.....do....	85	669	280	197
Electric energy:				
Purchased:				
Quantity.....million kw.-hrs..	232	355	217	174
Cost.....\$1,000..	2,770	5,220	3,439	2,596
Generated less sold.....million kw.-hrs..	-	-	-	-
Aggregate horsepower of prime movers and electric motors driven by purchased energy (December 31), total.....1,000 hp..	67	172	71	115
Prime movers, total.....do....	3	9	2	7
Driving generators.....do....	(Z)	2	1	1
Not driving generators.....do....	3	7	1	6
Electric motors, total.....do....	64	163	70	107
Driven by purchased energy.....do....	64	163	70	107
Driven by energy generated at establishment.....do....	-	-	-	-
Aggregate horsepower per 100 production workers.....	356	418	195	758

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than 500 horsepower.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)

All other operations such as maintenance, warehousing, etc.....	59	16	17	26	2,332	32	194	2,106	4,667

Note: Very small establishments were not requested to report their metalworking operations and in some instances a few larger establishments failed to report. The significance of this undercoverage is shown in terms of production worker employment on the last line of the table below.

Item	Electric lamps (SIC 3641)	Lighting fixtures (SIC 3642)	Current carrying devices (SIC 3643)	Noncurrent carrying devices (SIC 3644)
Total number of establishments in the industry.....	81	1,239	449	182
Number of establishments which reported one or more of the specified operations.....	19	433	200	129
Percent of industry production workers in these establishments.....	55-60	70-75	85-90	90-95
Number of establishments which reported "none" of the operations apply	34	162	(X)	(X)
Percent of industry production workers in these establishments.....	40-45	5-10	(X)	(X)
Percent of industry production workers in establishments which completed metalworking operations inquiry.....	95-100	80-85	85-90	90-95

(D) Withheld to avoid disclosing figures for individual companies. (X) Not applicable.

<sup>1</sup>These size groups are based on the number of employees engaged in each specific operation. They are not based on total employment in the establishment.

## COMMUNICATION EQUIPMENT, INCLUDING RADIO AND TV, AND ELECTRONIC COMPONENTS AND ACCESSORIES

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3651—Radio and Television Receiving Sets, Except Communication Types
- 3652—Phonograph Records
- 3661—Telephone and Telegraph Apparatus
- 3662—Radio and Television Transmitting, Signaling, and Detection Equipment and Apparatus
- 3671—Radio and Television Receiving Type Electron Tubes, Except Cathode Ray
- 3672—Cathode Ray Picture Tubes
- 3673—Transmitting, Industrial, and Special Purpose Electron Tubes
- 3674—Semiconductors (Solid State) and Related Devices
- 3679—Electronic Components and Accessories, Not Elsewhere Classified

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

Industries included in this report produce the bulk of electronic equipment, i.e., radios, television sets, electron tubes, etc., but also produce communications equipment other than electronic (industry 3661).

Component parts are generally included in the industry of the end product with the exception of certain general purpose components which are specifically classified elsewhere in the Standard Industrial Classification. Electronic components are frequently produced and consumed at the same location by establishments classified in this major group. Thus, there are (1) plants solely engaged in producing electronic components; (2) plants producing electronic components and assembling them into finished products; and (3) plants which assemble components produced elsewhere either in other plants of the same company or by other companies.

### 3651—RADIO AND TELEVISION RECEIVING SETS, EXCEPT COMMUNICATION TYPES

This industry comprises establishments primarily engaged in the manufacture of electronic equipment for home entertainment. This industry also includes establishments primarily engaged in manufacturing public address systems, and music distribution apparatus except records. Establishments primarily engaged in manufacturing records are classified in

industry 3652; radio and television receiving type tubes in industry 3671; and television receiving type cathode ray tubes in industry 3672. For a detailed list of products of industry 3651, refer to table 6A-2, product codes 3651101 to 3651394.

The code number for this industry in the Standard Industrial Classification Manual is unchanged, but the content of the industry has been slightly changed from the classification system used in 1958. The composition of the industry as now constituted, compared with that under the classification system followed in the 1958 census, is due principally to the reclassification of TV tuners from industry 3651 to industry 3662, Radio, TV Communications Equipment.

Value of shipments and other receipts of the Radio and TV Receiving Sets Industry totaled \$2,255 million. This amount included shipments of radio and TV receiving sets (primary products) valued at \$1,992 million, shipments of other products (secondary products) valued at \$191 million, and miscellaneous receipts (mainly resales) at \$72 million.

This industry's shipments of radio and TV receiving sets represented 91 percent of its total product shipments. The industry specialization ratio in 1958 also was 91 percent. Secondary products shipped by this industry in 1963 consisted mainly of electronic components and accessories (\$43 million), and coils, transformers, reactors, and chokes for electronic application (\$20 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into subindustries represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 62 percent of the total industry shipments are represented by plants specializing in product class 36512, Household television receivers, including television combinations; 20 percent in 36511, Household and automobile radios, and radio-phonograph combinations; and 17 percent in 36513, Recorders, audio-amplifiers, phonographs, tuners, speaker systems and other audio equipment and accessories.

Shipments of radio and TV receiving sets by this industry represented 96 percent of all shipments of these products (\$2,071 million) by all industries. In 1958 the coverage ratio was 92 percent. Other industries shipping radio and TV receiving sets consisted mainly of industry 3679, Electronic Components, N.E.C., \$14 million; and industry 3662, Radio, TV Communications Equipment, \$12 million.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product class of industry 3651, e.g., 36512, Household television receivers, including television combinations, 100 percent.

The production index for the primary products of the industry increased to 161 in 1963 from the 1958 level of 99. The unit value index for 1963 was 83 compared to 97 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3652—PHONOGRAPH RECORDS

This industry comprises establishments primarily engaged in the manufacture of phonograph records and prerecorded tape. Establishments primarily engaged in manufacturing electronic equipment for home entertainment, except records, are classified in industry 3651. For a detailed list of products of industry 3652, refer to table 6A-1, product codes 3652022 to 3652091.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Phonograph Records Industry totaled \$180 million. This amount included shipments of phonograph records and prerecorded tape (primary products) valued at \$174 million, shipments of other products (secondary products) valued at \$4 million, and miscellaneous receipts (mainly resales) at \$2 million.

This industry's shipments of phonograph records and prerecorded tape represented 99 percent of its total product shipments. The industry specialization ratio in 1958 was 97 percent.

Shipments of phonograph records and prerecorded tape by this industry in 1963 represented 97 percent of all shipments of these products (\$179 million) by all industries. In 1958 the coverage ratio was 98 percent.

The production index for the primary products of the industry increased to 221 in 1963 from the 1958 level of 178. The unit value index for 1963 was 106 compared to 101 in 1958. Both indexes were computed on a basis of 1954 = 100.

### 3661—TELEPHONE AND TELEGRAPH APPARATUS

This industry comprises establishments primarily engaged in the manufacture of wire and wireless telephone and telegraph equipment, and parts especially designed for telephone and telegraph use. For a detailed list of products of industry 3661, refer to table 6A-1, product codes 3661111 to 3661281.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Data on cost of materials and value of shipments of the Telephone; Telegraph Apparatus Industry include extensive duplication resulting from the transfer of products such as telephone and telegraph components to establishments producing complete telephone and telegraph equipment. The value of such shipments are duplicated in the total value of shipments. A corresponding duplication enters into the total cost of materials. The data shown for value added by manufacture (value of shipments less cost of materials, etc.) avoid this duplication.

Value of shipments and other receipts of the Telephone and Telegraph Apparatus Industry totaled \$1,736 million. This amount included shipments of telephone; telegraph apparatus (primary products) valued at \$1,463 million, shipments of other products (secondary products) valued at \$192 million, and miscellaneous receipts (mainly resales) at \$80 million.

This industry's shipments of telephone and telegraph apparatus represented 95 percent of its total product shipments. The industry specialization ratio in 1958 was 96 percent. The exact percentage, however, is not very meaningful due to the duplication described above. Secondary products shipped by this industry in 1963 consisted mainly of commercial, industrial, and military electronic communication equipment (except broadcast equipment and home-type intercommunication equipment), \$43 million.

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into subindustries represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 45 percent of the total industry shipments are represented by plants specializing in product class 36611, Telephone switching and switchboard equipment, and 54 percent in 36612, Other telephone and telegraph (wire) apparatus, equipment, and components.

Shipments of telephone and telegraph apparatus by this industry represented 95 percent of all shipments of these products (\$1,538 million) by all industries. In 1958 the coverage ratio was 99 percent. The exact percentages, however, are not very meaningful due to the duplication described above. Other industries shipping telephone and telegraph apparatus consisted mainly of industry 3662, Radio, TV Communications Equipment, \$20-\$50 million.

#### 3662—RADIO AND TELEVISION TRANSMITTING, SIGNALING, AND DETECTION EQUIPMENT AND APPARATUS

This industry comprises establishments primarily engaged in manufacturing (1) radio and television broadcasting equipment; (2) electric communication equipment and parts, except telephone and telegraph; (3) electronic field detection apparatus, light and heat emission operating apparatus, object detection apparatus and navigational electronic equipment, and aircraft and missile control systems; and (4) other electric and electronic communication and signaling products, not elsewhere classified. Establishments primarily engaged in manufacturing transmitting tubes are classified in industry 3673. For a detailed list of products of industry 3662, refer to table 6A-3, product codes 3662121 to 3662812.

The code number for this industry in the Standard Industrial Classification Manual is unchanged, but the content of the industry has been slightly changed from the classification system used in 1958. The composition of the industry as now constituted, compared with that under the classification system followed in the 1958 census, is due principally to the reclassification of TV tuners to industry 3662 from industry 3651, Radio and TV Receiving Sets.

During the period 1958-1963 reports received from some large establishments indicated a change from the manufacture primarily of such individual instruments as those used for indicating air speed, rate-of-climb, angle-of-yaw and similar flight characteristics, and gyroscopes which are sold separately, to primarily manufacturing complete instrumentation systems for navigation, guidance, check-out, etc. The major impact of this change has been on the classification of products and, consequently, the SIC coding of these large establishments. This change in reporting was brought to light by the initiation by the Census Bureau of detailed commodity surveys in the fields of electronic products and instrumentation. The electronic and associated products report (MA-36N) was started covering the year 1961 and the instruments series (MA-38B) was broadened for 1963 to encompass most types of instruments following an introductory report for 1961 and 1962 covering industrial process instruments and test and measuring equipment. Annual statistics from both reports are published in the Current Industrial Reports Series.

In both the 1958 Census of Manufactures and the Annual Survey of Manufactures from 1959 through 1962 the classification of systems was not sufficiently spelled out in the product inquiries of these programs, especially at the 5-digit product class level. However, with the introduction in the MA-36N and MA-38B surveys of detailed 7-digit product information which itself is used to build up to broader 5-digit product class totals, these totals, although they should be the same as those reported on Form MA-100 (Annual Survey of Manufactures), have differed. The respondents affected have identified the proportion of earlier years' output which consisted of systems rather than instruments as such, which was the manner in which the items were originally reported.

In view of the above, the annual data for 1958-1962 have been revised, as indicated with the symbol "r" in the appropriate tables. Because of the shift in recent years from instruments which are classified in industry 3811 to complete systems which are classified in industry 3662, the year-to-year changes are of dubious validity for the industries considered separately. The two industries taken in combination, however, would yield significant measures of activity in the general area.

Value of shipments and other receipts of the Radio, TV Communications Equipment Industry totaled \$7,146 million. This amount included shipments of radio and TV communications equipment (primary products) valued at \$5,512 million, shipments of other products (secondary products) valued at \$750 million, and miscellaneous receipts (mainly receipts for research and development work) at \$883 million.

This industry's shipments of radio and TV communications equipment represented 88 percent of its total product shipments. The industry specialization ratio in 1958 was 86 percent. Secondary products shipped by this industry in 1963 consisted mainly of aircraft, flight, nautical and navigational instruments, and automatic pilots (\$169 million), and other electronic components and accessories, n.e.c. (\$73 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into subindustries represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 20 percent of the total industry shipments are represented by plants specializing in product classes 36621, Commercial, industrial, and military electronic communication equipment; 32 percent in 36625, Electronic search and detection apparatus, including radar, infrared and sonar; and 21 percent in 36628, Missile-borne and space vehicle-borne navigation and guidance systems and equipment.

Shipments of radio and TV communications equipment by this industry represented 91 percent of all shipments of these products (\$6,052 million) by all industries. In 1958 the coverage ratio was 83 percent. Other industries shipping radio and TV communications equipment consisted mainly of industry 3679, Electronic Components, N.E.C., \$39 million; and industry 3661, Telephone; Telegraph Apparatus, \$43 million.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product classes of industry 3662, e.g., 36623, Inter-communication equipment and electric alarm and signal systems and devices, 76 percent; 36624, Electronic navigational aids, except missile-borne and space vehicle-borne equipment, 97 percent; 36626, Electronic military, industrial and commercial equipment, n.e.c., 82 percent; and, 36627, Space satellite-borne communication systems, 100 percent.

#### 3671—RADIO AND TELEVISION RECEIVING TYPE ELECTRON TUBES, EXCEPT CATHODE RAY

This industry comprises establishments primarily engaged in the manufacture of radio and television receiving type electron tubes, except cathode ray tubes. Establishments primarily engaged in manufacturing television receiving type cathode ray tubes are classified in industry 3672; transmitting tubes in industry 3673; X-ray tubes in industry 3693; and electronic equipment for home entertainment, except tubes in industry 3651. For a detailed list of products of industry 3671, refer to table 6A-3, product codes 3671011 to 3671015.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Electron Tubes, Receiving Type, Industry totaled \$321 million. This amount included shipments of receiving type electron tubes (primary products) valued at \$272 million, shipments of other products (secondary products) valued at \$34 million, and miscellaneous receipts (mainly resales) at \$15 million.

This industry's shipments of receiving type electron tubes represented 89 percent of its total product shipments. The industry specialization ratio in 1958 also was 89 percent. Secondary products shipped by this industry in 1963 consisted mainly of transmitting, industrial, and special purpose electron tubes (except X-ray) (\$15 million), and electronic components and accessories, n.e.c. (\$17 million).

Shipments of receiving type electron tubes by this industry in 1963 represented 95 percent of all shipments of these products (\$288 million) by all industries. In 1958 the coverage ratio was 96 percent. Other industries shipping receiving type electron tubes consisted mainly of industry 3661, Telephone; Telegraph Apparatus, and industry 3674, Semiconductors, over \$2 million each.

The product index for the primary products of the industry decreased to 91 in 1963 from the 1958 level of 104. The unit value index for 1963 was 109 compared to 113 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3672—CATHODE RAY PICTURE TUBES

This industry comprises establishments primarily engaged in manufacturing television receiving type cathode ray tubes. Establishments primarily engaged in manufacturing other radio and television receiving type electron tubes are classified in industry 3671; and transmitting tubes in industry 3673. For a detailed list of products of industry 3672, refer to table 6A-3, product codes 3672013 to 3672015.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Cathode Ray Picture Tubes Industry totaled \$269 million. This amount included shipments of cathode ray picture tubes (primary products) valued at \$224 million, and shipments of other products (secondary products) and miscellaneous receipts valued at \$45 million.

This industry's shipments of cathode ray picture tubes represented between 85-90 percent of its total product shipments. The industry specialization ratio in 1958 was 96 percent. Secondary products shipped by this industry in 1963 consisted mainly of other electronic components and accessories (\$4 million).

Shipments of cathode ray picture tubes by this industry represented 90 percent of all shipments of these products (\$249 million) by all industries. In 1958 the coverage ratio was 84 percent. Other industries shipping cathode ray picture tubes consisted mainly of industry 3651, Radio and TV Receiving Sets, industry 3673, Electron Tubes, Transmitting, and industry 3674, Semiconductors, over \$2 million each.

The production index for the primary products of the industry increased to 110 in 1963 from the 1958 level of 92. The unit value index for 1963 was 106 compared to 91 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3673—TRANSMITTING, INDUSTRIAL, AND SPECIAL PURPOSE ELECTRON TUBES

This industry comprises establishments primarily engaged in manufacturing transmitting, industrial, and special purpose electron tubes. Establishments primarily engaged in manufacturing radio and television transmitting equipment are classified in industry 3662; radio and television receiving tubes in industry 3671; television type cathode ray tubes in industry 3672; and X-ray tubes in industry 3693. For a detailed list of products of industry 3673, refer to table 6A-3, product codes 3673011 to 3673096.

The code number as well as the definition of the industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Electron Tubes, Transmitting, Industry totaled \$300 million. This amount included shipments of electron tubes, transmitting (primary products) valued at \$214 million, shipments of other products (secondary products) valued at \$53 million, and miscellaneous receipts (mainly resales) at \$33 million.

This industry's shipments of electron tubes, transmitting, represented 80 percent of its total product shipments. The industry specialization ratio in 1958 was 83 percent. Secondary products shipped by this industry in 1963 consisted mainly of other electronic components and accessories, n.e.c. (\$6 million), and electronic military, industrial, and commercial equipment, n.e.c. (\$3 million).

Shipments of electron tubes, transmitting, by this industry represented 75 percent of all shipments of these products (\$287 million) by all industries. In 1958 the coverage ratio was 81 percent. Other industries shipping electron tubes, transmitting, consisted mainly of industry 3671, Electron Tubes, Receiving Type, \$15 million; and industry 3662, Radio, TV Communications Equipment, \$12 million.

The production index for the primary products of the industry increased to 166 in 1963 from the 1958 level of 130. The unit value index for 1963 was 111 compared to 110 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3674—SEMICONDUCTORS (SOLID STATE) AND RELATED DEVICES

This industry comprises establishments primarily engaged in the manufacture of semiconductor (solid state) and related devices, such as semiconductor diodes and stacks, including rectifiers; transistors; solar cells; and light sensitive semiconductor (solid state) devices. This industry is now a separate one under the Standard Industrial Classification System. In 1958, the SIC included it as part of industry 3679. For a detailed list of products of industry 3674, refer to table 6A-3, product codes 3674013 to 3674096.

Value of shipments and other receipts of the Semiconductors Industry totaled \$688 million. This amount included shipments of solid state semiconductor devices (primary products) valued at \$575 million, shipments of other products (secondary products) valued at \$76 million, and miscellaneous receipts (mainly receipts for research and developmental work) at \$36 million.

This industry's shipments of solid state semiconductor devices represented 88 percent of its total product shipments. Secondary products shipped by this industry in 1963 consisted mainly of electronic components and accessories, n.e.c. (\$29 million) and capacitors for electronic applications (\$4 million).

Shipments of solid state semiconductor devices by this industry represented 92 percent of all shipments of these products (\$623 million) by all industries. Another industry shipping solid state semiconductor devices was industry 3679, Electronic Components, N.E.C., \$15 million.

#### 3679—ELECTRONIC COMPONENTS AND ACCESSORIES, NOT ELSEWHERE CLASSIFIED

This industry comprises establishments primarily engaged in manufacturing specialty resistors for electronic end products; solid state electronic devices and similar devices; inductors, electronic transformers and capacitors; and, other electronic components, n.e.c. Establishments primarily engaged in manufacturing resistors, inductors, and transformers for telephone and telegraph apparatus are classified in industry 3661; and electric lamps in industry 3641. For a detailed list of products of industry 3679, refer to table 6A-3, product codes 3679212 to 3679598.

The code number for this industry in the Standard Industrial Classification Manual is unchanged, but the content of the industry has been significantly changed from the classification system used in 1958. The composition of the industry as now constituted, compared with that under the classification system followed in the 1958 census, is due principally to

the setting up of separate industry 3674 for those establishments producing solid state semiconductor devices; and, the inclusion in 1963 of electronic connectors, which were previously classified in industry 3643, Current Carrying Devices.

Value of shipments and other receipts of the Electronic Components, N.E.C., Industry totaled \$2,332 million. This amount included shipments of electronic components, n.e.c. (primary products) valued at \$1,944 million, shipments of other products (secondary products) valued at \$243 million, and miscellaneous receipts (mainly resales) at \$146 million.

This industry's shipments of electronic components, n.e.c., represented 89 percent of its total product shipments. Secondary products shipped by this industry in 1963 consisted mainly of electronic military, industrial, and commercial equipment, n.e.c. (\$32 million) and optical instruments and lenses (except sighting and fire-control equipment), \$17 million.

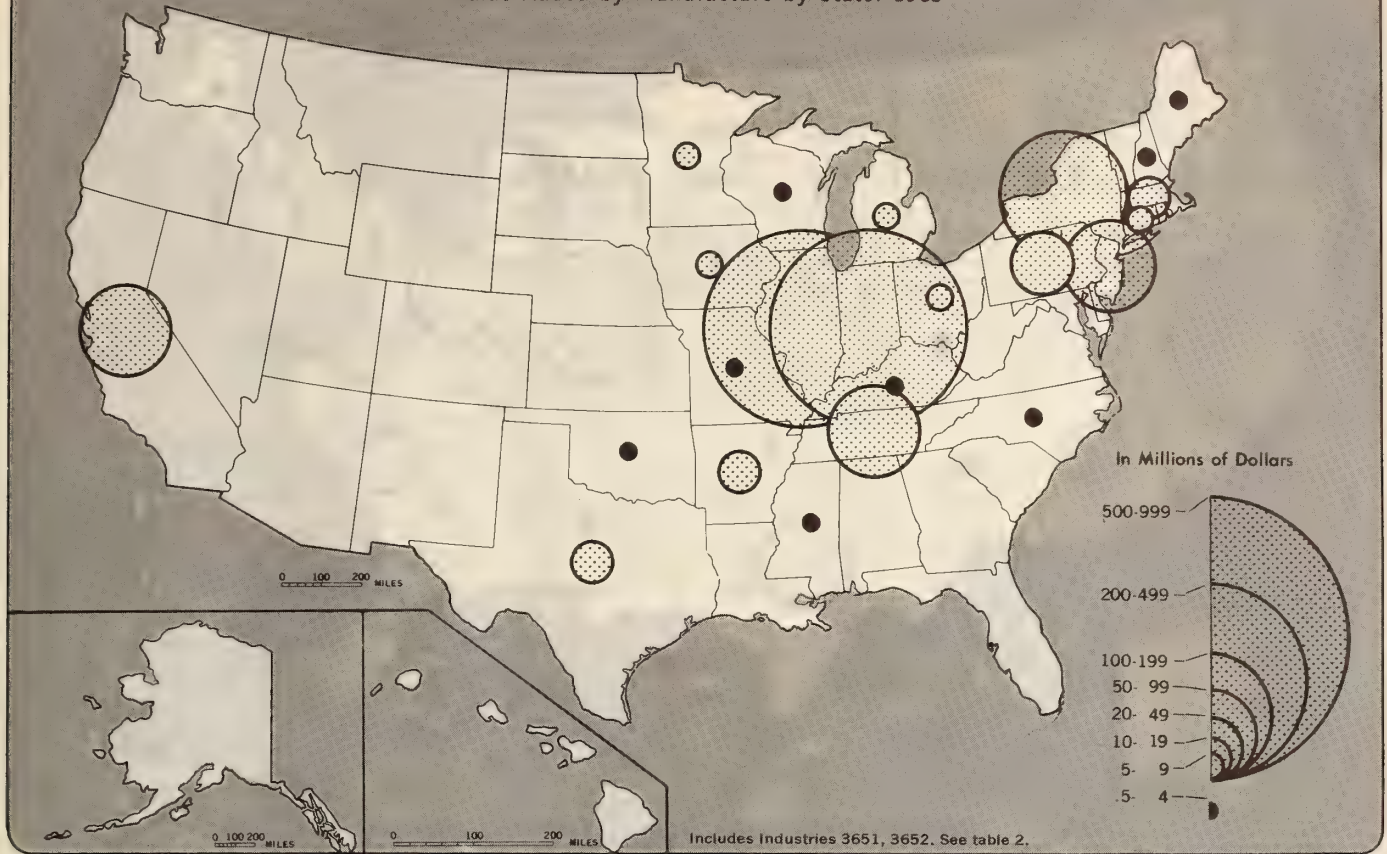

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into subindustries represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 56 percent of the total industry shipments are represented by plants specializing in product class 36795, Other electronic components and accessories.

Shipments of electronic components, n.e.c., by this industry represented 78 percent of all shipments of these products (\$2,501 million) by all industries. Other industries shipping electronic components, n.e.c., consisted mainly of industry 3571, Computing and Related Machines, \$75 million; and industry 3662, Radio, TV Communications Equipment, \$82 million.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product classes of industry 3679, e.g., 36792, Capacitors for electronic applications, 94 percent; 36793, Resistors for electronic applications, 74 percent; 36794, Coils, transformers, reactors, and chokes for electronic applications, 85 percent; and 36795, Other electronic components and accessories, n.e.c., 72 percent.

	(NA)	1,431	695	108,872	451,032	85,251	166,696	301,424	728,006	473,451	1,195,378	35,719	(NA)	(NA)

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: **All employees:** For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). **Production workers:** For 1947 and prior years figures represent an average of 12 monthly figures. **Value added:** Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. **Cost of materials:** Cost of materials prior to 1958 (except 1954) excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. **Value of shipments:** Value of shipments for years prior to 1958 (except 1954) excludes value of products bought for resale without further manufacture, processing or assembly. For 1939, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. Revised. n.e.c. Not elsewhere classified.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data. See text for explanation concerning shift from individual instruments to systems.

<sup>2</sup>A revision in the definition of this industry was introduced in the 1957 Standard Industrial Classification so that comparable data for prior years are not available. See text for explanation concerning shift from individual instruments to systems.

<sup>3</sup>Data for Alaska and Hawaii are not included for 1958 and previous years.

<sup>4</sup>The value of shipments and cost of materials for this industry include extensive duplication arising from shipments between establishments in the same industry classifications. For further explanation see text.

<sup>5</sup>For 1958 and 1963 a number of small establishments (under 20 employees) may have been misclassified in industry 3661, Telephone and Telegraph Apparatus because of insufficient product information. Although this has a significant effect on the number of establishments for this industry it has virtually no effect on any of the other statistics, i.e., number of employees, salaries and wages, value added, etc. It is estimated that the effect on these principal statistics is less than 1 percent.

<sup>6</sup>The exact figures shown, while correct to the extent that they are mathematical calculations, are not very meaningful because of extensive duplication in the value of shipments. See introductory text for this industry.

<sup>7</sup>This industry was included in industry 3679 in the 1958 Census of Manufactures. Accordingly, no estimates are available for 1959-1962, or for years prior to 1958. The figures for 1958 are based on a special tabulation.

<sup>8</sup>This industry included the semiconductor devices manufacturers (present SIC 3674) in 1958. Accordingly, no estimates are available for 1959-1962, or for years prior to 1958. The figures for 1958 are based on a special tabulation.

TABLE 2. General Statistics, by Geographic Areas: 1963 and 1958—Continued

Footnotes for Table 2-36D—Continued

- <sup>1</sup>General statistics for some producing States have been withheld to avoid disclosing figures for individual companies. Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State.
- SIC 3651, Radio and TV Receiving Sets: New England—Maine, 1 (100-249); Massachusetts, 12 (1,000-2,499); Middle Atlantic—New Jersey, 19 (4,726); Pennsylvania, 8 (3,319); East North Central—Ohio, 10 (979); Indiana, 15 (14,565); Wisconsin, 3 (299); West North Central—Minnesota, 6 (500-999); Missouri, 1 (20-99); Kansas, 3 (1-19); South Atlantic—Maryland, 1 (1-19); District of Columbia, 1 (1-19); Virginia, 1 (1-19); North Carolina, 1 (20-99); South Carolina, 1 (1-19); Georgia, 1 (20-99); Florida, 4 (1-19); East South Central—Kentucky, 3 (250-499); Tennessee, 2 (1,000-2,499); West South Central—Arkansas, 5 (1,000-2,499); Oklahoma, 2 (100-249); Texas, 10 (1,000-2,499); Mountain—Colorado, 2 (1-19); Arizona, 1 (1-19); Nevada, 1 (1-19); Pacific—Washington, 1 (1-19).
- SIC 3652, Phonograph Records: New England—New Hampshire, 1 (20-99); Massachusetts, 1 (20-99); Connecticut, 4 (500-999); Middle Atlantic—New Jersey, 26 (2,336); Pennsylvania, 11 (1,119); East North Central—Ohio, 4 (126); Indiana, 3 (2,249); Michigan, 3 (20-99); West North Central—Minnesota, 2 (20-99); South Atlantic—Maryland, 1 (1-19); Florida, 3 (20-99); East South Central—Kentucky, 1 (1-19); Tennessee, 5 (20-99); Mississippi, 1 (20-99); West South Central—Arkansas, 1 (1-19); Louisiana, 1 (1-19); Texas, 4 (20-99); Mountain—Arizona, 1 (1-19); Pacific—Hawaii, 2 (1-19).
- SIC 3661, Telephones; Telegraph Apparatus: New England—New Hampshire, 1 (20-99); Massachusetts, 5 (9,966); Connecticut, 2 (250-499); Middle Atlantic—New York, 19 (5,471); New Jersey, 8 (10,000 and over); Pennsylvania, 1 (1-19); East North Central—Ohio, 5 (6,626); Indiana, 2 (5,000-9,999); Illinois, 15 (29,213); Wisconsin, 1 (100-249); West North Central—Minnesota, 1 (100-249); Iowa, 1 (1-19); Missouri, 3 (4,022); Nebraska, 1 (2,500-4,999); South Atlantic—Maryland, 1 (2,500-4,999); Virginia, 2 (500-999); East South Central—Kentucky, 1 (1-19); Tennessee, 2 (500-999); Mississippi, 1 (250-499); West South Central—Arkansas, 1 (250-499); Oklahoma, 2 (2,500-4,999); Texas, 2 (1-19); Pacific—Oregon, 1 (20-99); California, 12 (2,823).
- SIC 3662, Radio, TV Communications Equipment: New England—Maine, 1 (1-19); Massachusetts, 83 (30,726); Rhode Island, 3 (746); Connecticut, 40 (5,000-9,999); Middle Atlantic—New York, 176 (68,204); New Jersey, 108 (10,000 and over); Pennsylvania, 61 (10,000 and over); East North Central—Ohio, 37 (8,429); Indiana, 20 (5,000-9,999); Illinois, 68 (14,350); Wisconsin, 13 (5,000-9,999); West North Central—Minnesota, 9 (5,000-9,999); Iowa, 5 (5,000-9,999); Missouri, 10 (836); South Dakota, 1 (1-19); Kansas, 3 (304); South Atlantic—Delaware, 1 (1-19); Maryland, 28 (10,000 and over); District of Columbia, 3 (20-99); West Virginia, 1 (20-99); North Carolina, 8 (9,908); South Carolina, 2 (20-99); Georgia, 4 (20-99); East South Central—Kentucky, 4 (100-249); Tennessee, 6 (2,500-4,999); Alabama, 2 (500-999); West South Central—Arkansas, 2 (100-249); Louisiana, 2 (20-99); Oklahoma, 9 (2,500-4,999); Mountain—Arizona, 7 (3,155); Utah, 3 (500-999); Nevada, 2 (100-249); Pacific—Oregon, 3 (20-99); California, 256 (94,071); Alaska, 1 (1-19).
- SIC 3671, Electron Tubes, Receiving Type: New England—Massachusetts, 5 (2,500-4,999); Middle Atlantic—New York, 6 (1,175); New Jersey, 7 (8,242); Pennsylvania, 7 (2,500-4,999); East North Central—Ohio, 2 (1,000-2,499); Indiana, 2 (1,000-2,499); Illinois, 3 (20-99); West North Central—Minnesota, 1 (1-19); Iowa, 1 (1,000-2,499); Nebraska, 1 (1-19); South Atlantic—Maryland, 1 (1-19); South Carolina, 1 (1-19); East South Central—Kentucky, 1 (2,500-4,999); Alabama, 1 (100-249); Pacific—California, 3 (20-99).
- SIC 3672, Cathode Ray Picture Tubes: New England—New Hampshire, 1 (1-19); Massachusetts, 6 (20-99); Middle Atlantic—New York, 11 (569); New Jersey, 10 (231); Pennsylvania, 11 (4,092); East North Central—Ohio, 11 (1,000-2,499); Indiana, 4 (1,000-2,499); Illinois, 14 (2,126); Michigan, 7 (20-99); West North Central—Minnesota, 4 (1-19); Iowa, 1 (1-19); Missouri, 4 (1-19); South Dakota, 1 (1-19); Nebraska, 1 (1-19); Kansas, 2 (1-19); South Atlantic—Virginia, 2 (20-99); North Carolina, 2 (1-19); Georgia, 5 (122); Florida, 4 (20-99); East South Central—Kentucky, 2 (1-19); Tennessee, 5 (1-19); Alabama, 7 (1-19); Mississippi, 2 (1-19); West South Central—Arkansas, 1 (1-19); Louisiana, 4 (20-99); Oklahoma, 2 (1-19); Texas, 5 (20-99); Mountain—Colorado, 2 (1-19); New Mexico, 1 (1-19); Arizona, 4 (1-19); Utah, 1 (1-19); Pacific—Washington, 2 (1-19); Oregon, 2 (1-19); California, 9 (125); Hawaii, 1 (1-19).
- SIC 3673, Electron Tubes, Transmitting: New England—Massachusetts, 5 (2,915); Connecticut, 3 (1,000-2,499); Middle Atlantic—Pennsylvania, 2 (250-499); South Atlantic—Virginia, 1 (100-249); Florida, 1 (500-999); East South Central—Mississippi, 1 (1-19); West South Central—Texas, 2 (100-249); Mountain—Utah, 1 (250-499).
- SIC 3674, Semiconductors: New England—Maine, 1 (500-999); New Hampshire, 1 (500-999); Rhode Island, 3 (500-999); Connecticut, 6 (1,000-2,499); East North Central—Ohio, 1 (1,000-2,499); Illinois, 7 (626); West North Central—Minnesota, 1 (20-99); South Atlantic—Florida, 1 (1-19); East South Central—Mississippi, 1 (1-19); West South Central—Texas, 2 (5,000-9,999); Mountain—Arizona, 4 (5,260).
- SIC 3679, Electronic Components, N.E.C.: New England—New Hampshire, 16 (2,500-4,999); Vermont, 4 (1,000-2,499); Rhode Island, 10 (500-999); East North Central—Indiana, 43 (7,342); West North Central—Minnesota, 34 (2,361); Iowa, 12 (1,000-2,499); Missouri, 14 (800); South Dakota, 2 (100-249); Kansas, 11 (1,000-2,499); South Atlantic—Delaware, 4 (20-99); Maryland, 24 (1,000-2,499); District of Columbia, 1 (20-99); Virginia, 13 (5,624); South Carolina, 5 (2,500-4,999); Georgia, 4 (1-19); Florida, 47 (1,475); East South Central—Kentucky, 6 (100-249); Alabama, 3 (776); Mississippi, 2 (250-499); West South Central—Arkansas, 1 (1-19); Louisiana, 2 (1-19); Oklahoma, 5 (100-249); Mountain—Idaho, 2 (20-99); New Mexico, 6 (20-99); Arizona, 11 (502); Utah, 3 (250-499); Nevada, 2 (1-19); Pacific—Washington, 7 (100-249); Oregon, 5 (20-99).

<sup>2</sup>This State or division was not shown as a separate line in table 2 in the 1958 report for this industry. A footnote to table 2 in the 1958 report showed the number of establishments and total employment (either actual or in size ranges) for such States.

Note: Detailed figures may not add to totals because of independent rounding or independent dropping of fractions of thousands rather than rounding in computer operations. See Introduction for an explanation of terms used.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>The proportion of product shipments (both primary and secondary) of the industry represented by primary products.

<sup>2</sup>The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.

TABLE 4. Selected Statistics, by Employment Size of Establishments: 1963

Item	Establishments, total	Establishments with an average of—									
		1 to 4 employees	5 to 9 employees	10 to 19 employees	20 to 49 employees	50 to 99 employees	100 to 249 employees	250 to 499 employees	500 to 999 employees	1,000 to 2,499 employees	2,500 employees and over

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

<sup>1</sup>Includes capital expenditures of \$100-\$200 thousand for plants under construction but not in operation.

<sup>2</sup>Includes capital expenditures of \$2-\$5 million for plants under construction but not in operation.

<sup>3</sup>Includes capital expenditures of \$500-\$1,000 thousand for plants under construction but not in operation.

<sup>4</sup>Includes capital expenditures of \$5-\$10 million for plants under construction but not in operation.

**TABLE 5A. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958**

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		(\$1,000)	(\$1,000)	(\$1,000)	(\$1,000)	Col. B Col. B+C (percent)	(\$1,000)	(\$1,000)	(\$1,000)	Col. B Col. F (percent)

	1958..	1,195,378	(NA)	(NA)	(NA)	(NA)	1,297,570	(NA)	(NA)	(NA)

Note: See Introduction for an explanation of terms used.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. <sup>1</sup>Revised.

<sup>1</sup>The exact percentages shown, while correct to the extent that they are mathematical calculations, are not very meaningful because of duplication in the value of shipments. See introductory text for this industry.

<sup>2</sup>For 1963, secondary products are included with miscellaneous receipts. The specialization ratio is between 85-90 percent.

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars except for ranges (shown in parentheses) which are expressed in millions of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c) miscellaneous

receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

33560	Rolled, drawn, and extruded nonferrous metal mill products (except copper and aluminum).....	(X)	(over 2)	(X)
35595	Other special industry machinery and equipment.....	(X)	(over 2)	(X)
36112	Test equipment for testing electrical, radio, and communication circuits and motors.....	(X)	(over 2)	(X)
36131	Switchgear, including power switchgear assemblies and other switching and interrupting devices 2300 volts and over.....	(X)	(over 2)	(X)
36220	General industry power circuit devices and controls.....	(X)	(5-10)	(X)
36292	Rectifying apparatus.....	(X)	(over 2)	(X)
36410	Electric lamps (bulbs only) including sealed beam lamps.....	(X)	(over 2)	(X)
36430	Current carrying wiring devices, including lightning rods.....	(X)	(over 2)	(X)
36441	Pole-line and transmission hardware.....	(X)	(over 2)	(X)
36623	Intercommunication equipment (except telephone and telegraph) and electric alarm and signal systems and devices.....	(X)	(2-5)	(X)
36710	Receiving type electron tubes, except cathode ray.....	(X)	(over 2)	(X)
36730	Transmitting, industrial and special purpose electron tubes (except X-ray).....	(X)	(2-5)	(X)
36740	Solid state semiconductor devices.....	(X)	(over 2)	(X)
36793	Resistors for electronic applications.....	(X)	(over 2)	(X)
36795	Other electronic components and accessories, n.e.c., including parts for electron tubes (except glass blanks).....	(X)	(20-50)	(X)
	Miscellaneous receipts.....	(X)	80,447	(X)
	Contract work.....	(X)	1,647	(X)
	Resales.....	(X)	33,357	(X)
	Other miscellaneous receipts.....	(X)	45,443	(X)
36612	Listing of other industries with over \$2 million shipments of each primary product class:			
	3357 Nonferrous wire drawing, etc.....	(X)	(X)	(over 2)
	3662 Radio, TV communications equipment.....	(X)	(X)	(20-50)
	3674 Semiconductors.....	(X)	(X)	(over 2)
		All industries	Radio, TV communications equipment (SIC 3662)	Other industries
RADIO, TV COMMUNICATIONS EQUIPMENT INDUSTRY				
	Total shipments and receipts of the industry.....	(X)	7,145,600	(X)
	Primary products.....	6,052,037	5,511,882	540,155
36621	Commercial industrial and military electronic communication equipment (except broadcast equipment, space satellite-borne communications equipment (complete package)).....	1,080,989	972,384	108,605
36622	Radio and television broadcast equipment, and closed circuit systems.....	150,931	133,279	17,652
36623	Intercommunication equipment (except telephone and telegraph) and electric alarm and signal systems and devices.....	165,801	125,720	40,081
36624	Electronic navigational aids (except missile-borne and space vehicle basin equipment).....	1,246,261	1,212,484	33,777
36625	Electronic search and detection apparatus, including radar, infrared and sonar.....	1,644,863	1,493,695	151,168
36626	Electronic military, industrial, and commercial equipment, n.e.c.....	723,925	595,052	128,873
36627	Space satellite-borne communication systems (complete package).....	28,709	28,709	-
36628	Missile-borne and space vehicle-borne navigation and guidance systems and equipment.....	978,597	919,014	59,583
36620	Radio, TV communications equipment, n.s.k.....	31,961	31,545	416
	Secondary products.....	(X)	750,466	(X)
19410	Sighting and fire-control equipment made from purchased lenses.....	(X)	12,997	(X)
19990	Ordnance and accessories, n.e.c.....	(X)	6,134	(X)
34460	Architectural and ornamental metal work (except curtain wall and other exterior panels).....	(X)	2,283	(X)
34990	Fabricated metal products, n.e.c.....	(X)	3,535	(X)
35595	Other special industry machinery and equipment.....	(X)	3,581	(X)

See footnotes at end of table.

TABLE 5B. **Industry-Product Analysis—Shipments by Product Class and Industry:**  
**1963—Continued**

Prod. class code	Class of products and miscellaneous receipts	All industries	Radio, TV communications equipment (SIC 3662)	Other industries
RADIO, TV COMMUNICATIONS EQUIPMENT INDUSTRY—Continued				
Secondary products—Continued				
35711	Electronic data processing machines, and associated equipment, except typewriters.....	(X)	28,158	(X)
35712	Computing and accounting machines, including cash registers.....	(X)	16,868	(X)
36112	Test equipment for testing electrical, radio, and communication circuits, and motors.....	(X)	30,760	(X)
36215	Motor generator sets and other rotating equipment.....	(X)	4,688	(X)
36220	General industry power circuit devices and controls.....	(X)	5,540	(X)
36513	Recorders, audio amplifiers, phonographs, tuners, speaker systems, and other audio equipment and accessories.....	(X)	11,716	(X)
36730	Transmitting, industrial, and special purpose electron tubes (except X-ray).....	(X)	12,462	(X)
36794	Coils, transformers, reactors and chokes for electronic applications.....	(X)	8,403	(X)
36795	Other electronic components and accessories, n.e.c., including parts for electron tubes (except glass blanks).....	(X)	73,481	(X)
36992	Lamp bulb components, (except glass blanks) and electrical products.....	(X)	4,226	(X)
37216	Other aeronautical services for aircraft.....	(X)	7,880	(X)
37291	Other aircraft parts and auxiliary equipment.....	(X)	35,012	(X)
37292	Guided missile components and subassemblies, n.e.c.....	(X)	39,315	(X)
37294	Research and development on missile parts and components, n.e.c.....	(X)	5,814	(X)
38111	Aircraft, flight, nautical, and navigational instruments and automatic pilots.....	(X)	169,361	(X)
38112	Laboratory and scientific instruments.....	(X)	5,755	(X)
38213	Industrial process instruments.....	(X)	2,129	(X)
38216	Other mechanical measuring and controlling instruments.....	(X)	4,028	(X)
38311	Optical instruments and lenses, except sighting and fire-control equipment.....	(X)	12,223	(X)
	All other secondary products.....	(X)	244,117	(X)
19251	Guided missiles, complete.....	(X)	(20-50)	(X)
19253	Research and development on guided missiles (complete).....	(X)	(10-20)	(X)
19255	All other services on complete missiles and space vehicles.....	(X)	(2-5)	(X)
33620	Copper and copper-base alloy castings.....	(X)	(over 2)	(X)
36133	Low voltage panelboards and distribution boards and switching and interrupting devices 750 volts and under.....	(X)	(5-10)	(X)
36511	Household and automobile radios, and radio-phonograph combinations.....	(X)	(over 2)	(X)
36612	Other telephone and telegraph (wire) apparatus, equipment, and components.....	(X)	(20-50)	(X)
36792	Capacitors for electronic applications.....	(X)	(2-5)	(X)
36920	Primary batteries, dry and wet.....	(X)	(over 2)	(X)
37224	Aircraft engine parts and accessories.....	(X)	(2-5)	(X)
38211	Aircraft engine instruments, except flight.....	(X)	(10-20)	(X)
38220	Automatic temperature controls.....	(X)	(2-5)	(X)
38312	Sighting and fire-control equipment made from lenses, prisms, etc., produced in the same plant.	(X)	(10-20)	(X)
38611	Still picture equipment.....	(X)	(2-5)	(X)
39312	Organs.....	(X)	(over 2)	(X)
	Miscellaneous receipts.....	(X)	883,252	(X)
	Contract work.....	(X)	20,152	(X)
	Resales.....	(X)	184,511	(X)
	Receipts for installation.....	(X)	29,083	(X)
	Receipts for research and development work.....	(X)	560,869	(X)
	Receipts for repair work.....	(X)	31,594	(X)
	Other miscellaneous receipts.....	(X)	57,043	(X)
Listings of other industries with over \$2 million shipments of each primary product class:				
36621	1929 Ammunition, n.e.c.....	(X)	(X)	(over 2)
	3357 Nonferrous wire drawing, etc.....	(X)	(X)	(over 2)
	3571 Computing and related machines.....	(X)	(X)	(over 2)
	3651 Radio and TV receiving sets.....	(X)	(X)	8,384
	3661 Telephone; telegraph apparatus.....	(X)	(X)	43,208
	3679 Electronic components, n.e.c.....	(X)	(X)	7,256
	3722 Aircraft engines and parts.....	(X)	(X)	(over 2)
	3729 Aircraft equipment, n.e.c.....	(X)	(X)	(2-5)
36622	3611 Electric measuring instruments.....	(X)	(X)	(2-5)
	3651 Radio and TV receiving sets.....	(X)	(X)	9,768
36623	3613 Switchgear and switchboards.....	(X)	(X)	(2-5)
	3634 Electric housewares and fans.....	(X)	(X)	(over 2)
	3644 Noncurrent carrying devices.....	(X)	(X)	(over 2)
	3651 Radio and TV receiving sets.....	(X)	(X)	3,744
	3661 Telephone; telegraph apparatus.....	(X)	(X)	(2-5)
	3729 Aircraft equipment, n.e.c.....	(X)	(X)	(2-5)
	3871 Watches and clocks.....	(X)	(X)	(5-10)
36624	1925 Complete guided missiles.....	(X)	(X)	(over 2)
	1941 Sighting and fire-control equipment.....	(X)	(X)	(over 2)
	3571 Computing and related machines.....	(X)	(X)	(2-5)
	3721 Aircraft.....	(X)	(X)	(over 2)
	3729 Aircraft equipment, n.e.c.....	(X)	(X)	(2-5)
	3811 Scientific instruments.....	(X)	(X)	(2-5)
	3861 Photographic equipment.....	(X)	(X)	(over 2)

See footnotes at end of table.

36793 00	Resistors for electronic applications: As reported in the census of manufactures <sup>2</sup> ..... As reported on Census Annual Form MA-36N <sup>2</sup> .....	312,583 312,386	146,788 (X)
36794 00	Coils, transformers, reactors, and chokes for electronic application: As reported in the census of manufactures <sup>2</sup> ..... As reported on Census Annual Form MA-36N <sup>2</sup> .....	<sup>6</sup> 274,443 <sup>6</sup> 259,325	<sup>6</sup> 191,984 (X)
36795 --	Other electronic components and accessories, n.e.c., including parts for electron tubes (except glass blanks).....	1,496,668	<sup>5</sup> 685,015
36795 00	Electronic components, n.e.c., except phonograph needles and cutting styli: As reported in the census of manufactures <sup>2</sup> ..... As reported on Census Annual Form MA-36N <sup>2</sup> .....	1,459,552 1,342,011	674,084 (X)
36795 47	Phonograph needles and cutting styli.....	37,116	10,931
36790 00	Electronic components and accessories, n.s.k.....	98,769	90,221

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>Figure differs from that previously published for 1958. TV tuners (\$34,721 thousand) previously classified in Industry 3651 are now included under code 3662610 in 1963.

Footnotes continued on next page

TABLE 6A-1. **Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued**

Footnotes for table 6A-1--36D--Continued

<sup>2</sup>For these products, figures were also collected in the Bureau of the Census commodity survey program. In lieu of asking for detailed statistics on these products in the census of manufactures, respondents were asked to report only value of shipments for specified groups of products for which separate figures had previously been collected in the commodity survey. In most cases, the value figures reported in the census of manufactures for each group of products agreed closely with the corresponding figures reported in the commodity survey. However, there were minor differences between the census figures and the commodity survey figures. These variations were due primarily to the following reasons:

- a. Better coverage in census of manufactures program. Coverage in the annual surveys will be supplemented by adding respondents not currently in the survey but making the specified product according to their census of manufactures report.
- b. Use of different reporting periods (calendar year vs. fiscal year).
- c. Use of estimates in reporting figures on the commodity survey, whereas census of manufactures figures generally represent more exact shipment figures.

See tables 6A-2 and 6A-3 for more detailed product data.

<sup>3</sup>Figure differs from that previously published for 1958. Phonographs and record players previously included under code 3651110 are now included under code 3651320.

<sup>4</sup>In 1963, statistics on chassis for home-type radio receivers, for sale separately, are combined with chassis for home-type television receivers, for sale separately, in order to avoid disclosing figures of individual companies.

<sup>5</sup>Includes \$66,436 thousand of connectors for electronic application which were previously classified in industry 3643, Current Carrying Devices.

<sup>6</sup>Data for 1958 for product class 36792, Capacitors for electronic applications, include \$9,449 thousand for permeability tuning devices. These tuning devices are included in product class 36794, Coils, transformers, reactors, and chokes for electronic applications in 1963.

**TABLE 6A-2. Radio Receivers and Television Sets—Quantity and Value of Shipments: 1963 and 1958**

Source: Current Industrial Reports Series M36M "Home-type Radio Receivers and Television Sets, Automobile Radios, Phonographs, and Record Player Attachments" and M36N "Selected Electronics and Associated Products."

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>Includes a negligible amount of console models.

<sup>2</sup>Other home-type electronic equipment (code 3651367) were included with music distribution systems (code 3651393) and public address systems (code 3651384) in 1958.

**TABLE 6A-3. Selected Electronic and Associated Products-Quantity and Value of Shipments: 1963 and 1958**

Product code	Product	Total shipments including interplant transfers					
		1963		1958			
		Quantity (number of units)	Value (\$1,000)	Quantity (number of units)	Value (\$1,000)		
36621 --	Commercial, industrial, and military electronic communication equipment (except broadcast equipment, space satellite-borne communications systems (complete package), home-type intercommunication equipment, and microwave and mobile telephone communication equipment), total.....	(X)	980,485	(X)	<sup>1</sup> 372,125		
	Receivers, radio communications (point-to-point) except amateur, and Citizens Radio, sold separately:						
36621 21	Very low frequency and low frequency (below 300 kc).....	(X)	173	{	(X)		
36621 23	Medium and high frequency (300 kc to 30 mc).....	(X)	23,065				
36621 24	Very high frequency and ultra high frequency -- to 890 megacycles.....	{	(X) 49,003				
36621 25	Microwave line-of-sight; microwave scatter; and microwave video relay, except studio transmitter link.....						
	Mobile receivers, except amateur and Citizens Radio, sold separately:						
36621 71	Airborne.....	{	(X)	{			
36621 73	Marine.....						
36621 75	Ground.....						
36621 91	Light communications systems and equipment, electronic (including infrared).....	(X)	3,009	{			
	Point-to-point radio communication systems such as Dew Line, White Alice, etc., (except real estate), sold as a complete package (antennae, power supplies, receivers, transmitters, multiplexing and demodulating equipment, etc.):						
36621 11	Very low frequency and low frequency (below 300 kc).....	(X)	42,346				
36621 13	Medium and high frequency (300 kc to 30 mc).....	(X)	43,667				
36621 14	Very high frequency and ultra high frequency -- to 890 megacycles.....	{	(X) 104,493				
36621 15	Microwave line-of-sight; microwave scatter; and microwave video relay, except studio-transmitter link.....						
	Transmitters and RF power amplifiers, radio communications (point-to-point), except amateur and Citizens Radio, sold separately:						
36621 31	Very low frequency and low frequency (below 300 kc).....	(X)	15,847	{			
36621 33	Medium and high frequency (300 kc to 30 mc).....	(X)	42,566				
36621 34	Very high frequency and ultra high frequency -- to 890 megacycles.....	{	(X) 47,614				
36621 35	Microwave line-of-sight; microwave scatter; and microwave video relay, except studio television link.....						
36621 43	Associated ground equipment for space satellite communications systems (including telemetering, synchronization, relay, and command and control equipment).....	(X)	26,887	{	(X)		
36621 45	Sonar communications systems and equipment.....	(X)	( <sup>2</sup> )				
36621 47	Carrier current communications systems and equipment, n.e.c.....	(X)	20,803				
	Mobile radio systems, sold as complete packages, including transceivers, base stations, power amplifiers, antennae, repeaters, transmitters, receivers, etc., except amateur and Citizens Radio:						
36621 51	Airborne.....	(X)	26,311	{			
36621 53	Marine.....	(X)	5,396				
36621 55	Ground.....	(X)	188,754				
	Mobile transceivers and transmitters, except amateur and Citizens Radio, sold separately:						
36621 61	Airborne.....	5,295	11,394	{			
36621 63	Marine.....	{	(X) 76,239				
36621 65	Ground.....						
36621 81	Portable receivers, transceivers, and transmitter-receivers, except amateur and Citizens Radio.....	27,427	16,547	{			
	Amateur radio communications equipment, fixed, mobile, and portable:						
36621 83	Transmitters and RF power amplifiers.....	(X)	2,416				
36621 85	Receivers.....	23,697	5,213				
36621 87	Other (transceivers, transmitter-receivers, etc.).....	(X)	10,931	{			
36621 89	Citizens Radio communication equipment.....	170,396	15,274				
36621 93	Electronic checkout, monitoring, evaluation, and other electronic support equipment for communications systems.....	(X)	33,937				
36621 98	Other communications equipment, sold separately.....	(X)	<sup>2</sup> 129,813				
36621 92	Communications antennae, below 890 megacycles.....	(X)	20,943	{			
36621 94	Microwave, antenna systems above 890 megacycles (horns, parabolas, etc.), exclude structural towers, sold separately.....	(X)	11,641				

See footnotes at end of table.

TABLE 6A-3. **Selected Electronic and Associated Products-Quantity and Value of Shipments: 1963 and 1958-Continued**

36622 15	Turntables.....	35,081	1,696				
36622 16	Other (power supplies, terminal equipment, etc.).....	(X)	6,610				
	Video equipment:						
36622 22	Amplifiers.....	3,887	1,202				
36622 23	Cameras (TV and TV camera chains).....	(X)	8,762				
36622 24	Control consoles and switchers.....	393	2,317				
36622 25	Film equipment (broadcast film cameras, multiplexers, projectors, etc.).....	(X)	4,732				
36622 26	Monitors.....	8,272	2,708				
36622 27	Video tape recorders.....	(X)	27,240				
36622 28	Other (power supplies, synchronization equipment, terminal equipment, etc.).....						
36622 30	Broadcasting transmitting antennae.....	(X)	831				
36622 31	Community antennae systems except structural towers, sold separately....	(X)	5,364				
	Other broadcast, studio, theatre, and commercial sound equipment, sold separately (excluding studio lighting equipment, radiating and supporting towers, and closed circuit TV and cameras):						
36622 37	Broadcast and studio sound effects equipment.....	(X)	4,045	(X)	7,485		
36622 38	Theatre sound equipment.....						
	Electronic kits to be assembled by purchaser:						
36622 92	Amateur equipment kits.....	(X)	5,525	(X)	7,485		
36622 93	Test and measuring equipment kits.....	(X)	18,561				
36622 94	Other kits.....						
36622 41	Closed circuit television systems and equipment.....	(X)	14,815	(X)	7,710		
36622 00	Radio and television broadcast equipment, and closed circuit systems, n.s.k.....	(X)	-	(X)	7,011		
Product code	Product	Value of shipments including interplant transfers (\$1,000)					
		1963		1958			
36623 --	Intercommunication equipment (except telephone and telegraph) and electric alarm systems and signal systems and devices, total.....			129,143	83,402		
36623 11	Intercommunication equipment, electronically amplified (except intercommunication equipment designed primarily for use in telephone and telegraph networks).....			69,399	26,169		
36623 42	Vehicular and pedestrian traffic signal heads, including parts and accessories.....			12,312	12,496		
36623 43	Electronic and electro-mechanical controllers, detectors, and sensors; including parts and accessories			6,026			
36623 47	Alarm systems, electronic.....			41,406	44,737		
36624 --	Electronic navigational aids, except missile-borne and space vehicle-borne equipment, total.....			1,224,230	3425,542		
36624 13	Nonmissile and space vehicle guidance equipment (ground, ship, or airborne command guidance systems, etc.).....			269,596	424,832		
36624 14	Electronic checkout, launching, and other missile and space vehicle support systems (ground, ship, and air).....			239,838			
	Navigational systems and equipment (NAV AIDS) for aircraft, ship and ground navigation (autopilots, beacons, transponders, collision warning devices, DECCA, DME, ILS, Doppler navigation systems, inertial navigational systems, optical/laser, LORAN, radio compasses and direction finders, SHORAN, TACAN, VOR, VORTAC equipment, etc.):						
36624 15	Airborne navigational systems.....			425,851			
36624 16	Surface (ship and ground) navigational systems.....			78,745			
36624 17	Underwater navigational systems.....			133,539			
36624 18	Electronic checkout, monitoring, evaluation, and other electronic support equipment for navigational systems and equipment.....			76,661			
36624 00	Electronic navigational aids, n.s.k.....			-	710		

See footnotes at end of table.

TABLE 6A-3. **Selected Electronic and Associated Products-Quantity and Value of Shipments: 1963 and 1958-Continued**

Product code	Product	Value of shipments including interplant transfers (\$1,000)	
		1963	1958
36625 --	Electronic search and detection apparatus, including radar, infrared and sonar, total.....	1,563,909	1,016,440
36625 12	Light reconnaissance and surveillance electronic systems and equipment,including electronic checkout, monitoring, evaluation, and other electronic support equipment for light reconnaissance and surveillance electronic systems (infrared, ultraviolet, and visible light).....	235,542	}
36625 25	Miscellaneous search, detection, identification, and tracking systems and equipment.....	20,162	
	Radar systems and equipment:		
	Search, detection, and acquisition radar systems and equipment (BMEWS, airborne, and other early warning radars, air traffic control radars, air defense and fighter control radars, ship radars, harbor control radars, meteorological radars, etc.):		
36625 42	Airborne and missile/space radars.....	105,938	}
36625 44	Ship (marine) radars.....	52,174	
36625 46	Ground radars.....	315,142	}
	Tracking radar systems and equipment (fire-control, bombing, bombing-navigational radars, aircraft and missile tracking radars, etc.):		
36625 62	Airborne and missile/space radars.....	58,674	}
36625 64	Ship (marine) radars.....	305,373	
36625 66	Ground radars.....		
	Instrumentation radar systems and equipment (altimeters, highway speed control radars, missile and space satellite tracking range radars, GCA and other precision approach radars, etc.):		
36625 72	Airborne and missile/space radars.....	21,075	}
36625 74	Ship (marine) radars.....		
36625 76	Ground radars.....	47,958	}
36625 82	Electronic checkout, monitoring, evaluation, and other electronic support equipment for radar systems.....	86,079	
	Sonar search, detection, and tracking systems and equipment, including ASW (depth finding, fire-control, fusing, guidance, hydrophones, mapping, sonarbuys, navigation, sonar fish finders, sonar range instrumentation, and other):		
36625 52	Surface ship applications (destroyers, destroyer escorts, etc.).....	41,564	}
36625 53	Submarine applications.....	28,387	
36625 54	Submerged fixed systems.....	15,638	}
36625 55	Airborne.....	35,052	
36625 56	Electronic checkout, monitoring, evaluation, and other electronic support equipment for sonar systems.....	35,423	44,618
36625 91	Specialized command and control data processing and display equipment sold separately from complete systems.....	159,728	}
36625 00	Electronic search and detection apparatus, including radar, infrared and sonar, n.s.k.....	-	
36626 --	Electronic military, industrial, and commercial equipment, n.e.c.....	662,984	340,749
36626 31	Telemetry equipment.....	158,351	50,367
	Amplifiers, except audio, RF power, and video, sold separately:		
36626 61	Magnetic.....	5,620	}
36626 65	Pulse.....	2,492	
36626 67	DC.....	6,002	}
36626 69	Other (differential, facsimile, etc.).....	11,199	
36626 71	Automotive equipment, electronic.....	10,598	}
36626 81	Consumer electronic equipment, n.e.c.....	74,583	
	Ultrasonic equipment:		
36626 22	Cleaners.....	2,170	}

Source: Current Industrial Reports Series M36N "Selected Electronics and Associated Products."

Standard Notes: - Represents zero. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>Data for 1958 for product class 36621, Commercial, industrial and military electronic communication equipment, includes space satellite-borne communications systems (code 3662741), collected separately in 1963.

<sup>2</sup>Figures on Sonar communications systems and equipment, are included with Other communications equipment, sold separately (3662198) in order to avoid disclosing figures of individual companies.

<sup>3</sup>Data for 1958 for product class 36624, Electronic navigational aids, except missile-borne and space vehicle-borne equipment includes missile-borne and space vehicle-borne navigations and guidance system and equipment (code 3662812), collected separately in 1963.

<sup>4</sup>Figures on "Other transistors" and "Other diodes" are included with "Other semiconductor devices" (3674095) in order to avoid disclosing figures of individual companies.

Footnotes continued on next page.

**TABLE 6A-3. Selected Electronic and Associated Products-Quantity and Value of Shipments: 1963 and 1958--Continued**

Footnotes for table 6A-3--36D--Continued

<sup>5</sup>The following figures were published in Current Industrial Reports Series M36A, Switchgear, Switchboard Apparatus, Relays, and Industrial Controls:

Product	1963 (\$1,000)
Total (Series M36A).....	\$163,733
Switchboard relays.....	39,939
Circuit relays:	
A.c. and d.c. magnetic control...	114,172
Overload relays.....	9,622

The Series M36A values, when added to the comparable values for relays for electronic applications, result in the following total for 1963: \$204,427.

<sup>6</sup>Figures on "Frequency synthesizers" and "Cryogenic cooling devices" are included with "Electronic parts, n.e.c., and specialized electronic hardware" (3679539) in order to avoid disclosing figures of individual companies.

<sup>7</sup>Figures on "Phase shifters" are included with "Circulators (electromagnetic), used as switches, modulators, etc.," to avoid disclosing figures of individual companies.

n.e.c. Not elsewhere classified.

<sup>1</sup>Not shown because comparable quantity data were not obtained for the majority of these products measured in terms of value.

<sup>2</sup>Unit value indexes based on shipments data for telephone instrument sets; production indexes derived by including in addition the values for other telephone apparatus and equipment shipped.

<sup>3</sup>Not shown pending further review of quantity and price information reported in 1963 to determine comparability with data reported for 1958 and 1954.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. Revised n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>Source: Current Industrial Reports Series M36M, Home-Type Radio Receivers and Television Sets, Automobile Radios, Phonographs and Record Players.

<sup>3</sup>For 1958-1962 product classes 36627 and 36628 were part of product classes 36621 and 36624, respectively. Refer to Current Industrial Reports Series M36N for 1961 and 1962 comparable data on these two new product classes. Separate data prior to 1961 are unavailable.

<sup>4</sup>Source: Current Industrial Reports Series M36N, Selected Electronic and Associated Products.

**TABLE 6D. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958**

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

Glass and glass products:						
322921	Tube blanks.....	Thousands.....	465	254	(NA)	(NA)
320311	Other than tube blanks.....	.....	(X)	3,282	(X)	(NA)
367951	Fabricated electron tube parts except blanks.....	(X)		1,712	(X)	(NA)
282130	Thermoplastic resins (cellulosics, polyethylenes, styrenes, etc.)..	1,000 pounds...	5,032	2,823	(NA)	(NA)
282140	Thermosetting resins (melamines, phenolics, polyesters, ureas, etc.)	...do.....	9,968	6,703	(NA)	(NA)
970099	All other materials and components, parts, containers, and supplies consumed.....	(X)		434,704	(X)	326,496
976000	Materials, parts, containers, and supplies, n.s.k.....	(X)		135,742	(X)	74,582

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind. <sup>1</sup>Revised.

<sup>1</sup>Represents (a) total cost of materials for small establishments reporting on "short forms" where separate figures for individual materials consumed were not requested and (b) total cost of materials reported for those establishments which failed to report costs of individual materials on "standard forms."

<sup>2</sup>Since industry 3674 was included as part of industry 3679 in 1958, separate statistics on materials consumed for industry 3674 in 1958 are included in the detail for industry 3679.

Aggregate horsepower per 100 production workers.....	276	354	326	645	224	313	263	219

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than 500 horsepower.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)

Footnotes on next page.

TABLE 9. Establishments, Production Workers, and Man-Hours for Selected Metalworking Operations: 1963—Continued

Footnotes for table 9-36D

Note: Very small establishments were not requested to report their metalworking operations and, in some instances, a few larger establishments failed to report. The significance of this undercoverage is shown in terms of production-worker employment on the last line of the table below:

Item	Industry							
	3651	3661	3662	3671	3672	3673	3674	3679
Total number of establishments in the industry.....	348	90	1,132	42	151	57	107	1,934
Number of establishments which reported one or more of the specified operations.....	167	54	634	23	20	41	87	779
Percent of industry production workers in these establishments.....	85-90	95-100	80-85	95-100	85-90	90-95	95-100	80-85
Number of establishments which reported "none" of the operations apply.....	15	2	68	19	16	4	20	157
Percent of industry production workers in these establishments.....	0-5	0-5	0-5	0-5	0-5	0-5	0-5	0-5
Percent of industry production workers in establishments which completed the metalworking operations inquiry.....	85-90	95-100	85-90	95-100	90-95	90-95	95-100	85-90

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

<sup>1</sup>These size groups are based on the number of employees engaged in each specific operation. They are not based on total employment in the establishment.

## MISCELLANEOUS ELECTRICAL MACHINERY, EQUIPMENT, AND SUPPLIES

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3691—Storage Batteries
- 3692—Primary Batteries, Dry and Wet
- 3693—X-Ray and Therapeutic Apparatus and Tubes
- 3694—Electrical Equipment for Internal Combustion Engines
- 3699—Electrical Machinery, Equipment, and Supplies, Not Elsewhere Classified

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### 3691—STORAGE BATTERIES

This industry comprises establishments primarily engaged in the manufacture of storage batteries for automobiles, trucks, farm tractors, and busses as well as storage batteries for farm uses, communications systems, and railroad equipment. Parts for storage batteries are also included in this industry. For a detailed list of products of industry 3691, refer to table 6A-1, product codes 3691112 to 3691298.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Storage Batteries Industry totaled \$516 million. This amount included shipments of storage batteries (primary products) valued at \$500 million, shipments of other products (secondary products) valued at \$8 million, and miscellaneous receipts (mainly resales) at \$8 million.

This industry's shipments of storage batteries represented 98 percent of its total product shipments. The industry specialization ratio in 1958 was 99 percent.

Shipments of storage batteries by this industry in 1963 represented 99 percent of all shipments of these products (\$504 million) by all industries. In 1958 the coverage ratio was 100 percent.

The production index for the primary products of the industry increased to 153 in 1963 from the 1958 level of 112. The unit value index for 1963 was 92 compared to 96 in 1958. Both indexes were computed on a basis of 1954 = 100.

### 3692—PRIMARY BATTERIES, DRY AND WET

This industry comprises establishments primarily engaged in the manufacture of dry and wet cell primary batteries for flashlights, railroad lanterns, hearing aids, portable radios, farm radios, and general purposes as well as parts and supplies for primary batteries. For a detailed list of products of industry 3692, refer to table 6A-1, product codes 3692012 to 3692095.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Primary Batteries, Dry and Wet, Industry totaled \$195 million. This amount included shipments of dry and wet primary batteries (primary products) valued at \$173 million, shipments of other products (secondary products) valued at \$8 million, and miscellaneous receipts (mainly resales) at \$14 million.

This industry's shipments of dry and wet primary batteries represented 96 percent of its total product shipments. The industry specialization ratio in 1958 was 99 percent.

Shipments of dry and wet primary batteries by this industry represented 91 percent of all shipments of these products (\$192 million) by all industries. In 1958 the coverage ratio was 98 percent.

The production index for the primary products of the industry increased to 120 in 1963 from the 1958 level of 93. The unit value index for 1963 was 135 compared to 123 in 1958. Both indexes were computed on a basis of 1954 = 100.

### 3693—X-RAY AND THERAPEUTIC APPARATUS AND TUBES

This industry comprises establishments primarily engaged in manufacturing radiographic X-ray, fluoroscopic X-ray, and therapeutic X-ray apparatus and tubes for medical, industrial, research and control applications. Establishments primarily engaged in manufacturing radio receiving type tubes are classified in industry 3671; television receiving cathode ray tubes in industry 3672; transmitting tubes in industry 3673; and electrotherapeutic lamp units for ultra-violet and infra-red radiation in industry 3641. For a detailed list of products of industry 3693, refer to table 6A-1, product codes 3693019 to 3693096.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the X-Ray Apparatus and Tubes Industry totaled \$144 million. This amount included shipments of X-ray apparatus and tubes (primary products) valued at \$87 million, shipments of other products (secondary products) valued at \$18 million, and miscellaneous receipts (mainly resales) at \$39 million.

This industry's shipments of X-ray apparatus and tubes represented 83 percent of its total product shipments. The industry specialization ratio in 1958 was 84 percent.

Shipments of X-ray apparatus and tubes by this industry represented 80 percent of all shipments of these products (\$109 million) by all industries. In 1958 the coverage ratio was 82 percent.

### 3694—ELECTRICAL EQUIPMENT FOR INTERNAL COMBUSTION ENGINES

This industry comprises establishments primarily engaged in manufacturing electrical equipment for internal combustion engines. Important products of this industry include starting motors and generators for automobiles and aircraft; and ignition apparatus for

internal combustion engines including spark plugs, magnetos, coils, and distributors. For a detailed list of products of industry 3694, refer to table 6A-1, product codes 3694111 to 3694698.

The code number for this industry in the Standard Industrial Classification Manual is unchanged, but the content of the industry has been slightly changed from the classification system used in 1958. The change in composition of the industry as now constituted, compared with that under the classification system followed in the 1958 census, is due to a revision made in the 1963 supplement to the 1957 edition of the Standard Industrial Classification, reclassifying establishments primarily manufacturing automotive wiring harness sets other than ignition from industry 3694 to industry 3714 (census industry 3717) "Automobiles and Parts."

Value of shipments and other receipts of the Engine Electrical Equipment Industry totaled \$901 million. This amount included shipments of electrical equipment for internal combustion engines (primary products) valued at \$706 million, shipments of other products (secondary products) valued at \$128 million, and miscellaneous receipts (mainly resales) at \$67 million.

This industry's shipments of engine electrical equipment represented 93 percent of its total product shipments. The industry specialization ratio in 1958 was 87 percent. Secondary products shipped by this industry in 1963 consisted mainly of parts and accessories for passenger cars, trucks, and busses shipped to motor vehicle manufacturers (\$81 million).

Shipments of electrical equipment for internal combustion engines by this industry represented 81 percent of all shipments of these products (\$874 million) by all industries. In 1958 the coverage ratio was 83 percent.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product classes of industry 3694, e.g., Cranking motors (36943), 98 percent; Components and parts for engine electrical equipment (36946), 92 percent; and Ignition harness and cable sets and spark plugs (36941 and 36944 combined), 54 percent.

The higher specialization ratio in 1963 compared with the 1958 figure primarily results from changes in the Standard Industrial Classification system as described above.

The production index for the primary products of the industry increased to 129 in 1963 from the 1958 level of 100. The unit value index for 1963 was 123 compared to 107 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3699—ELECTRICAL MACHINERY, EQUIPMENT, AND SUPPLIES, NOT ELSEWHERE CLASSIFIED

This industry comprises establishments primarily engaged in manufacturing electrical machinery, equipment, and supplies, n.e.c. For a detailed list of products of industry 3699, refer to table 6A-1, product codes 3699211 to 3699629.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Electrical Products, N.E.C., Industry totaled \$190 million. This amount included shipments of electrical machinery, equipment, and supplies, n.e.c. (primary products) valued at \$163 million, shipments of other products (secondary products) valued at \$19 million, and miscellaneous receipts (mainly resales) at \$8 million.

This industry's shipments of electrical machinery, equipment, and supplies, n.e.c., represented 90 percent of its total product shipments. The industry specialization ratio in 1958 was 91 percent. Secondary products shipped by this industry in 1963 included miscellaneous electronic components and accessories (\$3 million).

Shipments of electrical machinery, equipment, and supplies, n.e.c., by this industry represented 49 percent of all shipments of these products (\$336 million) by all industries. In 1958 the coverage ratio was 54 percent. Other industries shipping electrical machinery, equipment, and supplies, n.e.c., consisted mainly of industry 3357, Nonferrous Wire Drawing, etc., \$102 million.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product classes of industry 3699, e.g., Lamp bulb components (36992), 65 percent; and Appliance wire and cord and flexible cord sets (36996), 30 percent.

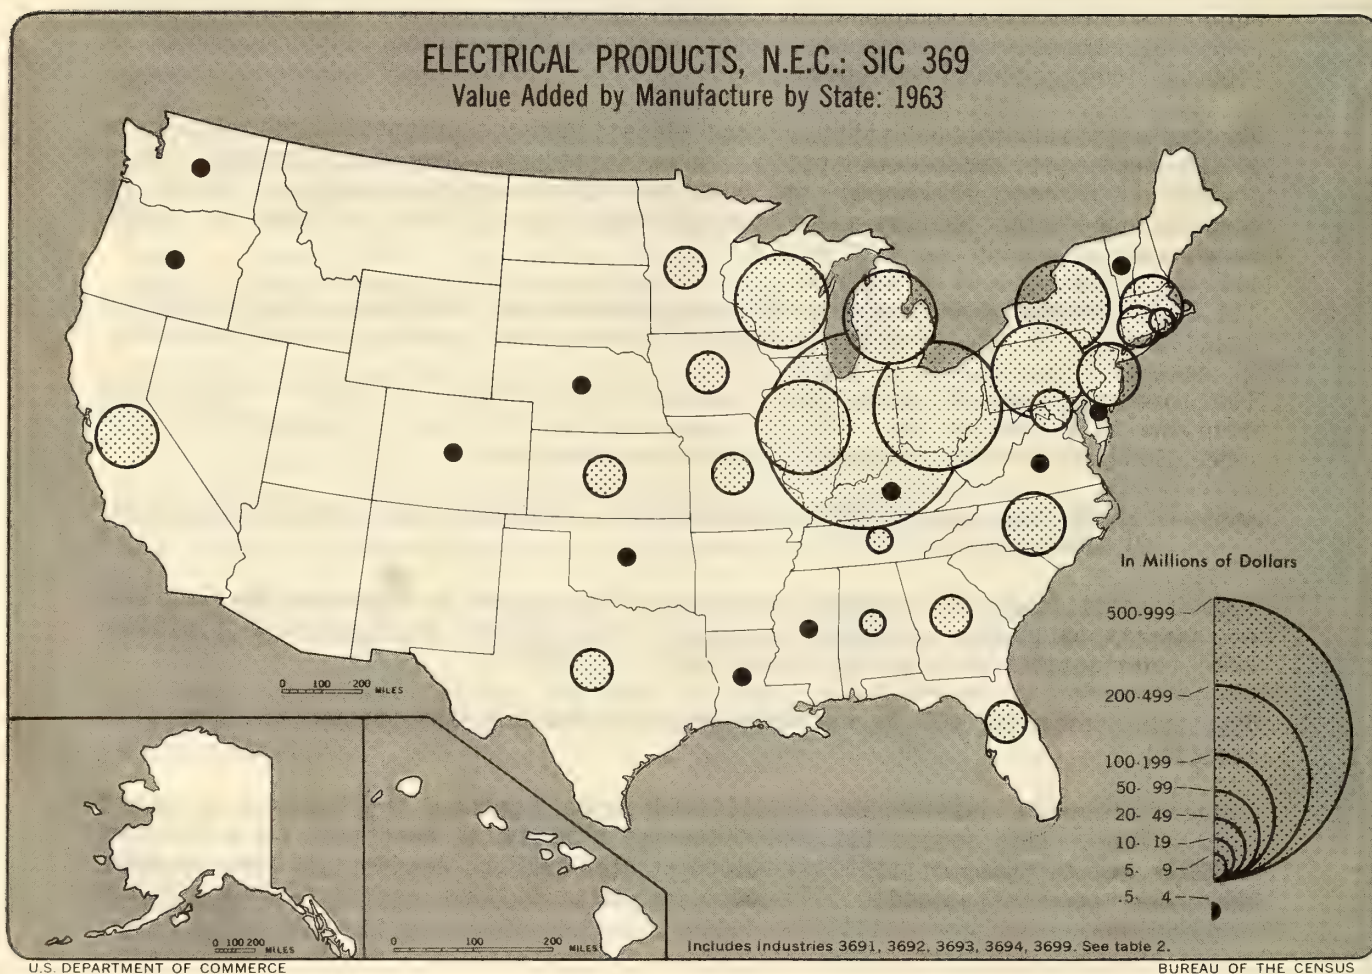

TABLE 1. General Statistics: 1963 and Earlier Years

Year	Com- panies  (number)	Establishments		All employees		Production workers			Value added by manufacture, adjusted  (\$1,000)	Cost of materials  (\$1,000)	Value of shipments  (\$1,000)	Capital expend- itures, new (\$1,000)	Spec- ial- ization ratio (per- cent)	Cov- erage ratio (per- cent)
		Total  (number)	With 20 employ- ees or more (number)	Total  (number)	Payroll  (\$1,000)	Total  (number)	Man-hours  (1,000)	Wages  (\$1,000)

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: All employees: For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). Production workers: For 1947 and prior years figures represent an average of 12 monthly figures. Value added: Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. Cost of materials: Cost of materials prior to 1958 (except 1954) excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. Value of shipments: Value of shipments for years prior to 1958 (except 1954) excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

<sup>2</sup>Data for Alaska and Hawaii are not included.

<sup>3</sup>A revision in the definition of this industry was made in the 1963 supplement to the 1957 edition of the Standard Industrial Classification, reclassifying establishments primarily manufacturing automotive wiring harness sets other than ignition from industry 3694 to industry 3714 (Census industry 3717) "Motor Vehicles and Parts." The statistics for 1958 to 1962 have been revised to take this reclassification into account. However, comparable data for this industry are not available for earlier years.

<sup>4</sup>A revision of the definition of this industry was introduced in the 1957 Standard Industrial Classification so that earlier figures on a comparable basis are unavailable.

TABLE 2. General Statistics, by Geographic Areas: 1963 and 1958

- Represents zero.

(D) Withheld to avoid disclosure. Data for this item are included in the underscored figures at the left. n.e.c. Not elsewhere classified.

<sup>1</sup>Includes capital expenditures of approximately \$100-\$200 thousand for plants under construction but not in operation.<sup>2</sup>Includes capital expenditures of approximately \$20-\$50 thousand for plants under construction but not in operation.

**TABLE 5A. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958**

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		(\$1,000)	(\$1,000)	(\$1,000)	(\$1,000)	Col. B Col. B+C (percent)	(\$1,000)	(\$1,000)	(\$1,000)	Col. B Col. F (percent)
		A	B	C	D	E	F	G	H	I

Note: See Introduction for an explanation of terms used.

<sup>1</sup> Included in this industry are appliance wire and cord and flexible cord sets which are also primary to industry 3357, Nonferrous Wire Drawing, Etc. For 1963, a coverage ratio computed on the basis of including both industries to which appliance wire and cord and flexible cord sets are primary would total 79 percent; 49 percent by industry 3699, and 30 percent by industry 3357. The remaining 21 percent was shipped by establishments in other industries. For 1958, a coverage ratio computed on the basis of including both industries to which appliance wire and cord and flexible cord sets are primary would total 81 percent; 54 percent by industry 3699, and 17 percent by industry 3357. The remaining 19 percent was shipped by establishments in other industries.

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars except for ranges (shown in parentheses) which are expressed in millions of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c) miscellaneous

receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

36946	3599 Miscellaneous machinery....	(X)	(X)	(2-5)					
	3821 Mechanical measuring devices.....	(X)	(X)	(over 2)					

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>Includes the total for product class 33576, Appliance wire and cord and flexible cord sets, which is primary to industry 3357.

**TABLE 6A-1. Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958**

Product code	Product	Unit of measure	Total shipments including interplant transfers			
			1963		1958	
			Quantity	Value (\$1,000)	Quantity	Value (\$1,000)
3691- --	STORAGE BATTERIES, TOTAL.....		(X)	504,492	(X)	361,489
36911 --	Storage batteries, SLI type.....		(X)	360,885	(X)	278,960
	Motor vehicle type storage batteries, including tractor, aircraft, and marine starting, lighting, and ignition types, complete units:					
	Automobile, truck, farm tractor, and bus:					
	Automotive type (all types primarily designed to fit passenger cars, regardless of application) for original equipment:					
36911 12	6 volt.....	1,000 units....	9,214	77,285	{ 413 5,450	{ 3,311 48,798
36911 15	12 volt.....	..do.....				
	For replacement:					
	Wet:					
36911 21	6 volt.....	..do.....	9,915	72,527	<sup>1</sup> 17,450	<sup>1</sup> 128,226
36911 23	12 volt.....	..do.....	8,459	74,095	<sup>1</sup> 7,419	<sup>1</sup> 74,327
	Dry charge:					
36911 27	6 volt.....	..do.....	4,338	33,658	(NA)	(NA)
36911 28	12 volt.....	..do.....	9,496	79,963	(NA)	(NA)
	Heavy-duty transport, motor coach and bus, and diesel starting batteries)(excluding marine and railway diesel starting batteries):					
	For original equipment:					
36911 32	6 volt.....	..do.....	146	1,422	}	76
36911 35	12 volt.....	..do.....	234	3,693		
	For replacement:					
36911 42	6 volt.....	..do.....	478	4,431	273	3,983
36911 45	12 volt.....	..do.....	278	4,437	110	3,106
36911 51	Aircraft.....	..do.....	90	3,154	73	2,649
36911 71	Marine.....	..do.....	92	1,474	118	4,745
36911 98	Other starting, lighting, and ignition type batteries (including motorcycle).....		(X)	4,746	(X)	7,978
36912 --	Storage batteries (other than SLI type) including parts for storage batteries, all types.....		(X)	139,095	(X)	78,511
	Motive power type:					
36912 11	Industrial truck type.....	1,000 units....	70	27,420	(NA)	18,074
36912 19	Other motive power type storage batteries, including mining, and industrial locomotive and railway.....	..do.....	24	3,760	(X)	888
36912 41	Farm and emergency lighting storage batteries.....		(X)	( <sup>3</sup> )	(X)	( <sup>4</sup> )
36912 51	Communication storage batteries (include radio station, telephone and telegraph, and railroad signalling).....		(X)	18,126	(X)	15,626
36912 61	Railway diesel starting batteries.....	1,000 units....	27	6,005	(X)	( <sup>4</sup> )
36912 71	Railway air-conditioning and car lighting batteries.....		(X)	( <sup>3</sup> )	(X)	3,660
36912 91	Parts and supplies for storage batteries.....		(X)	9,525	(X)	10,767

36920 95	Parts and supplies for primary batteries.....		(X)	22,542	(X)	14,807
36920 99	Primary batteries, n.s.k.....		(X)	1,639	(X)	1,880
3693- --	X-RAY APPARATUS AND TUBES, TOTAL.....		(X)	108,577	(X)	72,969
	X-ray equipment, including X-ray tubes, and electro-therapeutic apparatus:					
36930 --	As reported in the census of manufactures.....		(X)	108,577	(X)	72,969
	As reported on Census Annual Form MA-36N.....		(X)	100,599	(X)	(X)
	Medical diagnostic and therapeutic electronic equipment, except X-ray:					
36930 82	Diathermy equipment.....		(X)	3,651	(X)	64,125
36930 92	Electrocardiographs.....	No. of units...	9,803	7,477		
36930 94	Electroencephalographs.....		(X)	(12)		
36930 96	Other (electronic).....		(X)	1218,187		
	X-ray equipment and accessories (excluding X-ray spectrometers and diffraction equipment):					
36930 19	Medical and dental X-ray and gamma ray equipment.....		(X)	42,451	(X)	8,844
36930 34	Industrial and scientific X-ray equipment.....		(X)	12,036		
36930 71	X-ray equipment accessories.....		(X)	6,836		
36930 49	X-ray tubes and valves, sold separately.....	No. of units...	30,121	9,961		
3694- --	ELECTRICAL EQUIPMENT FOR INTERNAL COMBUSTION ENGINES.....		(X)	873,912	(X)	586,853
36941 --	Ignition harness and cable sets <sup>13</sup> .....		(X)	58,899	(X)	28,831
	Ignition harness sets:					
36941 11	Automotive type <sup>13</sup> .....	1,000 units....	20,438	28,667	(NA)	(14)
36941 15	Aircraft type.....	do.....	1,377	6,716	(NA)	9,580
36941 19	Other, including tractor, stationary engine, etc.....		(X)	2,330	(X)	1410,191
36941 51	Cable sets (automotive and aircraft types).....	1,000 units....	15,450	20,742	(NA)	7,923
36941 00	Ignition harness sets, n.s.k.....		(X)	444	(X)	1,137
36942 --	Battery charging generators.....		(X)	199,287	(X)	104,930
	Battery charging generators, including alternators for internal combustion engines:					
	Passenger car and light truck type:					
36942 11	6 volt.....	1,000 units....	450	3,631	321	2,672
36942 15	12 volt.....	do.....	9,334	119,972	5,345	53,574
36942 21	Heavy-duty truck and bus type- 12 volt and higher.....	do.....	280	17,539	581	10,405
36942 29	All other (excluding farm lighting generators, but including farm tractor, marine, stationary, construction machinery, and aircraft and space types).....	do.....	(NA)	16,986	(NA)	7,914
	Regulators for battery charging generators:					
36942 41	Passenger car and light truck type.....	do.....	13,891	34,867	10,237	24,781
36942 49	Other types, including heavy-duty, truck and bus type.....	do.....	727	5,710	(NA)	5,584
36942 00	Battery charging generators, n.s.k.....		(X)	582	(X)	-

See footnotes at end of table.

TABLE 6A-1. **Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued**

Product code	Product	Unit of measure	Total shipments including interplant transfers			
			1963		1958

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>For 1958, includes both wet and dry charge.

<sup>2</sup>For 1958, includes \$180 thousand for which no quantity was reported.

<sup>3</sup>For 1963, product codes 3691241 and 3691271 are included with product code 3691298.

<sup>4</sup>For 1958, product codes 3691241 and 3691261 are included with product code 3691298.

<sup>5</sup>For 1963, a large portion of this value represents work on fuel cells.

<sup>6</sup>Codes 3692012 and 3692014 include data for codes 3692016 and 3692018 in 1958.

<sup>7</sup>Codes 3692089 and 3692091 include data for codes 3692028, 3692029, 3692051, 3692053, and 3692072 through 3692088 in 1958.

<sup>8</sup>Codes 3692072 through 3692081 include data for codes 3692041 through 3692053 in 1963.

<sup>9</sup>Codes 3692041 and 3692043 include data for codes 3692045 and 3692047 in 1958.

<sup>10</sup>Codes 3692069 and 3692071 include data for codes 3692061 and 3692063 in 1963.

<sup>11</sup>Codes 3692089 and 3692091 include data for codes 3692083 through 3692088 in 1963.

<sup>12</sup>Code 3693094 combined with code 3693096 to avoid disclosing figures of individual companies.

<sup>13</sup>Product code 3694111 has been revised to exclude nonignition automotive wiring harness sets. Accordingly, the total for product class 36941 is not comparable with estimates published for 1959 to 1962 in the annual survey of manufactures. Also, see footnote 3 of table 1.

<sup>14</sup>In 1958, automotive type ignition harness sets were included with "all other" (Census product code 3694119) to avoid disclosing operations of individual companies.

<sup>15</sup>Other types of electric comfort heating equipment are included in industry 3634, Electric Housewares and Fans.

<sup>16</sup>In 1958, product codes 3357613 and 3357615 were combined.

<sup>17</sup>In 1958, product codes 3699613 and 3699615 were combined.

**TABLE 6A-2. Automotive Type Storage Batteries—Quantity and Value Shipped, by Class of Customer: 1963 and 1958**

(Product codes 3691112 to 3691128)

Class of customer	Total shipments including interplant transfers			
	1963		1958	
	Quantity (1,000 units)	Value (\$1,000)	Quantity (1,000 units)	Value (\$1,000)
Shipments by all manufacturing establishments, total.....	41,422	337,528	30,732	254,662
To the United States Government.....	485	6,241	647	9,210
To export customers (including shipments to company's foreign branches or subsidiaries).....	193	1,715	664	4,548
To domestic customers:				
For original equipment purposes.....	9,070	75,009	5,631	49,109
For replacement purposes:				
Manufacturer's proprietary brands:				
To jobbers and distributors.....	12,387	111,532	9,914	86,667
To retail dealers.....	978	10,226	1,270	14,228
To other proprietary-brand customers.....	986	6,005	690	4,066
Private brands:				
To oil companies.....	3,703	126,800	3,049	86,834
To tire companies.....	2,053		2,183	
To mail-order and chain stores.....	7,735		5,746	
To motor-vehicle manufacturers (replacement only).....	1,663		368	
To other private-brand customers.....	2,169		570	

**TABLE 6B. Product Classes—Indexes of Production and Unit Value for Primary Products Shipped by All Producers: 1963 and 1958**

Product code	Product and year	Indexes (1954 = 100)	
		Production	Unit value
369--	Electrical products, n.e.c.....1963..	(1)	(1)

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>Source: Current Industrial Reports Series M36N, "Selected Electronics and Associated Products".

<sup>3</sup>Includes the total for product class 33576, appliance wire and cord and flexible cord sets, which is primary to industry 3357.

**TABLE 6D. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958**

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments

Driven by purchased energy.....do....	80	18	15	158	28
Driven by energy generated at establishment.....do....	1	-	-	9	-
Aggregate horsepower per 100 production workers.....	774	302	393	452	341

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than 500 horsepower.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)

Note: Very small establishments were not requested to report their metalworking operations and, in some instances, a few larger establishments failed to report. The significance of this undercoverage is shown in terms of production-worker employment on the last line of the table below:

Item	Industry				
	3691	3692	3693	3694	3699
Total number of establishments in the industry.....	252	46	58	182	350
Number of establishments which reported one or more of the specified operations.....	43	17	32	72	45
Percent of industry production workers in these establishments.....	40-45	45-50	85-90	85-90	45-50
Number of establishments which reported "none" of the operations apply.....	75	18	6	36	66
Percent of industry production workers in these establishments.....	25-30	35-40	0-5	0-5	30-35
Percent of industry production workers in establishments which completed the metalworking operations inquiry.....	65-70	85-90	90-95	90-95	75-80

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

<sup>1</sup>These size groups are based on the number of employees engaged in each specific operation. They are not based on total employment in the establishment.

## Transportation Equipment

- 37A Motor vehicles and equipment
- 37B Aircraft and parts
- 37C Ship and boat building, railroad and miscellaneous transportation equipment

This major group covers establishments primarily engaged in manufacturing equipment for transportation of passengers and cargo by land, air, and water. Important products produced by establishments classified in this major group include motor vehicles, aircraft, ships, boats, railroad equipment, and miscellaneous transportation equipment such as motorcycles, bicycles, etc.

The Standard Industrial Classification System (1957 edition) includes, in Industry Group 372, guided missile components, not elsewhere classified, and receipts from research and development on aircraft parts, guided missile components, not elsewhere classified, and airplane and missile engines.

Certain products which are sometimes associated with or considered a part of transportation

equipment are classified in other major groups in the Standard Industrial Classification System. For example, wheeltypes tractors, track-laying tractors, mining cars, and industrial trucks, tractors, trailers, and stackers are in Major Group 35; and ignition systems and storage batteries, in Major Group 36.

Railroad shops are not classified as manufacturing by the Standard Industrial Classification System and, therefore, such activities are not included in employment and other establishment totals for Major Group 37 or Industry Group 374. However, such shops were requested to report the quantity and value of locomotives and railroad cars built or rebuilt. Data on railroad cars built or rebuilt in railroad shops are included only in table 6A-2 for Industry 3742.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>The figures for 1939 through 1963 include data for employees of manufacturing establishments who are engaged in distribution and construction work. The extent to which data for such employees are included in the figures for earlier years is not known.

<sup>2</sup>For the period 1954 to 1963, figures represent adjusted value added by manufacture and for earlier years, unadjusted value added. Adjusted value added is equal to value of shipments (including resales of finished products) less cost of finished products, materials, supplies, fuel, electric energy and contract work, plus the net change in the value of finished products and work-in-process inventories between the beginning and end of the year, without adjustment for price changes. Unadjusted value added is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. See Introduction, "Value Added by Manufacture."

<sup>3</sup>The total value of shipments and cost of materials for industry groups (2- and 3-digit) includes extensive duplication arising from shipments between establishments in the same industry classification. For a more complete explanation, see Introduction.

<sup>4</sup>The figures for 1958 to 1963 include expenditures for plants under construction and not yet in operation.

<sup>5</sup>In addition to data for operating establishments, figures for employment and payroll for manufacturing central administrative offices and auxiliary units are shown for the

years 1949 to 1953 in the annual survey of manufactures volumes. Data for these units are not available for the years 1955 to 1957, 1959 to 1962, or prior to 1949.

<sup>6</sup>Figures for 1958 to 1963 for operating manufacturing establishments are not strictly comparable with prior years due to revisions of the Standard Industrial Classification System. Prior to 1958, establishments primarily engaged in the manufacture of truck and bus bearings, convertible tops for automobiles, rebuilt automotive parts, and aircraft and related engine and power take-off gears, were excluded from these data. Establishments primarily engaged in the manufacture of parachutes are included in data prior to 1958.

<sup>7</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

<sup>8</sup>The figures for 1939, but not for 1937, have been revised for comparability with the figures for later years. The principal revision is the exclusion of data for railroad repair shops reclassified as nonmanufacturing establishments. Value added by manufacture for 1939 on a basis strictly comparable with 1937 was \$1,794 million.

<sup>9</sup>The figures for 1935 and earlier years are not sufficiently comparable with those for later years to be shown in this table because the earlier figures exclude data for establishments primarily engaged in the manufacture of aircraft engines and for a number of large establishments classified prior to 1937 in other industry groups.

<sup>1</sup>The value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry. For a more complete explanation, see Introduction.

## MOTOR VEHICLES AND EQUIPMENT

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

3713—Truck and Bus Bodies  
3715—Truck Trailers  
3717—Motor Vehicles and Parts

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### 3713—TRUCK AND BUS BODIES

This industry comprises establishments primarily engaged in the manufacture of truck and bus bodies for sale separately, or for assembly on purchased chassis. Establishments primarily engaged in manufacturing complete trucks and busses are classified in Census Industry 3717, and stamped body parts for truck and busses in industry 3461.

The code number as well as the definition of this industry was unchanged between 1958 and 1963. For a detailed list of products of industry 3713, refer to table 6A, product codes 3713012 to 3713099.

Value of shipments and other receipts of the Truck and Bus Bodies Industry in 1963 totaled \$477 million. This amount included shipments of truck and bus bodies (primary products) valued at \$362 million, shipments of other products (secondary products) valued at \$56 million, and miscellaneous receipts (mainly resales) at \$58 million.

This industry's shipments of truck and bus bodies in 1963 represented 88 percent of its total product shipments. The industry specialization ratio in 1958 was 87 percent. Secondary products shipped by this industry in 1963 included motor vehicle manufacturers (\$11 million), parts and accessories for passenger cars, trucks, and busses shipped to; other than motor vehicle manufacturers (\$17 million).

Shipments of truck and bus bodies by this industry in 1963 represented 86 percent of all shipments of these products (\$420 million) by all industries. In 1958 the coverage ratio

was 87 percent. Other industries shipping truck and bus bodies consisted mainly of industry 3717, Motor Vehicles and Parts, \$18 million; and industry 3715, Truck Trailers, \$13 million.

#### 3715—TRUCK TRAILERS

This industry comprises establishments primarily engaged in the manufacture of truck trailers and truck trailer chassis for sale separately, but not engaged in manufacturing complete trucks and busses.

The code number as well as the definition of this industry were unchanged between 1958 and 1963. For a detailed list of products of industry 3715, refer to table 6A, product codes 3715011 to 3715055.

Value of shipments and other receipts of the Truck Trailers Industry in 1963 totaled \$516 million. This amount included shipments of truck trailers (primary products) valued at \$450 million, shipments of other products (secondary products) valued at \$39 million, and miscellaneous receipts (mainly resales), at \$27 million.

This industry's shipments of truck trailers in 1963 represented 92 percent of its total product shipments. The industry specialization ratio in 1958 was 84 percent. Secondary products shipped by this industry in 1963 consisted mainly of truck and bus bodies (\$13 million), and automotive parts and accessories shipped to motor vehicle manufacturers (\$10 million).

Shipments of truck trailers by this industry in 1963 represented 93 percent of all shipments of these products (\$485 million) by all industries. In 1958 the coverage ratio was also 93 percent. Other industries shipping truck trailers consisted mainly of industry 3443, Boiler Shop Products, \$2 million; and industry 3717, Motor Vehicles, and Parts, \$6 million.

#### 3717—MOTOR VEHICLES AND PARTS

The Motor Vehicles and Parts Industry includes establishments engaged primarily in the manufacture or assembly of complete passenger automobiles, car bodies, trucks, commercial cars and busses (except trackless trolleys-Industry 3742), special purpose motor vehicles and motor vehicle parts and accessories. Establishments primarily engaged in manufacturing truck and bus bodies and assembling them on purchased chassis are classified in industry 3713; motorcycles in industry 3751; wheel type tractors, except contractors' off-highway types in industry 3522; track laying tractors in industry 3531; and combat tanks in industry 1931.

In this report, based on the 1963 Census of Manufactures, as in 1958, the three Standard Industrial Classification industries (3711, 3712, and 3714) have been combined because of a major problem of defining the reporting unit in terms of these industries. This difficulty arises from the fact that many large establishments have integrated operations which include the production of parts or bodies and the assembly of complete vehicles at the same location.

Included in industry 3717 are such parts as passenger-car bodies, motor vehicle engines (except Diesel), brakes, clutches, axles, radiators, differentials, transmissions, wheels and frames, windshield wipers, automotive bumpers, camshafts, connecting rods, crankshaft assemblies, cylinder heads, drive shafts, exhaust systems, fuel systems, heaters, hoods, horns, instrument board assemblies, lubrication systems, mufflers, power-transmission equipment, rear-axle housings, shock absorbers, steering mechanisms, tops (except stamped metal), universal joints, wheel rims, windshield frames, and automobile accessories, not elsewhere classified.

A considerable number of components, parts and accessories for motor vehicles are not classified in industry 3717 but are classified in other Standard Industrial Classification industries based on the characteristic of the product itself rather than the Specific Application. Among the more important of these are automotive hardware, industry 3429, Hardware, N.E.C.; automotive stampings, industry 3461, Metal Stampings; Diesel and semi-Diesel engines, industry 3519, Internal Combustion Engines; sealed beam and other electric lamps, industry 3641, Electric Lamps; motor vehicle lighting fixtures, industry 3642, Lighting Fixtures; bearings, industry 3566, Power-Transmission Equipment; tires and inner tubes, industry 3011, Tires and Inner Tubes; automobile glass, industry 3211, Flat Glass; ignition equipment such as spark plugs, distributors, switches, ignition coils, generators, cranking motors, etc., industry 3694, Engine Electrical Equipment; storage batteries, industry 3691, Storage Batteries; automobile radios, industry 3651, radio and Television Receiving Sets; and carburetors and pistons, industry 3599, Miscellaneous Machinery.

The code number for this industry in the Standard Industrial Classification Manual is unchanged, but the content of the industry has been slightly changed from the classification system used in 1958. The change in the composition of the industry as now constituted, compared with that under the classification system followed in the 1958 census, is due principally to revision in the definition of this industry made in the 1963 Supplement to the 1957 edition of the Standard Industrial Classification, reclassifying establishments primarily manufacturing automotive wiring harness sets other than ignition, from industry 3694, "Engine Electrical Equipment" to industry 3714 (Census Industry 3717). For a detailed list of products of industry 3717, refer to table 6A, product codes 3717111 to 3717711.

Motor vehicle and equipment companies frequently operate separate establishments manufacturing such components, parts and accessories for automotive use. These establishments are not classified in industry 3717. Therefore, to obtain an overall picture of automotive components, parts and accessories associated with the manufacture or assembly of complete motor vehicles and equipment, reference must also be made to many of the industries outside of industry 3717. This situation occurs, of course, not only in connection with the Motor Vehicles and Parts Industry but for many other industries (aircraft, locomotives, etc.).

Another factor to be considered in dealing with the statistics for this group of industries relates to the varied degree of establishment integration in respect to such metalworking operations as stamping, foundry, and tool and die production associated with the output of motor vehicles and equipment. In some establishments many of these activities are conducted as an integral part of the same establishment which produces or assembles motor vehicles and equipment. In these cases, their employment, wages, materials, etc., are included in the statistics for the establishment. The extent of such integrated captive operations is shown in Table 9 for the motor vehicle industry.

On the other hand, the foundry, and tool and die activities may be set up as separate establishments of motor vehicle and equipment companies or such activities may be performed by establishments which are not part of motor vehicle or parts companies. In either of these cases, data for such separate establishments would not be included in industry 3717, but rather in their respective industries, e.g., Industry Group 332, Iron and Steel Foundries; Industry Group 336, Nonferrous Foundries; and Industry 3544, Special Dies and Tools.

#### Value of Shipments

Data on cost of materials and value of shipments of the Motor Vehicle and Parts Industry include extensive duplication resulting from the transfer of motor vehicle parts to establishments producing complete motor vehicles. The value of such shipments are

duplicated in the total value of shipments. A corresponding duplication enters into the total cost of materials. The data shown for value added by manufacture (value of shipments less cost of materials, etc.) avoid this duplication.

#### Replacement Parts

Manufacturers' shipments of replacement parts for passenger cars, trucks, busses, and trailers during 1963 amounted to \$2,318 million. The comparable 1958 figure was \$1,639 million. These figures include parts made by establishments classified in the Motor Vehicles and Parts Industry as well as parts classified as primary products of other industries. They include the value of motor vehicle replacement parts such as spark plugs, ignition coils, storage batteries, carburetors, pistons and piston rings, headlights, fan belts, springs, hardware, mufflers, radiators and cores, water and fuel pumps, wheels, universal joints, cylinder heads, hub and drum assemblies, transmissions, shock absorbers, rear axle shafts, and clutch disc and facing assemblies.

These figures represent the shipments of these parts by parts manufacturers to other than motor vehicle manufacturers and shipments of replacement parts by motor vehicle manufacturers including parts which they purchased and resold in the same condition. No duplication is involved since parts manufacturers reported separately parts shipped to motor vehicle manufacturers and the latter figure is not included in this total. Value of shipments of tires and tubes and motor vehicle accessories such as radios, heaters, etc., are not included in this figure.

In order to arrive at an aggregate value for replacement parts without duplication, establishments producing replacement parts but not engaged in manufacturing complete vehicles were requested to exclude from their shipments data on replacement parts all shipments to motor vehicle producers. Motor vehicle producers that reshipped such replacement parts were requested to report the value of these shipments, even though the parts were not made by such companies. The value of replacement parts in 1963 totaled the \$2,318 million referred to above.

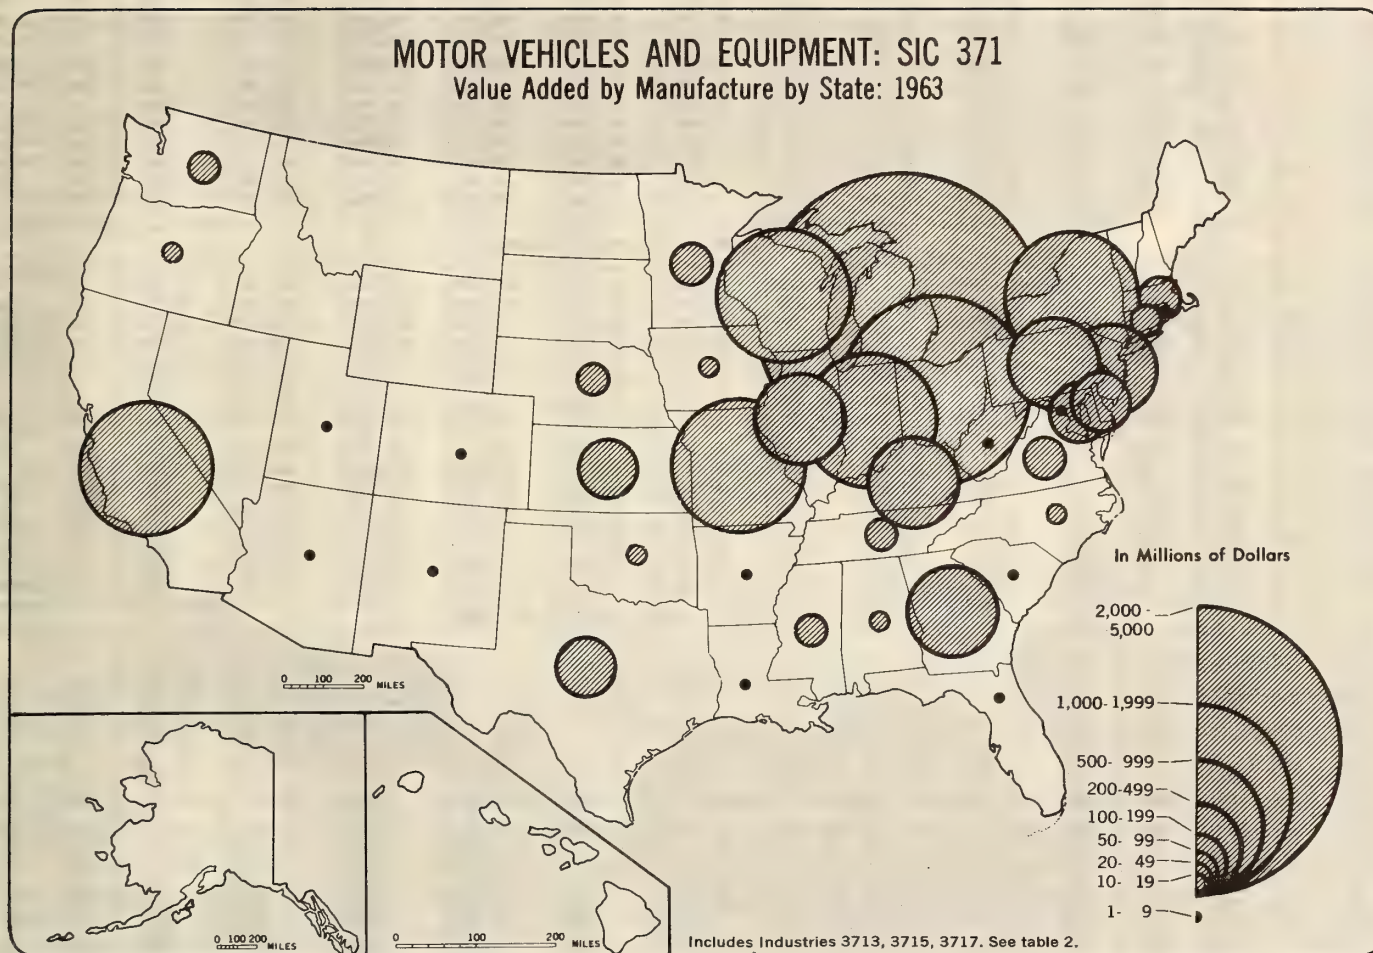

Table 6E shows data for 1963 and 1958 on the total production of selected motor vehicle parts and the use of such parts in the assembly of new vehicles as well as the use of these parts for replacement, export, and other uses. These data are not a precise measure of the sale of replacement parts in the United States since they include shipments of parts for export and are affected by inventory changes of parts during the year by both producers of parts and assemblers of vehicles. Also, see general Note of table 6E for discussion of other limitations of these data.

Value of shipments and other receipts of the Motor Vehicles and Parts Industry in 1963 totaled \$36,181 million. This amount included shipments of motor vehicles and parts (primary products) valued at \$34,837 million, shipments of other products (secondary products) valued at \$985 million, and miscellaneous receipts (mainly resales), at \$359 million.

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent to this specialization is indicated in table 8. Approximately 47 percent of the total industry shipments are represented by plants specializing in product class; 37171, Passenger cars, knocked down or assembled and; chassis for sale separately and 36 percent in 37175, Parts and accessories shipped to motor vehicle manufactures.

As shown in table 5B, except for motor vehicle parts and accessories, only a very small amount of primary products of this industry was shipped by establishments classified in other industries.

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: All employees: For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). Production workers: For 1947 and prior years figures represent an average of 12 monthly figures. Value added: Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. Cost of materials: Cost of materials prior to 1954 excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. Value of shipments: Value of shipments for years prior to 1954 excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. For 1959-1962 the figures shown in parenthesis either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>No comparable figures are available for earlier years.

<sup>3</sup>Includes extensive duplication arising from shipments between establishments in the same industry classification.

<sup>4</sup>A revision in the definition of this industry was made in the 1963 Supplement to the 1957 edition of the Standard Industrial Classification, reclassifying establishments primarily manufacturing automotive wiring harness sets other than ignition, from Industry 3694, "Engine Electrical Equipment" to Industry 3714 (Census Industry 3717). The statistics for 1958-1962 have been revised to take this reclassification into account. The data for 1947-1957 could not be revised to conform with this reclassification. Further, the 1947-1957 data are not strictly comparable with 1958-1963 because of changes introduced in the 1957 Standard Industrial Classification.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>General statistics for some producing States have been withheld to avoid disclosing figures for individual companies. Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State. SIC 3713, Truck and bus bodies: New England—Maine, 3 (20-99); Massachusetts, 17 (250-499); Rhode Island, 2 (20-99); Connecticut, 11 (20-99); East North Central—Ohio, 35 (4,132); Indiana, 20 (2,028); Wisconsin, 14 (1,697); West North Central—South Dakota, 3 (1-19); Kansas, 7 (20-99); South Atlantic—District of Columbia, 1 (100-249); West Virginia, 1 (1-19); North Carolina, 14 (500-999); South Carolina, 4 (20-99); Florida, 15 (229); East South Central—Kentucky, 7 (20-99); Tennessee, 13 (235); Mississippi, 6 (500-999); West South Central—Arkansas, 9 (250-499); Louisiana, 5 (100-249); Oklahoma, 6 (20-99); Mountain—Idaho, 3 (20-99); Colorado, 2 (20-99); Arizona, 2 (1-19); Utah, 4 (20-99); Nevada, 2 (1-19). SIC 3715, Truck Trailers: New England—Massachusetts, 4 (20-99); Connecticut, 1 (1-19); East North Central—Ohio, 8 (3,125); Indiana, 7 (1,236); Illinois, 10 (456); Wisconsin, 4 (976); West North Central—Minnesota, 1 (250-499); Missouri, 8 (718); South Dakota, 1 (1-19); Nebraska, 3 (502); Kansas, 2 (100-249); South Atlantic—Maryland, 3 (1-19); Virginia, 2 (20-99); West Virginia, 1 (20-99); North Carolina, 1 (1-19); South Carolina, 1 (20-99); Georgia, 1 (500-999); Florida, 4 (240); East South Central—Kentucky, 2 (250-499); Tennessee, 3 (475); Alabama, 5 (742); Mississippi, 1 (1-19); West South Central—Arkansas, 2 (1-19); Louisiana, 2 (250-499); Oklahoma, 2 (250-499); Texas, 20 (1,452); Mountain—Montana, 2 (20-99); Idaho, 1 (1-19); Colorado, 2 (250-499); New Mexico, 3 (20-99); Utah, 1 (20-99); Pacific—Washington, 6 (250-499); Hawaii, 1 (20-99). SIC 3717, Motor Vehicles and Parts: New England—Maine, 2 (1-19); New Hampshire, 2 (1-19); Massachusetts, 38 (2,939); Rhode Island, 8 (500-999); Middle Atlantic—New Jersey, 53 (12,156); Pennsylvania, 67 (13,603); East North Central—Illinois, 143 (20,973); Wisconsin, 35 (35,048); West North Central—Minnesota, 29 (2,500-4,999); Missouri, 47 (21,621); South Dakota, 3 (1-19); Nebraska, 6 (1,008); Kansas, 13 (3,650); South Atlantic—Delaware, 3 (5,816); Maryland, 15 (6,851); Virginia, 11 (1,860); West Virginia, 4 (500-999); South Carolina, 1 (100-249); Georgia, 44 (8,806); East South Central—Kentucky, 17 (4,164); Tennessee, 25 (3,397); West South Central—Arkansas, 12 (335); Louisiana, 9 (107); Texas, 105 (5,990); Mountain—Montana, 1 (1-19); Idaho, 6 (20-99); New Mexico, 4 (20-99); Arizona, 19 (100-249); Utah, 7 (20-99); Nevada, 1 (1-19); Pacific—Washington, 16 (1,000-2,499); Oregon, 20 (500-999); Hawaii, 1 (1-19).

<sup>2</sup>This State or division was not shown as a separate line in table 2 in the 1958 report for this industry. A footnote to table 2 in the 1958 report showed the number of establishments and total employment (either actual or in size ranges) for such States.

Selected operating ratios:			
Payroll/Total employment.....	5,448	5,810	7,612
Production workers/Total employment.....	.81	.80	.82
Man-hours/Production workers.....	2,074	1,999	2,226
Production worker wages/Man-hours.....	2.41	2.64	3.26
Cost of materials and payrolls/Total value of shipments.....	.80	.82	.80
Cost of materials/Total value of shipments.....	.52	.60	.66
Adjusted value added/Total employment.....	9,379	10,576	18,995
Salaries and wages/Adjusted value added.....	.58	.55	.40

Note: Detailed figures may not add to totals because of independent rounding or independent dropping of fractions of thousands rather than rounding in computer operations. See Introduction for an explanation of terms used.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>The proportion of product shipments (both primary and secondary) of the industry represented by primary products.

<sup>2</sup>The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.

<sup>3</sup>Differs from the production worker figure appearing in tables 1, 2, and 8 because the figures in those tables are based on employment for the payroll periods ended nearest the 15th of March, May, August and November. In this table they represent the average of 12 monthly figures.

TABLE 4. Selected Statistics, by Employment Size of Establishments: 1963

- Represents zero.

(D) Withheld to avoid disclosure. Data for this item are included in the underlined figures at the left.

<sup>1</sup>Value of shipments for Industry 3717 include extension duplication. See text for more complete discussion.<sup>2</sup>Includes capital expenditures for plants under construction but not in operation which constitute a small proportion of the total for the size class.

TABLE 5A. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
						Col. B Col. B+C (percent)				Col. B Col. F (percent)
		(\$1,000)	(\$1,000)	(\$1,000)	(\$1,000)	(percent)	(\$1,000)	(\$1,000)	(\$1,000)	(percent)
		A	B	C	D	E	F	G	H	I
3713	Truck and bus bodies.....1963..	476,733	362,470	56,197	58,066	88	419,747	362,470	57,277	86
	.....1958..	307,769	242,010	36,131	29,628	87	274,893	239,345	35,548	87

	.....1958..	334,724	264,550	48,483	21,691	84	283,998	264,550	19,448	93
3717	Motor vehicles and parts.....1963..	36,181,007	34,837,455	984,717	358,835	<sup>1</sup> 97	35,413,168	34,837,455	575,713	<sup>3</sup> 98
	.....1959..	20,830,059	19,710,460	780,958	338,641	<sup>1</sup> 96	19,863,333	19,710,460	152,873	<sup>3</sup> 99

Note: See Introduction for an explanation of terms used.

<sup>1</sup>The percentages shown, although correct to the extent that they are mathematical calculations, are not meaningful because of duplication in the value of shipments. See introductory text for this industry.

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars except for ranges (shown in parentheses) which are expressed in millions of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c) miscellaneous

receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

37175 17	Shipped to other motor vehicle manufacturers <sup>10</sup> .....	(X)	180,078		
37175 71	Shipped to motor vehicle and parts manufacturers (including shipments to producers of motor vehicles (passenger cars, trucks, busses, truck trailers, and trailer coaches) and of bodies, parts, and accessories, including other plants of the same company) <sup>11</sup> .....	(X)	2,632,208		

See footnotes at end of table.

TABLE 6A. Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued

Product code	Product	Total shipments including interplant transfers			
		1963		1958	
		Quantity (number)	Value (\$1,000)	Quantity (number)	Value (\$1,000)
37175 --	Parts and accessories shipped to motor vehicle manufacturers for passenger cars, trucks, busses, and trailers (excluding rough steel forgings, rough castings and accessories such as leaf and coil springs, meters for motor vehicles, radios, distributors, generators and alternators, cranking motors, and selected motor vehicle indicating instruments)—Continued				
37175 00	Automotive gasoline engines, new <sup>11</sup> .....	(X)	30,935	(X)	17,512
	Parts and accessories shipped to motor vehicle manufacturers for passenger cars, trucks, busses and tractors, n.s.k.....	(X)	5,980	(X)	3,581
37176 --	Parts and accessories for passenger cars, trucks and busses shipped to other than motor vehicle manufacturers.....	(X)	<sup>12</sup> 1,753,675	(X)	<sup>12</sup> 1,140,806
37176 11	Replacement parts and accessories for cars, trucks, busses, and trailers for domestic use, including purchased parts. (Includes shipments to distributors, dealers, jobbers, wholesalers, service stations, direct to fleet operators, governments and other consumers of motor vehicles, and subassembly rebuilders other than motor vehicle and motor vehicle parts manufacturers who also rebuild subassemblies. Does not include interplant transfers within a company; shipments to motor vehicle, body, parts, and accessory manufacturers; or export shipments of any kind, including bodies for mounting on old chassis) <sup>10</sup>	(X)	861,378	(X)	542,786
37176 15	Convertible tops for automobiles <sup>11</sup> .....	(X)	22,892	(X)	( <sup>13</sup> )
37176 21	Export shipments of parts and accessories for passenger cars, trucks, busses, and trailers, including purchased parts <sup>10</sup> .....	(X)	79,085	(X)	85,672
37176 31	Other parts and accessories for passenger cars, trucks, busses, and trailers <sup>11</sup> .....	(X)	758,436	(X)	439,623
37176 00	Replacement parts and accessories for cars, trucks, busses, and trailers for domestic use, including purchased parts, n.s.k.....	(X)	31,884	(X)	<sup>13</sup> 72,725
37177 11	Rebuilt motor vehicle engines and parts (except carburetors) <sup>11</sup> .....	(X)	188,295	(X)	79,891
37170 00	Motor vehicle parts, n.s.k.....	(X)	<sup>9</sup> 221,998	(X)	<sup>9</sup> 65,344

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

n.s.k. Not specified by kind.

<sup>1</sup>Truck and bus bodies built by garages, service stations and other establishments primarily engaged in nonmanufacturing activities are excluded.

<sup>2</sup>For these products, figures were also collected in the Bureau of the Census commodity survey program. In lieu of asking for detailed statistics on these products in the census of manufactures, respondents were asked to report only value of shipments for specified groups of products for which separate figures had previously been collected in the commodity survey. In most cases, the value figures reported in the census of manufactures for each group of products agreed closely with the corresponding figures reported in the commodity survey. However, there were differences between the census figures and the commodity survey figures. These variations were due primarily to the following reasons:

- Better coverage in the census of manufactures program. This includes many small establishments excluded from the monthly survey.
- Use of different reporting periods (calendar year vs. fiscal year).
- Use of estimates in reporting figures on the commodity survey, whereas census of manufactures figures generally represent more exact shipment figures.

<sup>3</sup>Includes small capacity trailers of special construction for the Defense Department, as well as auto transport, public utility trailers, converter dollies, and hoppers.

<sup>4</sup>The total value of shipments of products classified in industry 3717 includes extensive duplication arising from shipments between establishments in the same industry classification.

<sup>5</sup>Includes station wagons, ambulances, hearses, and taxicabs if produced on passenger car chassis. Value includes extra equipment billed with vehicles.

<sup>6</sup>Includes trucks such as pick-up, sedan delivery, panel, or other commercial cars made on passenger car chassis if these chassis were of own manufacture. Includes station wagons, hearses, and taxicabs if produced on truck chassis. Includes all truck chassis whether or not to be used for transportation of property, such as fire apparatus, street sprinklers, school busses, ambulances, etc. Excludes specialized road construction machinery and off-the-highway trucks.

<sup>7</sup>The sum of values reported for basic chassis and bodies (codes 3717201 through 3717218) and bodies and other equipment billed with basic chassis (codes 3717233, 3717236, and 3717239) represents the total value received from the sale of trucks, truck tractors, and truck chassis. Amounts reported for basic chassis values are based on average wholesale prices realized during 1963 and 1958. The amount reported for bodies and other equipment billed with basic chassis represents (1) the value received for bodies and other equipment shipped with the basic chassis; and (2) any plus or minus differences not included in the amounts reported for basic chassis due to the use of average wholesale prices for computing the values of the basic chassis.

<sup>8</sup>Separate figures are shown for fire department vehicles produced on purchased chassis (code 3713077) and for fire department vehicles produced on chassis of own manufacture (code 3717321). A small number of fire department vehicles, however, are produced on chassis furnished by customers.

<sup>9</sup>Product code 3717411 combined with 3717000 for security reasons, on advice from the Bureau of the Budget.

<sup>10</sup>Data are limited to establishments of companies producing motor vehicles or bodies.

<sup>11</sup>Data are limited to establishments of companies which do not produce motor vehicles or bodies.

<sup>12</sup>This figure is limited to shipments of products classified in industry 3717. There were additional shipments of motor vehicle parts by parts producers to other than motor vehicle manufacturers. This includes spark plugs, ignition coils, storage batteries, carburetors, pistons and piston rings, headlights, springs, and hardware which are classified outside the 3717 grouping and which approximated \$564 million in 1963 and \$498 million in 1958. Therefore, the total for 1963 was \$2,318 million. The comparable 1958 total was \$1,639 million.

<sup>13</sup>For 1958, product code 3717615 is combined with product code 3717600.

TABLE 6B. **Product Classes—Indexes of Production and Unit Value for Primary Products Shipped by All Producers: 1963 and 1958**

(Indexes of production and unit value are not shown for this area pending further review of the quantity data and associated values pertaining to these products.)

TABLE 6C. **Product Classes—Value Shipped by All Manufacturing Establishments: 1947, 1954, 1958 to 1963**

(In thousands of dollars)

Code	Product class	1963	1962 <sup>1</sup>	1961 <sup>1</sup>	1960 <sup>1</sup>	1959 <sup>1</sup>	1958	1954	1947

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

n.s.k. Not specified by kind.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

<sup>2</sup>Product class 37174 combined with 37170 for security reasons, on advice from the Bureau of the Budget.

**TABLE 6D. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958**

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments

Footnotes for Table 6D—37A—Continued

<sup>1</sup>For the specified product classes shipments of \$1 million or more were reported for the States listed but the exact figures are withheld to avoid disclosure of individual company figures: 37130, Kentucky, Mississippi, Arkansas, Oklahoma; 37171, Massachusetts, New York, New Jersey, Ohio, Indiana, Illinois, Wisconsin, Minnesota, Missouri, Kansas, Delaware, Maryland, Virginia, Georgia, Kentucky, Texas; 37172, Connecticut, New York, New Jersey, Pennsylvania, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Missouri, Maryland, Virginia, Georgia, Kentucky, Texas, Washington, Oregon, California; 37173, Massachusetts, New York, Pennsylvania, Ohio, Indiana, Michigan, Wisconsin, Georgia; 37174, Connecticut, Pennsylvania, Ohio, Indiana; 37175, Maine, Massachusetts, Rhode Island, Connecticut, Minnesota, Iowa, Missouri, Nebraska, Delaware, Maryland, West Virginia, Georgia, Mississippi, Arkansas, Colorado, California; 37176, Rhode Island, Minnesota, Nebraska, Maryland, Virginia, North Carolina, Kentucky, Alabama, Washington; 37177, Massachusetts, New York, Kansas, South Carolina, Florida, Tennessee, Washington, Oregon.

<sup>2</sup>Shipments of \$1 million or more were reported but exact figures are withheld to avoid disclosure of individual company figures.

<sup>3</sup>For 1958, figures for product class 37175 are combined with those for product class 37176.

**TABLE 6E. Production and Use of Selected Parts of the Type Used for Passenger Cars, Trucks, and Busses: 1963 and 1958**

Product	Total number of units (1,000)					
	1963			1958		
	Produced <sup>1</sup>	Used in the assembly of new vehicles	For replacement, export, and other purposes <sup>2</sup>	Produced <sup>1</sup>	Used in the assembly of new vehicles	For replacement, export, and other purposes <sup>2</sup>
Engines, new (with or without cylinder heads, fuel pumps, water pumps, and other standard accessories):						
Gasoline.....	9,584	8,922	662	5,370	5,032	338

Heavy duty truck and bus types.....	1,448	507	941	1,121	409	712
Condensers*.....	54,725	15,425	39,300	39,934	6,830	33,104
Breaker point sets:						
Contact arms*.....	102,268	8,852	93,416	49,726	3,690	46,036
Contact supports and screws*.....	(NA)	8,852	(NA)	34,926	3,690	31,236
Headlights, sealed beam units.....	78,569	38,519	40,050	53,050	19,724	33,326

Note: For products identified in this table with an asterisk, it was not considered feasible to request manufacturers to identify automotive type parts separately from similar parts used for tractors, construction machinery, boats, etc. For all other products, the manufacturers were instructed to report separately automotive type versus non-automotive type parts.

- Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>For those products classified in industry 3717, with the exception of fuel pumps, production figures exclude units produced by establishments in other industries. Although it is not possible to precisely measure the effect of this undercoverage, it is believed to be minor for most products.

<sup>2</sup>The number of motor vehicle parts for replacement, export and other purposes were derived by subtracting from the total number of units produced, the quantities used in the assembly of new vehicles as reported by motor vehicle assembly plants. <sup>3</sup>For these products, total number of units shipped were used instead of total number of units produced. <sup>4</sup>In 1958, these products were described respectively as "mufflers (exhaust)," and "muffler tail pipes."

Electric motors, total.....do....	75	95	5,251
Driven by purchased energy.....do....	75	95	5,161
Driven by energy generated at establishment.....do....	-	-	90
Aggregate horsepower per 100 production workers.....	-	-	1,144

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)

Shipping department, including packing and crating...	612	291	165	156	16,236	586	1,643	14,007

Note: Very small establishments were not requested to report their metalworking operations and, in some instances, a few larger establishments failed to report. The significance of this undercoverage is shown in terms of production-worker employment on the last line of the table below:

Item	Truck and bus bodies (SIC 3713)	Truck trailers (SIC 3715)	Motor vehicles and parts (SIC 3717)
Total number of establishments in the industry.....	610	197	1,958
Number of establishments which reported one or more of the specified operations.....	216	95	830
Percent of industry production workers in these establishments.....	70-75	80-85	85-90
Number of establishments which reported "none" of the operations apply.....	57	30	136
Percent of industry production workers in these establishments.....	5-10	0-5	0-5
Percent of industry production workers in establishments which completed the metal working operations inquiry.....	75-80	85-90	90-95

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>These size groups are based on the number of employees engaged in each specific operation. They are not based on total employment in the establishment.

## AIRCRAFT AND PARTS

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

3721—Aircraft

3722—Aircraft Engines and Engine Parts

3723—Aircraft Propellers and Propeller Parts

3729—Aircraft Parts and Auxiliary Equipment, Not Elsewhere Classified

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### 3721—AIRCRAFT

This industry comprises establishments primarily engaged in manufacturing or assembling complete aircraft. This industry includes establishments primarily engaged in factory type aircraft modification on a contract or fee basis. Establishments primarily engaged in manufacturing engines, propellers, and other aircraft parts and auxiliary equipment are classified in industries 3722, 3723, and 3729. For a detailed list of products of industry 3721, refer to table 6A, product codes 3721111 to 3721655.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

In industry 3721 there is usually a significant difference between value of actual physical shipments and value of work done during a specified period. This is primarily due to lead time between the input of materials and labor and the shipments of completed aircraft. In evaluating the internal relationships of the Aircraft Industry, such as the ratio of cost of materials or payrolls to output, the value of aircraft shipments for the year is generally not meaningful and value of work done is therefore substituted. For the 1963 Census of Manufactures, establishments producing military, personal, utility, and commercial aircraft were requested to report both the value of shipments of aircraft and value of work done during the year. This latter statistic included total costs (materials, labor, overhead, etc.) and reflected the value of work done during 1963, including work done on aircraft not accepted during the year, but excluding the value of work done in prior years.

Value of work done and other receipts of the Aircraft Industry totaled \$6,317 million. This amount included work done on aircraft (primary products) valued at \$4,164 million, shipments of other products (secondary products) valued at \$1,898 million, and miscellaneous receipts (mainly resales) at \$254 million.

This industry's work done on aircraft represented 69 percent of its total product shipments. The industry specialization ratio in 1958 was 81 percent. Secondary products shipped by this industry in 1963 consisted mainly of aircraft parts and auxiliary equipment (\$714 million), and guided missiles and space vehicles, complete (\$372 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 54 percent of the total industry shipments are represented by plants specializing in product class 37211, Complete military aircraft.

Work done on aircraft by this industry in 1963 represented 96 percent of all work done on these products (\$4,331 million) by all industries. In 1958 the coverage ratio was 99 percent.

#### 3722—AIRCRAFT ENGINES AND ENGINE PARTS

This industry comprises establishments primarily engaged in the manufacture of aircraft engines, complete missile or space vehicle engines and/or propulsion units, and their parts. For a detailed list of products of industry 3722, refer to table 6A, product codes 3722110 to 3722813.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Aircraft Engines and Parts Industry totaled \$4,101 million. This amount included shipments of aircraft engines and engine parts (primary products) valued at \$3,367 million, shipments of other products (secondary products) valued at \$495 million, and miscellaneous receipts (mainly resales) at \$238 million.

This industry's shipments of aircraft engines and engine parts represented 87 percent of its total product shipments. The industry specialization ratio in 1958 was 94 percent. Secondary products shipped by this industry in 1963 included guided missile components and subassemblies, n.e.c. (\$128 million), and aircraft parts and auxiliary equipment, n.e.c. (\$35 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 40 percent of the total industry shipments are represented by plants specializing in product class 37221, Aircraft engines for military customers; 25 percent in product class 37226, Receipts for research and development on complete missile or space vehicle engines and/or propulsion units; and 18 percent in product class 37224, Aircraft engine parts and accessories.

Shipments of aircraft engines and engine parts by this industry represented 93 percent of all shipments of these products (\$3,610 million) by all industries. In 1958 the coverage ratio was also 93 percent. Other industries shipping aircraft engines and engine parts included industry 3729, Aircraft Equipment, N.E.C., \$18 million; and industry 3494, Valves and Pipe Fittings, \$13 million.

### 3723—AIRCRAFT PROPELLERS AND PROPELLER PARTS

This industry comprises establishments primarily engaged in manufacturing aircraft propellers and propeller parts. For a detailed list of products of industry 3723, refer to table 6A, product codes 3723010 to 3723051.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Aircraft Propellers and Parts Industry totaled \$191 million. This amount included shipments of aircraft propellers and propeller parts (primary products) valued at \$88 million, shipments of other products (secondary products) valued at \$95 million, and miscellaneous receipts at \$8 million.

This industry's shipments of aircraft propellers and parts represented 48 percent of its total product shipments. The industry specialization ratio in 1958 was 75 percent.

Shipments of aircraft propellers and parts by this industry represented 81 percent of all shipments of these products (\$109 million) by all industries. In 1958 the coverage ratio was 95 percent.

### 3729—AIRCRAFT PARTS AND AUXILIARY EQUIPMENT, NOT ELSEWHERE CLASSIFIED

This industry comprises establishments primarily engaged in manufacturing aircraft parts and auxiliary equipment, n.e.c., including nose cones for guided missiles. Establishments primarily engaged in manufacturing or assembling complete aircraft are classified in industry 3721, aircraft engines and parts in industry 3722, propellers and propeller parts in industry 3723, aeronautical instruments in industry 3811, and aeronautical electrical equipment in industry 3694. For a detailed list of products of industry 3729, refer to table 6A, product codes 3729113 to 3729439.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Aircraft Equipment, N.E.C., Industry totaled \$3,169 million. This amount included shipments of aircraft equipment, n.e.c. (primary products) valued at \$2,254 million, shipments of other products (secondary products) valued at \$761 million, and miscellaneous receipts at \$153 million.

This industry's shipments of aircraft equipment, n.e.c., represented 75 percent of its total product shipments. The industry specialization ratio in 1958 was 84 percent. Secondary products shipped by this industry in 1963 included research and development on guided missiles (complete) (\$108 million), and aircraft engine parts (\$18 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 59 percent of the total industry shipments are represented by plants specializing in product class 37291, Aircraft parts and auxiliary equipment, n.e.c.; and 25 percent in product class 37292, Guided missile components and subassemblies, n.e.c.

Shipments of aircraft equipment, n.e.c., by this industry represented 59 percent of all shipments of these products (\$3,792 million) by all industries. In 1958 the coverage ratio was 63 percent.

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: **All employees:** For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). **Production workers:** For 1947 and prior years figures represent an average of 12 monthly figures. **Value added:** Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. **Cost of materials:** Cost of materials prior to 1958 (except 1954) excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. **Value of shipments:** Value of shipments for years prior to 1958 (except 1954) excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Footnotes continued on next page.

TABLE 1. General Statistics: 1963 and Earlier Years—Continued

Footnotes for Table 1-37B—Continued

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>For the period 1954-1963, the adjusted value added figure for the Aircraft Industry has not been adjusted for the change in inventory between the beginning and end of the year, since the figures reported by establishments in this industry are value of work done rather than value of shipments. It does include the value added by resales. For prior years this figure is unadjusted value added.

<sup>2</sup>For industry 3721, represents value of work done rather than value of shipments.

<sup>3</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>4</sup>Total cost of materials and total value of shipments are not shown since these figures are not comparable to those of later years.

<sup>5</sup>No comparable figures are available for previous years.

<sup>6</sup>A revision in the definition of this industry was introduced in the 1957 Standard Industrial Classification. Accordingly, the data for 1958-1963 are not comparable with those for earlier years.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

<sup>1</sup>General statistics for some producing States have been withheld to avoid disclosing figures for individual companies. Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State. SIC 3721, Aircraft: New England—Massachusetts, 1 (20-99); Connecticut, 4 (10,000 and over); Middle Atlantic—New York, 7 (37,790); Pennsylvania, 6 (10,000 and over); East North Central—Ohio, 3 (12,071); Michigan, 2 (20-99); Wisconsin, 1 (20-99); West North Central—Missouri, 1 (10,000 and over); Kansas, 5 (9,348); South Atlantic—Delaware, 1 (100-249); North Carolina, 1 (500-999); Georgia, 2 (10,000 and over); Florida, 7 (1,000-2,499); East South Central—Alabama, 3 (5,000-9,999); West South Central—Oklahoma, 5 (2,500-4,999); Mountain—Wyoming, 2 (100-249); Colorado, 1 (1-19); Pacific—Washington, 7 (61,044); Oregon, 1 (1-19); California, 23 (71,250); Alaska, 1 (1-19).

SIC 3722, Aircraft Engines and Parts: New England—Maine, 3 (1,000-2,499); Vermont, 2 (500-999); Massachusetts, 8 (6,745); Rhode Island, 2 (250-499); Connecticut, 36 (41,119); Middle Atlantic—New York, 17 (5,000-9,999); New Jersey, 10 (10,000 and over); East North Central—Indiana, 12 (13,882); Michigan, 7 (2,500-4,999); Wisconsin, 2 (200-249); West North Central—Minnesota, 2 (250-499); Iowa, 1 (250-499); Missouri, 3 (1,000-2,499); South Atlantic—Maryland, 1 (500-999); Virginia, 1 (500-999); North Carolina, 2 (250-499); Georgia, 1 (20-99); Florida, 5 (5,000-9,000); East South Central—Alabama, 1 (1,000-2,499); West South Central—Louisiana, 1 (2,500-4,999); Oklahoma, 1 (1-19); Texas, 4 (1,000-2,499); Mountain—Arizona, 3 (2,500-4,999); Utah, 3 (12,072); Pacific—Washington, 2 (20-99).

SIC 3723, Aircraft Propellers and Parts: New England—Connecticut, 2 (5,000-9,999); Middle Atlantic—New York, 1 (20-99); New Jersey, 2 (1,000-2,499); Pennsylvania, 1 (100-249); East North Central—Ohio, 2 (100-249); Michigan, 1 (250-499); South Atlantic—Florida, 1 (1-19); Mountain—Colorado, 1 (1-19); Pacific—California, 3 (20-99).

SIC 3729, Aircraft Equipment, N.E.C.: New England—Maine, 2 (20-99); Vermont, 2 (1,000-2,499); Massachusetts, 17 (2,500-4,999); East North Central—Ohio, 56 (10,000 and over); Indiana, 16 (6,637); Wisconsin, 1 (20-99); West North Central—Minnesota, 8 (2,500-4,999); Nebraska, 1 (1-19); Kansas, 35 (19,290); South Atlantic—Delaware, 1 (250-499); Maryland, 8 (10,000 and over); Virginia, 3 (500-999); West Virginia, 1 (1-19); North Carolina, 2 (250-499); Georgia, 7 (233); East South Central—Kentucky, 1 (20-99); Tennessee, 3 (2,500-4,999); Alabama, 2 (100-249); Mississippi, 2 (500-999); West South Central—Arkansas, 1 (20-99); Texas, 36 (2,500-4,999); Mountain—Idaho, 1 (100-249); Colorado, 6 (10,000 and over); New Mexico, 1 (1-19); Arizona, 18 (1,000-2,499); Nevada, 1 (1-19); Pacific—Washington, 22 (1,000-2,499); Oregon, 2 (500-999).

<sup>2</sup>For industry 3721, represents value of work done rather than the value of shipments.

<sup>3</sup>This State or region was not shown as a separate line in table 2 in the 1958 report for this industry. A footnote to table 2 in the 1958 report showed the number of establishments and total employment (either actual or in size ranges) for such States.

TABLE 3. Detailed Statistics: 1963

Adjusted value added/Total employment.....	11,723	11,761	10,143	11,229
Salaries and wages/Adjusted value added.....	.67	.66	.69	.67

Note: Detailed figures may not add to totals because of independent rounding or independent dropping of fractions of thousands rather than rounding in computer operations. See Introduction for an explanation of terms used.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>The proportion of product shipments (both primary and secondary) of the industry represented by primary products.

<sup>2</sup>The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.

<sup>3</sup>For industry 3721, represents value of work done rather than value of shipments.

<sup>4</sup>See table 1, footnote 1.

-Represents zero.

(D) Withheld to avoid disclosure. Data for this item are included in the underscored figures at the left. n.e.c. Not elsewhere classified.

<sup>1</sup>For industry 3721, represents value of work done rather than value of shipments.

**TABLE 5A. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958**

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments <sup>1</sup>					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio

Note: See Introduction for an explanation of terms used.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

<sup>1</sup>For industry 3721, represents value of work done rather than value of shipments.

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars except for ranges (shown in parentheses) which are expressed in millions of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c) miscellaneous

receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

Prod. class code	Class of products and miscellaneous receipts	All industries	Aircraft (SIC 3721)	Other industries

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>Total value of shipments figure for aircraft differs from value of work done. See text for explanation of differences.

<sup>2</sup>Data for value of work done, including modifications, conversions, and overhaul of previously accepted aircraft, and other aeronautical services (including research and development on aircraft), represent receipts, billings, or value of work done.

<sup>3</sup>Statistics on shipments of complete civilian aircraft were collected monthly and published in Current Industrial Reports Series M37G. The figures reported in that survey for 1963 were as follows: quantity, 8,155 units; value, \$685,936 thousand.

<sup>4</sup>For 1958, data on complete missile or space vehicle engines and/or propulsion units were included with aircraft engines.

<sup>5</sup>Statistics on shipments of aircraft engines for other than United States military customers were collected monthly and published in Current Industrial Reports Series M37G. The total value reported in that survey for 1963 was \$144,254 thousand.

<sup>6</sup>For 1958, data on missile and space vehicle engine and/or propulsion unit parts or accessories were included with aircraft engine parts and accessories.

<sup>7</sup>For 1958, data on receipts for research and development on complete missile or space vehicle engines and/or propulsion units for United States military customers and all other services on aircraft, missile or space vehicle engines and/or propulsion units for United States military customers were included with receipts for research and development on aircraft engines for United States military customers.

<sup>8</sup>For 1958, data on receipts for research and development on complete missile or space vehicle engines and/or propulsion units for other than United States military customers and all other services on aircraft, missile or space vehicle engines and/or propulsion units for other than United States military customers were included with receipts for research and development on aircraft engines for other than United States military customers.

<sup>9</sup>For 1963, data on research and development on aircraft engines for other than United States military customers are included with all other aeronautical services on aircraft engines for other than United States military customers to avoid disclosing figures of individual companies.

<sup>10</sup>Statistics on complete propellers are also shown on Current Industrial Reports Series M37E, "Aircraft Propellers."

<sup>11</sup>Since much less detail was collected for these products in 1958, "Not specified by kind" was included within the specified products.

<sup>12</sup>Represents receipts or billings.

TABLE 6B. **Product Classes—Indexes of Production and Unit Value for Primary Products, Shipped by All Producers: 1963 and 1958**

(Indexes of production and unit value are not shown for this area pending further review of the quantity data and associated values pertaining to these products.)

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

<sup>2</sup>For industry 3721, represents value of work done rather than value of shipments.

<sup>3</sup>For 1954-1962, data for complete missile or space vehicle engines and/or propulsion units were included with aircraft engines.

<sup>4</sup>For 1954-1962, data on receipts for research and development on complete missile or space vehicle engines and/or propulsion units, and, all other services on complete missile or space vehicle engines and/or propulsion units, were included with receipts for research and development on aircraft engines.

<sup>5</sup>For 1954-1962, data on missile and space vehicle engine and/or propulsion unit parts or accessories were included with aircraft engine parts and accessories.

TABLE 6D. **Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958**

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

Product class and geographic area	Value of shipments	Product class and geographic area	Value of shipments	Product class and geographic area	Value of shipments

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>Does not include materials produced and consumed at the same establishment.

<sup>2</sup>Represents estimates published in MC58(1)-7 (Supplement), "Selected Materials Consumed," from data collected in a supplemental survey on Form MA-131, "Consumption of Materials, Parts, Containers and Supplies During 1958." This survey was limited to large establishments in selected chemical, machinery and equipment industries and resulted in estimates which are subject to greater error than are the figures on materials consumption collected as a regular part of the census of manufactures. This material was described as pumps and compressors, including hydraulic motors.

**TABLE 7B. Fuels and Electric Energy Consumed and Horsepower Rating of Power Equipment: 1962**

Item	Aircraft (SIC 3721)	Aircraft engines and parts (SIC 3722)	Aircraft propellers and parts (SIC 3723)	Aircraft equipment, n.e.c. (SIC 3729)

Driven by energy generated at establishment.....do....	15	3	(Z)	-
Aggregate horsepower per 100 production workers.....	538	1,133	1,037	692

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than 500 horsepower. n.e.c. Not elsewhere classified.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)

Note: Very small establishments were not requested to report their metalworking operations and, in some instances, a few larger establishments failed to report. The significance of this undercoverage is shown in terms of production-worker employment on the last line of the table below:

Item	Industry			
	3721	3722	3723	3729
Total number of establishments in the industry.....	100	232	14	1,000
Number of establishments which reported one or more of the specified operations	65	195	9	542
Percent of industry production workers in these establishments.....	90-95	95-100	95-100	90-95
Number of establishments which reported "none" of the operations apply.....	16	18	-	32
Percent of industry production workers in these establishments.....	0-5	0-5	-	0-5
Percent of industry production workers in establishments which completed the metalworking operations inquiry.....	90-95	95-100	95-100	90-95

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

<sup>1</sup>These size groups are based on the number of employees engaged in each specific operation. They are not based on total employment in the establishment.

## SHIP AND BOAT BUILDING, RAILROAD AND MISCELLANEOUS TRANSPORTATION EQUIPMENT

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3731—Ship Building and Repairing
- 3732—Boat Building and Repairing
- 3741—Locomotives and Parts
- 3742—Railroad and Street Cars
- 3751—Motorcycles, Bicycles, and Parts
- 3791—Trailer Coaches
- 3799—Transportation Equipment, Not Elsewhere Classified

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### 3731—SHIP BUILDING AND REPAIRING

This industry comprises establishments primarily engaged in building and repairing all types of ships, barges, canal boats, and lighters, whether propelled by sail or motor power or towed by other craft. This industry also includes the conversion and reconversion of ships. Establishments primarily engaged in fabricating structural assemblies or components for ships, or subcontractors engaged in ship painting, joinery, carpentry work, electrical wiring installation, etc., are not classified in this industry. For a detailed list of products of industry 3731, refer to table 6A, product codes 3731110 to 3731659.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

The total value of work done and other receipts of the Ship Building and Repairing Industry totaled \$1,680 million. This amount included receipts from primary activities (ship building and repairing) valued at \$1,508 million, shipments of products primary to other industries (secondary products) valued at \$118 million, and miscellaneous receipts at \$54 million.

The value of ship building and repairing represents value of work done during the year. This provides a more adequate measure of the activity in this industry than value of vessels completed and delivered, primarily because of length of the production cycle, which

may be several years for some vessels. Value of shipments (deliveries) would result in a distortion for establishments working on a vessel all year, but not completing it during the year or, conversely, for establishments completing and delivering a vessel during a year when most of the work was performed in previous years. Respondents were requested to compute the value of work done by including the cost of labor, the cost of purchased materials and parts received during 1963, overhead and profits by one of the following methods: (1) estimating the percentage of completion during 1963, (2) reporting net billings for work done during 1963, or (3) reporting payments received for work done during 1963.

This industry's receipts for ship building and repairing represented 92 percent of its total product shipments. The industry specialization ratio in 1958 was 93 percent. Secondary products shipped by this industry in 1963 include fabricated structural iron and steel (\$36 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into subindustries represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 51 percent of the total value of work done is represented by plants specializing in self-propelled U.S. military ships, and 16 percent in self-propelled non-military ships.

Shipments of ship building and repairing by this industry represented 99 percent of all shipments of these products (\$1,518 million) by all industries. In 1958 the coverage ratio was also 99 percent.

#### 3732—BOAT BUILDING AND REPAIRING

This industry comprises establishments primarily engaged in building and repairing all types of boats, except rubber boats (industry 3069). Establishments primarily engaged in cleaning and storing boats and in the rental of dock space, and yacht clubs are classified in nonmanufacturing industries. For a detailed list of products of industry 3732, refer to table 6A, product codes 3732111 to 3732421.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Boat Building and Repairing Industry totaled \$360 million. This amount included shipments of newly constructed boats and receipts for boat repairs (primary products) valued at \$322 million, shipments of other products (secondary products) valued at \$12 million, and miscellaneous receipts (mainly products bought and resold) at \$27 million.

This industry's shipments of newly constructed boats and receipts for repair of boats represented 97 percent of its total product shipments. The industry specialization ratio in 1958 was 93 percent. Secondary products shipped by this industry in 1963 include repair of nonmilitary ships (\$3 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into subindustries represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 33 percent of the total industry shipments are represented by plants specializing in inboard motor boats; and 28 percent in outboard motor boats.

Shipments of newly constructed boats and receipts for repair of boats by this industry represented 95 percent of all shipments of these products (\$338 million) by all industries. In 1958 the coverage ratio was also 95 percent. Another industry shipping newly constructed boats and repairing boats was industry 3731, Ship Building and Repairing, over \$2 million.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product classes of industry 3732, e.g., boat repair, 83 percent, and all other boats, 90 percent.

The production index for the primary products of the industry increased to 185 in 1963 from the 1958 level of 146. The unit value index for 1963 was 114 compared to 126 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3741—LOCOMOTIVES AND PARTS

This industry comprises establishments primarily engaged in building and rebuilding locomotives (including frames and parts; n.e.c.) of any type or gauge. Railroad shops rebuilding and repairing locomotives or building new locomotives are classified in Major Group 40. For a detailed list of products of industry 3741, refer to table 6A, product codes 3741141 to 3741351.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Locomotives and Parts Industry totaled \$438 million. This amount included shipments of locomotives and parts (primary products) valued at \$342 million, shipments of other products (secondary products) valued at \$70 million, and miscellaneous receipts at \$25 million.

This industry's shipments of locomotives and parts represented 83 percent of its total product shipments. The industry specialization ratio in 1958 was 85 percent. Secondary products shipped by this industry in 1963 include land transportation motors, generators, and control equipment and parts (over \$20 million), and diesel and semidiesel engines (over \$2 million).

Shipments of locomotives and parts by this industry represented 90 percent of all shipments of these products (\$378 million) by all industries. In 1958 the coverage ratio was 90 percent. Other industries shipping locomotives and parts include industry 3742, Railroad and Street Cars, over \$5 million; and industry 3323, Steel Foundries, over \$2 million.

The production index for the primary products of the industry decreased to 86 in 1963 from the 1958 level of 89. The unit value index for 1963 was 119 compared to 109 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3742—RAILROAD AND STREET CARS

This industry comprises establishments primarily engaged in building and rebuilding railroad, street, and rapid transit cars and car equipment for operation on rails for freight and passenger service. This industry also includes establishments primarily engaged in manufacturing trackless trolley busses. Establishments primarily engaged in manufacturing mining cars are classified in industry 3532. Repair shops, owned and operated by railroads or local transit companies, rebuilding or repairing cars, or building new cars for their own account, are classified in Major Groups 40 and 41. For a detailed list of products of industry 3742, refer to table 6A, product codes 3742111 to 3742351.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Railroad and Street Cars Industry totaled \$927 million. This amount included shipments of railroad and street cars (primary products) valued at \$813 million, shipments of other products (secondary products) valued at \$83 million, and miscellaneous receipts (including products bought and resold) at \$30 million.

This industry's shipments of railroad and street cars represented 91 percent of its total product shipments. The industry specialization ratio in 1958 was 87 percent. Secondary products shipped by this industry in 1963 include fabricated metal products, n.e.c. (over \$5 million), and other construction machinery and equipment including construction machinery parts, n.e.c. (over \$5 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into subindustries represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 64 percent of the total industry shipments are represented by plants specializing in freight train cars, new; and 31 percent in street cars and parts and accessories for railroad and street cars, and rebuilt passenger and freight train cars.

Shipments of railroad and street cars by this industry represented 93 percent of all shipments of these products (\$871 million) by all industries. In 1958 the coverage ratio was 90 percent. Other industries shipping railroad and street cars and parts include industry 3323, Steel Foundries, \$17 million; and industry 3717, Motor Vehicles and Parts, \$7 million.

The production index for the primary products of the industry increased to 125 in 1963 from the 1958 level of 87. The unit value index for 1963 was 149 compared to 129 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3751—MOTORCYCLES, BICYCLES, AND PARTS

This industry comprises establishments primarily engaged in manufacturing motorcycles, bicycles, and similar equipment and parts. Establishments primarily engaged in assembling motorcycles or bicycles from purchased parts are also included in this industry. Establishments primarily engaged in manufacturing children's vehicles, except bicycles, are classified in industry 3943. For a detailed list of products of industry 3751, refer to table 6A, product codes 3751013 to 3751081.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Motorcycles, Bicycles, and Parts Industry totaled \$193 million. This amount included shipments of motorcycles, bicycles, and parts (primary products) valued at \$152 million, shipments of other products (secondary products) valued at \$32 million, and miscellaneous receipts (mainly products bought and resold) at \$9 million.

This industry's shipments of motorcycles, bicycles, and parts represented 83 percent of its total product shipments. The industry specialization ratio in 1958 was 84 percent. Secondary products shipped by this industry in 1963 include baby carriages and children's vehicles, except bicycles (over \$10 million), and lawn mowers and parts (over \$2 million).

Shipments of motorcycles, bicycles, and parts by this industry represented 93 percent of all shipments of these products (\$163 million) by all industries. In 1958 the coverage ratio was also 93 percent. Other industries shipping motorcycles, bicycles, and parts include industry 3717, Motor Vehicles and Parts, over \$2 million; and industry 3943, Children's Vehicles, over \$2 million.

The production index for the primary products of the industry increased to 226 in 1963 from the 1958 level of 130. The unit value index for 1963 was 81 compared to 92 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3791—TRAILER COACHES

This industry comprises establishments primarily engaged in manufacturing trailer coaches (mobile dwellings) for attachment to passenger cars. For a detailed list of products of industry 3791, refer to table 6A, product codes 3791021 to 3791041.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Trailer Coaches Industry totaled \$713 million. This amount included shipments of trailer coaches, housing types (primary products), valued at \$686 million, shipments of other products (secondary products) valued at \$15 million, and miscellaneous receipts (mainly products bought and resold) at \$12 million.

This industry's shipments of trailer coaches, housing types, represented 98 percent of its total product shipments. The industry specialization ratio in 1958 was 99 percent.

Shipments of trailer coaches, housing types, by this industry represented 99 percent of all shipments of these products (\$690 million) by all industries. In 1958 the coverage ratio was also 99 percent.

The production index for the primary products of the industry increased to 279 in 1963 from the 1958 level of 195. The unit value index for 1963 was 110 compared to 105 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3799—TRANSPORTATION EQUIPMENT, NOT ELSEWHERE CLASSIFIED

This industry comprises establishments primarily engaged in manufacturing transportation equipment, n.e.c. Establishments primarily engaged in manufacturing industrial trucks, tractors, trailers, and stackers are classified in industry 3537, and children's vehicles, except bicycles, in industry 3943. For a detailed list of products of industry 3799, refer to table 6A, product codes 3799115 to 3799298.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Transportation Equipment, N.E.C., Industry totaled \$167 million. This amount included shipments of transportation equipment, n.e.c. (primary products) valued at \$142 million, shipments of other products (secondary products) valued at \$17 million, and miscellaneous receipts (mainly products bought and resold) at \$9 million.

This industry's shipments of transportation equipment, n.e.c., represented 89 percent of its total product shipments. The industry specialization ratio in 1958 was 86 percent. Secondary products shipped by this industry in 1963 include parts and accessories for passenger cars, trucks, and busses shipped to other than motor vehicle manufacturers (\$3 million).

Shipments of transportation equipment, n.e.c., by this industry represented 75 percent of all shipments of these products (\$190 million) by all industries. In 1958 the coverage ratio was 73 percent. Other industries shipping transportation equipment, n.e.c., consisted

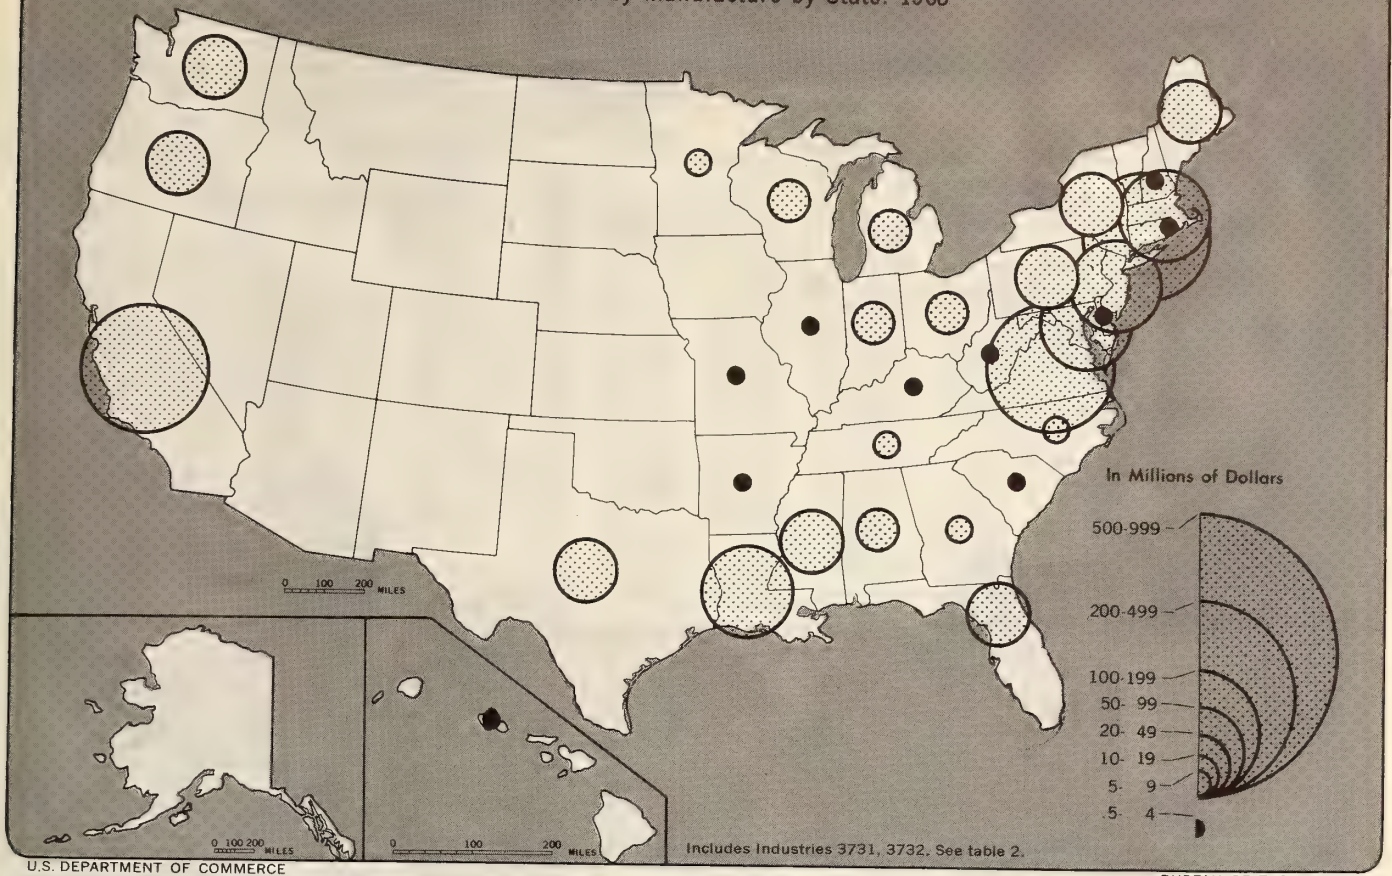

mainly of industry 3522, Farm Machinery and Equipment, \$25 million; and industry 3791, Trailer Coaches, \$4 million.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product classes of industry 3799, e.g., Automobile trailers, excluding housing type coaches, 89 percent; and Other transportation equipment, 62 percent.

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: **All employees:** For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). **Production workers:** For 1947 and prior years figures represent an average of 12 monthly figures. **Value added:** Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. **Cost of materials:** Cost of materials prior to 1958 (except 1954) excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. **Value of shipments:** Value of shipments for years prior to 1958 (except 1954) excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>For the period 1954-1963 the adjusted value added figure for the ship building and repairing industry has not been adjusted for the change in inventory between the beginning and end of the year, since the figures reported by establishments in this industry are value of work rather than value of shipments. It does include the value added by resales. For prior years, this figure is unadjusted value added.

<sup>2</sup>Represents value of work done rather than value of shipments.

<sup>3</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>4</sup>For 1939 and prior years separate industry figures for "Ship building and repairing" and "Boat building and repairing" are not available. However, for the period 1899-1939 combined data for the two industries are shown.

<sup>5</sup>A revision in the definition of this industry was introduced in the 1957 Standard Industrial Classification so that data for prior years are not strictly comparable.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

<sup>1</sup>General statistics for some producing States have been withheld to avoid disclosing figures for individual companies. Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State.

SIC 3731, Ship Building and Repairing: New England—Maine, 8 (2,626); Vermont, 1 (1-19); Massachusetts, 12 (4,613); Rhode Island, 2 (20-99); Connecticut, 10 (15,932); East North Central—Ohio, 9 (707); Indiana, 3 (611); Illinois, 3 (166); Michigan, 5 (737); West North Central—Minnesota, 2 (1-19); Iowa, 1 (20-99); Missouri, 3 (102); South Atlantic—Delaware, 2 (100-249); Maryland, 9 (8,027); Virginia, 13 (20,847); West Virginia, 1 (500-999); South Carolina, 5 (402); Georgia, 1 (500-999); East South Central—Kentucky, 1 (200-249); Tennessee, 1 (500-999); Alabama, 7 (2,500-4,999); Mississippi, 7 (5,084); West South Central—Oklahoma, 1 (1-19); Texas, 23 (2,500-4,999); Pacific—Washington, 17 (2,500-4,999); Alaska, 1 (1-19); Hawaii, 1 (1-19).

SIC 3732, Boat Building and Repairing: New England—New Hampshire, 8 (20-99); Vermont, 1 (1-19); Massachusetts, 81 (1,181); East North Central—Indiana, 26 (974); Illinois, 25 (440); West North Central—Iowa, 3 (1-19); Missouri, 16 (207); South Dakota, 2 (1-19); Nebraska, 1 (1-19); Kansas, 9 (20-99); South Atlantic—Delaware, 5 (1-19); District of Columbia, 1 (1-19); Georgia, 20 (250-499); East South Central—Kentucky, 6 (20-99); Tennessee, 20 (500-999); Alabama, 17 (20-99); Mississippi, 13 (100-249); West South Central—Oklahoma, 11 (20-99); Texas, 85 (1,000-2,499); Mountain—Montana, 4 (20-99); Idaho, 2 (1-19); Colorado, 2 (1-19); New Mexico, 1 (1-19); Arizona, 3 (20-99); Utah, 9 (20-99); Nevada, 1 (1-19); Pacific—Alaska, 8 (20-99); Hawaii, 4 (20-99).

SIC 3741, Locomotives and Parts: Middle Atlantic—New York, 1 (1,000-2,499); New Jersey, 1 (1-19); Pennsylvania, 6 (4,555); East North Central—Ohio, 3 (260); Indiana, 1 (1-19); Illinois, 7 (7,671); Michigan, 1 (1-19); Wisconsin, 2 (100-249); West North Central—Minnesota, 1 (20-99); Nebraska, 1 (1-19).

SIC 3742, Railroad and Street Cars: Middle Atlantic—New York, 5 (1,660); New Jersey, 3 (538); East North Central—Indiana, 5 (2,500-4,999); Illinois, 18 (2,747); Michigan, 3 (1,000-2,499); Wisconsin, 2 (20-99); West North Central—Minnesota, 1 (20-99); Iowa, 1 (20-99); Missouri, 2 (2,500-4,999); Kansas, 2 (250-499); South Atlantic—West Virginia, 1 (500-999); Georgia, 2 (20-99); East South Central—Kentucky, 1 (100-249); Alabama, 2 (1,000-2,499); West South Central—Texas, 2 (100-249); Pacific—Washington, 1 (1,000-2,499); California, 3 (248).

SIC 3751, Motorcycles, Bicycles, and Parts: New England—Massachusetts, 2 (250-499); Connecticut, 1 (20-99); Middle Atlantic—New York, 8 (873); New Jersey, 4 (20-99); Pennsylvania, 3 (1-19); East North Central—Illinois, 4 (500-999); Wisconsin, 3 (1,000-2,499); West North Central—Nebraska, 1 (500-999); South Atlantic—Georgia, 2 (20-99); Florida, 2 (1-19); East South Central—Kentucky, 2 (250-499); Tennessee, 2 (1,000-2,499); West South Central—Arkansas, 3 (500-999); Louisiana, 1 (20-99); Oklahoma, 2 (1-19); Texas, 1 (1-19); Mountain—Colorado, 1 (1-19); Utah, 4 (20-99); Pacific—Oregon, 1 (1-19).

SIC 3791, Trailer Coaches: New England—Maine, 2 (20-99); New Hampshire, 1 (1-19); Massachusetts, 1 (1-19); Connecticut, 1 (1-19); Middle Atlantic—New Jersey, 1 (20-99); Pennsylvania, 23 (1,000-2,499); East North Central—Illinois, 3 (1-19); Wisconsin, 10 (851); West North Central—Minnesota, 4 (100-249); South Dakota, 2 (100-249); South Atlantic—Maryland, 2 (100-249); Virginia, 1 (100-249); South Carolina, 2 (100-249); East South Central—Kentucky, 1 (20-99); Tennessee, 3 (177); Alabama, 2 (250-499); Mississippi, 1 (200-249); Mountain—New Mexico, 1 (1-19); Utah, 8 (100-249).

SIC 3799, Transportation Equipment, N.E.C.: New England—Vermont, 2 (20-99); Massachusetts, 7 (20-99); Connecticut, 4 (20-99); Middle Atlantic—New York, 12 (250-499); New Jersey, 4 (20-99); West North Central—Minnesota, 12 (100-249); North Dakota, 4 (1-19); South Dakota, 1 (1-19); South Atlantic—Maryland, 1 (20-99); Virginia, 2 (20-99); South Carolina, 3 (1-19); Georgia, 6 (20-99); East South Central—Kentucky, 2 (20-99); Tennessee, 6 (20-99); Alabama, 2 (20-99); Mississippi, 2 (1-19); West South Central—Arkansas, 4 (20-99); Louisiana, 5 (20-99); Texas, 47 (498); Mountain—Montana, 2 (20-99); Wyoming, 1 (1-19); Colorado, 13 (20-99); New Mexico, 2 (1-19); Arizona, 7 (20-99); Utah, 5 (100-249); Pacific—Washington, 13 (20-99); Oregon, 7 (100-249); Alaska, 1 (1-19).

<sup>2</sup>See footnote 1, table 1.

<sup>3</sup>Represents value of work done rather than value of shipments.

<sup>4</sup>This State or division was not shown as a separate line in table 2 in the 1958 report for this industry. A footnote to table 2 in the 1958 report showed the number of establishments and total employment (either actual or in size ranges) for such States.

Note: Detailed figures may not add to totals because of independent rounding or independent dropping of fractions of thousands rather than rounding in computer operations. See Introduction for an explanation of terms used.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>The proportion of product shipments (both primary and secondary) of the industry represented by primary products.

<sup>2</sup>The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.

<sup>3</sup>Represents value of work done rather than value of shipments.

<sup>4</sup>See footnote 1, table 1.

TABLE 4. Selected Statistics, by Employment Size of Establishments: 1963

Item	Establishments, total	Establishments with an average of—									
		1 to 4 employees	5 to 9 employees	10 to 19 employees	20 to 49 employees	50 to 99 employees	100 to 249 employees	250 to 499 employees	500 to 999 employees	1,000 to 2,499 employees	2,500 employees and over
INDUSTRY 3731.—SHIP BUILDING AND REPAIRING

- Represents zero.

(D) Withheld to avoid disclosure. Data for this item are included in the underscored figures at the left<sup>1</sup>.

n.e.c. Not elsewhere classified.

<sup>1</sup>See footnote 1, table 1.<sup>2</sup>Represents value of work done rather than value of shipments.<sup>3</sup>Includes capital expenditures of approximately \$200-\$500 thousand for plants under construction but not in operation.

**TABLE 5A. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958**

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		Col. B Col. B+C (percent)								Col. B Col. F (percent)

Note: See Introduction for an explanation of terms used.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.  
<sup>1</sup>Represents the value of work done.

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars except for ranges (shown in parentheses) which are expressed in millions of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c) miscellaneous

receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

Standard Note: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>The total value of work done for ship building and repairing differs from "value of shipments." See text for explanation. However, the figures for codes 3731110 through 3731181 are value of shipments.

<sup>2</sup>Excludes products manufactured by facilities operated by the Department of Defense, or at Federal, District of Columbia, and State prisons.

<sup>3</sup>In 1958, data for code 3731110, "Nonpropelled ships, new construction, military, including hopper barges, etc." were withheld to avoid disclosing figures for individual companies. They are included with code 3731000 "Ship building and repairing, not specified by kind."

<sup>4</sup>In 1958 code 3731431, "All other conversions and reconversions" was included with code 3731421, "Military sea transportation service, conversions and reconversions."

<sup>5</sup>In 1958 code 3731439, "All other repairs" was included with code 3731429, "Military sea transportation service, all other repairs."

<sup>6</sup>1958 data for inboard powered runabouts, code 3732131, were included with cabin cruisers based on length of boat. Such runabouts are almost all under 26' in length.

<sup>7</sup>1958 data for outboard powered utility boats, codes 3732227, 3732237, and 3732247, are included with runabouts based on length of boat.

<sup>8</sup>1958 data for outboard powered cabin cruisers, codes 3732228, 3732238, and 3732248, were included with runabouts based on length of boat. Such cabin cruisers are almost all over 15'7" in length.

<sup>9</sup>Data excludes parts shipped by railroad repair shops. No new or rebuilt locomotives were produced in railroad repair shops in either 1963 or 1958.

<sup>10</sup>See table 6A-1 for quantity and value of shipments of new and rebuilt railroad cars shipped by shops of operating railroads in the United States.

<sup>11</sup>Product class 37422 and product code 3742298 include an undetermined value from product class 37423 and 3742331.

<sup>12</sup>In 1958 data for box cars (code 3542211) are included with figures for other freight train cars (code 3742298) in 1958.

<sup>13</sup>In 1958, an undetermined dollar amount of other automobile trailers (boat, camping, commercial display, etc.) was included in code 3791000.

TABLE 6A-2. New and Rebuilt Passenger and Freight Train Cars Shipped by Shops of Operating Railroads: 1963 and 1958

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>Values of railroad cars built by railroads for own use represents the amounts at which they were written into property accounts.<sup>2</sup>A passenger and freight train car is defined as rebuilt when the cost of their dismantling, improvement and modernization is more than 50 percent of the replacement cost of a new unit of the same class and kind at the time of rebuilding. Conversions, reclassifications or units which were reconditioned by replacing defective parts are not included.<sup>3</sup>Excludes parts for passenger and freight cars, made in railroad car shops.<sup>4</sup>The 1963 product codes 3742111, 3742198, 3742245, 3742298, and 3742331 are included with the figure for "Other cars" (code 3742313).<sup>5</sup>The 1958 product code 3742211 is included in the figure of \$74,067 thousand.

TABLE 6B. Product Classes—Indexes of Production and Unit Value for Primary Products, Shipped by All Producers: 1963 and 1958

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

(S) Withheld because the estimate did not meet publication standards on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>Represents value of work done rather than value of shipments.

<sup>3</sup>Data include value of new and rebuilt railroad cars made in railroad car shops. The 1947 total and detailed statistics include \$37.9 million of new railroad cars shipped by railroad repair shops. Value of railroad cars built by railroads for own use represent amounts at which they were written into property accounts.

<sup>4</sup>Product class 37422 includes an undetermined value from product class 37423.

<sup>5</sup>Includes an undetermined dollar amount of other automobile trailers (boat, camping, commercial display, etc.).

**TABLE 6D. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958**

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

Driven by purchased energy.....do....	786	62	84	311	53	-	-
Driven by energy generated at establishment.....do....	9	-	80	22	-	-	-
Aggregate horsepower per 100 production workers.....	1,043	409	1,123	1,814	752	-	-

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than 500 horsepower.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)

Shipping department, including packing and crating...	1	-	1	-	(D)	-	(D)	-

Note: Very small establishments were not requested to report their metalworking operations and, in some instances, a few larger establishments failed to report. The significance of this undercoverage is shown in terms of production-worker employment on the last line of the table below:

Item	Industry						
	3731	3732	3741	3742	3751	3791	3799
Total number of establishments in the industry.....	334	1,626	24	78	88	413	522
Number of establishments which reported one or more of the specified operations.....	175	233	17	52	33	147	117
Percent of industry production workers in these establishments.....	85-90	50-55	95-100	95-100	90-95	60-65	50-55
Number of establishments which reported "none" of the operations apply	48	139	0	6	4	80	24
Percent of industry production workers in these establishments.....	0-5	10-15	0	0-5	0-5	20-25	5-10
Percent of industry production workers in establishments which completed the metalworking operations inquiry.....	90-95	65-70	95-100	95-100	90-95	80-85	60-65

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>These size groups are based on the number of employees engaged in each specific operation. They are not based on total employment in the establishment.

## Instruments and Related Products

- 38A Instruments; surgical, dental and ophthalmic goods
- 38B Photographic equipment; clocks, watch and watchcases

This major group covers establishments primarily engaged in manufacturing mechanical measuring, engineering, laboratory, and scientific research instruments; optical instruments and lenses; surgical, medical, and dental instruments, equipment and supplies; ophthalmic goods; photographic equipment and supplies; and, watches and clocks. Dental laboratories making dentures and artificial teeth to order for the dental profession, and establishments grinding ophthalmic lenses on an individual prescription basis, are classified in trade industries.

During the period 1958 to 1963, reports received from some large establishments indicated a change from the manufacture primarily of such individual instruments as those used for indicating air speed, rate-of-climb, angle-of-yaw and similar flight characteristics, and gyroscopes which are sold separately, to the manufacture primarily of complete instrumentation systems for navigation, guidance, check-out, etc. The major impact of this change has been on the classification of products and, consequently, the SIC coding of these large establishments. This change in reporting was brought to light by the initiation, by the Census Bureau, of detailed commodity surveys in the fields of electronic products and instrumentation. The electronic and associated products report (MA-36N) was started covering the year 1961 and the instruments series (MA-38B) was broadened for 1963 to encompass most types of instruments

following an introductory report for 1961 and 1962 covering industrial process instruments and test and measuring equipment. Annual statistics from both reports are published in the Current Industrial Reports Series.

In both the 1958 Census of Manufactures and the Annual Survey of Manufactures from 1959 through 1962, the classification of systems was not sufficiently spelled out in the product inquiries of these programs, especially at the 5-digit product class level. However, with the introduction, in the MA-36N and MA-38B surveys, of detailed 7-digit product information which itself is used to build up to broader 5-digit product class totals, these totals, although they should be the same as those reported on Form MA-100 (Annual Survey of Manufactures), have differed. The respondents affected have identified the proportion of earlier years' output which consisted of systems rather than instruments as such, which was the manner in which the items were originally reported.

In view of the above, the annual data for 1958-1962 have been revised. Because of the shift in recent years from instruments which are classified in industry 3811 to complete systems which are classified in industry 3662, the year-to-year changes are of dubious validity for the industries considered separately. The two industries taken in combination however, would yield significant measures of activity in the general area.

# INSTRUMENTS AND RELATED PRODUCTS: MAJOR GROUP 38

Value Added by Manufacture by State: 1963

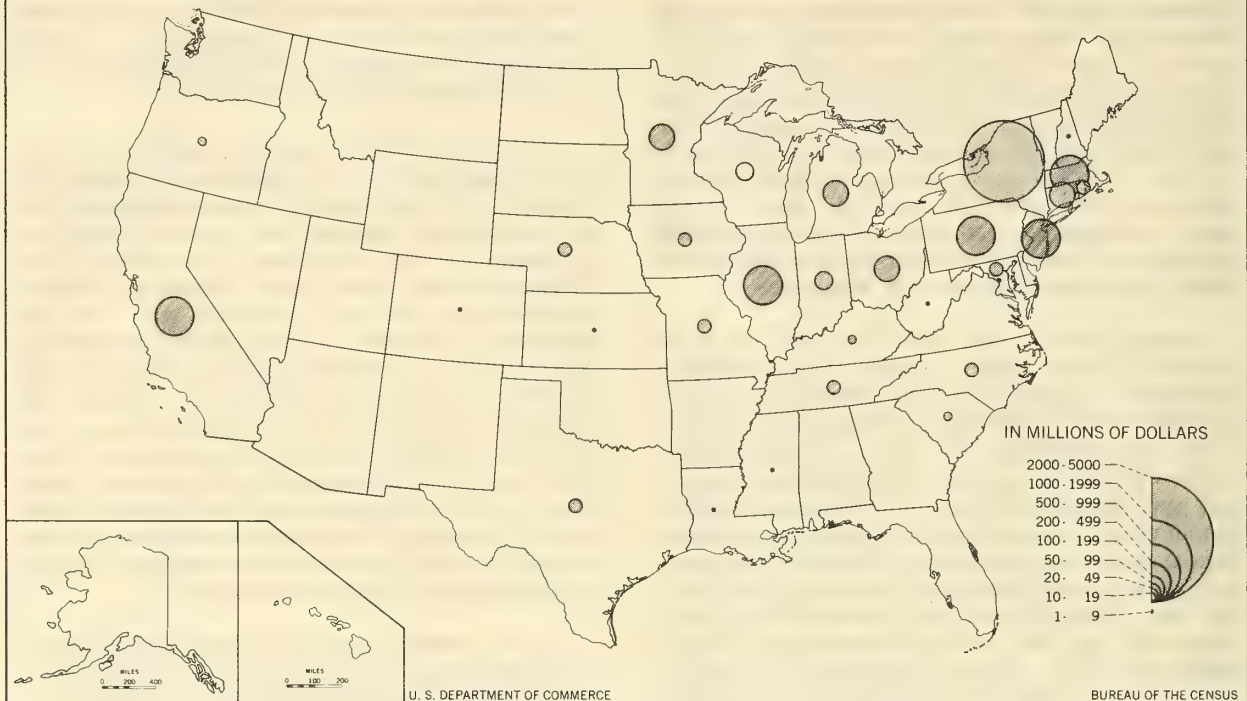

TABLE 1. General Statistics: 1963 and Earlier Years

Year and item	Establishments		All employees <sup>1</sup>		Production workers			Value added by manufacture, adjusted <sup>2</sup>	Cost of materials <sup>3</sup>	Value of shipments <sup>3</sup>	Capital expenditures, new <sup>4</sup>

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not applicable.

<sup>1</sup>The figures for 1939 through 1963 include data for employees of manufacturing establishments who are engaged in distribution and construction work. The extent to which data for such employees are included in the figures for earlier years is not known.

<sup>2</sup>For the period 1954 to 1963, figures represent adjusted value added by manufacture and for earlier years, unadjusted value added. Adjusted value added is equal to value of shipments (including resales of finished products) less cost of finished products, materials, supplies, fuel, electric energy and contract work, plus the net change in the value of finished products and work-in-process inventories between the beginning and end of the year, without adjustment for price changes. Unadjusted value added is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. See Introduction, "Value Added by Manufacture."

<sup>3</sup>The total value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry classification. For a more complete explanation, see Introduction.

<sup>4</sup>The figures for 1958 to 1963 include expenditures for plants under construction and not yet in operation.

<sup>5</sup>The figures for 1947, 1954, and later years include establishments primarily engaged in the manufacture of automatic temperature controls.

<sup>6</sup>In addition to data for operating establishments, figures for employment and payroll for manufacturing central administrative offices and auxiliary units are shown for the years 1949 to 1953 in the annual survey of manufacturing volumes. Data for these units are not available for the years 1955 to 1957, 1959 to 1962, or prior to 1949.

<sup>7</sup>Figures for 1958 to 1963 for operating manufacturing establishments are not strictly comparable with prior years due to revisions of the Standard Industrial Classification System. Prior to 1958, data for the following commodities were excluded: laboratory precision balances; laboratory furniture; revolution counters; operating room and other hospital furniture; surgical corsets; and hearing aids. Establishments primarily engaged in the manufacture of sanitary napkins and tampons are included prior to 1958.

<sup>8</sup>These figures represent estimates derived from a representative sample of manufac-

turing establishments canvassed in the annual survey of manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

<sup>9</sup>The figures for 1939 and later years are not strictly comparable with those for earlier years. Statistics for 1939 and later years (a) include data for establishments primarily engaged in manufacture of thermostats and gauges, and (b) exclude data for establishments primarily engaged in the manufacture of time-recording stamps and machines. Value added by manufacture for 1939 on a basis strictly comparable with 1937 was \$314.1 million.

<sup>10</sup>The figures for 1937 to 1954 include, whereas those for earlier years exclude, data for establishments primarily engaged in the manufacture of certain mechanical measuring instruments. Value added by manufacture for 1937, excluding data for these establishments and on a basis comparable with 1935, was \$294.5 million.

<sup>11</sup>The figures for 1935 to 1954 include, whereas those for 1933 and earlier years exclude, data for establishments primarily engaged in manufacture of certain dental equipment and supplies (chairs, cabinets, and electrical devices).

<sup>12</sup>The figures for 1929 to 1954 exclude, whereas those for earlier years include, data for establishments primarily engaged in manufacture of gas machines. Value added by manufacture for 1929, including data for these establishments and on a basis comparable with 1927, was \$306.3 million.

<sup>13</sup>The figures for 1927 to 1954 exclude, whereas those for earlier years include, data for dental laboratories operating on a custom basis. Value added by manufacture for 1927 including data for these laboratories and on a basis comparable with 1925, was \$280.3 million.

<sup>14</sup>The figures for 1899 to 1923 include, whereas those for later years exclude, data for establishments primarily engaged in grinding lenses for spectacles and eyeglasses to individual prescription.

<sup>15</sup>The figures for 1899 to 1909 exclude, whereas those for 1914 and later years include, data for establishments primarily engaged in manufacture of motion-picture machines. Value added by manufacture for 1914, excluding data for such establishments, was \$96.4 million.

TABLE 2. General Statistics, by Geographic Areas: 1963 and 1958

<sup>1</sup>The value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry. For a more complete explanation, see Introduction.

## INSTRUMENTS; SURGICAL, DENTAL, AND OPHTHALMIC GOODS

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3811—Engineering, Laboratory, and Scientific and Research Instruments and Associated Equipment
- 3821—Mechanical Measuring and Controlling Instruments, Except Automatic Temperature Controls
- 3822—Automatic Temperature Controls
- 3831—Optical Instruments and Lenses
- 3841—Surgical and Medical Instruments and Apparatus
- 3842—Orthopedic, Prosthetic, and Surgical Appliances and Supplies
- 3843—Dental Equipment and Supplies
- 3851—Ophthalmic Goods

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

Each of these industries is characterized by a wide variety of products. However, most of the individual establishments tend to specialize in a single product or group of similar products. Many of the categories include hundreds of different specific products. For example, data for most types of laboratory and scientific instruments and apparatus are presented as a single item. The products included in many of these items are highly diversified and range from very simple hand tools to highly complex instruments such as mapping equipment.

Establishments in the instrument industries (particularly industries 3811, 3821, and 3831 covered in this report and industry 3611, Electric Measuring Instruments, which includes plants primarily engaged in manufacturing instruments for indicating, measuring, and recording electrical quantities and characteristics), produce a wide variety of complex items requiring skilled workmanship and an unusually high degree of precision. Plants of this type have a higher ratio of wages to value of shipments than are found in other industries. The instrument industries have also experienced significant technological advances which have intensified even further the need for the high degree of precision.

Industries 3842, Surgical Appliances and Supplies, and 3843, Dental Equipment and Supplies, include many establishments which specialize in a single line of appliances or

supplies. These establishments perform a wide variety of manufacturing processes and consume different types of materials. However, they are brought together into these two industries by the use to which their products are put.

Separate descriptions of these industries are given below.

#### 3811--ENGINEERING, LABORATORY, AND SCIENTIFIC AND RESEARCH INSTRUMENTS AND ASSOCIATED EQUIPMENT

This industry comprises establishments primarily engaged in manufacturing laboratory, scientific, and engineering instruments such as nautical, navigational, aeronautical, surveying, drafting, and instruments for laboratory work and scientific research (except optical instruments--industry 3831). Establishments primarily engaged in manufacturing surgical and medical instruments are classified in industry 3841; dental instruments and equipment in industry 3843; mechanical measuring and controlling instruments in industry 3821; machinists' precision measuring tools in industry 3545; instruments for indicating, measuring, and recording electrical quantities and characteristics in industry 3611; watches and clocks in industry 3871; and measuring and dispensing pumps in industry 3586. For a detailed list of products of industry 3811, refer to tables 6A-1 and 6A-2.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

During the period 1958-1963 reports received from some large establishments indicated a change from the manufacture primarily of such individual instruments as those used for indicating air speed, rate-of-climb, angle-of-yaw and similar flight characteristics, and gyroscopes which are sold separately, to primarily manufacturing complete instrumentation systems for navigation, guidance, check-out, etc. The major impact of this change has been on the classification of products and, consequently, the SIC coding of these large establishments. This change in reporting was brought to light by the initiation by the Census Bureau of detailed commodity surveys in the fields of electronic products and instrumentation. The electronic and associated products report (MA-36N) was started covering the year 1961 and the instruments series (MA-38B) was broadened for 1963 to encompass most types of instruments following an introductory report for 1961 and 1962 covering industrial process instruments and test and measuring equipment. Annual statistics from both reports are published in the Current Industrial Reports Series.

In both the 1958 Census of Manufactures and the Annual Survey of Manufactures from 1959 through 1962 the classification of systems was not sufficiently spelled out in the product inquiries of these programs, especially at the 5-digit product class level. However, with the introduction in the MA-36N and MA-38B surveys of detailed 7-digit product information which itself is used to build up to broader 5-digit product class totals, these totals, although they should be the same as those reported on Form MA-100 (Annual Survey of Manufactures), have differed. The respondents affected have identified the proportion of earlier years' output which consisted of systems rather than instruments as such, which was the manner in which the items were originally reported.

In view of the above, the annual data for 1958-1962 have been revised, as indicated with the symbol "r" in the appropriate tables. Because of the shift in recent years from instruments which are classified in industry 3811 to complete systems which are classified in industry 3662, the year-to-year changes are of dubious validity for the industries considered separately. The two industries taken in combination however, would yield significant measures of activity in the general area.

Value of shipments and other receipts of the Scientific Instruments Industry totaled \$554 million. This amount included shipments of scientific instruments (primary products) valued at \$406 million, shipments of other products (secondary products) valued at \$80 million, and miscellaneous receipts (mainly resales) at \$68 million.

This industry's shipments of scientific instruments represented 84 percent of its total product shipments. The industry specialization ratio in 1958 was 78 percent. Secondary products shipped by this industry in 1963 consisted mainly of industrial process instruments (\$6 million), and aircraft engine instruments, except flight (\$6 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 46 percent of the total industry shipments are represented by plants specializing in product class 38111, Aircraft, flight, nautical and navigational instruments and automatic pilots; 28 percent in 38112, Laboratory and scientific instruments; and 23 percent in 38113, Surveying and drafting instruments and laboratory furniture.

Shipments of scientific instruments by this industry represented 56 percent of all shipments of these products (\$722 million) by all industries. In 1958 the coverage ratio was 67 percent. Other industries shipping scientific instruments consisted mainly of industry 3662, Radio, TV Communications Equipment, \$175 million.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product classes of industry 3811, e.g., Aircraft, flight, nautical, and navigational instruments and automatic pilots (38111), 44 percent; and Surveying and drafting instruments and laboratory furniture (38113), 91 percent.

#### 3821—MECHANICAL MEASURING AND CONTROLLING INSTRUMENTS, EXCEPT AUTOMATIC TEMPERATURE CONTROLS

This industry comprises establishments primarily engaged in the manufacture of industrial process instruments for indicating, recording, measuring and controlling temperature (except automatic temperature controls—industry 3822), pressure and vacuum, fluid flow and liquid level, mechanical motion, rotation, humidity, density, acidity, alkalinity, and combustion; dial pressure gauges; physical property testing apparatus such as hardness, tension, compression, torsion, ductility; and elasticity testing apparatus. For a detailed list of products of industry 3821, refer to tables 6A-1 and 6A-2.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Mechanical Measuring Devices Industry totaled \$1,143 million. This amount included shipments of mechanical measuring devices (primary products) valued at \$819 million, shipments of other products (secondary products) valued at \$207 million, and miscellaneous receipts (mainly resales) at \$117 million.

This industry's shipments of mechanical measuring devices represented 90 percent of its total product shipments. The industry specialization ratio in 1958 was 86 percent. Secondary products shipped by this industry in 1963 consisted mainly of carburetors, pistons, and other machine shop products (\$20-\$50 million), and miscellaneous electrical measuring instruments (\$17 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 52 percent of the total industry shipments are represented by plants specializing in industrial process instruments (38213).

Shipments of mechanical measuring devices by this industry represented 83 percent of all shipments of these products (\$984 million) by all industries. In 1958 the coverage ratio was 76 percent. Other industries shipping mechanical measuring devices consisted mainly

of industry 3494, Valves and Pipe Fittings, \$9 million; and industry, 3811, Scientific Instruments, \$13 million.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product classes of industry 3821, e.g., integrating meters, nonelectrical type (38212), 98 percent; motor vehicle instruments, except electric (38214), 66 percent; and aircraft engine instruments, except flight (38211), 62 percent.

#### 3822—AUTOMATIC TEMPERATURE CONTROLS

This industry comprises establishments primarily engaged in manufacturing automatic temperature controls activated by pressure, temperature, level, flow, time, or humidity (including pneumatic controls) of the type principally used as components of air conditioning, refrigeration, and comfort heating, or as components of household appliances. Establishments primarily engaged in manufacturing industrial electric controls are classified in industry 3622. For a detailed list of products of industry 3822, refer to table 6A-2, product codes 3822014 to 3822018.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Automatic Temperature Controls Industry totaled \$527 million. This amount included shipments of automatic temperature controls (primary products) valued at \$409 million, shipments of other products (secondary products) valued at \$91 million, and miscellaneous receipts (mainly resales) at \$27 million.

This industry's shipments of automatic temperature controls represented 82 percent of its total product shipments. The industry specialization ratio in 1958 was 88 percent. Secondary products shipped by this industry in 1963 consisted mainly of industrial controls (\$13 million), and metal valves for piping systems (\$9 million).

Shipments of automatic temperature controls by this industry in 1963 represented 95 percent of all shipments of these products (\$432 million) by all industries. In 1958 the coverage ratio was 94 percent. Other industries shipping automatic temperature controls consisted mainly of industry 3821, Mechanical Measuring Devices, \$10 million; and industry 3494, Valves and Pipe Fittings, \$2 million.

#### 3831—OPTICAL INSTRUMENTS AND LENSES

This industry comprises establishments primarily engaged in the production of optical lenses and prisms, and in manufacturing optical instruments such as microscopes, telescopes, field and opera glasses; and optical measuring and testing instruments such as refractometers, spectrometers, spectroscopes, colorimeters, and polariscopes. Establishments primarily engaged in manufacturing eyeglass lenses, frames, or fittings are classified in industry 3851; and those engaged in manufacturing sighting and fire-control instruments, but not engaged in manufacturing optical components, in industry 1941. For a detailed list of products of industry 3831, refer to table 6A-2, product codes 3831131 to 3831262.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Optical Instruments and Lenses Industry totaled \$196 million. This amount included shipments of optical instruments and lenses (primary products) valued at \$165 million, shipments of other products (secondary products) valued at \$17 million, and miscellaneous receipts (mainly resales) at \$14 million.

This industry's shipments of optical instruments and lenses represented 90 percent of its total product shipments. The industry specialization ratio in 1958 also was 90 percent. Secondary products shipped by this industry in 1963 consisted mainly of still picture equipment (\$3 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 75 percent of the total industry shipments are represented by plants specializing in product classes 38311, Optical and analytical instruments and lenses; and 21 percent in 38312, Sighting and fire-control equipment made from lenses, prisms, etc., produced in the same plant.

Shipments of optical instruments and lenses by this industry represented 61 percent of all shipments of these products (\$270 million) by all industries. In 1958 the coverage ratio was 66 percent. Other industries shipping optical instruments and lenses consisted mainly of industry 3662, Radio, TV Communications Equipment, \$10-\$20 million.

#### 3841—SURGICAL AND MEDICAL INSTRUMENTS AND APPARATUS

This industry comprises establishments primarily engaged in manufacturing medical, surgical, ophthalmic, and veterinary instruments and apparatus. Establishments primarily engaged in manufacturing surgical and orthopedic appliances are classified in industry 3842; and electrotherapeutic, electromedical, and X-ray apparatus in industry 3693. For a detailed list of products of industry 3841, refer to table 6A-1, product codes 3841012 to 3841095.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Surgical and Medical Instruments Industry totaled \$284 million. This amount included shipments of surgical and medical instruments (primary products) valued at \$215 million, shipments of other products (secondary products) valued at \$29 million, and miscellaneous receipts (mainly resales) at \$40 million.

This industry's shipments of surgical and medical instruments represented 88 percent of its total product shipments. The industry specialization ratio in 1958 was 83 percent. Secondary products shipped by this industry in 1963 consisted mainly of surgical, orthopedic, and prosthetic appliances and supplies (\$3 million), and furniture and fixtures, n.e.c. (\$3 million).

Shipments of surgical and medical instruments by this industry represented 74 percent of all shipments of these products (\$291 million) by all industries. In 1958 the coverage ratio was 76 percent. Other industries shipping surgical and medical instruments consisted mainly of industry 2834, Pharmaceutical Preparations, \$22 million; and industry 3842, Surgical Appliances and Supplies, \$6 million.

The production index for the primary products of the industry increased to 254 in 1963 from the 1958 level of 117. The unit value index for 1963 was 109 compared to 112 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3842—ORTHOPEDIC, PROSTHETIC, AND SURGICAL APPLIANCES AND SUPPLIES

This industry comprises establishments primarily engaged in manufacturing orthopedic, prosthetic, and surgical appliances and supplies, arch supports, and other foot appliances; fracture appliances, elastic hosiery, abdominal supporters, braces, and trusses; bandages; surgical gauze and dressings; sutures; adhesive tapes and medicated plasters; and personal

safety appliances and equipment. Establishments primarily engaged in manufacturing surgical and medical instruments are classified in industry 3841. Establishments primarily engaged in manufacturing appliances and in the personal fitting to the individual prescription of a physician are classified in trade industries. For a detailed list of products of industry 3842, refer to table 6A-1, product codes 3842111 to 3842400.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Surgical Appliances and Supplies Industry totaled \$597 million. This amount included shipments of surgical appliances and supplies (primary products) valued at \$415 million, shipments of other products (secondary products) valued at \$105 million, and miscellaneous receipts (mainly resales) at \$77 million.

This industry's shipments of surgical appliances and supplies represented 80 percent of its total product shipments. The industry specialization ratio in 1958 was 84 percent. Secondary products shipped by this industry in 1963 consisted mainly of pharmaceutical preparations affecting parasitic and infective diseases, for human use (\$10-\$20 million), and cosmetic and toilet preparations (\$10-\$20 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 73 percent of the total industry shipments are represented by plants specializing in product class 38421; Surgical, orthopedic and prosthetic appliances and supplies; and 18 percent in 38423, Personal industrial safety devices.

Shipments of surgical appliances and supplies by this industry represented 90 percent of all shipments of these products (\$462 million) by all industries. In 1958 the coverage ratio was also 90 percent. Other industries shipping surgical appliances and supplies consisted mainly of industry 2641, Paper Coating and Glazing, \$10 million; and industry 3851, Ophthalmic Goods, \$5 million.

The production index for the primary products of the industry increased to 155 in 1963 from the 1958 level of 118. The unit value index for 1963 was 104 compared to 107 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3843—DENTAL EQUIPMENT AND SUPPLIES

This industry comprises establishments primarily engaged in manufacturing artificial teeth, dental metals, alloys and amalgams, and a wide variety of equipment, instruments, and supplies used by dentists, dental laboratories, and dental colleges. Dental laboratories constructing artificial dentures, bridges, inlays and other dental restorations on specifications from dentists are classified in service industries. For a detailed list of products of industry 3843, refer to table 6A-1, product codes 3843011 to 3843098.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Dental Equipment and Supplies Industry totaled \$148 million. This amount included shipments of dentalequipment and supplies (primary products) valued at \$128 million, shipments of other products (secondary products) valued at \$9 million, and miscellaneous receipts (mainly resales) at \$11 million.

This industry's shipments of dental equipment and supplies represented 94 percent of its total product shipments. The industry specialization ratio in 1958 was 95 percent. Secondary products shipped by this industry in 1963 consisted mainly of surgical and medical instruments (\$2-\$5 million).

Shipments of dental equipment and supplies by this industry represented 92 percent of all shipments of these products (\$140 million) by all industries. In 1958 the coverage ratio was 92 percent. Other industries shipping dental equipment and supplies consisted mainly of industry 3842, Surgical Appliances and Supplies, \$5-\$10 million.

The production index for the primary products of the industry increased to 134 in 1963 from the 1958 level of 118. The unit value index for 1963 was 131 compared to 118 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3851—OPHTHALMIC GOODS

This industry comprises establishments primarily engaged in manufacturing ophthalmic frames, lenses, and sunglass lenses. Establishments primarily engaged in manufacturing slit lamps are classified in industry 3841, and molded glass blanks in industry 3229. Establishments primarily engaged in grinding lenses and fitting glasses to prescription are classified in trade. For a detailed list of products of industry 3851, refer to table 6A-1, product codes 3851012 to 3851098.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Ophthalmic Goods Industry totaled \$273 million. This amount included shipments of ophthalmic goods (primary products) valued at \$226 million, shipments of other products (secondary products) valued at \$37 million, and miscellaneous receipts (mainly resales) at \$10 million.

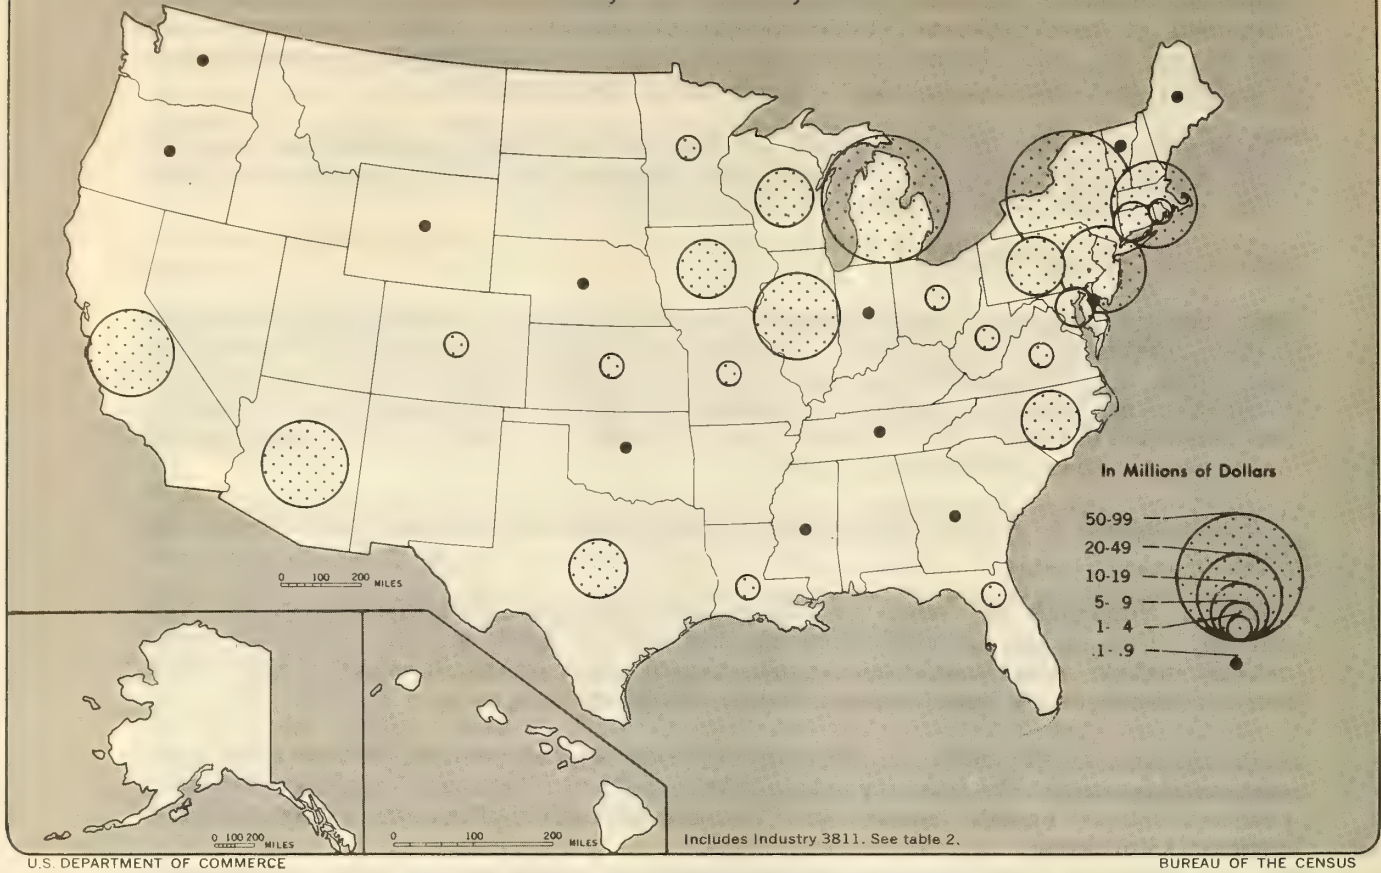

This industry's shipments of ophthalmic goods represented 86 percent of its total product shipments. The industry specialization ratio in 1958 was 87 percent. Secondary products shipped by this industry in 1963 consisted mainly of personal industrial safety devices (\$5 million).

Shipments of ophthalmic goods by this industry represented 92 percent of all shipments of these products (\$244 million) by all industries. In 1958 the coverage ratio was 98 percent. Other industries shipping ophthalmic goods consisted mainly of industry 2821, Plastics Materials and Resins, and industry 3861, Photographic Equipment, both over \$2 million each.

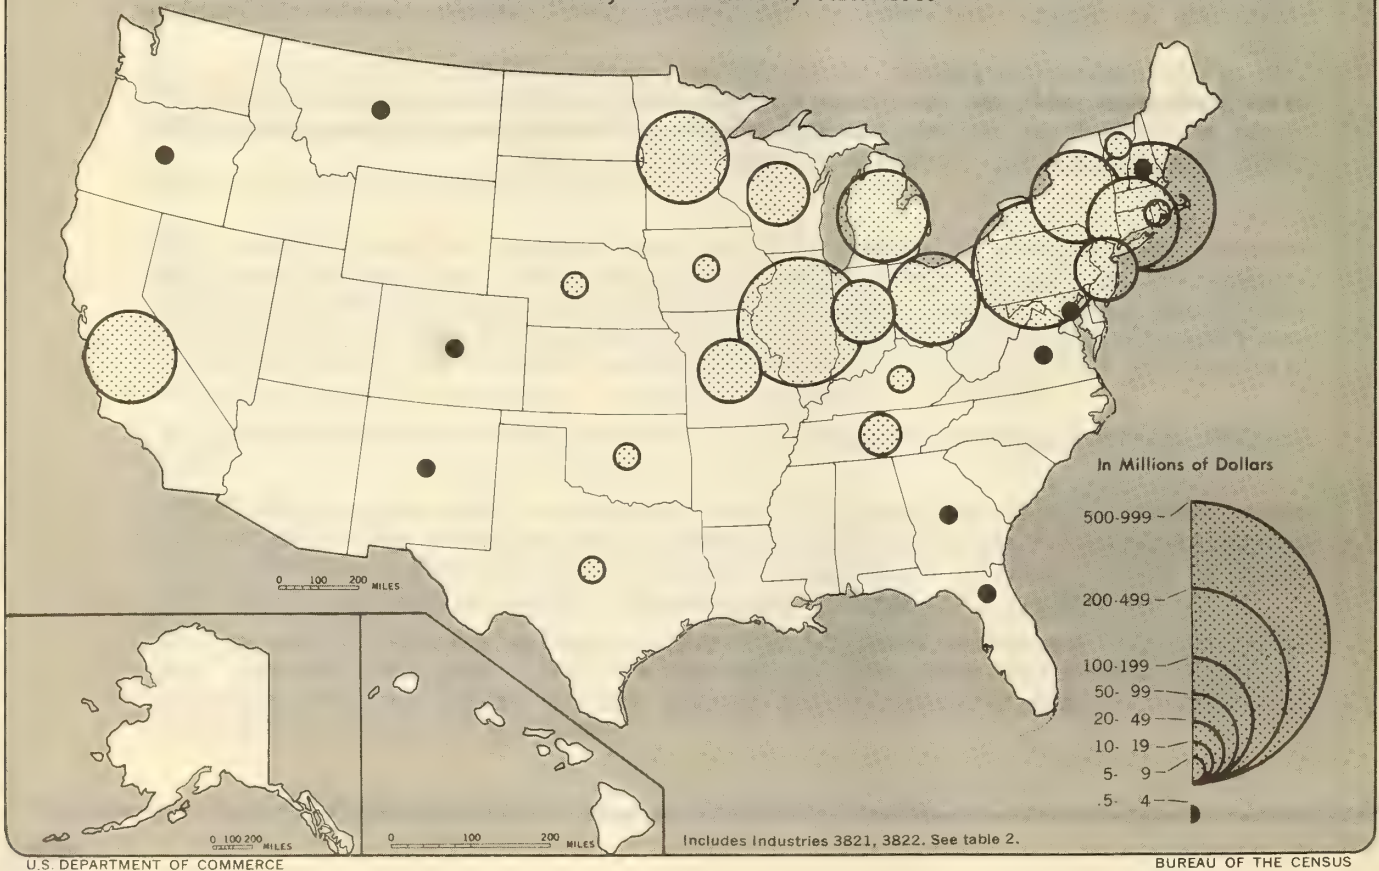

The production index for the primary products of the industry increased to 139 in 1963 from the 1958 level of 109. The unit value index for 1963 was 126 compared to 113 in 1958. Both indexes were computed on a basis of 1954 = 100.

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: All employees: For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). Production workers: For 1947 and prior years figures represent an average of 12 monthly figures. Value added: Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. Cost of materials: Cost of materials prior to 1958 (except 1954) excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. Value of shipments: Value of shipments for years prior to 1958 (except 1954) excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. <sup>1</sup>Revised.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>2</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data. See text for explanation concerning shift from individual instruments to systems.

<sup>3</sup>A revision in the definition of this industry was introduced in the 1957 Standard Industrial Classification so that the industry is not comparable. The 1957 and earlier figures are on the old SIC definition of the industry.

<sup>4</sup>Data for Alaska and Hawaii are not included.

<sup>5</sup>A revision in the definition of this industry was introduced in the 1957 Standard Industrial Classification. Accordingly, the data for 1958-1963 are not comparable with those for earlier years.

Salaries and wages/Adjusted value added.....	.58	.53	.51	.60	.49	.44	.48	.54

Note: Detailed figures may not add to totals because of independent rounding or independent dropping of fractions of thousands rather than rounding in computer operations. See Introduction for an explanation of terms used.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>The proportion of product shipments (both primary and secondary) of the industry represented by primary products.

<sup>2</sup>The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.

(D) Withheld to avoid disclosure. Data for this item are included in the underscored figures at the left.

TABLE 5A. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		(1,000)	(1,000)	(1,000)	(1,000)	Col. B Col. B+C (percent)	(1,000)	(1,000)	(1,000)	Col. B Col. F (percent)

Note: See Introduction for an explanation of terms used.

Standard Note: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. Revised.

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars except for ranges (shown in parentheses) which are expressed in millions of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products); (b) products classified in other industries (secondary products); and (c) miscellaneous

receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

See footnotes at end of table.

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry:  
1963—Continued

Prod. class code	Class of products and miscellaneous receipts	All industries	Surgical appliances and supplies (SIC 3842)	Other industries
SURGICAL APPLIANCES AND SUPPLIES INDUSTRY--Continued				
Secondary products--Continued				
	Other secondary products.....	(X)	94,564	(X)
22991	Bonded fiber fabrics (nonwoven textiles, including nonwoven ribbons for gift tyings).....	(X)	(over 2)	(X)
26472	Sanitary tissue health products.....	(X)	(over 2)	(X)
28346	Pharmaceutical preparations acting on the skin, for human use.....	(X)	(5-10)	(X)
28348	Pharmaceutical preparations affecting parasitic and infective diseases, for human use.....	(X)	(10-20)	(X)
28443	Hair preparations (including shampoos).....	(X)	(over 2)	(X)
28445	Other cosmetics and toilet preparations.....	(X)	(10-20)	(X)
30695	Mechanical rubber goods, n.e.c.....	(X)	(over 2)	(X)
31414	Women's dress, work, and play shoes.....	(X)	(over 2)	(X)
35319	Other construction machinery and equipment, including construction machinery parts, n.e.c....	(X)	(over 2)	(X)
38213	Industrial process instruments.....	(X)	(2-5)	(X)
38430	Dental instruments, equipment, and supplies.....	(X)	(5-10)	(X)
	Miscellaneous receipts.....	(X)	76,742	(X)
	Contract work.....	(X)	3,054	(X)
	Resales.....	(X)	62,226	(X)
	Receipts for repair work.....	(X)	7,400	(X)
	Other miscellaneous receipts.....	(X)	4,062	(X)
Listings of other industries with over \$2 million shipments of each primary product class:				
38421	2641 Paper coating and glazing.....	(X)	(X)	10,445
	3069 Rubber products, n.e.c.....	(X)	(X)	(2-5)
	3841 Surgical and medical instruments.....	(X)	(X)	3,063
38423	3069 Fabricated rubber products, n.e.c.....	(X)	(X)	(2-5)
	3851 Ophthalmic goods.....	(X)	(X)	5,137
38424	3651 Radio and TV receiving sets.....	(X)	(X)	(over 2)
DENTAL EQUIPMENT AND SUPPLIES INDUSTRY				
	Total shipments and receipts of the industry.....	(X)	147,805	(X)
38430	Dental instruments, equipment, and supplies.....	139,532	127,693	11,839
	Secondary products.....	(X)	8,801	(X)
34990	Fabricated metal products, n.e.c.....	(X)	(over 2)	(X)
38410	Surgical and medical instruments and apparatus.....	(X)	(2-5)	(X)
	Miscellaneous receipts.....	(X)	11,311	(X)
	Contract work.....	(X)	964	(X)
	Resales.....	(X)	8,445	(X)
	Other miscellaneous receipts.....	(X)	1,902	(X)
Listing of other industries with over \$2 million shipments of dental equipment and supplies:				
38430	3842 Surgical appliances and supplies.....	(X)	(X)	(5-10)
OPHTHALMIC GOODS INDUSTRY				
	Total shipments and receipts of the industry.....	(X)	272,687	(X)
38510	Ophthalmic goods.....	244,143	225,702	18,441
	Secondary products.....	(X)	37,421	(X)
38423	Personal industrial safety devices.....	(X)	5,137	(X)
	All other secondary products.....	(X)	32,284	(X)
31720	Personal leather goods, except handbags and purses.....	(X)	(over 2)	(X)
38311	Optical instruments and lenses, except sighting and fire-control equipment.....	(X)	(over 2)	(X)
38410	Surgical and medical instruments and apparatus.....	(X)	(over 2)	(X)
	Miscellaneous receipts.....	(X)	9,564	(X)
	Receipts for work done for others on their own materials (contract work).....	(X)	1,134	(X)
	Resales.....	(X)	6,235	(X)
	All other miscellaneous receipts.....	(X)	2,195	(X)
Listing of other industries with over \$2 million shipments of ophthalmic goods:				
	2821 Plastics materials and resins.....	(X)	(X)	(over 2)
	3861 Photographic equipment.....	(X)	(X)	(over 2)

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

TABLE 6A-1. Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958

Product code	Product	Value of shipments including interplant transfers (\$1,000)	
		1963	1958
3811- --	SCIENTIFIC INSTRUMENTS, TOTAL.....	722,105	<sup>r</sup> 758,639
38111 10	Aircraft, flight, nautical, and navigational instruments and automatic pilots: As reported in the census of manufactures..... As reported on Census Annual Form MA-38B (see table 6A-2).....	<sup>1</sup> 2410,591 <sup>1</sup> 2346,074	<sup>r</sup> 509,853 (X)

38510 17	Temples (all types), finished.....	1,000 pairs....	24,665	24,173	26,144	25,736
38510 18	Centers, oxfords, parts, trim, unfinished fronts and temples, etc.....		(X)	6,836	(X)	6,774
38510 24	Ophthalmic spectacles and eyeglasses (frames and mountings of all types when sold corrective lenses inserted-with or without decoration).....	1,000 units....	3,341	4,797	3,449	3,500
	Ophthalmic focus lenses:					
38510 32	Single vision lenses (ground and polished and moulded blanks)....	1,000 pairs....	22,058	27,439	14,553	13,721
38510 35	Multifocal lenses (bifocals and trifocals; finished and semi-finished and moulded blanks).....	..do.....	14,477	42,592	13,899	28,098
38510 41	Industrial goggles, eye protectors, welding circles and plates, mountings, and parts.....		(X)	22,977	(X)	13,923
38510 51	Sun or glare glasses and sungoggles, complete.....	1,000 units....	32,619	45,042	16,780	14,445
38510 98	Other ophthalmic goods and accessories (sunglass frames, single readers and magnifiers, holders, gas mask inserts, etc.).....		(X)	17,472	(X)	9,231
38510 00	Ophthalmic goods, n.s.k.....		(X)	8,969	(X)	11,263

Standard notes: - Represents zero. (X) Not applicable. <sup>R</sup>Revised.

n.s.k. Not specified by kind.

<sup>1</sup>For these products, figures were also collected in the Bureau of the Census commodity survey program. In lieu of asking for detailed statistics on these products in the census of manufactures, respondents were asked to report only value of shipments for specified groups of products for which separate figures had previously been collected in the commodity survey. In most cases, the value figures reported in the census of manufactures for each group of products agreed closely with the corresponding figures reported in the commodity survey. However, there were minor differences between the census figures and the commodity survey figures. These variations, except as noted below were due primarily to the following reasons:

- Better coverage in census of manufactures program. Coverage in the annual surveys will be supplemented by adding respondents not currently in the survey but making the specified product according to their census of manufactures report.
- Use of different reporting periods (calendar year vs. fiscal year).
- Use of estimates in reporting figures on the commodity survey, whereas census of manufactures figures generally represent more exact shipment figures.

See table 6A-2 for more detailed product data.

<sup>2</sup>The major difference between these two figures concerns the method of reporting parts and components for aircraft, flight, nautical, and navigational instruments and automatic pilots. Whereas many respondents have included such parts under the broad heading in the census, parts were not covered in the 1963 MA-38B survey. While the exact value of such parts cannot be derived, it is approximately represented by the difference between the two sets of figures.

<sup>3</sup>The major difference between these two figures concerns the method of reporting parts and components for industrial process instruments. Whereas many respondents have included such parts under the broad heading in the census, parts were not covered in the 1963 MA-38B survey. While the exact value of such parts cannot be derived, it is approximately represented by the difference between the two sets of figures.

<sup>4</sup>1963 product class codes 38311 and 38312 were collected as a single product class in 1958.

<sup>5</sup>Product code 3842161 is included with product code 3842198, "Other surgical and orthopedic items" to avoid disclosing figures for individual companies.

TABLE 6A-2. Selected Instruments and Related Products—Quantity and Value of Shipments: 1963 and 1958

Product code	Product	Total shipments including interplant transfers

Standard Notes: -Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. Revised. n.s.k. Not specified by kind.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>The 1954 value of shipments does not include a total for product code 3811000, scientific instruments, n.s.k., estimated at less than \$3 million.

<sup>3</sup>See text for explanation regarding shift from individual instruments to systems.

TABLE 6D. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. Revised. (Z) Shipments of less than \$1 million reported.

<sup>1</sup>For the specified product classes, shipments of \$1 million or more were reported for the States listed, but the exact figures are withheld to avoid disclosure of individual company figures: 38111, Connecticut, Indiana, Michigan, Wisconsin, Minnesota, Iowa, Kansas, Maryland, Virginia, North Carolina, Florida, Texas, Arizona, Washington, and California; 38112, Rhode Island, Connecticut, Wisconsin, Missouri, Louisiana, Colorado, Arizona, Oregon, and California; 38113, Rhode Island, Ohio, Virginia, West Virginia, North Carolina, Louisiana, Colorado, and California; 38211, Vermont, Massachusetts, Connecticut, New Jersey, Pennsylvania, Michigan, Minnesota, Iowa, Texas and California; 38212, Massachusetts, Connecticut, New York, Illinois, Wisconsin, Nebraska, Georgia, Tennessee, Oklahoma, and Texas; 38213, New Hampshire, Vermont, Rhode Island, Missouri, Nebraska, Virginia, Georgia, Kentucky, Oregon, and California; 38214, Connecticut and Indiana; 38216, Massachusetts, Rhode Island, New Mexico, and California; 38311, New Hampshire, Massachusetts, Connecticut, and Michigan; 38312, New Hampshire, Massachusetts, New York, Pennsylvania, Michigan, West Virginia, Texas, and California; 38410, Missouri, Nebraska, Maryland, Georgia, Florida, Mississippi, and Colorado; 38421, Rhode Island, New Jersey, Pennsylvania, South Carolina, Kentucky, and Tennessee; 38423, Massachusetts, Rhode Island, Connecticut, Michigan, West Virginia, and California.

<sup>2</sup>Shipments of \$1 million or more were reported, but exact figures are withheld to avoid disclosure of individual company figures.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.s.k. Not specified by kind. Revised.

<sup>1</sup>For 1958 and 1963 material codes 331013 and 331017 are included with 331019 to avoid disclosing figures for individual companies.

<sup>2</sup>Represents (a) total cost of materials for small establishments reporting on "short forms" where separate figures for individual materials consumed were not requested and (b) total cost of materials reported for those establishments which failed to report costs of individual materials on "standard forms."

<sup>3</sup>For 1963, 331013 combined with 331019.

Aggregate horsepower per 100 production workers.....	242	390	266	204	195	335	332	253

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than 500 horsepower.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)

Note: Very small establishments were not requested to report their metalworking operations and, in some instances, a few larger establishments failed to report. The significance of this undercoverage is shown in terms of production-worker employment on the last line of the table below:

Item	Industry		
	3811	3821	3822
Total number of establishments in the industry.....	594	670	104
Number of establishments which reported one or more of the specified operations.....	244	291	58
Percent of industry production workers in these establishments.....	75-80	90-95	95-100
Number of establishments which reported "none" of the operations apply.....	43	39	8
Percent of industry production workers in these establishments.....	5-10	0-5	0-5
Percent of industry production workers in establishments which completed the metalworking operations inquiry.....	80-85	95-100	95-100

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>These size groups are based on the number of employees engaged in each specific operation. They are not based on total employment in the establishment.

## PHOTOGRAPHIC EQUIPMENT; CLOCKS, WATCHES, AND WATCHCASES

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

3861—Photographic Equipment and Supplies

3871—Watches, Clocks, and Parts, Except Watchcases

3872—Watchcases

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1-4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### 3861—PHOTOGRAPHIC EQUIPMENT AND SUPPLIES

This industry comprises establishments primarily engaged in manufacturing (1) photographic apparatus, equipment, parts, attachments, and accessories, such as still and motion picture cameras and projection apparatus; photocopy and microfilm equipment; blueprinting and diatype (white printing) apparatus and equipment; and other photographic equipment; and (2) sensitized film, paper, cloth, and plates and prepared photographic chemicals for use therewith. Establishments primarily engaged in manufacturing photographic paper stock (unsensitized), and paper mats, mounts, easels and folders for photographic use are classified in Major Group 26; photographic lenses in industry 3831; photographic glass in Major Group 32; chemicals for technical purposes, not specifically prepared and packaged for use in photography, in Major Group 28; and photographic flash, flood, enlarger and projection lamps in industry 3641. For a detailed list of products of industry 3861, refer to table 6A, product codes 3861106 to 3861811.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Photographic Equipment Industry totaled \$1,851 million. This amount included shipments of photographic equipment (primary products) valued at \$1,578 million, shipments of other products (secondary products) valued at \$80 million, and miscellaneous receipts (mainly resales) at \$194 million.

This industry's shipments of photographic equipment represented 95 percent of its total product shipments. The industry specialization ratio in 1958 was 94 percent.

Secondary products shipped by this industry in 1963 included 36112, "Testing equipment for testing electrical, radio, and communication circuits and motors" (\$2 million), and 38311, "Optical instruments and lenses, except sighting and fire-control" (\$5 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 45 percent of the total industry shipments are represented by plants specializing in product classes: 38615, Photographic sensitized film and plates, and 19 percent in 38611, Still picture equipment.

Shipments of photographic equipment by this industry represented 97 percent of all shipments of these products (\$1,631 million) by all industries. In 1958, the coverage ratio was 94 percent. An important industry shipping photographic equipment was industry 3831, Optical Instruments and Lenses, Except Sighting and Fire-control, \$3 million.

The production index for the primary products of the industry increased to 177 in 1963 from the 1958 level of 124. The unit value index for 1963 was 119 compared to 111 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3871—WATCHES, CLOCKS, AND PARTS, EXCEPT WATCHCASES

This industry comprises establishments primarily engaged in manufacturing clocks (including electric), watches, mechanisms for clockwork operated devices, and clock and watch parts. This industry includes establishments primarily engaged in assembling clocks and watches from purchased movements and cases. Establishments primarily engaged in manufacturing watch cases are classified in industry 3872, glass crystals in industry 3231, and unbreakable crystals in industry 3079. For a detailed list of products of industry 3871, refer to table 6A, product codes 3871111 to 3871589.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Watches and Clocks Industry totaled \$511 million. This amount included shipments of watches and clocks (primary products), valued at \$386 million, shipments of other products (secondary products) valued at \$83 million, and miscellaneous receipts (mainly resales) at \$42 million.

This industry's shipments of watches and clocks represented 82 percent of its total product shipments. The industry specialization ratio in 1958 was 88 percent. Secondary products shipped by this industry in 1963 included fractional horsepower motors (\$7 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 43 percent of the total industry shipments are represented by plants specializing in 38711, Clocks.

Shipments of watches and clocks by this industry represented 95 percent of all shipments of these products (\$406 million) by all industries. In 1958, the coverage ratio was 95 percent.

The production index for the primary products of the industry increased to 130 in 1963 from the 1958 level of 93. The unit value index for 1963 was 105 compared to 107 in 1958. Both indexes were computed on a basis of 1954 = 100.

### 3872—WATCHCASES

This industry comprises establishments primarily engaged in manufacturing watchcases, for sale as such. Establishments primarily engaged in assembling complete watches by assembling purchased movements with watchcases of their own manufacture are classified in industry 3871. For a detailed list of products of industry 3872, refer to table 6A, product codes 3872011 to 3872071.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Watchcases Industry totaled \$34 million. This amount included shipments of watchcases (primary products) valued at \$28 million, shipments of other products (secondary products) valued at \$4 million, and miscellaneous receipts at \$1 million.

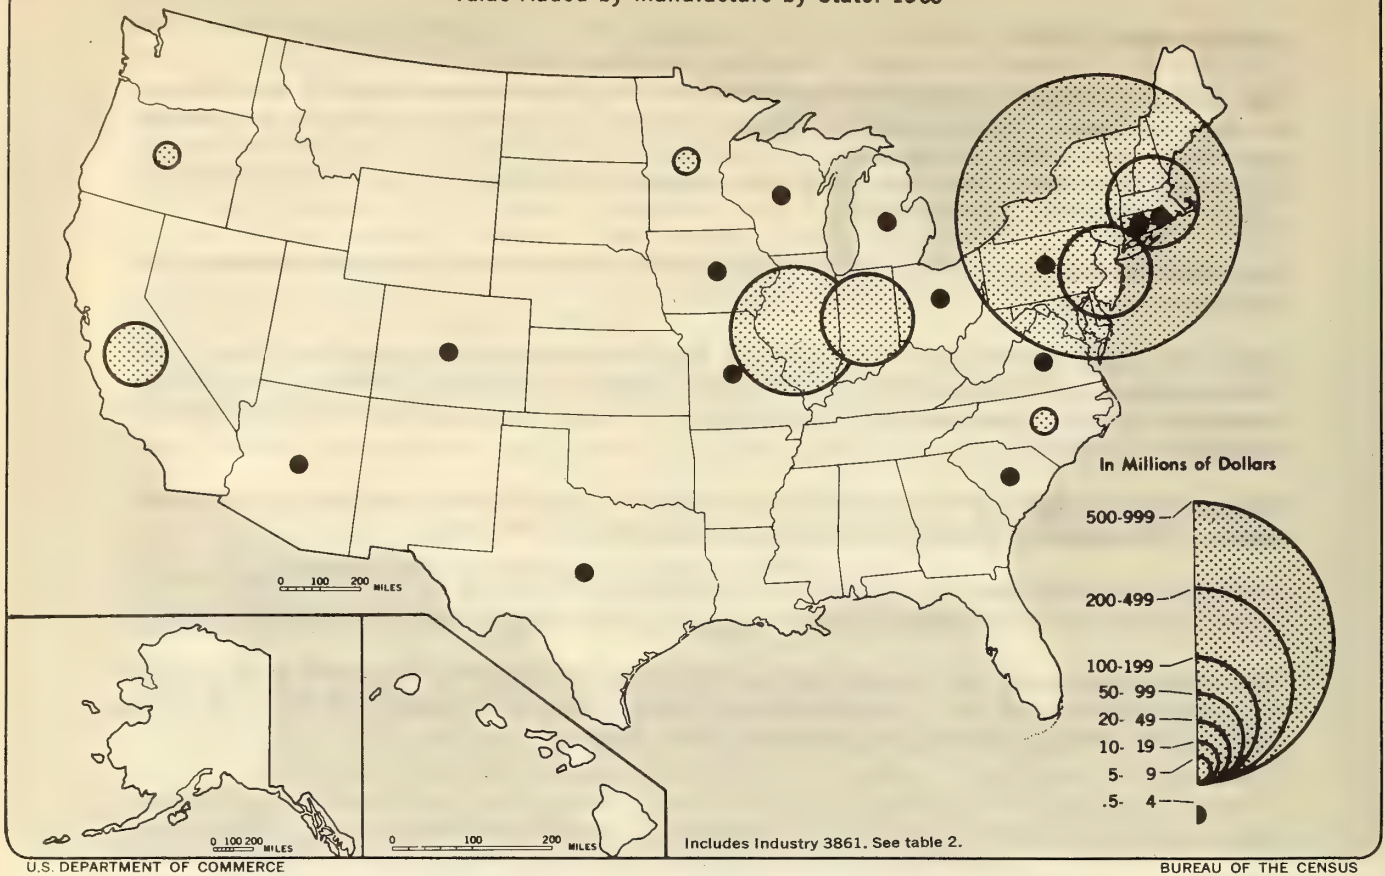

This industry's shipments of watchcases represented 86 percent of its total product shipments. The industry specialization ratio in 1958 was 80 percent.

Shipments of watchcases by this industry represented 97 percent of all shipments of these products (\$29 million) by all industries. In 1958, the coverage ratio was 98 percent.

The production index for the primary products of the industry increased to 92 in 1963 from the 1958 level of 72. The unit value index for 1963 was 91 compared to 112 in 1958. Both indexes were computed on a basis of 1954 = 100.

# **PHOTOGRAPHIC EQUIPMENT: SIC 386** **Value Added by Manufacture by State: 1963**

# **WATCHES, CLOCKS, AND WATCHCASES: SIC 387** **Value Added by Manufacture by State: 1963**

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: **All employees:** For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). **Production workers:** For 1947 and prior years figures represent an average of 12 monthly figures. **Value added:** Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. **Cost of materials:** Cost of materials prior to 1954 excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. **Value of shipments:** Value of shipments for years prior to 1954 excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than \$500 thousand.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

(D) Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>General statistics for some producing States have been withheld to avoid disclosing figures for individual companies. Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State.

SIC 3861, Photographic Equipment: New England—Rhode Island, 2 (20-99); Connecticut, 12 (250-999); East North Central—Indiana, 8 (1,097); Michigan, 19 (201); West North Central—Minnesota, 8 (699); Iowa, 2 (20-99); Nebraska, 2 (1-19); Kansas, 2 (20-99); South Atlantic—Maryland, 4 (1-19); District of Columbia, 2 (20-99); North Carolina, 3 (763); South Carolina, 1 (250-499); Florida, 5 (20-99); East South Central—Kentucky, 2 (1-19); Tennessee, 1 (1-19); West South Central—Louisiana, 3 (20-99); Texas, 11 (101); Mountain—Colorado, 6 (100-249); Arizona 2 (20-99); Utah, 2 (1-19); Pacific—Washington, 3 (1-19); Oregon, 3 (489); California, 95 (2,500-4,999); Hawaii, 1 (1-19).

SIC 3871, Watches and Clocks: Middle Atlantic—New Jersey, 8 (250-499); Pennsylvania, 6 (1,000-2,499); East North Central—Ohio, 1 (20-99); Indiana, 4 (467); Michigan, 3 (100-249); Wisconsin, 4 (564); West North Central—Minnesota, 1 (1-19); Iowa, 1 (500-999); South Atlantic—Maryland, 1 (20-99); District of Columbia, 1 (1-19); North Carolina, 2 (250-499); Georgia, 3 (607); Florida, 1 (1-19); East South Central—Kentucky, 2 (100-249); Tennessee, 1 (250-499); Alabama, 1 (20-99); Mississippi, 1 (100-249); West South Central—Arkansas, 1 (1,000-2,499); Louisiana, 1 (1-19); Oklahoma, 1 (1-19); Texas, 3 (890); Pacific—Washington, 1 (1-19); California, 7 (20-99).

SIC 3872, Watchcases: New England—Rhode Island, 1 (500-999); Connecticut, 1 (250-499); Middle Atlantic—New York, 46 (1,000-2,499); New Jersey, 2 (20-99); East North Central—Michigan, 1 (250-499); West South Central—Oklahoma, 1 (1-19); Pacific—California, 1 (1-19).

<sup>2</sup>This State or division was not shown as a separate line in table 2 in the 1958 report for this industry. A footnote to table 2 in the 1958 report showed the number of establishments and total employment (either actual or in size ranges) for such States.

- Represents zero.

(D) Withheld to avoid disclosure. Data for this item are included in the underscored figures at the left.

<sup>1</sup>Includes capital expenditures for plants under construction but not in operation which constitute \$500-\$1,000 thousand of the total for the size class.<sup>2</sup>Includes capital expenditures for plants under construction but not in operation which constitute a small proportion of the total for the size class.

TABLE 5A. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
						Col. B Col. B+C (percent)				Col. B Col. F (percent)
		(\$1,000)	(\$1,000)	(\$1,000)	(\$1,000)		(\$1,000)	(\$1,000)	(\$1,000)

Note: See Introduction for an explanation of terms used.

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c)

miscellaneous receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

(X) Not applicable. n.s.k. Not specified by kind.

<sup>1</sup>Includes \$3,098 million shipped by industry 3831, "Optical Instruments and Lenses." In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3651, Radio and TV Receiving Sets; 3622, Radio and TV Communications Equipment and, 3871, Watches and Clocks.

<sup>2</sup>Includes \$2 million shipped by the following industries; however, the exact figures are withheld to avoid disclosing figures for individual companies: 3651, Radio and TV Receiving Sets, and 3662, Radio and TV Communications Equipment.

<sup>3</sup>Figures for sensitized photographic film and cloth, silver halide type, made in other industries (less than 1 percent of the total), are included with shipments by the Photographic Equipment Industry to avoid disclosing individual company figures.

<sup>4</sup>Includes shipments of over \$2 million of each of the following product classes; however, the exact values are withheld to avoid disclosing individual company figures: 35595, Other special industry machinery and equipment; 36624, Electronic navigational aids; 36625, Electronic search and detection apparatus; 36795, Other electronic components and accessories, n.e.c.; and, 38510, Ophthalmic goods.

<sup>5</sup>Includes shipments of over \$2 million by industry 3822, Automatic Temperature Controls. However, the exact value is withheld to avoid disclosing individual company figures.

<sup>6</sup>Figures for watches with imported movements, made in other industries (less than 1 percent of the total) are included with shipments by the Watches and Clocks Industry to avoid disclosing individual company figures.

<sup>7</sup>Figures for clocks, watches and clock and watch parts, n.s.k., made in other industries (considerably less than 1 percent) are included with shipments by the Watches and Clocks Industry to avoid disclosing individual company figures.

<sup>8</sup>Includes shipments of over \$2 million of each of the following product classes; however, the exact values are withheld to avoid disclosing individual company figures: 19291, Ammunition over 30mm; 33560, Rolled, drawn and extruded nonferrous metal mill products, except copper and aluminum; 35790, Addressing, dictating, duplicating, and office machines, n.e.c.; 36343, Other small household electric appliances; 36430, Current-carrying wiring devices; 36623, Intercommunication equipment (except telephone and telegraph) and electric alarm and signal systems and devices; 37292, Guided missile components and subassemblies, n.e.c.; 38111, Aircraft, flight, nautical, and navigational instruments and automatic pilots; 38611, Still picture equipment; and 39111, Jewelry, made of platinum metals and karat gold.

TABLE 6A. Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958

Product code	Product	Unit of measure	Total shipments including interplant transfers			
			1963		1958

- Represents zero. (NA) Not available. n.s.k. Not specified by kind.

(X) Not applicable.

<sup>1</sup>Values include stands and attachments shipped with process cameras.

<sup>2</sup>Product code 3861142 was collected in number of units in 1958.

<sup>3</sup>In 1958, studio type flash units; exposure meters; and projectors, other than slide film and strip film were included in product code 3861198. Also, 1958 data for code 3861198 excludes projectors with illumination source rated at less than 150 watts.

<sup>4</sup>1958 data for both still and motion picture projectors include those with illumination source rated at less than 150 watts.

<sup>5</sup>Quantity figures include heads shipped separately, as well as complete units. Value figures include the value of heads shipped separately, stands shipped separately and complete units shipped.

<sup>6</sup>In 1958, projection screens were included in product code 3861379. Also, 1958 data for code 3861379 excludes projectors with illumination source rated at less than 150 watts.

<sup>7</sup>Total square feet of sensitized material (in thousands).

<sup>8</sup>Motion picture film, amateur roll film, and other film were combined to avoid disclosing figures of individual companies. Motion picture film was reported in linear feet by width and has been converted to TSFSM. Amateur roll film and other film were collected in TSFSM. In 1963, the statistics published for product code 3861500 were collected separately as product codes 3861511, 3861512, 3861513, 3861515, 3861521, 3861522, 3861523, 3861525, 3861531, 3861532, 3861533, 3861535, 3861551, 3861552, 3861553, 3861555, 3861561, 3861562, 3861567, 3861569, 3861571, 3861575, and 3861577.

<sup>9</sup>Includes and indeterminate amount of duplication resulting from shipments of film between film producers for further manufacturing process.

<sup>10</sup>Total square yards of sensitized material (in thousands).

<sup>11</sup>Automobile clocks included with other complete clocks (product code 3871131) for 1963.

<sup>12</sup>Includes only watch parts and watch movements produced domestically; watch parts and watch movements imported by watch assemblers and resold in the same condition are excluded.

<sup>13</sup>Does not include a figure of less than 10,000 reported for gold filled women's wristwatch cases (for jeweled watch movement).

<sup>14</sup>Womens' pocket and other watchcases for jeweled watch movements combined with pocket and other watchcases for nonjeweled or pin-lever watch movements.

**TABLE 6B. Product Classes—Indexes of Production and Unit Value for Primary Products Shipped by All Producers: 1963 and 1958**

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.s.k. Not specified by kind.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

**TABLE 6D. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958**

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

976000	Materials, parts, containers, and supplies, n.s.k. <sup>3</sup> .....		(X)	29,110	(X)	8,590

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.s.k. Not specified by kind.

<sup>1</sup>Represents estimates published in MC58(1)-7 (Supplement), "Selected Materials Consumed," from data collected in a supplemental survey on Form MA-131, "Consumption of Materials, Parts, Containers, and Supplies During 1958." This survey was limited to large establishments in selected chemical, machinery, and equipment industries and resulted in estimates which are subject to greater error than are the figures on materials consumption collected as a regular part of the Census of Manufactures.

<sup>2</sup>Does not include quantities produced and consumed in the same establishment.

<sup>3</sup>Represents (a) total cost of materials for small establishments reporting on "short forms" where separate figures for individual materials consumed were not requested and (b) total cost of materials reported for those establishments which failed to report costs of individual materials and "standard forms."

TABLE 7B. Fuels and Electric Energy Consumed, and Horsepower Rating of Power Equipment: 1962

Item	1962		
	Photographic equipment (SIC 3861)	Watches and clocks (SIC 3871)	Watchcases (SIC 3872)
Total cost of purchased fuels and electric energy.....\$1,000..	12,497	2,077	246

Prime movers, total.....do....	169	6	1
Driving generators.....do....	112	6	(Z)
Not driving generators.....do....	57	(Z)	1
Electric motors, total.....do....	296	35	3
Driven by purchased energy.....do....	149	34	3
Driven by energy generated at establishment.....do....	147	1	-
Aggregate horsepower per 100 production workers.....	894	227	249

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than 500 horsepower.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)
			Total (number)	Payroll (\$1,000)	Total (number)	Man-hours (1,000)	Wages (\$1,000)

Stamping, blanking, and forming of metals.....	18	5	10	3	212	6	82	124

Note: Very small establishments were not requested to report their metalworking operations and in some instances a few larger establishments failed to report. The significance of this undercoverage is shown in terms of production worker employment on the last line of the table below.

Item	Watches and clocks (SIC 3871)	Watchcases (SIC 3872)
Total number of establishments in the industry.....	167	53
Number of establishments which reported one or more of the specified operations.....	45	21
Percent of industry production workers in these establishments.....	80-85	75-80
Number of establishments which reported "none" of the operations apply.....	20	3
Percent of industry production workers in these establishments.....	0-5	0-5
Percent of industry production workers in establishments which completed metalworking operations inquiry.....	85-90	75-80

- Represents zero. (D) Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>These size groups are based on the number of employees engaged in each specific operation. They are not based on total employment in the establishments.

## Miscellaneous Manufacturing

- 39A Jewelry, silverware, and plated ware
- 39B Musical instruments and parts; toys, and sporting and athletic goods
- 39C Office supplies, costume jewelry and misc. notions
- 39D Miscellaneous manufacturing industries

Major Group 39 covers establishments primarily engaged in manufacturing products not classified in any other major manufacturing group. Industries in this group fall into the following categories: Jewelry, and silverware and plated ware; musical instruments; toys, and sporting and athletic goods; pens, pencils, and other office and artists' materials; buttons, costume novelties, and miscellaneous notions; brooms and brushes; morticians' goods; and, other miscellaneous manufacturing industries.

For 1953 and earlier years, data for Major Group 19, Ordnance and Accessories, are included with Major Group 39 in table 1.

For 1954 and subsequent years Major Group 19 data are published separately. However, in some tables within these volumes, data for Major Group 19 are given both separately and combined with Major Group 39.

Major Group 19 covers establishments primarily engaged in manufacturing artillery, small arms, and related equipment; ammunition; tanks and specialized tank parts; sighting and fire control equipment; complete guided missiles and research and development on complete guided missiles and, miscellaneous ordnance and accessories, not elsewhere classified.

## MISCELLANEOUS MANUFACTURING: MAJOR GROUP 39

Value Added by Manufacture by State: 1963

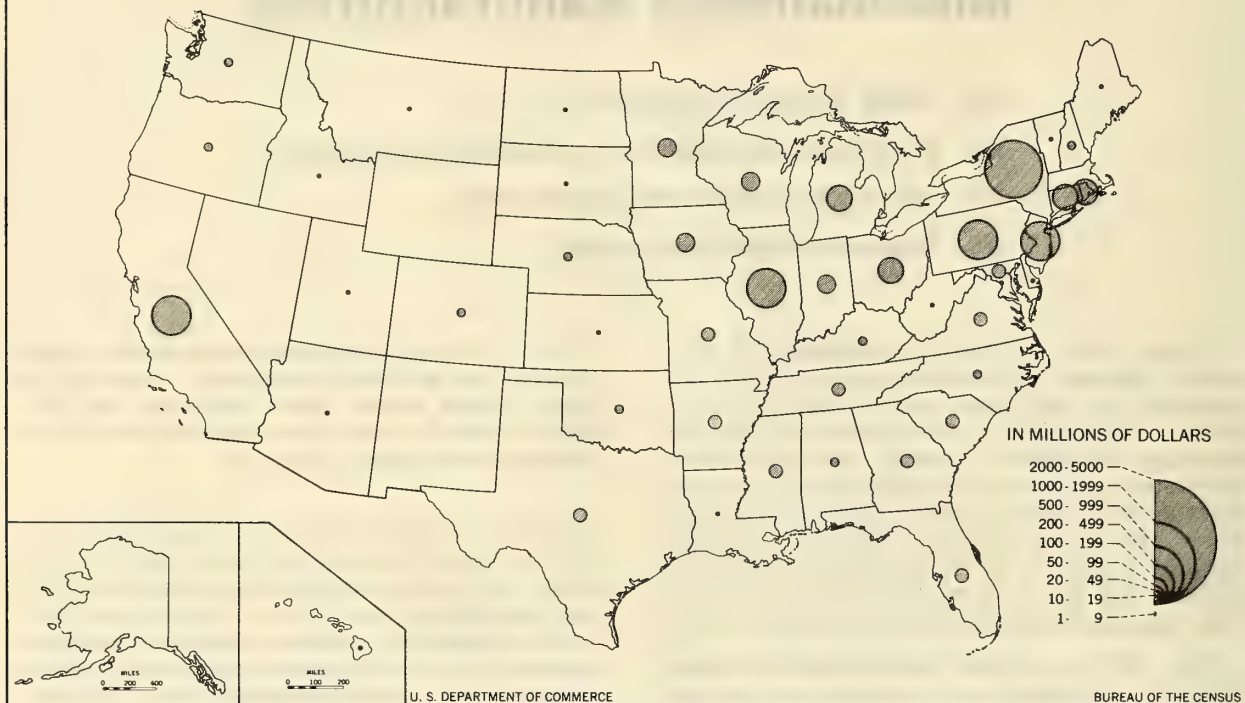

TABLE 1. General Statistics: 1963 and Earlier Years

Year and item	Establishments		All employees <sup>1</sup>		Production workers			Value added by manufacture, adjusted <sup>4</sup>	Cost of materials <sup>3</sup>	Value of shipments <sup>3</sup>	Capital expenditures, new <sup>4</sup>

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>The figures for 1939 through 1963 include data for employees of manufacturing establishments who were engaged in distribution and construction work. The extent to which data for such employees are included in the figures for earlier years is not known.

<sup>2</sup>For the period 1954 to 1963, figures represent adjusted value added by manufacture and for earlier years, unadjusted value added. Adjusted value added is equal to value of shipments (including resales of finished products) less cost of finished products, materials, supplies, fuel, electric energy and contract work, plus the net change in the value of finished products and work-in-process inventories between the beginning and end of the year, without adjustment for price changes. Unadjusted value added is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year.

<sup>3</sup>The total value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry classification. For more information, see Introduction.

<sup>4</sup>The figures for 1958 to 1963 include expenditures for plants under construction and not yet in operation.

<sup>5</sup>In addition to data for operating establishments, figures for employment and payroll

for manufacturing centraladministrative office and auxiliary units are included in industry group 39 for groups 39 and 19 for the years 1949 to 1953 in the annual survey of manufactures volumes. Data for these units are not available for the years 1955 to 1957, 1959 to 1962, and prior to 1949.

<sup>6</sup>Figures for 1958 to 1963 for operating manufacturing establishments are not strictly comparable with prior years due to revisions of the Standard Industrial Classification System. Prior to 1958, establishments primarily engaged in the manufacture of plastics products, n.e.c., cork products, soda-fountain and bar equipment, and jewelry, instrument and musical instrument cases, were included in these data. Establishments primarily engaged in the manufacture of linoleum and other hard surface floor covering, n.e.c., are excluded in data prior to 1958.

<sup>7</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

<sup>8</sup>In 1954, data for administrative and auxiliary establishments for Major Group 19, "Ordnance and Accessories," are included with Major Group 39, "Miscellaneous Manufactures."

<sup>9</sup>For 1953 and earlier years data includes ordnance and accessories.

TABLE 2. General Statistics, by Geographic Areas: 1963 and 1958

Code	Industry group and geographic area	1963								1958			
		Establishments		All employees		Production workers			Value added by manufacture, adjusted	Capital expenditures, new	All employees	Value added by manufacture, adjusted	
		Total	With 20 employees or more	Total	Payroll	Total	Man-hours	Wages					
									(number)	(number)	(number)	(\$1,000)	(number)

<sup>1</sup>The value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry. For a more complete explanation, see Introduction.

## JEWELRY, SILVERWARE, AND PLATED WARE

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3911—Jewelry, Precious Metal
- 3912—Jewelers' Findings and Materials
- 3913—Lapidary Work and Cutting and Polishing Diamonds
- 3914—Silverware and Plated Ware

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1-4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### 3911—JEWELRY, PRECIOUS METAL

This industry comprises establishments primarily engaged in manufacturing jewelry and other articles, worn on or carried about the person, made of precious metals with or without stones (including the setting of stones where stones are used), including cigarette cases and lighters, vanity cases and compacts, trimmings for umbrellas and canes, and jewel settings and mountings. Establishments primarily engaged in manufacturing costume jewelry from nonprecious metals and other materials are classified in industry 3961. For a detailed list of products of industry 3911, refer to table 6A, product codes 3911298.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Jewelry, Precious Metal Industry in 1963 totaled \$482 million. This amount included shipments of precious metal jewelry (primary products) valued at \$387 million, shipments of other products (secondary products) valued at \$32 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$63 million.

This industry's shipments of precious metal jewelry in 1963 represented 92 percent of its total product shipments. The industry specialization ratio in 1958 was 95 percent.

Secondary products shipped by this industry in 1963 include costume jewelry and costume novelties, except precious metal (\$12 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 73 percent of the total industry shipments are represented by plants specializing in jewelry made of platinum metals and carat gold and 21 percent in Jewelry made of precious metals, except platinum metals and carat gold.

Shipments of precious metal jewelry by this industry in 1963 represented 97 percent of all shipments of these products (\$400 million) by all industries. In 1958 the coverage ratio was 98 percent. Another industry shipping precious metal jewelry (primary products) was industry 3961, Costume Jewelry \$4 million.

#### 3912--JEWELERS' FINDINGS AND MATERIALS

This industry comprises establishments primarily engaged in manufacturing unassembled jewelry parts and stock shop products such as sheet, wire, and tubing. Establishments primarily engaged in lapidary work are classified in industry 3913. For a detailed list of products of industry 3912, refer to table 6A, product codes 3912011 to 3912051.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Jewelers' Findings and Materials Industry in 1963 totaled \$73 million. This amount included shipments of jewelers' findings and materials (primary products) valued at \$63 million, shipments of other products (secondary products) valued at \$6 million, and miscellaneous receipts at \$4 million.

This industry's shipments of jewelers' findings and materials in 1963 represented 92 percent of its total product shipments. The industry specialization ratio in 1958 was 90 percent.

#### 3913--LAPIDARY WORK AND CUTTING AND POLISHING DIAMONDS

This industry comprises establishments primarily engaged in all types of lapidary work, and cutting and polishing diamonds. This industry also includes establishments primarily engaged in cutting and polishing other precious stones; recutting and setting stones; preparing jewels for instruments, tools, and for watches and chronometers; and preparing real and imitation stones for settings. For a detailed list of products of industry 3913, refer to table 6A, product codes 3913011 to 3913031.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Lapidary Work Industry in 1963 totaled \$65 million. This amount included receipts for lapidary work (primary products) valued at \$55 million, shipments of other products (secondary products) valued at \$4 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$6 million.

This industry's receipts for lapidary work in 1963 represented 93 percent of its total product shipments. The industry specialization ratio in 1958 was 99 percent.

Value of lapidary work by this industry in 1963 represented 81 percent of all shipments of these products (\$68 million) performed by all industries. In 1958 the coverage ratio was 87 percent.

Excluded from the \$68 million value of shipments of lapidary work reported by all industries is the value of lapidary work by establishments classified in other industries (i.e., jewelry, etc.) where (1) this activity is combined with other finishing operations in the production of jewelry or other products or (2) this activity is reported as a receipt for contract work. Contract receipts for lapidary work were not separately reported or tabulated. The relatively small amount of lapidary work done in retail stores is also excluded.

#### 3914—SILVERWARE AND PLATED WARE

This industry comprises establishments primarily engaged in manufacturing flatware (including knives, forks and spoons), hollow ware, toilet ware, ecclesiastical ware, and related products made of sterling silver; of metal plated with silver, gold, or other metal; of nickel silver; of pewter; or of stainless steel.

"Flatware" is defined for purposes of the census as all knives, forks, spoons, etc., made wholly of metal, including stainless steel knives, forks, and spoons, and carving sets with metal handles. Knives, forks, spoons, etc., with handles of materials other than metal are included in industry 3421, Cutlery. For a detailed list of products of industry 3914, refer to table 6A, product codes 3914111 to 3914261.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Silverware and Plated Ware Industry in 1963 totaled \$238 million. This amount included shipments of silverware and plated ware (primary products) valued at \$209 million, shipments of other products (secondary products) valued at \$11 million, and miscellaneous receipts, at \$19 million.

This industry's shipments of silverware and plated ware in 1963 represented 95 percent of its total product shipments. The industry specialization ratio in 1958 was also 95 percent.

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 66 percent of the total industry shipments are represented by plants specializing in jewelry made of platinum metals and karat gold and 21 percent in jewelry made of precious metals, except platinum metals and karat gold.

Shipments of silverware and plated ware by this industry in 1963 represented 98 percent of all shipments of these products (\$212 million) by all industries. In 1958 the coverage ratio was also 98 percent.

# JEWELRY AND SILVERWARE: SIC 391 Value Added by Manufacture by State: 1963

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: All employees: For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). Production workers: For 1947 and prior years figures represent an average of 12 monthly figures. Value added: Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. Cost of materials: Cost of materials prior to 1954 excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. Value of shipments: Value of shipments for years prior to 1954 excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>No comparable data available for earlier years.

<sup>1</sup>General statistics for some producing States have been withheld to avoid disclosing figures for individual companies. Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State. SIC 3911, Jewelry, Precious Metal: New England—New Hampshire, 3 (1-19); Vermont, 1 (1-19); Connecticut, 6 (20-99); East North Central—Indiana, 13 (784); Wisconsin, 7 (20-99); West North Central—Minnesota, 8 (500-999); Iowa, 1 (1-19); Missouri, 7 (111); South Dakota, 4 (20-99); Nebraska, 1 (1-19); South Atlantic—Maryland, 2 (20-99); District of Columbia, 5 (1-19); Virginia, 1 (1-19); North Carolina, 3 (1-19); Georgia, 7 (1-19); Florida, 9 (20-99); East South Central—Kentucky, 3 (20-99); Tennessee, 3 (100-249); West South Central—Louisiana, 3 (1-19); Oklahoma, 5 (20-99); Texas, 15 (273); Mountain—Montana, 1 (1-19); Idaho, 2 (1-19); Colorado, 5 (1-19); New Mexico, 5 (100-249); Arizona, 5 (20-99); Utah, 3 (216); Pacific—Washington, 13 (20-99); Oregon, 7 (20-99); Alaska, 3 (1-19); Hawaii, 3 (20-99).

Footnotes continued on next page.

## Footnotes for Table 2—39A—Continued

SIC 3912, Jewelers' Findings and Materials: New England—New Hampshire, 1 (20-99); Massachusetts, 14 (250-499); Middle Atlantic—New Jersey, 22 (500-999); Pennsylvania, 2 (1-19); East North Central—Ohio, 1 (1-19); Illinois, 1 (1-19); South Atlantic—North Carolina, 1 (1-19); Florida, 1 (1-19); East South Central—Mississippi, 1 (1-19); Mountain—Colorado, 1 (1-19); New Mexico, 1 (1-19); Pacific—California, 4 (1-19).

SIC 3913, Lapidary Work: New England—Massachusetts, 6 (100-249); Rhode Island, 40 (100-249); Middle Atlantic—New Jersey, 10 (20-99); Pennsylvania, 4 (20-99); East North Central—Ohio, 5 (1-19); Indiana, 3 (114); Illinois, 6 (20-99); Michigan, 4 (20-99); West North Central—Minnesota, 1 (1-19); Missouri, 3 (1-19); North Dakota, 1 (100-249); South Atlantic—Maryland, 1 (1-19); North Carolina, 2 (1-19); Georgia, 1 (1-19); Florida, 2 (1-19); East South Central—Kentucky, 1 (1-19); West South Central—Louisiana, 1 (1-19); Texas, 1 (1-19); Mountain—Colorado, 2 (1-19); New Mexico, 1 (1-19); Arizona, 4 (1-19); Pacific—Washington, 1 (1-19); California, 8 (20-99); Alaska, 1 (1-19).

SIC 3914, Silverware and Plated Ware: New England—Maine, 2 (20-99); Massachusetts, 33 (2,771); Rhode Island, 10 (1,000-2,499); East North Central—Ohio, 5 (111); Indiana, 4 (20-99); Michigan, 2 (1-19); West North Central—Iowa, 1 (20-99); Kansas, 1 (1-19); South Atlantic—Maryland, 5 (205); Virginia, 1 (100-249); North Carolina, 1 (1-19); South Carolina, 1 (1-19); Florida, 1 (1-19); East South Central—Tennessee, 1 (20-99); Alabama, 1 (1-19); West South Central—Oklahoma, 1 (20-99); Texas, 2 (20-99); Mountain—Colorado, 1 (20-99); Arizona, 1 (1-19); Nevada, 1 (1-19); Pacific—Washington, 1 (1-19); Oregon, 2 (20-99).

<sup>2</sup>This State or division was not shown as a separate line in table 2 in the 1958 report for this industry. A footnote to table 2 in the 1958 report showed the number of establishments and total employment (either actual or in size ranges) for such States.

(D) Withheld to avoid disclosure. Data for this item are included in the underscored figures at the left.

TABLE 5A. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		Col. B	Col. B	Col. C	Col. D	Col. E	Col. F	Col. G	Col. H	Col. I

note: See Introduction for an explanation of terms used.

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c)

miscellaneous receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

Prod. class code	Class of products and miscellaneous receipts	All industries	Jewelry, precious metal (SIC 3911)	Other industries	Prod. class code	Class of products and miscellaneous receipts	All industries	Lapidary work (SIC 3913)	Other industries

n.s.k. Not specified by kind.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

TABLE 6D. **Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958**

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments

Not driving generators.....do....	-	(Z)	-	2
Electric motors, total.....do....	29	18	-	58
Driven by purchased energy.....do....	29	18	-	57
Driven by energy generated at establishment.....do....	-	-	-	1
Aggregate horsepower per 100 production workers.....	180	393	-	590

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than 500 horsepower.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)

## MUSICAL INSTRUMENTS AND PARTS; TOYS, AND SPORTING AND ATHLETIC GOODS

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3931—Musical Instruments and Parts
- 3941—Games and Toys, Except Dolls and Children's Vehicles
- 3942—Dolls
- 3943—Children's Vehicles, Except Bicycles
- 3949—Sporting and Athletic Goods, Not Elsewhere Classified

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### 3931—MUSICAL INSTRUMENTS AND PARTS

This industry comprises establishments primarily engaged in manufacturing pianos, with or without player attachments; organs; other musical instruments; and parts and materials for musical instruments. For a detailed list of products of industry 3931, refer to table 6A, product codes 3931111 to 3931498.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Musical Instruments and Parts Industry totaled \$314 million. This amount included shipments of musical instruments and parts (primary products) valued at \$294 million, shipments of other products (secondary products) valued at \$8 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$13 million.

This industry's shipments of musical instruments and parts represented 97 percent of its total product shipments. The industry specialization ratio in 1958 was 98 percent.

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 31 percent of the total industry shipments are represented by plants specializing in organs; 30 percent in pianos; and 28 percent in other musical instruments.

Shipments of musical instruments and parts by this industry represented 92 percent of all shipments of these products (\$319 million) by all industries. In 1958 the coverage ratio was 91 percent.

The production index for the primary products of the industry increased to 190 in 1963 from the 1958 level of 141. The unit value index for 1963 was 99 compared to 102 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3941—GAMES AND TOYS, EXCEPT DOLLS AND CHILDREN'S VEHICLES

This industry comprises establishments primarily engaged in indoor games and game sets for adults and children, and mechanical and nonmechanical toys. Important products of this industry include games such as chess, checkers, dominoes, puzzles, and other indoor games; and toys, such as toy furniture, doll carriages and carts, construction sets, mechanical trains, toy guns and air rifles, and other mechanical games and toys. Establishments primarily engaged in manufacturing dolls are classified in industry 3942; children's outdoor wheel goods and vehicles, except bicycles, in industry 3943; and sporting and athletic goods for children and adults, in industry 3949. For a detailed list of products of industry 3941, refer to table 6A, product codes 3941011 to 3941097.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Games and Toys Industry totaled \$797 million. This amount included shipments of games and toys (primary products) valued at \$694 million, shipments of other products (secondary products) valued at \$62 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$41 million.

This industry's shipments of toys and games represented 92 percent of its total product shipments. The industry specialization ratio in 1958 was 93 percent. Secondary products shipped by this industry in 1963 include miscellaneous plastic products (\$10 million) and baby carriages and children's vehicles (\$3 million).

Shipments of games and toys by this industry represented 91 percent of all shipments of these products (\$764 million) by all industries. In 1958 the coverage ratio was 92 percent. Other industries shipping games and toys include industry 3079, Plastics Products, N.E.C., \$18 million; and industry 3943, Children's Vehicles, \$4 million.

#### 3942—DOLLS

This industry comprises establishments primarily engaged in manufacturing dolls, doll parts, and doll clothing. Establishments primarily engaged in manufacturing stuffed toy animals are also included in this industry. For a detailed list of products of industry 3942, refer to table 6A, product codes 3942006 to 3942055.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Dolls Industry totaled \$248 million. This amount includes shipments of dolls (primary products) valued at \$165 million.

This industry's shipments of dolls represented between 80 and 85 percent of its total product shipments. The industry specialization ratio in 1958 was 98 percent.

Shipments of dolls by this industry represented 87 percent of all shipments of these products (\$190 million) by all industries. In 1958 the coverage ratio was 94 percent.

The production index for the primary products of the industry increased to 124 in 1963 from the 1958 level of 113. The unit value index for 1963 was 119 compared to 109 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3943—CHILDREN'S VEHICLES, EXCEPT BICYCLES

This industry comprises establishments primarily engaged in manufacturing baby carriages, strollers, and gocarts; children's velocipedes and tricycles, coaster wagons, play cars, sleds, and other children's outdoor wheel goods and vehicles, except bicycles. For a detailed list of products of industry 3943, refer to table 6A, product codes 3943011 to 3943098.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Children's Vehicles Industry totaled \$78 million. This amount included shipments of children's vehicles (primary products) valued at \$54 million, shipments of other products (secondary products) valued at \$22 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$1 million.

This industry's shipments of children's vehicles represented 71 percent of its total product shipments. The industry specialization ratio in 1958 was 84 percent. Secondary products shipped by this industry in 1963 include games and toys (\$4 million), and metal household furniture (\$2 million).

Shipments of children's vehicles by this industry represented 65 percent of all shipments of these products (\$83 million) by all industries. In 1958 the coverage ratio was 78 percent.

The production index for the primary products of the industry increased to 116 in 1963 from the 1958 level of 99. The unit value index for 1963 was 110 compared to 114 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3949—SPORTING AND ATHLETIC GOODS, NOT ELSEWHERE CLASSIFIED

This industry comprises establishments primarily engaged in manufacturing sporting and athletic goods, not elsewhere classified, such as fishing tackle; golf and tennis goods; baseball, football, basketball, and boxing equipment; roller skates and ice skates; gymnasium and playground equipment; billard and pool tables; and bowling alleys and equipment. Establishments primarily engaged in manufacturing athletic apparel are classified in Major Group 23, small arms ammunition in industry 1961, and firearms in industry 1951. For a detailed list of products of industry 3949, refer to table 6A, product codes 3949114 to 3949298.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Sporting and Athletic Goods Industry totaled \$705 million. This amount included shipments of sporting and athletic goods (primary products) valued at \$598 million. Shipments of other products (secondary products) valued at \$47 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$60 million.

This industry's shipments of sporting and athletic goods represented 93 percent of its total product shipments. The industry specialization ratio in 1958 was 88 percent. Secondary products shipped by this industry in 1963 included miscellaneous plastic products (\$3 million).

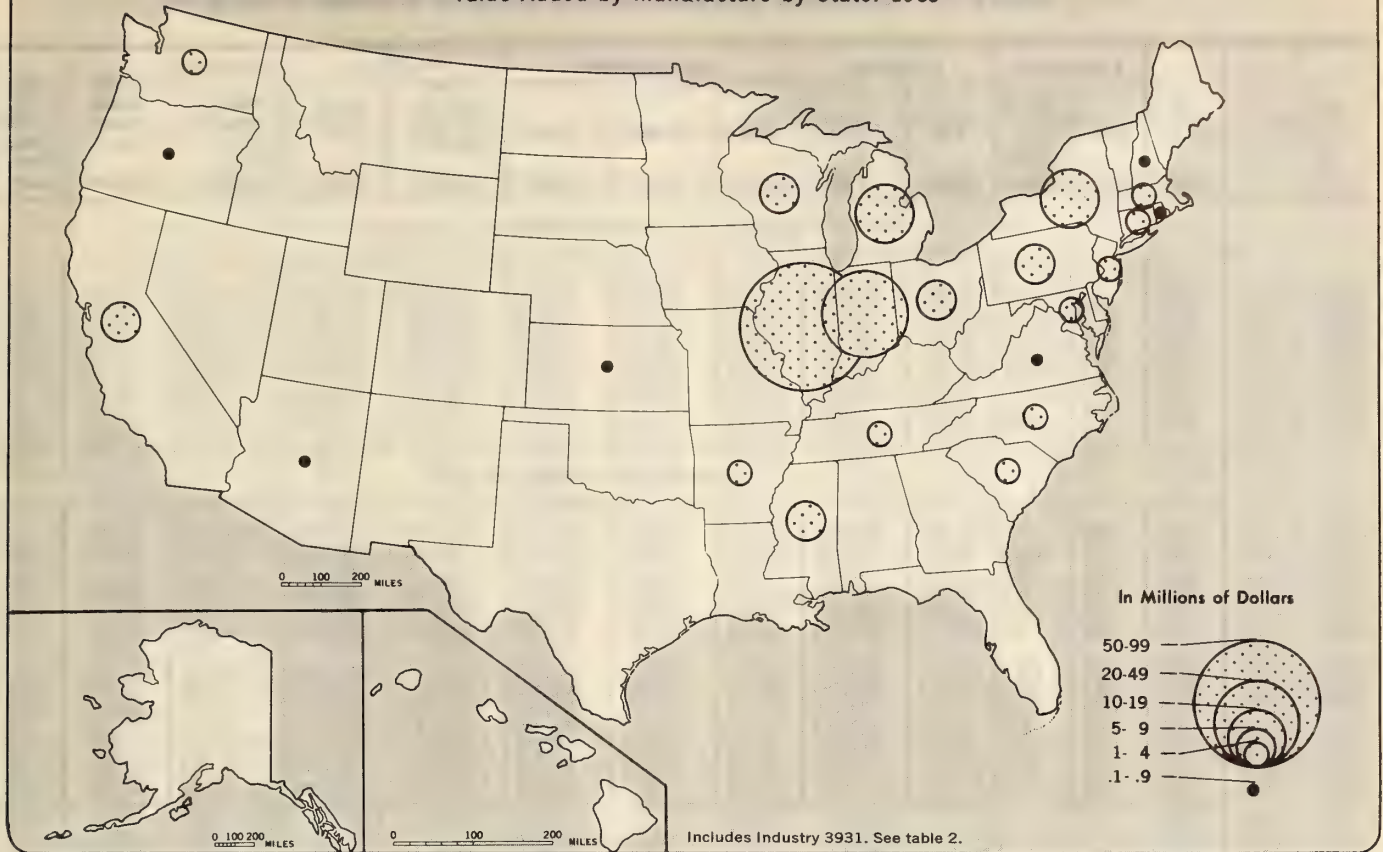

Shipments of sporting and athletic goods by this industry represented 91 percent of all shipments of these products (\$656 million) by all industries. In 1958 the coverage ratio was also 91 percent. Other industries shipping sporting and athletic goods includes industry 3069, Rubber Products, N.E.C., \$15 million.

The production index for the primary products of the industry increased to 196 in 1963 from the 1958 level of 158. The unit value index for 1963 was 110 compared to 109 in 1958. Both indexes were computed on a basis of 1954 = 100.

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: All employees: For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). Production workers: For 1947 and prior years figures represent an average of 12 monthly figures. Value added: Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. Cost of materials: Cost of materials prior to 1954 excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. Value of shipments: Value of shipments for years prior to 1954 excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available.  
(X) Not applicable.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>No comparable figures are available for earlier years.

<sup>3</sup>The figures for 1937-1963 are not entirely comparable with those for earlier years because they include data for establishments primarily engaged in the manufacture of playground equipment. Value added by manufacture for 1937, excluding data for these establishments, amounted to \$26.3 million.

TABLE 2. General Statistics, by Geographic Areas: 1963 and 1958

- Represents zero.

(D) Withheld to avoid disclosure. Data for this item are included in the underscored figures at the left.

**TABLE 5A. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958**

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c)

miscellaneous receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>The following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3651, Radio and TV Receiving Sets; and 3662, Radio, TV Communications Equipment.

<sup>2</sup>The following industry had shipments which totaled \$2 million or more but is withheld to avoid disclosing figures for individual companies: 3651, Radio and TV Receiving Sets.

<sup>3</sup>Includes the following product class which totaled \$2 million or more but is withheld to avoid disclosing individual company figures: 36513, "Recorders, audio amplifiers, phonographs, tuners, speaker systems, and other audio equipment and accessories."

<sup>4</sup>Includes \$2,148 thousand shipped by industry 3069, Rubber Products, N.E.C. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 2731, Books, Publishing and Printing; 3461, Metal Stampings; and 3631, Household Cooking Equipment.

<sup>5</sup>Includes the following product classes which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 31610, Suitcases, briefcases, bags, and musical instrument cases; 39420, Dolls and stuffed toy animals; and 39492, Other sporting and athletic goods.

<sup>6</sup>The following industry had shipments which totaled \$2 million or more but is withheld to avoid disclosing figures for individual companies: 3941, Games and Toys.

<sup>7</sup>Includes \$2,773 thousand shipped by Industry 3941, Games and Toys. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3522, Farm Machinery and Equipment; and 3751, Motorcycles, Bicycles, and Parts.

<sup>8</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 25116, Infants' and children's wood furniture; 37510, Bicycles, motorcycles, motorbikes, scooters and parts; 37992, Other transportation equipment; and 39492, Other sporting and athletic goods.

<sup>9</sup>Includes \$2,440 thousand shipped by industry 3141, Shoes, Except Rubber. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3079, Plastics Products, N.E.C.; 3161, Luggage; 3534, Elevators and Moving Stairways; 3941, Games and Toys; and 3943, Children's Vehicles.

<sup>10</sup>Includes the following product classes which totaled \$2 million or more but are withheld to avoid disclosing individual company figures: 23292, Men's, youths' and boy's outerwear, n.e.c. (made from woven or purchased knit fabrics); 30115, Tread rubber, tire sundries, and repair materials; 35225, Harvesting machinery; and 37291, Other aircraft parts and auxiliary equipment.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

n.s.k. Not specified by kind.

<sup>1</sup>1958 data for fretted and string instruments are included with data for "Other musical instruments," code 3931498.

<sup>2</sup>2,538 thousand units were shipped in 1963 and 2,397 thousand in 1958.

<sup>3</sup>The quantity figure relates to a value of \$53,874 thousand. In addition, \$8,265 thousand were reported without quantity.

<sup>4</sup>The quantity figure relates to a value of \$33,650 thousand. In addition, \$5,906 thousand were reported without quantity.

<sup>5</sup>In 1958, data for children's pedal driven automobiles and tractors (product code 3943033) were included with other children's vehicles (product code 3943098).

<sup>6</sup>In 1958, product code 3949225 was combined with product code 3949229, "Other bowling alley playing supplies," to avoid disclosing figures for individual companies.

<sup>7</sup>Some products, e.g., pin setters, are not sold but are leased. The values reported for such products represents the valuation placed on them for tax, insurance, and similar purposes.

<sup>8</sup>In 1958, data for product codes 3949249, 88, 86, 92, 87, 93, 94, and 91 are included with "Other sporting and athletic goods," product code 3949298.

n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

TABLE 6D. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments

970099	All other materials and components, parts, containers, and supplies consumed.....		(X)	175,645
976000	Materials, parts, containers, and supplies, n.s.k. <sup>2</sup> .....		(X)	47,576

Note: No comparable data for materials consumed was collected in 1958.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

n.s.k Not specified by kind.

<sup>1</sup>Estimates for 1958 for selected materials were published in MC58(1)-7 (Supplement), "Selected Materials Consumed," from data collected in a supplemental survey on Form MA-131, "Consumption of Materials, Parts, Containers and Supplies During 1958." This survey was limited to large establishments in selected chemical, machinery and equipment industries and resulted in estimates which are subject to greater error than are the figures on materials consumption collected as a regular part of the census of manufactures. Estimates for these industries are as follows:

Industry	Materials	Delivered cost (million dollars)
3941	Iron and steel shapes and forms....	17
	Plastics and resins materials.....	27
	Paperboard containers and boxes....	34
3949	Plastics and resins materials.....	8

<sup>2</sup>Represents (a) total cost of materials for small establishments reporting on "short forms" where separate figures for individual materials consumed were not requested and (b) total cost of materials reported for those establishments which failed to report costs of individual materials on "standard forms."

TABLE 7B. Fuels and Electric Energy Consumed and Horsepower Rating of Power Equipment: 1962

Item	Musical instruments and parts (SIC 3931)	Games and toys (SIC 3941)	Dolls (SIC 3942)	Children's vehicles (SIC 3943)	Sporting and athletic goods (SIC 3949)

Driven by purchased energy.....do....	47	128	22	13	131
Driven by energy generated at establishment.....do....	(Z)	-	-	-	2
Aggregate horsepower per 100 production workers.....	271	334	130	430	479

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than 500 horsepower.

n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)

## OFFICE SUPPLIES, COSTUME JEWELRY, AND MISCELLANEOUS NOTIONS

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3951—Pens, Pen Points, Fountain Pens, Ball Point Pens, Mechanical Pencils and Parts
- 3952—Lead Pencils, Crayons, and Artists' Materials
- 3953—Marking Devices
- 3955—Carbon Paper and Inked Ribbons
- 3961—Costume Jewelry and Costume Novelties, Except Precious Metal
- 3962—Feathers, Plumes, and Artificial Flowers
- 3963—Buttons
- 3964—Needles, Pins, Hooks and Eyes, and Similar Notions

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### 3951—PENS, PEN POINTS, FOUNTAIN PENS, BALL POINT PENS, MECHANICAL PENCILS AND PARTS

This industry comprises establishments primarily engaged in manufacturing pens, pen points, fountain pens, ball point pens, refill cartridges, and parts for pens and mechanical pencils. For a detailed list of products of industry 3951, refer to table 6A, product codes 3951001 to 3951071.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Pens and Mechanical Pencils Industry totaled \$185 million. This amount included shipments of pens and mechanical pencils (primary products) valued at \$165 million, shipments of other products (secondary products) valued at \$18 million, and miscellaneous receipts (mainly products bought and resold) at \$3 million.

This industry's shipments of pens and mechanical pencils represented 90 percent of its total product shipments. The industry specialization ratio in 1958 was 93 percent. Secondary products shipped by this industry in 1963 include artists' materials (\$2 million).

Shipments of pens and mechanical pencils by this industry represented 93 percent of all shipments of these products (\$178 million) by all industries. In 1958 the coverage ratio was also 93 percent. Other industries shipping pens and mechanical pencils include industry 3952, Lead Pencils and Art Goods, \$6 million.

The production index for the primary products of the industry increased to 216 in 1963 from the 1958 level of 141. The unit value index for 1963 was 63 compared to 83 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3952—LEAD PENCILS, CRAYONS, AND ARTISTS' MATERIALS

This industry comprises establishments primarily engaged in manufacturing lead pencils, pencil leads, and crayons; materials and equipment for art work such as airbrushes, drawing tables and boards, palettes, sketchboxes, pantographs, artists' colors and waxes, pyrography goods, drawing inks, and drafting materials. Establishments primarily engaged in manufacturing mechanical pencils are classified in industry 3951, and drafting instruments in industry 3811. For a detailed list of products of industry 3952, refer to table 6A, product codes 3952111 to 3952211.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Lead Pencils and Art Goods Industry totaled \$122 million. This amount included shipments of lead pencils and art goods (primary products) valued at \$97 million, shipments of other products (secondary products) valued at \$14 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$11 million.

This industry's shipments of lead pencils and art goods represented 87 percent of its total product shipments. The industry specialization ratio in 1958 was 88 percent. Secondary products shipped by this industry in 1963 include pens and mechanical pencils (\$6 million).

Shipments of lead pencils and art goods by this industry represented 90 percent of all shipments of these products (\$108 million) by all industries. In 1958 the coverage ratio was 92 percent. Other industries shipping lead pencils and art goods include industry 3951, Pens and Mechanical Pencils, \$2 million.

#### 3953—MARKING DEVICES

This industry comprises establishments primarily engaged in manufacturing rubber and metal hand stamps, dies, and seals; steel letters and figures; and stencils for use in painting or marking. For a detailed list of products of industry 3953, refer to table 6A, product codes 3953011 to 3953098.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Marking Devices Industry totaled \$127 million. This amount included shipments of marking devices (primary products) valued at \$96 million, shipments of other products (secondary products) valued at \$19 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$12 million.

This industry's shipments of marking devices represented 84 percent of its total product shipments. The industry specialization ratio in 1958 was 96 percent.

Shipments of marking devices by this industry represented 90 percent of all shipments of these products (\$107 million) by all industries. In 1958 the coverage ratio was 86 percent.

#### 3955—CARBON PAPER AND INKED RIBBONS

This industry comprises establishments primarily engaged in manufacturing carbon paper for business machines, sales books, etc.; spirit or gelatin process and other stencil paper; and inked ribbons for business machines. For a detailed list of products of industry 3955, refer to table 6A, product codes 3955011 to 3955098.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Carbon Paper and Inked Ribbons Industry totaled \$156 million. This amount included shipments of carbon paper and inked ribbons (primary products) valued at \$133 million, shipments of other products (secondary products) valued at \$7 million, and miscellaneous receipts (mainly products bought and resold) at \$15 million.

This industry's shipments of carbon paper and inked ribbons represented 95 percent of its total product shipments. The industry specialization ratio in 1958 was 91 percent.

Shipments of carbon paper and inked ribbons by this industry represented 83 percent of all shipments of these products (\$161 million) by all industries. In 1958 the coverage ratio was 89 percent. Other industries shipping carbon paper and inked ribbons include industry 3579, Office Machines, N.E.C., \$14 million.

The production index for the primary products of the industry increased to 160 in 1963 from the 1958 level of 130. The unit value index for 1963 was 110 compared to 100 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3961—COSTUME JEWELRY AND COSTUME NOVELTIES, EXCEPT PRECIOUS METAL

This industry comprises establishments primarily engaged in manufacturing costume jewelry, costume novelties, and ornaments made of all materials, except precious metal, precious or semiprecious stones, and rolled gold plate and gold filled materials (industry 3911). For a detailed list of products of industry 3961, refer to table 6A, product codes 3961011 to 3961098.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Costume Jewelry Industry totaled \$280 million. This amount included shipments of costume jewelry (primary products) valued at \$243 million, shipments of other products (secondary products) valued at \$13 million, and miscellaneous receipts (mainly products bought and resold) at \$25 million.

This industry's shipments of costume jewelry represented 95 percent of its total product shipments. The industry specialization ratio in 1958 was also 95 percent. Secondary products shipped by this industry in 1963 include jewelry made of precious metals, except platinum and carat gold (\$5 million).

Shipments of costume jewelry by this industry represented 95 percent of all shipments of these products (\$257 million) by all industries. In 1958 the coverage ratio was 96 percent. Other industries shipping costume jewelry include industry 3911, Jewelry, Precious Metal, \$11 million.

#### 3962—FEATHERS, PLUMES, AND ARTIFICIAL FLOWERS

This industry comprises establishments primarily engaged in manufacturing artificial flowers, fruits, and foliage made from all materials, except glass (industry 3231); in producing fancy feathers, plumes, and articles made principally of feathers and plumes; and curling, dyeing, and renovating ostrich feathers for the trade. For a detailed list of products of industry 3962, refer to table 6A, product code 3962011.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Artificial Flowers Industry totaled \$60 million. This amount included shipments of artificial flowers (primary products) valued at \$53 million, shipments of other products (secondary products) valued at \$2 million, and miscellaneous receipts (mainly products bought and resold) at \$6 million.

This industry's shipments of artificial flowers represented 97 percent of its total product shipments. The industry specialization ratio in 1958 was 98 percent.

Shipments of artificial flowers by this industry represented 87 percent of all shipments of these products (\$59 million) by all industries. In 1958 the coverage ratio was 98 percent.

#### 3963—BUTTONS

This industry comprises establishments primarily engaged in manufacturing buttons, button parts, and button blanks and molds, of all materials except precious metal and precious or semiprecious stones (industry 3911). For a detailed list of products of industry 3963, refer to table 6A, product codes 3963011 to 3963098.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Buttons Industry totaled \$82 million. This amount included shipments of buttons (primary products) valued at \$71 million, shipments of other products (secondary products) valued at \$3 million, and miscellaneous receipts (mainly products bought and resold) at \$7 million.

This industry's shipments of buttons represented 96 percent of its total product shipments. The industry specialization ratio in 1958 was 98 percent. Secondary products shipped by this industry in 1963 include needles, pins, fasteners (except slide), and similar notions (\$2 million).

Shipments of buttons by this industry represented 87 percent of all shipments of these products (\$82 million) by all industries. In 1958 the coverage ratio was 88 percent. Other industries shipping buttons include industry 3079, Plastics Products, N.E.C., \$4 million; and industry 3964, Needles, Pins, and Fasteners, \$2 million.

### 3964—NEEDLES, PINS, HOOKS AND EYES, AND SIMILAR NOTIONS

This industry comprises establishments primarily engaged in manufacturing notions, such as machine and hand needles, pins, hooks and eyes, eyelets, buckles, and slide and snap fasteners. For a detailed list of products of industry 3964, refer to table 6A, product codes 3964111 to 3964289.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Needles, Pins, and Fasteners Industry totaled \$337 million. This amount included shipments of needles, pins, and fasteners (primary products) valued at \$290 million, shipments of other products (secondary products) valued at \$29 million, and miscellaneous receipts (mainly products bought and resold) at \$18 million.

This industry's shipments of needles, pins, and fasteners represented 91 percent of its total product shipments. The industry specialization ratio in 1958 was 93 percent. Secondary products shipped by this industry in 1963 include hardware n.e.c. (\$7 million), and buttons (\$2 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 50 percent of the total industry shipments are represented by plants specializing in needles, pins, fasteners (except slide); and similar notions and 45 percent in zipper and slide fasteners.

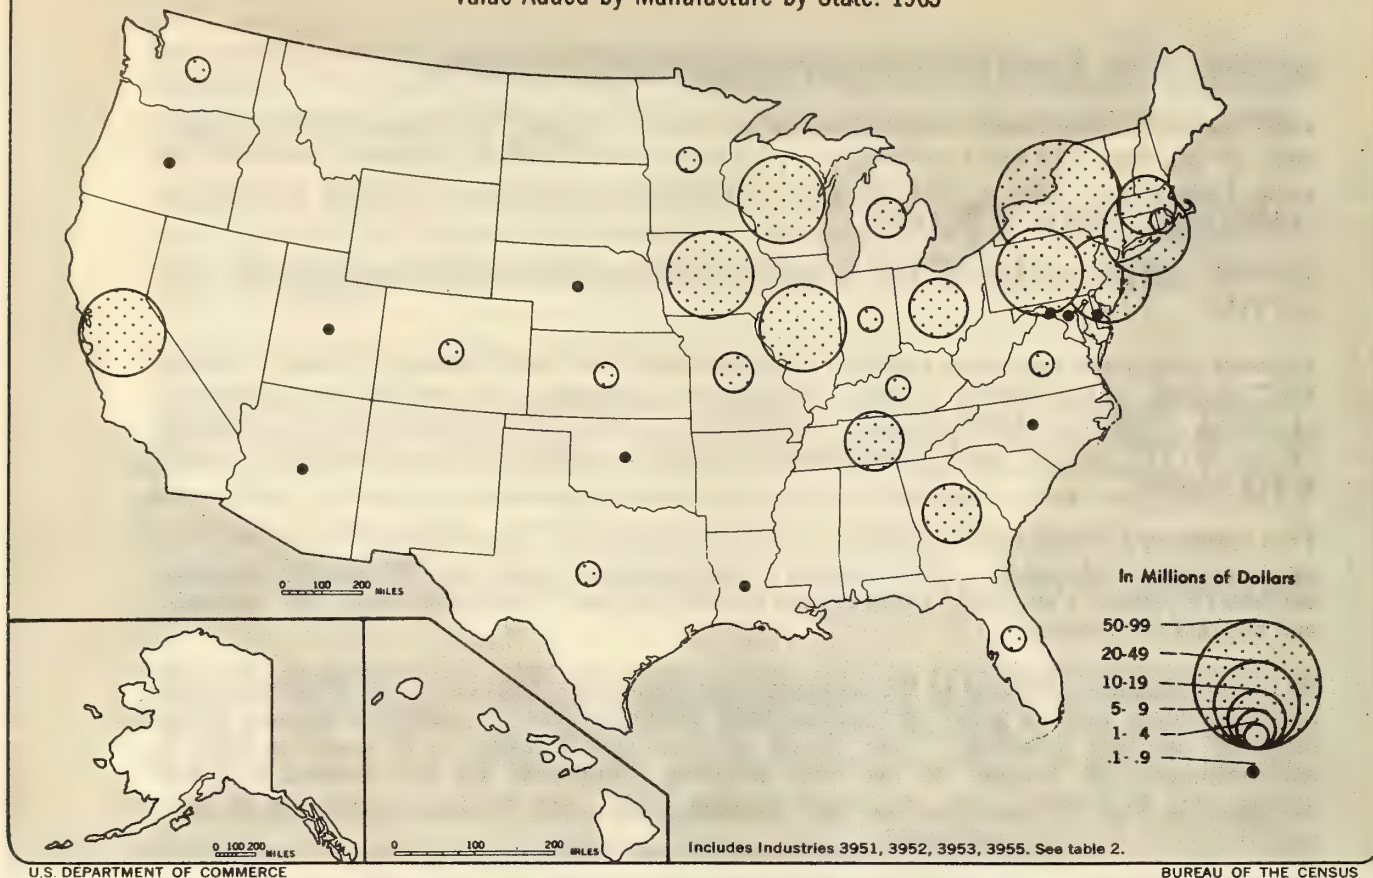

Shipments of needles, pins, and fasteners by this industry represented 92 percent of all shipments of these products (\$315 million) by all industries. In 1958 the coverage ratio was 89 percent. Other industries shipping needles, pins, and fasteners include industry 3963, Buttons, \$2 million.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product classes of industry 3964, e.g., zipper and slide fasteners, 99 percent; needles, pins, fasteners (except slide), and similar notions, 85 percent.

The production index for the primary products of the industry increased to 168 in 1963 from the 1958 level of 128. The unit value index for 1963 was 105 compared to 98 in 1958. Both indexes were computed on a basis of 1954 = 100.

# **PENS, PENCILS AND OFFICE SUPPLIES: SIC 395** Value Added by Manufacture by State: 1963

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: All employees: For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). Production workers: For 1947 and prior years figures represent an average of 12 monthly figures. Value added: Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. Cost of materials: Cost of materials prior to 1958 (except 1954) excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. Value of shipments: Value of shipments for years prior to 1958 (except 1954) excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>No comparable figures are available for earlier years.

<sup>3</sup>The 1957 Standard Industrial Classification combined in this industry two industries which were separate in the 1945 Standard Industrial Classification. These were: 3952, Lead Pencils and industry 3954, Artists' Materials. The data for 1954 and earlier years for these two industries have been combined.

<sup>4</sup>Less than \$500 thousand.

TABLE 2. General Statistics, by Geographic Areas: 1963 and 1958—Continued

Footnotes for Table 2-39C.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>General statistics for some producing States have been withheld to avoid disclosing figures for individual companies. Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State.

SIC 3951, Pens and Mechanical Pencils: New England—Rhode Island, 4 (342); Connecticut, 3 (327); Middle Atlantic—New Jersey, 18 (1,000-2,499); Pennsylvania, 2 (20-99); East North Central—Ohio, 2 (1-19); Illinois, 5 (411); Michigan, 2 (1-19); Wisconsin, 2 (1,000-2,499); West North Central—Minnesota, 2 (20-99); Iowa, 2 (1,000-2,499); Missouri, 3 (491); Nebraska, 1 (1-19); Kansas, 1 (1-19); South Atlantic—Virginia, 3 (240); Georgia, 1 (1,000-2,499); Florida, 1 (1-19); East South Central—Kentucky, 2 (100-249); Tennessee, 1 (1-19); West South Central—Oklahoma, 1 (1-19); Mountain—Colorado, 1 (1-19); Pacific—Washington, 1 (1-19); California, 15 (1,000-2,499).

SIC 3952, Lead Pencils and Art Goods: New England—Massachusetts, 5 (20-99); Connecticut, 5 (567); East North Central—Indiana, 3 (279); Illinois, 8 (100-249); Michigan, 1 (1-19); Wisconsin, 2 (1-19); West North Central—Minnesota, 1 (1-19); Missouri, 4 (100-249); Nebraska, 1 (1-19); Kansas, 2 (20-99); South Atlantic—Georgia, 2 (100-249); Florida, 1 (1-19); East South Central—Kentucky, 1 (100-249); Alabama, 1 (1-19); West South Central—Arkansas, 1 (1-19); Texas, 1 (1-19); Mountain—Colorado, 1 (1-19); Pacific—California, 16 (100-249).

SIC 3953, Marking Devices: New England—Maine, 2 (1-19); New Hampshire, 2 (1-19); Rhode Island, 6 (20-99); Middle Atlantic—New Jersey, 28 (250-499); Pennsylvania, 39 (500-999); East North Central—Ohio, 29 (329); Indiana, 12 (20-99); Michigan, 25 (294); Wisconsin, 11 (20-99); West North Central—Iowa, 7 (20-99); South Dakota, 1 (1-19); Nebraska, 4 (20-99); Kansas, 4 (1-19); South Atlantic—Delaware, 2 (1-19); Maryland, 7 (20-99); District of Columbia, 3 (20-99); Virginia, 7 (20-99); West Virginia, 4 (1-19); North Carolina, 7 (20-99); South Carolina, 3 (1-19); Florida, 29 (100-249); East South Central—Kentucky, 8 (20-99); Alabama, 3 (1-19); Mississippi, 1 (1-19); West South Central—Arkansas, 3 (1-19); Louisiana, 4 (20-99); Oklahoma, 6 (1-19); Mountain—Montana, 1 (1-19); Idaho, 2 (1-19); Colorado, 6 (20-99); New Mexico, 2 (1-19); Arizona, 7 (1-19); Utah, 3 (20-99); Nevada, 1 (1-19); Pacific—Washington, 10 (100-249); Oregon, 5 (20-99); Alaska, 1 (1-19); Hawaii, 2 (1-19).

SIC 3955, Carbon Paper and Inked Ribbons: New England—Massachusetts, 4 (222); Connecticut, 4 (304); East North Central—Ohio, 7 (500-999); Michigan, 2 (100-249); West North Central—Iowa, 1 (100-249); Missouri, 1 (1-19); Nebraska, 1 (1-19); South Atlantic—District of Columbia, 1 (1-19); Georgia, 2 (20-99); East South Central—Tennessee, 1 (1-19); West South Central—Louisiana, 1 (1-19); Texas, 5 (20-99); Mountain—Colorado, 2 (100-249); Pacific—Washington, 1 (1-19); Oregon, 1 (20-99).

SIC 3961, Costume Jewelry: New England—Maine, 1 (1-19); New Hampshire, 2 (1-19); Connecticut, 9 (1,275); Middle Atlantic—Pennsylvania, 9 (1-19); East North Central—Ohio, 4 (20-99); Indiana, 1 (1-19); Michigan, 1 (1-19); Wisconsin, 1 (1-19); West North Central—Minnesota, 2 (1-19); Iowa, 1 (1-19); Missouri, 2 (20-99); South Dakota, 3 (1-19); Nebraska, 3 (1-19); South Atlantic—Maryland, 4 (1-19); Virginia, 2 (1-19); West Virginia, 1 (1-19); North Carolina, 1 (1-19); South Carolina, 1 (1-19); Georgia, 2 (1-19); Florida, 14 (20-99); East South Central—Kentucky, 2 (1-19); Tennessee, 1 (1-19); Alabama, 3 (100-249); Mississippi, 1 (1-19); West South Central—Texas, 3 (20-99); Mountain—Wyoming, 1 (1-19); Colorado, 5 (1-19); New Mexico, 1 (1-19); Arizona, 7 (20-99); Nevada, 2 (1-19); Pacific—Washington, 2 (1-19); Oregon, 1 (1-19); Hawaii, 8 (20-99).

SIC 3962, Artificial Flowers: New England—Maine, 1 (1-19); New Hampshire, 1 (1-19); Massachusetts, 5 (1-19); Rhode Island, 2 (250-499); Middle Atlantic—New Jersey, 17 (121); East North Central—Ohio, 6 (20-99); Indiana, 6 (20-99); Illinois, 18 (100-249); Michigan, 5 (20-99); West North Central—Minnesota, 9 (100-249); Iowa, 5 (20-99); Kansas, 3 (1-19); South Atlantic—Delaware, 1 (20-99); Maryland, 1 (20-99); Virginia, 3 (1-19); West Virginia, 2 (1-19); North Carolina, 12 (134); East South Central—Tennessee, 1 (1-19); Alabama, 3 (20-99); Mississippi, 1 (1-19); West South Central—Louisiana, 1 (1-19); Oklahoma, 4 (20-99); Texas, 11 (144); Mountain—Montana, 3 (1-19); Colorado, 4 (20-99); Utah, 1 (1-19); Pacific—Washington, 10 (20-99); Oregon, 6 (20-99); California, 24 (100-249); Hawaii, 1 (1-19).

SIC 3963, Buttons: New England—Maine, 1 (20-99); Vermont, 1 (20-99); Massachusetts, 10 (20-99); Rhode Island, 1 (1-19); Connecticut, 8 (619); Middle Atlantic—Pennsylvania, 5 (247); East North Central—Illinois, 9 (100-249); West North Central—Missouri, 1 (1-19); North Dakota, 1 (1-19); South Atlantic—Delaware, 3 (1-19); Maryland, 6 (20-99); Virginia, 3 (261); Florida, 2 (20-99); West South Central—Arkansas, 2 (1-19); Texas, 3 (1-19); Pacific—California, 9 (20-99).

SIC 3964, Needles, Pins, and Fasteners: New England—New Hampshire, 2 (100-249); Vermont, 1 (1-19); Massachusetts, 11 (425); Middle Atlantic—New Jersey, 22 (1,668); Pennsylvania, 7 (1,535); East North Central—Ohio, 2 (1-19); Michigan, 3 (1-19); Wisconsin, 3 (100-249); West North Central—Iowa, 1 (1-19); Missouri, 4 (20-99); Nebraska, 1 (500-999); Kansas, 2 (1-19); South Atlantic—Maryland, 1 (20-99); Virginia, 2 (250-499); North Carolina, 3 (250-499); South Carolina, 4 (500-999); Georgia, 4 (500-999); Florida, 3 (1-19); East South Central—Kentucky, 1 (100-249); Mississippi, 2 (250-499); West South Central—Oklahoma, 1 (1-19); Texas, 2 (20-99); Mountain—Colorado, 2 (20-99); Pacific—California, 7 (250-499).

<sup>2</sup>This State or division was not shown as a separate line in table 2 in the 1958 report for this industry. A footnote to table 2 in the 1958 report showed the number of establishments and total employment (either actual or in size ranges) for such States.

- Represents zero.

(D) Withheld to avoid disclosure. Data for this item are included in the underscored figures at the left.

TABLE 5A. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio

TABLE 5B. **Industry-Product Analysis—Shipments by Product Class and Industry:**  
**1963**

In thousands of dollars except for ranges (shown in parentheses) which are expressed in millions of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c) miscellaneous

receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

39642 69	Other needles, except phonograph needles and styli (including shoe machine, hand sewing, hand knitting, crocheting, darning, etc.).....		(X)	8,817	(X)	210,316

See footnotes at end of table.

TABLE 6A. **Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued**

Product code	Product	Unit of measure	Total shipments including interplant transfers			
			1963		1958	
			Quantity	Value (\$1,000)	Quantity	Value (\$1,000)
	NEEDLES, PINS, AND FASTENERS—Continued					
	Needles, pins, fasteners (except slide), and similar notions—Con.					
	Pins (except jewelry):					
39642 81	Common or toilet, including dressmakers' pins.....	1,000 pounds..	2,736	5,029	2,373	3,702
39642 83	Hair pins, metal, "bobby" type.....	.....do.....	7,134	7,941	9,369	12,119
39642 87	Safety pins.....	1,000 gross...	10,765	3,371	9,161	2,989
39642 89	Other pins, hat pins, glasshead pins, plastic, and metal hairpins other than metal bobby type, etc.....	.....	(X)	5,177	(X)	<sup>3</sup> 8,219
39642 00	Needles, pins, fasteners (except slide) and similar notions, n.s.k.....	.....	(X)	10,182	(X)	( <sup>4</sup> )
39640 00	Needles, pins, fasteners, n.s.k.....	.....	(X)	16,296	(X)	<sup>4</sup> 21,557

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.s.k. Not specified by kind.

<sup>1</sup>Manufacturers of fountain pens, ball point pens, and mechanical pencils classified their shipments by categories based on retail selling price. However, the reported values represent the new selling values, f.o.b. plant. New selling values exclude discounts, allowances, freight charges and excise taxes.

<sup>2</sup>In 1958, latch and spring-beard knitting machine needles are included with "other needles."

<sup>3</sup>Includes \$617 thousand of "metal hairpins, other than bobby type."

<sup>4</sup>In 1958, product code 3964200 has been included with code 3964000.

TABLE 6B. **Product Classes—Indexes of Production and Unit Value for Primary Products Shipped by All Producers: 1963 and 1958**

Product code	Product and year	Indexes (1954 = 100)	
		Production	Unit value
395--	Pens, pencils and office supplies.....1963..	( <sup>1</sup> )	( <sup>1</sup> )
	.....1958..	( <sup>1</sup> )	( <sup>1</sup> )
3951-	Pens, pen points, fountain pens, ball point pens, mechanical pencils and parts.....1963..	216	63
	.....1958..	141	83
3952-	Lead pencils and art goods.....1963..	( <sup>1</sup> )	( <sup>1</sup> )
	.....1958..	( <sup>1</sup> )	( <sup>1</sup> )
39521	Lead pencils and crayons.....1963..	152	88
	.....1958..	99	129
3955-	Carbon paper and inked ribbons.....1963..	160	110
	.....1958..	130	100
396--	Costume jewelry and notions.....1963..	( <sup>2</sup> )	( <sup>2</sup> )
	.....1958..	( <sup>2</sup> )	( <sup>2</sup> )
3964-	Needles, pins, and fasteners.....1963..	168	105
	.....1958..	128	98
39641	Zipper or slide fasteners.....1963..	193	100
	.....1958..	128	92
39642	Needles, pins, fasteners, (except slide) and similar notions.....1963..	140	116
	.....1958..	106	113

<sup>1</sup>Not shown because comparable quantity data were not obtained for hand stamps, stencils and other marking devices (products of industry 3953) and artists' materials (product class 39522).

<sup>2</sup>Not shown because comparable quantity data were not obtained for costume jewelry and costume novelties, except precious metal (products of industry 3961), artificial flowers (products of industry 3962) and a significant portion of buttons (products of industry 3963).

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.s.k. Not specified by kind.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

TABLE 6D. **Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958**

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments	
	1963 <sup>1</sup>	1958		1963 <sup>1</sup>	1958		1963 <sup>1</sup>	1958
LEAD PENCILS AND CRAYONS (39521)			NEEDLES, PINS, FASTENERS (EXCEPT SLIDE), AND SIMILAR NOTIONS (39642)			ZIPPER AND SLIDE FASTENERS (39641)		
United States, total...	69,155	65,317	United States, total...	155,672	112,037	United States, total...	143,230	87,251
Middle Atlantic.....	29,646	22,771	Northeast.....	82,018	60,721	Northeast.....	6,535	(Z)
New York.....	5,366	3,944	Massachusetts.....	12,502	11,381	Middle Atlantic.....	80,194	( <sup>2</sup> )
New Jersey.....	9,630	6,954	Connecticut.....	62,359	42,267	New York.....	53,387	30,459

976000	Materials, etc., n.s.k. <sup>1</sup> .....		(X)	21,911	(X)	15,680	

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.s.k. Not specified by kind.

<sup>1</sup>Represents (a) total cost of materials for small establishments reporting on "short forms" when separate figures for individual materials consumed were not requested and (b) total costs of materials reported for those establishments which failed to report costs of individual materials on "standard forms."

<sup>2</sup>Represents estimates published in MC58(1)-7 (Supplement), "Selected Materials Consumed," from data collected in a supplemental survey on Form MA-131, "Consumption of Materials, Parts, Containers and Supplies During 1958." This survey was limited to large establishments in selected chemical, machinery and equipment industries and resulted in estimates which are subject to greater error than are the figures on materials consumption collected as a regular part of the census of manufactures.

**TABLE 7B. Fuels and Electric Energy Consumed and Horsepower Rating of Power Equipment: 1962**

Item	Pens and mechanical pencils (SIC 3951)	Lead pencils and art goods (SIC 3952)	Marking devices (SIC 3953)	Carbon paper and inked ribbons (SIC 3955)	Costume jewelry (SIC 3961)	Artificial flowers (SIC 3962)	Buttons (SIC 3963)	Needles, pins, and fasteners (SIC 3964)

Driven by energy generated at establishment.....do....	-	-	-	-	-	-	-	(Z)
Aggregate horsepower per 100 production workers.....	470	528	286	544	211	227	385	327

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than 500 horsepower.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)
			Total (number)	Payroll (\$1,000)	Total (number)	Man-hours (1,000)	Wages (\$1,000)

## MISCELLANEOUS MANUFACTURING INDUSTRIES

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3981—Brooms and Brushes
- 3982—Linoleum, Asphalted-Felt-Base, and Other Hard Surface Floor Coverings, Not Elsewhere Classified
- 3983—Matches
- 3984—Candles
- 3987—Lamp Shades
- 3988—Morticians' Goods
- 3992—Furs, Dressed and Dyed
- 3993—Signs and Advertising Displays
- 3995—Umbrellas, Parasols, and Canes
- 3999—Manufacturing Industries, Not Elsewhere Classified

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### 3981—BROOMS AND BRUSHES

This industry comprises establishments primarily engaged in manufacturing household, industrial, and street sweeping brooms; and brushes such as paint brushes, toothbrushes, toilet brushes, and household and industrial brushes. For a detailed list of products of industry 3981, refer to table 6A, product codes 3981113 to 3981398.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Brooms and Brushes Industry totaled \$321 million. This amount included shipments of brooms and brushes (primary products) valued at \$231 million, shipments of other products (secondary products) valued at \$27 million, and miscellaneous receipts (mainly products bought and resold) at \$63 million.

This industry's shipments of brooms and brushes represented 89 percent of its total product shipments. The industry specialization ratio in 1958 was also 89 percent. Secondary products shipped by this industry in 1963 included housefurnishings (\$8 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 60 percent of the total industry shipments are represented by plants specializing in 39813, Other brushes; and 25 percent in 39812, Paint and varnish brushes.

Shipments of brooms and brushes by this industry represented 93 percent of all shipments of these products (\$248 million) by all industries. In 1958 the coverage ratio was 94 percent. Other industries shipping brooms and brushes include industry 2392, Housefurnishings, N.E.C., \$2 million.

The production index for the primary products of the industry increased to 135 in 1963 from the 1958 level of 107. The unit value index for 1963 was 101 compared to 107 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3982—LINOLEUM, ASPHALTED-FELT-BASE, AND OTHER HARD SURFACE FLOOR COVERINGS, NOT ELSEWHERE CLASSIFIED

This industry comprises establishments primarily engaged in manufacturing linoleum, asphalted-felt-base, and other hard surface floor coverings, n.e.c. Establishments primarily engaged in manufacturing rubber floor coverings are classified in industry 3069, and cork floor and wall tile in industry 2499. For a detailed list of products of industry 3982, refer to table 6A, product codes 3982111 to 3982291.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Hard Surface Floor Coverings Industry totaled \$204 million. This amount included shipments of hard surface floor coverings (primary products) valued at \$165 million, shipments of other products (secondary products) valued at \$37 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$2 million.

This industry's shipments of hard surface floor coverings represented 82 percent of its total product shipments. The industry specialization ratio in 1958 was 84 percent.

Shipments of hard surface floor coverings by this industry represented 98 percent of all shipments of these products (\$168 million) by all industries. In 1958 the coverage ratio was also 98 percent.

The production index for the primary products of the industry decreased to 95 in 1963 from the 1958 level of 98. The unit value index for 1963 was 114 compared to 100 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3983—MATCHES

This industry comprises establishments primarily engaged in manufacturing matches, regardless of the material used. For a detailed list of products of industry 3983, refer to table 6A, product codes 3983012 to 3983061.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Match Industry totaled \$64 million. As in 1958, this consisted almost entirely of primary products (matches). Furthermore in 1963 as in 1958, this industry accounted for approximately all of the matches produced in manufacturing industries.

### 3984—CANDLES

This industry comprises establishments primarily engaged in manufacturing candles from fatty acids or from mineral and animal waxes. For a detailed list of products of industry 3984, refer to table 6A, product code 3984011.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Candle Industry totaled \$46 million. This amount included shipments of candles (primary products) valued at \$41 million, shipments of other products (secondary products) valued at \$2 million, and miscellaneous receipts (mainly products bought and resold) at \$2 million.

This industry's shipments of candles represented 95 percent of its total product shipments. The industry specialization ratio in 1958 was 94 percent.

Shipments of candles by this industry represented 94 percent of all shipments of these products (\$44 million) by all industries. In 1958 the coverage ratio was 95 percent.

### 3987—LAMP SHADES

This industry comprises establishments primarily engaged in manufacturing lamp shades of all materials, except glass (industry 3229), and metal (industry 3642). For a detailed list of products of industry 3987, refer to table 6A, product code 3987011.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Lamp Shade Industry totaled \$37 million. This amount included shipments of lamp shades (primary products) valued at \$35 million, shipments of other products (secondary products) valued at \$2 million, and miscellaneous receipts (mainly contract work on materials owned by others) at less than \$1 million.

This industry's shipments of lamp shades represented 96 percent of its total product shipments. The industry specialization ratio in 1958 was 97 percent.

Shipments of lamp shades by this industry represented 98 percent of all shipments of these products (\$36 million) by all industries. In 1958 the coverage ratio was 97 percent.

### 3988—MORTICIANS' GOODS

This industry comprises establishments primarily engaged in manufacturing caskets, coffins, burial cases, and coffin shipping cases, whether of wood or other material, except concrete (industry 3272); morticians' supplies and accessories, such as burial garments, gloves, slippers, casket linings, and embalming fluids; and morticians' paraphernalia and equipment. For a detailed list of products of industry 3988, refer to table 6A, product codes 3988111 to 3988398.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Morticians' Goods Industry totaled \$290 million. This amount included shipments of morticians' goods (primary products) valued at \$262 million, shipments of other products (secondary products) valued at \$14 million, and miscellaneous receipts (mainly products bought and resold) at \$14 million.

This industry's shipments of morticians' goods represented 95 percent of its total product shipments. The industry specialization ratio in 1958 was also 95 percent. Secondary products shipped by this industry in 1963 included surgical and medical instruments and apparatus.

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 54 percent of the total industry shipments are represented by plants specializing in 39881, Metal caskets and coffins, completely lined and trimmed; and 24 percent in 39882, Wood caskets and coffins, completely lined and trimmed.

Shipments of morticians' goods by this industry represented 98 percent of all shipments of these products (\$267 million) by all industries. In 1958 the coverage ratio was 99 percent. Other industries shipping morticians' goods include industry 3443, Boiler Shop Products.

The production index for the primary products of the industry increased to 155 in 1963 from the 1958 level of 126. The unit value index for 1963 was 105, the same level as in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3992—FURS, DRESSED AND DYED

This industry comprises establishments primarily engaged in scraping, currying, tanning, bleaching, and dyeing pelts. For a detailed list of products of industry 3992, refer to table 6A, product code 3992011.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Furs, Dressed and Dyed, Industry totaled \$42 million. This amount included shipments of furs, dressed and dyed (primary products) valued at \$41 million, shipments of other products (secondary products) valued at \$1 million, and miscellaneous receipts, at less than \$1 million.

This industry's receipts for furs, dressed and dyed, including value of receipts for work done on materials owned by others, represented 98 percent of its total product shipments. The industry specialization ratio in 1958 was 100 percent.

Shipments of furs, dressed and dyed, by this industry represented 94 percent of all shipments of these products (\$44 million) by all industries. In 1958 the coverage ratio was 100 percent. Other industries shipping furs, dressed and dyed include industry 2371, Fur Goods.

#### 3993—SIGNS AND ADVERTISING DISPLAYS

This industry comprises establishments primarily engaged in manufacturing electrical, mechanical, cutout, or plate signs and advertising displays, including neon signs and advertising novelties. Sign painting shops doing business on a custom basis are classified in service industries. Establishments primarily engaged in manufacturing electric signal equipment are classified in industry 3662, and lighting fixtures in industry 3642. For a detailed list of products of industry 3993, refer to table 6A, product codes 3993111 to 3993311.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Signs and Advertising Displays Industry totaled \$647 million. This amount included shipments of signs and advertising displays (primary products) valued at \$555 million, shipments of other products (secondary products) valued at \$26 million, and miscellaneous receipts (mainly products bought and resold) at \$66 million.

This industry's shipments of signs and advertising displays represented 96 percent of its total product shipments. The industry specialization ratio in 1958 was 95 percent. Secondary products shipped by this industry in 1963 included job stampings.

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 49 percent of the total industry shipments are represented by plants specializing in 39932, Nonelectric signs and advertising displays; and 28 percent in 39931, Luminous tubing and bulb signs.

Shipments of signs and advertising displays by this industry represented 95 percent of all shipments of these products (\$584 million) by all industries. In 1958 the coverage ratio was also 95 percent. Other industries shipping signs and advertising displays include industry 3079, Plastics Products, N.E.C.

#### 3995—UMBRELLAS, PARASOLS, AND CANES

This industry comprises establishments primarily engaged in manufacturing umbrellas, parasols, canes; and trimmings, frames, handles, and other parts. For a detailed list of products of industry 3995, refer to table 6A, product code 3995011.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Umbrellas, Parasols, and Canes Industry totaled \$37 million. This amount included shipments of umbrellas, parasols, and canes (primary products) valued at \$33 million, shipments of other products (secondary products) valued at \$2 million, and miscellaneous receipts (mainly products bought and resold) at \$1 million.

This industry's shipments of umbrellas, parasols, and canes represented 95 percent of its total product shipments. The industry specialization ratio in 1958 was 96 percent.

Shipments of umbrellas, parasols, and canes by this industry represented 98 percent of all shipments of these products (\$34 million) by all industries. In 1958 the coverage ratio was 95 percent.

#### 3999—MANUFACTURING INDUSTRIES, NOT ELSEWHERE CLASSIFIED

This industry comprises establishments primarily engaged in manufacturing miscellaneous fabricated products, including beauty shop and barber shop equipment; hair work; tobacco pipes and cigarette holders; coin-operated amusement machines; and many other articles, n.e.c. For a detailed list of products of industry 3999, refer to table 6A, product codes 3999111 to 3999398.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Miscellaneous Products, N.E.C., Industry totaled \$458 million. This amount included shipments of miscellaneous products, n.e.c.

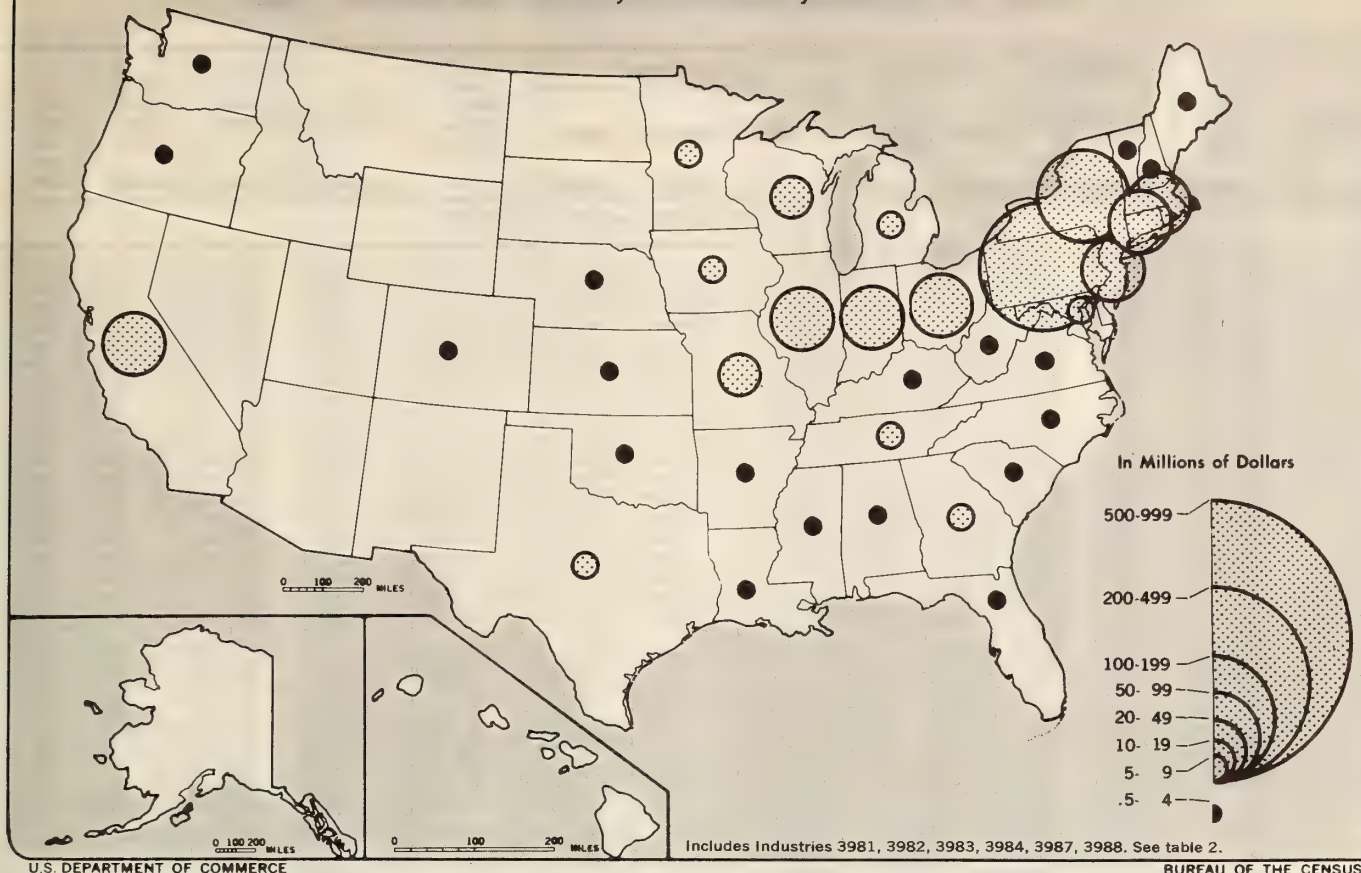

(primary products) valued at \$395 million, shipments of other products (secondary products) valued at \$27 million, and miscellaneous receipts (mainly products bought and resold) at \$36 million.

This industry's shipments of miscellaneous products, n.e.c., represented 94 percent of its total product shipments. The industry specialization ratio in 1958 was 92 percent. Secondary products shipped by this industry in 1963 included wood products, n.e.c., and precision measuring tools.

Shipments of miscellaneous products, n.e.c., by this industry represented 84 percent of all shipments of these products (\$472 million) by all industries. In 1958 the coverage ratio was 87 percent. Other industries shipping miscellaneous products, n.e.c., include industry 2844, Toilet Preparations, \$7 million.

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: All employees: For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). Production workers: For 1947 and prior years figures represent an average of 12 monthly figures. Value added: Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. Cost of materials: Cost of materials prior to 1958 (except 1954) excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. Value of shipments: Value of shipments for years prior to 1958 (except 1954) excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than \$500 thousand. n.e.c. Not elsewhere classified.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>Because of the inclusion of excise taxes in both the cost of materials and the value of shipments for 1937 and 1935, the statistics for these years are not strictly comparable with statistics for other years.

<sup>3</sup>No comparable figures are available for earlier years.

<sup>4</sup>The figures for 1925 and prior years do not include data for metal burial vaults, whereas the figures for later years include data for this product.

<sup>5</sup>Relationships not meaningful because predominance of miscellaneous receipts, particularly contract and commission work on material owned by others.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures of individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

<sup>1</sup>General statistics for some producing States have been withheld to avoid disclosing figures for individual companies. Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State.

SIC 3981, Brooms and Brushes: New England—Maine, 3 (159); New Hampshire, 2 (100-249); Vermont, 3 (118); Massachusetts, 26 (2-139); Rhode Island, 4 (20-99); Connecticut, 9 (535); East North Central—Indiana, 11 (184); Michigan, 22 (194); West North Central—Missouri, 13 (298); Kansas, 7 (20-99); South Atlantic—Delaware, 4 (1-19); Virginia, 5 (20-99); West Virginia, 3 (1-19); South Carolina, 4 (20-99); East South Central—Kentucky, 10 (20-99); Alabama, 8 (100-249); Mississippi, 3 (1-19); West South Central—Arkansas, 9 (20-99); Oklahoma, 8 (20-99); Mountain—Montana, 1 (1-19); Colorado, 8 (20-99); New Mexico, 2 (1-19); Arizona, 1 (1-19); Utah, 1 (1-19); Pacific—Washington, 4 (20-99); Hawaii, 5 (1-19).

SIC 3982, Hard Surface Floor Coverings: New England—Maine, 1 (100-249); Massachusetts, 1 (250-499); Connecticut, 1 (100-249); Middle Atlantic—New York, 1 (1-19); New Jersey, 2 (1,000-2,499); Pennsylvania, 3 (3,980); East North Central—Ohio, 1 (100-249); West North Central—Nebraska, 1 (1-19); South Atlantic—Virginia, 1 (20-99); East South Central—Kentucky, 1 (20-99); Pacific—California, 3 (114).

SIC 3983, Matches: New England—New Hampshire, 1 (100-249); Massachusetts, 1 (250-499); Rhode Island, 1 (1-19); Middle Atlantic—New York, 2 (250-499); New Jersey, 2 (500-999); East North Central—Ohio, 4 (833); Illinois, 4 (738); Michigan, 1 (1-19); West North Central—Minnesota, 1 (1-19); Missouri, 2 (250-499); South Atlantic—North Carolina, 1 (20-99); West South Central—Louisiana, 1 (100-249); Texas, 1 (20-99); Pacific—Washington, 1 (100-249); California, 3 (250-499).

SIC 3984, Candles: New England—Vermont, 1 (1-19); Massachusetts, 6 (100-249); Middle Atlantic—New Jersey, 8 (208); Pennsylvania, 5 (100-249); East North Central—Ohio, 5 (292); Illinois, 3 (1-19); Michigan, 1 (1-19); Wisconsin, 2 (250-499); West North Central—Iowa, 1 (179); Missouri, 4 (1-19); North Dakota, 1 (1-19); Nebraska, 1 (1-19); South Atlantic—Maryland, 1 (1-19); North Carolina, 1 (1-19); Florida, 2 (1-19); West South Central—Louisiana, 3 (1-19); Texas, 8 (156); Mountain—Colorado, 1 (1-19); Arizona, 1 (1-19); Pacific—Oregon, 1 (100-249); California, 25 (271).

SIC 3987, Lampshades: New England—Vermont, 1 (1-19); Massachusetts, 6 (100-249); Rhode Island, 6 (182); Middle Atlantic—New York, 89 (920); East North Central—Michigan, 6 (20-99); West North Central—Minnesota, 1 (1-19); Iowa, 2 (20-99); South Atlantic—Delaware, 1 (1-19); Maryland, 2 (1-19); Georgia, 1 (1-19); Florida, 3 (1-19); East South Central—Kentucky, 1 (1-19); Tennessee, 1 (1-19); Mississippi, 1 (20-99); West South Central—Texas, 1 (1-19); Mountain—Arizona, 3 (1-19); Utah, 1 (1-19); Pacific—Oregon, 1 (1-19).

SIC 3988, Miscellaneous Goods: New England—Maine, 4 (20-99); New Hampshire, 7 (200); Rhode Island, 3 (20-99); West North Central—Minnesota, 8 (190); North Dakota, 1 (1-19); South Dakota, 1 (1-19); Nebraska, 3 (20-99); Kansas, 6 (20-99); South Atlantic—Maryland, 3 (20-99); District of Columbia, 1 (1-19); West Virginia, 4 (20-99); South Carolina, 6 (189); East South Central—Kentucky, 8 (20-99); Mississippi, 3 (20-99); Mountain—Montana, 1 (1-19); Colorado, 7 (20-99); New Mexico, 2 (1-19); Arizona, 2 (20-99); Utah, 4 (20-99); Pacific—Oregon, 4 (20-99); Hawaii, 3 (1-19).

SIC 3992, Furs, Dressed and Dyed: New England—Maine, 1 (1-19); Vermont, 1 (1-19); Connecticut, 2 (1-19); Middle Atlantic—Pennsylvania, 6 (20-99); East North Central—Illinois, 2 (100-249); Wisconsin, 1 (1-19); West North Central—Minnesota, 1 (1-19); Missouri, 2 (1-19); California, 1 (1-19); South Atlantic—Virginia, 1 (1-19); South Carolina, 1 (200-249); West South Central—Louisiana, 1 (1-19); Mountain—Colorado, 2 (20-99); Pacific—Washington, 4 (1-19); California, 5 (1-19).

SIC 3993, Signs and Advertising Displays: New England—Maine, 11 (20-99); New Hampshire, 5 (1-19); Vermont, 4 (20-99); Connecticut, 47 (333); West North Central—North Dakota, 4 (20-99); South Dakota, 6 (20-99); South Atlantic—Delaware, 4 (20-99); District of Columbia, 13 (100-249); West Virginia, 10 (20-99); East South Central—Mississippi, 11 (20-99); Mountain—Montana, 14 (20-99); Idaho, 16 (20-99); Wyoming, 5 (20-99); Nevada, 8 (158); Pacific—Alaska, 3 (1-19); Hawaii, 6 (20-99).

SIC 3995, Umbrellas, Parasols, and Canes: New England—Massachusetts, 1 (20-99); Middle Atlantic—Pennsylvania, 7 (250-499); East North Central—Ohio, 2 (20-99); Illinois, 1 (1-19); West North Central—Iowa, 1 (1-19); Missouri, 1 (1-19); South Atlantic—Maryland, 4 (214); Georgia, 1 (1-19); Florida, 3 (1-19); East South Central—Mississippi, 1 (1-19); West South Central—Arkansas, 3 (20-99); Louisiana, 1 (1-19); Texas, 1 (1-19); Mountain—Arizona, 1 (1-19); Pacific—Oregon, 1 (20-99); California, 2 (20-99).

SIC 3999, Miscellaneous Products, N.E.C.: New England—Maine, 3 (1-19); New Hampshire, 6 (20-99); Vermont, 3 (161); Rhode Island, 33 (670); East North Central—Indiana, 24 (301); Wisconsin, 29 (678); West North Central—North Dakota, 1 (1-19); South Dakota, 4 (20-99); Kansas, 2 (1-19); South Atlantic—Virginia, 9 (114); West Virginia, 1 (1-19); North Carolina, 11 (250-499); South Carolina, 4 (1-19); Georgia, 2 (1-19); East South Central—Tennessee, 13 (100-249); Alabama, 2 (1-19); Mississippi, 4 (1-19); West South Central—Arkansas, 4 (20-99); Louisiana, 4 (1-19); Oklahoma, 5 (20-99); Mountain—Montana, 1 (1-19); Colorado, 8 (20-99); New Mexico, 2 (1-19); Arizona, 7 (20-99); Utah, 5 (21-99); Nevada, 3 (20-99); Pacific—Washington, 11 (20-99); Oregon, 8 (20-99); Alaska, 1 (1-19).

<sup>2</sup>This State or division was not shown as a separate line in table 2 in the 1958 report for this industry. A footnote to table 2 in the 1958 report showed the number of establishments and total employment (either actual or in size ranges) for such States.

**TABLE 5A. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958**

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		(\$1,000)	(\$1,000)	(\$1,000)	(\$1,000)	Col. B Col. B+C (percent)	(\$1,000)	(\$1,000)	(\$1,000)	Col. B Col. F (percent)

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. Figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>For 1963 and 1958 include receipts for work done on materials owned by others. Such receipts are excluded in other years.

**TABLE 6D. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958**

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments

(Z) Less than \$1 million reported.

<sup>2</sup> For the specified product classes shipments of \$1 million or more were reported for the States listed but the exact figures are withheld to avoid disclosure of individual company figures: 39812, Massachusetts, Ohio, Indiana, Wisconsin, Maryland, Tennessee, Oregon, and California; 39813, New Hampshire, Connecticut, Michigan, Minnesota, Iowa, Maryland, and Kentucky; 39881, Louisiana and Washington; 39332, Alabama; 39933, Wisconsin, Iowa, Missouri, and Tennessee; 39991, Massachusetts, New York, Ohio, Illinois, Wisconsin, and California.

<sup>2</sup>Shipments of \$1 million or more were reported but exact figures are withheld to avoid disclosure of individual company figures.

<sup>3</sup>For product class 39933, the 1958 sum of value of shipments for New England and Middle Atlantic equals \$26,106 million.

Aggregate horsepower per 100 production workers.....	384	1,874	316	143	76	463	262	293	-	329

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than 500 horsepower. n.e.c. Not elsewhere classified.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

## Ordnance and Accessories

### 19A Ordnance and accessories

For 1953 and earlier years, data for Major Group 19, Ordnance and Accessories, are included with Major Group 39 in table 1.

For 1954 and subsequent years Major Group 19 data are published separately. However, in some tables within these volumes, data for Major Group 19 are given both separately and combined with Major Group 39.

Major Group 19 covers establishments primarily engaged in manufacturing artillery, small arms, and related equipment; ammunition; tanks and specialized tank parts; sighting and fire control equipment; complete guided missiles and research and development on complete guided missiles and, miscellaneous ordnance and accessories, not elsewhere classified.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>The figures for 1939 through 1963 include data for employees of manufacturing establishments who were engaged in distribution and construction work. The extent to which data for such employees are included in the figures for earlier years is not known.

<sup>2</sup>For the period 1954 to 1963, figures represent adjusted value added by manufacture and for earlier years, unadjusted value added. Adjusted value added is equal to value of shipments (including resales of finished products) less cost of finished products, materials, supplies, fuel, electric energy and contract work, plus the net change in the value of finished products and work-in-process inventories between the beginning and end of the year, without adjustment for price changes. Unadjusted value added is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year.

<sup>3</sup>The total value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry classification. For more information, see Introduction.

<sup>4</sup>The figures for 1958 to 1963 include expenditures for plants under construction and not yet in operation.

<sup>5</sup>In 1954, data for administrative and auxiliary establishments for Major Group 19, "Ordnance and Accessories", are included with Major Group 39, "Miscellaneous Manufactures".

<sup>6</sup>Data for 1958 to 1963 include establishments primarily engaged in manufacturing complete guided missiles, and in performing research and development on complete guided missiles.

<sup>7</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

Note: Detailed figures may not add to totals because of independent rounding or independent dropping of fractions of thousands rather than rounding in computer operations. See appendix A for an explanation of terms used.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.  
<sup>1</sup>The value of shipments and cost of materials for industry groups (2-and3-digit) include extensive duplication arising from shipments between establishments in the same industry. For a more complete explanation, see Introduction.

## ORDNANCE AND ACCESSORIES

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 1911—Guns, Howitzers, Mortars, and Related Equipment
- 1925—Guided Missiles and Space Vehicles, Completely Assembled
- 1929—Ammunition, Not Elsewhere Classified
- 1931—Tanks and Tank Components
- 1941—Sighting and Fire Control Equipment
- 1951—Small Arms
- 1961—Small Arms Ammunition
- 1999—Ordnance and Accessories, Not Elsewhere Classified

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### 1911—GUNS, HOWITZERS, MORTARS, AND RELATED EQUIPMENT

This industry comprises establishments primarily engaged in the manufacture of naval, aircraft, anti-aircraft, tank, coast, and field artillery having a bore over 30 mm. (or over 1.18 inch), and components. Establishments primarily engaged in manufacturing small arms and parts 30 mm. (or 1.18 inch) and below are classified in industry 1951. However, all statistics for industry 1911 combined with those for industry 1999 in 1963, with the exception of a value of shipments figure for the products primary to industry 1911. The latter figure is shown separately in table 6A.

### 1925—GUIDED MISSILES AND SPACE VEHICLES, COMPLETELY ASSEMBLED

This industry comprises establishments primarily engaged in the manufacture of completely assembled guided missiles and space vehicles. Establishments primarily engaged in manufacturing guided missiles and space vehicle engines and engine parts are classified in industry 3722; space satellites, guided missile and space vehicle airborne and ground guidance, check-out and launch electronic systems and components in industry 3662; and guided missile and space vehicle airframes, nose cones, and space capsules in industry 3729. This industry is now a separate one under the Standard Industrial Classification System. In 1958 the SIC included it as part of industry 1929; it was published separately at that time as census industry 1925. For a detailed list of products of industry 1925, refer to table 6A, product codes 1925111 to 1925115.

Value of work done and other receipts of the Complete Guided Missiles Industry totaled \$3,054 million. This amount included work on complete guided missiles and space vehicles (primary products) valued at \$2,735 million, shipments of other products (secondary products) valued at \$176 million, and miscellaneous receipts at \$143 million.

This industry's receipts for work done on complete guided missiles and space vehicles represented 94 percent of its total product shipments. The industry specialization ratio in 1958 was 73 percent. Secondary products shipped by this industry in 1963 consisted mainly of aircraft and parts (\$131 million).

Shipments of complete guided missiles and space vehicles by this industry represented 69 percent of all shipments of these products (\$3,957 million) by all industries. In 1958 the coverage ratio was 83 percent. Other industries shipping complete guided missiles and space vehicles consisted mainly of industry 3721, Aircraft, and industry 3729, Aircraft Equipment, N.E.C.

#### 1929—AMMUNITION, NOT ELSEWHERE CLASSIFIED

This industry comprises establishments primarily engaged in the manufacture of ammunition, n.e.c., or in loading and assembling ammunition over 30 mm. (or over 1.18 inch) for naval, aircraft, anti-aircraft, tank, coast, and field artillery; including component parts. This industry also includes establishments primarily engaged in manufacturing bombs, mines, torpedoes, grenades, depth charges, chemical warfare projectiles, and their component parts. Establishments primarily engaged in manufacturing small arms ammunition are classified in industry 1961; explosives in industry 2892; and military pyrotechnics in industry 2899. This industry has been amended to include industry 1921, Artillery Ammunition and industry 1922, Ammunition, Loading and Assembling, which were defined as separate industries in the 1957 Standard Industrial Classification Manual. Also, establishments producing guided missiles and space vehicles are now classified in industry 1925, Complete Guided Missiles. For a detailed list of products of industry 1929, refer to table 6A, product class codes 19291 to 19293.

The code number for this industry in the Standard Industrial Classification Manual is unchanged, but the content of the industry has been significantly changed from the classification system used in 1958. The change in composition of the industry as now constituted, compared with that under the classification system followed in the 1958 census, is due principally to industries 1921, Artillery Ammunition, and 1922, Ammunition Loading and Assembling, being included in this industry for 1963.

Value of shipments and other receipts of the Ammunition, N.E.C., Industry totaled \$503 million. This amount included shipments of ammunition, n.e.c. (primary products) valued at \$290 million, shipments of other products (secondary products) valued at \$123 million, and miscellaneous receipts (mainly contract work on materials owned by others) at \$89 million.

This industry's shipments of ammunition, n.e.c., represented 70 percent of its total product shipments.

Shipments of ammunition, n.e.c., by this industry represented 82 percent of all shipments of these products (\$356 million) by all industries. Other industries shipping ammunition, except for small arms, n.e.c. (primary products) included industry 3461, Metal Stampings; industry 3545, Machine Tool Accessories; and industry 3621, Motors and Generators.

#### 1931—TANKS AND TANK COMPONENTS

This industry comprises establishments primarily engaged in the manufacture or assembly of complete tanks and other tracked military vehicles and specialized components for

tanks. Establishments primarily engaged in manufacturing wheeled military vehicles are classified in group 371, and tank engines in industry 3519.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Tanks and Tank Components Industry totaled \$394 million. This amount included shipments of tanks and tank components (primary products) valued at \$358 million, shipments of other products (secondary products) valued at \$18 million, and miscellaneous receipts at \$18 million.

This industry's shipments of tanks and tank components represented 95 percent of its total product shipments. The industry specialization ratio in 1958 was 89 percent.

Shipments of tanks and tank components by this industry in 1963 represented 79 percent of all shipments of these products (\$454 million) by all industries. In 1958 the coverage ratio was 84 percent. Another industry shipping tanks and tank components was industry 3717, Motor Vehicles and Parts, \$5 million.

#### 1941—SIGHTING AND FIRE CONTROL EQUIPMENT

This industry comprises establishments primarily engaged in the manufacture of sighting and fire control equipment, but which are not engaged in manufacturing optical lenses and prisms. Important products of this industry include bomb sights, percentage correctors, wind correctors, directors, and sound locators. Establishments engaged in manufacturing optical lenses and prisms, and also manufacturing sighting and fire control equipment, are classified in industry 3831.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Sighting and Fire Control Equipment Industry totaled \$157 million. This amount included shipments of sighting and fire control equipment (primary products) valued at \$86 million, shipments of other products (secondary products) valued at \$66 million, and miscellaneous receipts at \$5 million.

This industry's shipments of sighting and fire control equipment represented 57 percent of its total product shipments. The industry specialization ratio in 1958 was 62 percent. Secondary products shipped by this industry in 1963 consisted mainly of test equipment for testing electrical, radio, and communication circuits and motors, electronic navigational aids, and missile-borne and space vehicle-borne navigation and guidance systems and equipment.

Shipments of sighting and fire control equipment by this industry represented 80 percent of all shipments of these products (\$107 million) by all industries. In 1958 the coverage ratio was 89 percent. Another industry shipping sighting and fire control equipment was industry 3662, Radio, TV Communications Equipment, \$13 million.

#### 1951—SMALL ARMS

This industry comprises establishments primarily engaged in the manufacture of small firearms having a bore 30 mm. (or 1.18 inch) and below, and parts for small firearms. Establishments primarily engaged in manufacturing artillery and mortars having a bore over 30 mm. (or over 1.18 inch), and component parts are classified in industry 1911. For a detailed list of products of industry 1951, refer to table 6A, product codes 1951113 to 1951281.

Value of shipments and other receipts of the Small Arms, 30 mm. and Under, Industry totaled \$133 million. This amount included shipments of small arms, 30 mm. and under, (primary products) valued at \$122 million, shipments of other products (secondary products) valued at \$6 million, and miscellaneous receipts (mainly resales) at \$5 million.

This industry's shipments of small arms, 30 mm. and under, represented 95 percent of its total product shipments. The industry specialization ratio in 1958 was 91 percent.

Shipments of small arms, 30 mm. and under, by this industry represented 82 percent of all shipments of these products (\$149 million) by all industries. In 1958 the coverage ratio was also 81 percent. Other industries shipping small arms, 30mm. and under, included industry 3722, Aircraft Engines and Parts; and industry 3729, Aircraft Equipment, N.E.C.

#### 1961—SMALL ARMS AMMUNITION

This industry comprises establishments primarily engaged in the manufacture of ammunition for small arms having a bore of 30 mm. (or 1.18 inch) and below. Establishments primarily engaged in manufacturing ammunition except for small arms are classified in industry 1929, blasting and detonating caps and safety fuses in industry 2892, and fireworks in industry 2899. For a detailed list of products of industry 1961, refer to table 6A, product codes 1961012 to 1961089.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Small Arms Ammunition Industry totaled \$192 million. This amount included shipments of small arms ammunition (primary products) valued at \$177 million and shipments of other products (secondary products) and miscellaneous receipts which together totaled \$16 million.

This industry's shipments of small arms ammunition are between 85 and 99 percent of its total product shipments. The industry specialization ratio in 1958 also was between 85 and 99 percent.

Shipments of small arms ammunition by this industry represented 92 percent of all shipments of these products (\$192 million) by all industries. In 1958 the coverage ratio was 94 percent. Other industries shipping small arms ammunition included industry 1999, Ordnance and Accessories, N.E.C.; industry 3352, Aluminum Rolling and Drawing; and industry 3694, Engine Electrical Equipment.

#### 1999—ORDNANCE AND ACCESSORIES, NOT ELSEWHERE CLASSIFIED

This industry comprises establishments primarily engaged in the manufacture of ordnance and accessories, n.e.c. Complete guided missiles and space vehicles are classified in industry 1925. However, in 1963 all statistics for industry 1999 include those for industry 1911, with the exception of a value of shipments figure for the products primary to industry 1911. The latter figure is shown separately in table 6A.

Therefore, the textual material below represent the activities of industries 1999 and 1911 combined.

Value of shipments and other receipts of the Ordnance and Accessories, N.E.C., Industry (including SIC 1911) totaled \$351 million. This amount included shipments of ordnance and accessories, n.e.c.; and howitzers, mortars, and other artillery over 30 mm. (primary products) valued at \$176 million, shipments of other products (secondary products) valued at \$49 million, and miscellaneous receipts (mainly contract work on materials owned by others) at \$126 million.

These industry's shipments of ordnance and accessories, n.e.c., and howitzers, mortars, and other artillery over 30 mm. represented 78 percent of the total product shipments. (The specialization ratio for industry 1999 alone is not affected by the inclusion of industry 1911).

Shipments of ordnance and accessories, n.e.c., and howitzers, mortars, and other artillery over 30 mm. represented 69 percent of all shipments of these products (\$256 million) by all industries. (The coverage ratio for industry 1999 alone in 1963 was 72 percent.) Other industries shipping ordnance and accessories, n.e.c., and howitzers, mortars, and other artillery over 30 mm. consisted mainly of industry 3729, Aircraft Equipment, N.E.C., \$7 million; industry 3662, Radio, TV Communication Equipment, \$6 million; and industry 3722, Aircraft Engines and Parts, \$4 million.

### ORDNANCE AND ACCESSORIES, Major Group 19 Value Added by Manufacture by State: 1963

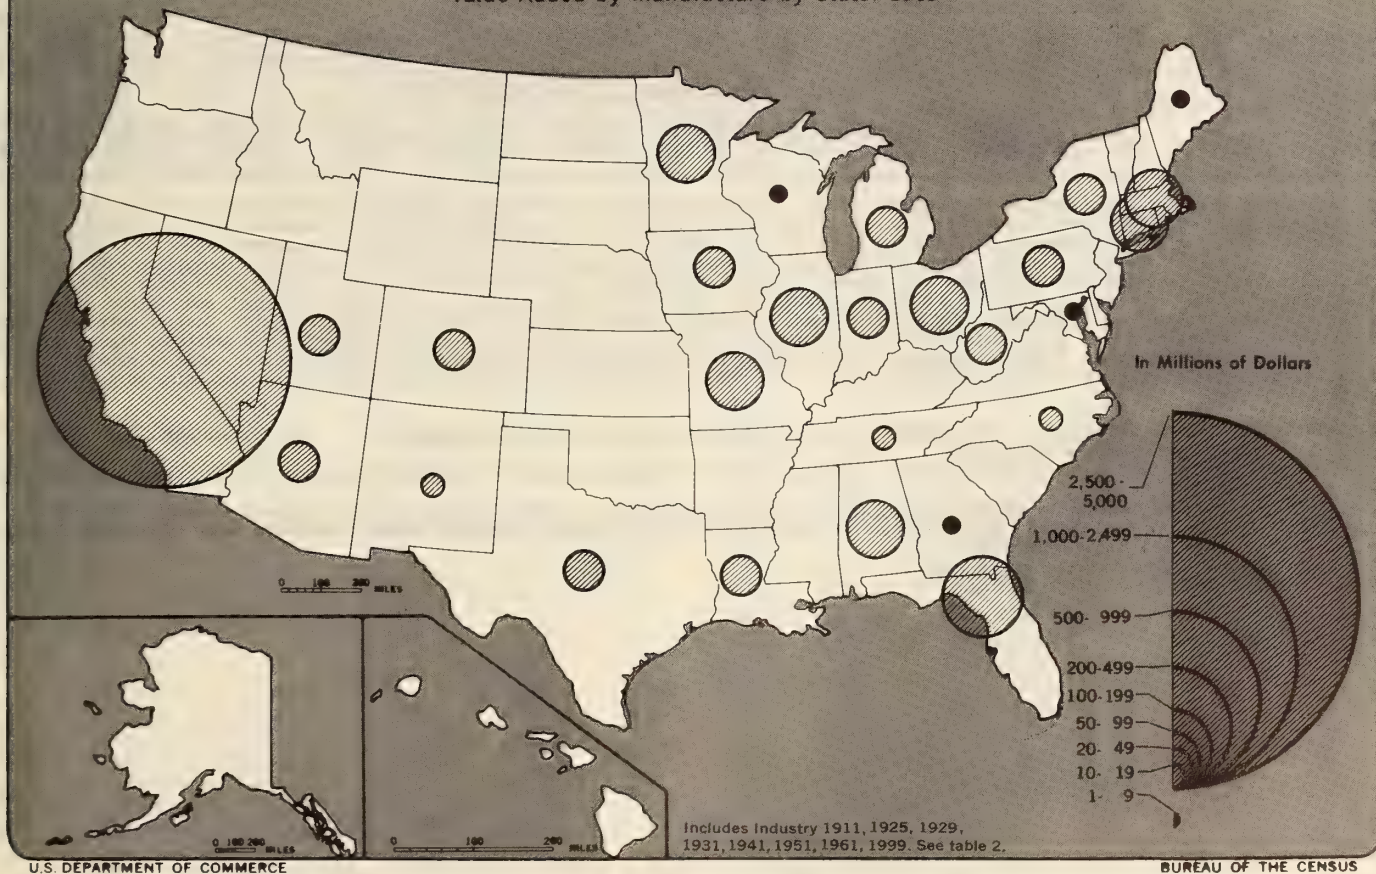

TABLE 1. General Statistics: 1963 and Earlier Years

Year	Com- panies  (number)	Establishments		All employees		Production workers			Value added by manufacture, adjusted  (\$1,000)	Cost of materials  (\$1,000)	Value of shipments  (\$1,000)	Capital expend- itures, new  (\$1,000)	Spe- cial- ization ratio (per- cent)	Cov- erage ratio (per- cent)

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: All employees: For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). Production workers: For 1947 and prior years figures represent an average of 12 monthly figures. Value added: Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. Cost of materials: Cost of materials prior to 1958 (except 1954) excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. Value of shipments: Value of shipments for years prior to 1958 (except 1954) excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

<sup>1</sup>Industry 1911 combined with industry 1999 for 1963. However, a value of shipments figure for the products primary to this industry is shown in table 6A.

<sup>2</sup>The adjusted value added for the Guided Missiles and Space Vehicles Industry does not take into account the change in inventory between the beginning and end of the year, since the figures reported by establishments in this industry represent value of work done rather than value of shipments. It does include value added by resales.

<sup>3</sup>For industry 1925, represents value of work done.

<sup>4</sup>Excludes 1958 SIC 1922, ammunition loading.

Note: Detailed figures may not add to totals because of independent rounding or independent dropping of fractions of thousands rather than rounding in computer operations. See Introduction for an explanation of terms used.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>The proportion of product shipments (both primary and secondary) of the industry represented by primary products.

<sup>2</sup>The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.

<sup>3</sup>For industry 1925, represents value of work done.

<sup>4</sup>See table 1, footnote 2.

TABLE 4. Selected Statistics, by Employment Size of Establishments: 1963

Item	Establishments, total	Establishments with an average of—									
		1 to 4 employees	5 to 9 employees	10 to 19 employees	20 to 49 employees	50 to 99 employees	100 to 249 employees	250 to 499 employees	500 to 999 employees	1,000 to 2,499 employees	2,500 employees and over

- Represents zero.

(D) Withheld to avoid disclosure. Data for this item are included in the underscored figures at the left.

n.e.c. Not elsewhere classified.

<sup>1</sup>See footnote 2, table 1.<sup>2</sup>Includes capital expenditures of approximately \$200-\$500 thousand for plants under construction but not in operation.

**TABLE 5A. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958**

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		(\$1,000)	(\$1,000)	(\$1,000)	(\$1,000)	Col. B Col. B+C (percent)	(\$1,000)	(\$1,000)	(\$1,000)	Col. B Col. F (percent)
		A	B	C	D	E	F	G	H	I
1911	Guns, howitzers, and mortars.....1963.. 1958..	( <sup>1</sup> ) 6,892	( <sup>1</sup> ) ( <sup>2</sup> )	( <sup>1</sup> ) ( <sup>2</sup> )	( <sup>1</sup> ) ( <sup>2</sup> )	(NA) (NA)	( <sup>1</sup> ) ( <sup>2</sup> )	( <sup>1</sup> ) ( <sup>2</sup> )	( <sup>1</sup> ) ( <sup>2</sup> )	(NA) (NA)

Note: See Introduction for an explanation of terms used.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

<sup>1</sup>Data for industry 1911 included with industry 1999 in 1963.

<sup>2</sup>Data for industry 1911 and a portion of industry 1929 has been included with industry 1999 in 1958 to avoid disclosing figures of individual companies.

<sup>3</sup>Represents value of work done.

<sup>4</sup>For industry 1961, value of shipments of secondary products are included with miscellaneous receipts. The specialization ratios are between 85 and 99 percent.

<sup>5</sup>The inclusion of data for industry 1911 does not effect the specialization ratio for industry 1999 in 1963.

<sup>6</sup>The coverage ratio for industry 1999 alone for 1963 is 72 percent. The difference in coverage by inclusion of the products primary to industry 1911 results from the fact that most of the value for industry 1911 is accounted for by establishments in industries other than 1911.

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c)

miscellaneous receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

<sup>1</sup>Includes \$372,326 shipped by industry 3721, Aircraft. In addition, the following industries had shipments of \$2 million or more; however, the exact values are withheld to avoid disclosing individual company figures: 3662, Radio, TV Communications Equipment; 3722, Aircraft Engines and Parts; and, 3729, Aircraft Equipment, N.E.C.

<sup>2</sup>Includes shipments of \$2 million or more by the following industries; however, the exact values are withheld to avoid disclosing individual company figures: 3662, Radio, TV Communications Equipment; 3721, Aircraft; and 3729, Aircraft Equipment, N.E.C.

Footnotes continued on next page.

# TABLE 5B. Industry-Product Analysis—Production by Product Class and Industry: 1963—Continued

Footnotes for Table 5B-19A—Continued

<sup>3</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 27313, Technical, scientific, and professional books; 36624, Electronic navigational aids (except missile-borne and space vehicle basin equipment) and 36628, Missile-borne and space vehicle-borne navigation and guidance systems and equipment.

<sup>4</sup>Includes shipments of \$2 million or more by the following industries; however, the exact values are withheld to avoid disclosing individual company figures: 3461, Metal Stampings; 3545, Machine Tool Accessories; 3621, Motors and Generators; 3661, Telephone; Telegraph Apparatus; and 3871, Watches and Clocks.

<sup>5</sup>Includes \$2 million shipped by industry 3729, Aircraft Equipment, N.E.C. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 1941, Sighting and Fire Control Equipment; 3443, Boiler Shop Products; 3599, Miscellaneous Machinery; and 3636, Sewing Machines.

<sup>6</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 19310, Tanks and tank components; 33991, Metal powders and paste; 34320, Plumbing fixtures and fittings and trim (brass goods); 34434, Gas cylinders; 34612, Job stampings, except automotive; 34615, Stamped and spun hospital utensils and cooking and kitchen household utensils except aluminum; 36621, Radio and TV commercial communication equipment; 37175, Parts and accessories for passenger cars, trucks, and busses, shipped to motor vehicle manufacturers; 37221, Aircraft engines for military customers; 37223, Research and development on aircraft engines; 37291, Other aircraft parts and auxiliary equipment; and 37292, Guided missile components and subassemblies, n.e.c.

<sup>7</sup>Includes \$5,029 shipped by industry 3717, Motor Vehicles and Parts. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 1929, Ammunition, N.E.C.; 3323, Steel Foundries, 3585, Refrigeration Machinery; 3722, Aircraft Engines and Parts; and 3742, Railroad and Street Cars.

<sup>8</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 37291, Other aircraft parts and auxiliary equipment; and 37292, Guided missile components and subassemblies, n.e.c.

<sup>9</sup>Includes \$12,997 thousand shipped by industry 3662, Radio, TV Communications Equipment. In addition, industry 3585, Refrigeration Machinery, had shipments which totaled \$2 million or more, but is withheld to avoid disclosing figures for individual companies.

<sup>10</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing figures for individual companies: 19293, Ammunition, n.e.c.; 36112, Test equipment for testing electrical, radio, and communication circuits and motors; 36624, Electronic navigational aids; 36628, Missile-borne and space vehicle-borne navigation and guidance systems and equipment; 37291, Other aircraft parts and auxiliary equipment; 37292, Guided missile components and subassemblies, n.e.c.; 38311, Optical instruments and lenses, except sighting and fire-control equipment; and 38410, Surgical and medical instruments and apparatus.

<sup>11</sup>Includes shipments of over \$2 million of the following industries, however, the exact values are withheld to avoid disclosing individual company figures: 3722, Aircraft Engines and Parts; and 3729, Aircraft Equipment, N.E.C.

<sup>12</sup>Includes shipments of over \$2 million of products classified in industry 3717, Motor Vehicles and Parts; however, the exact figures are withheld to avoid disclosing individual company figures.

<sup>13</sup>Includes the following industries which total \$2 million or more but are withheld to avoid disclosing company figures: 1999, Ordnance and Accessories, N.E.C.; 3352, Aluminum Rolling and Drawing; and 3694, Engine Electrical Equipment.

<sup>14</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing company figures: 19990, Ordnance and accessories, n.e.c., and 34295, Other hardware.

<sup>15</sup>Includes shipments (in thousands of dollars) by the following: \$2,020 by industry 1929, Ammunition, N.E.C.; \$6,134 by industry 3662, Radio, TV Communication Equipment; \$3,562, by industry 3722, Aircraft Engines and Parts; \$7,227 by industry 3729, Aircraft Equipment, N.E.C.; as well as by the following industries, the shipments of which total \$2 million or more but are withheld to avoid disclosing individual company figures: 1961, Small Arms Ammunition; 2522, Metal Office Furniture; 3011, Tires and Inner Tubes; 3433, Heating Equipment, Except Electric; 3443, Boiler Shop Products; 3461, Metal Stampings; 3519, Internal Combustion Engines; 3544, Special Dies and Tools; 3571, Computing and Related Machines; 3599, Miscellaneous Machinery; 3679, Electronic Components, N.E.C.; 3721, Aircraft; and 3861, Photographic Equipment.

<sup>16</sup>Includes the following product classes which total \$2 million or more, but are withheld to avoid disclosing individual company figures: 19610, Small arms ammunition, 30 mm. and under (or 1.18 inches and under); 35111, Steam, gas, and hydraulic turbine generator set units and parts; 35595, Other special industry machinery and equipment; 36122, Power and distribution transformers, except parts; 36131, Switchgear, including power switchgear assemblies, and other switching and interrupting devices 2,300 volts; 36212, Integral horsepower motors and generators, except land transportation; and 36220, General industry power circuit devices and controls.

TABLE 6A. Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958

Product code	Product	Total shipments including interplant transfers							
		1963		1958					
		Quantity (number of units)	Value (\$1,000)	Quantity (number of units)	Value (\$1,000)				
1911- --	GUNS, HOWITZERS, MORTARS, AND RELATED EQUIPMENT, OVER 30 MM.(OR OVER 1.18 INCHES).....	(X)	112,444	(X)	(2)				
1925- --	GUIDED MISSILES AND SPACE VEHICLES, COMPLETELY ASSEMBLED, TOTAL.....	(X)	33,957,159	(X)	31,886,682				
19251 --	Guided missiles and space vehicles, complete.....	(X)	1,644,181	(X)	900,837				
19251 11	Complete missile systems (excluding propulsion).....	(X)	1,241,792	}	900,837				
	Complete space vehicle systems (excluding propulsion):								
19251 13	For United States Government military customers.....	(X)	52,804						
19251 15	For United States Government nonmilitary customers.....	(X)	349,585						
19253 --	Research and development on guided missiles and space vehicles (complete).	(X)	1,628,268	(X)	4985,845				
19253 11	Research and development on complete missile systems.....	(X)	778,107	(X)	(NA)				
	Research and development on complete space vehicle systems:								
19253 13	For United States Government military customers.....	(X)	205,143	(X)	(NA)				
19253 15	For United States Government nonmilitary customers.....	(X)	645,018	(X)	(NA)				
19255 --	All other services on complete missiles and space vehicles.....	(X)	684,710	(X)	(4)				
19255 11	All other services on complete missiles.....	(X)	593,869	(X)	(NA)				
	All other services on complete space vehicles:								
19255 13	For United States Government military customers.....	(X)	39,921	(X)	(NA)				
19255 15	For United States Government nonmilitary customers.....	(X)	50,092	(X)	(NA)				
19255 23	For nongovernment customers.....	(X)	828	(X)	(NA)				
1929- --	AMMUNITION, N.E.C.....	(X)	355,893	(X)	2133,031				
19291 --	Ammunition over 30 mm.(or 1.18 inches and over), n.e.c.....	}	169,222	(X)	70,736				
19292 --	Receipts for ammunition loading and assembly over 30 mm.(or over 1.18 inches).....			(X)	(2)				
19293 --	Ammunition, n.e.c.....			(X)	62,295				
19290 --	Ammunition, n.e.c., n.s.k.....			(X)	62,295				
1931- --	TANKS AND TANK COMPONENTS.....	(X)	454,396	(X)	210,752				
1941- --	SIGHTING AND FIRE CONTROL EQUIPMENT.....	(X)	106,984	(X)	470,914				
19410 10	As reported in the census of manufactures.....	(X)	106,984	(X)	470,914				
	As reported on Census Annual Form MA-38B.....	(X)	104,380	(X)	(X)				
1951- --	SMALL ARMS, 30 MM. AND UNDER.....	(X)	148,542	(X)	86,037				
19512 32	Pistols and revolvers.....	496,139	19,716	489,340	18,969				
	Rifles:								
19512 52	Center fire, repeating.....	324,420	18,211	224,921	12,495				
19512 54	Rim fire, repeating.....	371,145	9,564	289,540	7,633				
19512 56	Rim fire, single shot.....	179,875	2,354	163,239	1,639				
	Shot guns:								
	Single barrel:								
19512 62	Repeating.....	321,869	17,916	382,945	17,072				
19512 63	Single shot.....	}	7,475	224,277	5,327				
19512 64	Double barrel, including over and under type.....								
	Other small firearms 30 mm. and under including machine guns:								
19511 13	} Shipped under U.S. military contract.....	}	68,760	(X)	21,853				
19512 72									
19511 53	} Shipments under other than U.S. military contracts.....								
19512 75									
19512 81	Parts and attachments for small firearms.....								
19510 00	Small arms 30 mm. and under, n.s.k.....	(X)	4,546	(X)	1,049				
1961- --	SMALL ARMS AMMUNITION, 30 MM. AND UNDER.....	(X)	192,399	(X)	150,651				
19610 12	Shipped under U.S. military contract.....	(X)	82,090	(X)	55,643				
	Shipments other than U.S. military contracts:								
	For small firearms (rifles, shotguns, and sidearms):								
	Cartridges:								
19610 83	Rim fire.....	}	41,501	(X)	92,797				
19610 85	Center fire.....								
19610 87	Shotgun shells.....	(X)	49,734	}	2,211				
19610 89	All other, including for machine gun, air rifle, B-B gun, etc.....	(X)	14,616						
19610 00	Small arms ammunition, n.s.k.....	(X)	4,458	(X)					
1999- --	ORDNANCE AND ACCESSORIES, N.E.C.....	(X)	243,496	(X)	2210,043				

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>Although general statistics for industry 1911 have been combined with SIC 1999, the value of products primary to SIC 1911 is shown separately. Most of this value is accounted for by establishments in industries other than 1911.

<sup>2</sup>Value of shipments for 1911 and 19292 included with 1999 for 1958.

<sup>3</sup>Data for industry 1925 represents receipts, billings or value of work done.

<sup>4</sup>In the 1958 Census of Manufactures, a single value figure for research and development and all other services on complete guided missiles and space vehicles was collected. Consequently, separate detailed statistics comparable to 1963 are not available.

**TABLE 6B. Product Classes—Indexes of Production and Unit Value for Primary Products Shipped by All Producers: 1963 and 1958**

(Indexes of production and unit value are not shown for this area pending further review of the quantity data and associated values pertaining to these products.)

**TABLE 6C. Product Classes—Value Shipped by All Manufacturing Establishments: 1947, 1954, 1958 to 1963**

(In thousands of dollars)

Code	Product class	1963	1962 <sup>1</sup>	1961 <sup>1</sup>	1960 <sup>1</sup>	1959 <sup>1</sup>	1958	1954	1947
1925-	Complete guided missiles.....	3,957,159	3,001,894	2,572,064	2,693,118	2,248,000	1,886,682	(NA)	(NA)
19251	Guided missiles, complete.....	1,644,181	1,542,276	1,045,125	1,048,480	995,910	900,837	(NA)	(NA)
19253	Research and development on guided missiles (complete).....	1,628,268	1,459,618	1,526,939	1,644,638	1,252,090	985,845	(NA)	(NA)
19255	All other services on complete space vehicles.....	684,710							
1951 -	Small arms, 30 mm. and under.....	148,542	180,623	138,608	104,679	(S)	86,037	56,449	54,932
19610	Small arms ammunition.....	192,399	163,906	152,008	130,350	159,069	150,651	(NA)	(NA)

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

TABLE 7A. Materials by Kind: 1963 and 1958

Code	Material	Unit of measure	1963		1958			
			Quantity	Delivered cost (\$1,000)	Quantity	Delivered cost (\$1,000)

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup> Does not include materials produced and consumed at the same establishment.

<sup>2</sup> Represents (a) total cost of materials for small establishments reporting on "short forms" where separate figures for individual materials consumed were not requested and (b) total cost of materials reported for those establishments which failed to report costs of individual materials on "standard forms."

<sup>3</sup> Includes data for the following industries: 1911, 1929, 1931, 1951, and 1999.

**TABLE 7B. Fuels and Electric Energy Consumed and Horsepower Rating of Power Equipment: 1962**

Item	Ordnance and accessories (SIC Major Group 19)

Quantity.....	million cu.ft.. 9,044
Cost.....	\$1,000.. 4,048
Other fuels.....	do... 1,736
Electric energy:	
Purchased:	
Quantity.....	million kw.-hrs.. 1,480
Cost.....	\$1,000.. 15,682
Generated less sold.....	million kw.-hrs.. 178
Aggregate horsepower of prime movers and electric motors driven by purchased energy (December 31), total.....	1,000 hp.. 1,117
Prime movers, total.....	do... 235
Driving generators.....	do... 155
Not driving generators.....	do... 80
Electric motors, total.....	do... 1,013
Driven by purchased energy.....	do... 882
Driven by energy generated at establishment.....	do... 131
Aggregate horsepower per 100 production workers.....	995

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)

## MANUFACTURING ACTIVITY IN GOVERNMENT ESTABLISHMENTS

This special report presents data of manufacturing activities for selected government establishments within the United States. These data are not included in other 1963 Census of Manufactures reports, which cover privately operated establishments only. Manufacturing establishments owned by the Federal Government and operated by private companies either for the government or for their own account are included with privately operated establishments. Three types of establishments are covered in this report: (1) Manufacturing facilities owned and operated by the Department of Defense; (2) prison industries (Federal, District of Columbia, and State); and (3) manufacturing facilities owned and operated by other U.S. Government agencies. The data were prepared with the cooperation of the Department of Defense, the Department of Justice, the Department of Interior, and the District of Columbia and State prison systems.

### MANUFACTURING FACILITIES OWNED BY THE U.S. GOVERNMENT AND OPERATED BY THE DEPARTMENT OF DEFENSE

Data are shown in tables 1 to 3 for manufacturing facilities owned by the U.S. Government and operated by the Department of Defense. Although these establishments may also be engaged in nonmanufacturing activities at the same location, the statistics represent only their activities relating to manufacturing. All manufacturing installations which produce goods or perform manufacturing services, such as industrial research and development, are covered in this report. Data resulting from the conversion and modification of ships and aircraft by the Army and Navy, but not the Air Force, are also included. Manufacturing activities of the U.S. Air Force are not included because its accounting system is different from that used in the Industrial Fund of the Department of Defense and thus the Air Force concluded it could not provide data comparable to the other respondents (Army and Navy). Also, the report does not include activities of Defense Department installations which serve primarily or exclusively their own installations (e.g., bakeries and some machine shops). All printing and publishing activities are excluded because almost every large government installation engages in these activities to some degree, thus making coverage difficult.

There are approximately twice as many plants reporting in this survey as in the comparable 1958 survey. This increase is primarily because of the additions of research and development activities and manufacturing divisions of supply depots. As a result of this increase, there are two types of tables. The first type shows 1963 data for all Defense Department plants within the scope of this survey. The second shows 1963 data for only those plants that reported in 1958 and their comparable 1958 data.

In all tables, statistics are shown for employment, man-hours, payrolls, costs, and billings. Military personnel are not included in any of the employment, payroll, or man-hours data. The data represent only nonmilitary (wage board and graded) employees engaged in manufacturing activities at the plant. The cost and billings data for 1963 are based on the Industrial Fund accounting system of the Department of Defense. The Industrial Fund concepts of "Total Billings" and "Total Earned Revenue," which were used for the 1963 data, differ because the latter is the result of increasing or decreasing "Total Billings" to reflect the change in unbilled costs of work in progress.

The 1963 value added by manufacture data, shown in table 1, represent total earned revenue (including the value of manufacturing services) less the cost of materials, parts, and supplies actually consumed or put into production during the year.

## PRISON INDUSTRIES (FEDERAL, DISTRICT OF COLUMBIA, AND STATE)

During 1963, manufactured products valued at \$112,702 thousand were produced in Federal, District of Columbia, and State prisons in the United States. The comparable 1958 figure of \$97,307 thousand also includes the value of products produced for use within the institutions as well as for products transferred to other governmental agencies or for sale in the open market. These data, shown in detail in table 4, cover the activities of the Federal Prison Industries, Inc., as well as those of the prison industries of each State and the District of Columbia.

## MANUFACTURING FACILITIES OWNED AND OPERATED BY OTHER U.S. GOVERNMENT AGENCIES

Manufacturing operations of the Bureau of Mines, U.S. Department of Interior, are not included in the tables of this report. That agency is the primary producer of refined helium in the United States. During 1963, it operated five plants from which 627 million cubic feet of helium valued at \$21,945 thousand were shipped. The average number of employees totaled 639, of which 479 were production and related workers, and the total wages and salaries paid amounted to \$4,195 thousand. Comparable figures for other years as well as additional detail for production, shipments, consumption, prices, reserves, and activities relating to conservation and technology appear in the Minerals Yearbook, a publication of the Bureau of Mines.

Excluded from this report are the manufacturing activities of the Government Printing Office, the National Aeronautics and Space Administration, and the Tennessee Valley Authority. The operations of these agencies are covered in their annual reports. Also excluded are the minor manufacturing activities of such other government agencies as the Post Office Department and the General Services Administration.

TABLE 1. Department of Defense

## COMPARABILITY OF CENSUSES OF MANUFACTURES IN TERMS OF THE VALUE ADDED MEASURE

It is doubtful whether any census could be kept fully comparable with one taken for an earlier period. Even if all systems of classification, such as the SIC, and definitions were identical and if the same procedures were employed in compiling the statistics, the changes in the structure of industry would introduce elements of noncomparableness. For example, a shift to the use of commercial services instead of the manufacturers' own labor force in performing some functions would affect the comparability of operating ratios such as output per man-hour associated with an industry.

The changes in definitions and procedures introduced in a census are described in the introductory text of the census volumes and historical data are revised where practical. (See Introductory text, Section 5.) Nevertheless, over long periods of time the comparableness of series will be significantly affected and the problems of revising historical data become difficult.

One way of displaying the problems connected with comparing the statistics from two censuses is to review the history of a single concept. For this example, value added by manufactures has been chosen. Currently, it is looked upon as the "best" additive measure of manufacturing activity provided by the census of manufactures. It is widely relied upon for comparative statistics by industry and by geographic location.

The phrase, "value added to materials by manufacturing processes," first appeared as a column heading in the census for 1904, where it was proposed as a measure suitable for comparing industries and areas. Earlier censuses had provided information on value of product and varying amounts of information on costs of materials, the two sets of figures which census analysts use to compute value added (table A). In connection with the census for 1869, costs of materials were subtracted from value of product for each industry but the difference, which was labeled "excess of product over materials," was used primarily to indicate variation among industries classified by the ratio of materials to employees and by the manner in which products were valued for census purposes.

This appendix was prepared by Frank H. Hanna, professor of economics, Duke University.

During the 19th century, interest centered chiefly in obtaining an aggregate which would reflect the growth of the American economy. In 1889, the subtraction of costs of materials from value of product was labeled, "net value of products." It was later criticized as a "statistical absurdity" unsuitable for measuring the growth of manufactures since the net value of products was made to appear less than the cost of materials. The census for 1899 proposed as a measure of growth the sum of "(1) the value of all raw materials which have entered this output; and (2) the entire value added to these raw materials by manufacturing processes," and, (3) the value of the partially fabricated materials imported "since their value is counted nowhere else."

The concern with the appropriate basis for the measurement of growth, and the desire to include within the measure all activities not explicitly included elsewhere, probably had its roots in the sparsity of available data. The census of manufactures was almost the only source of information on output and apparently there was a desire to make it as comprehensive as possible. It purported to cover output wherever it occurred—in factories, in the hand trades, in stores, and even in homes if the output was commercial—though the censuses for 1869 and later disclaimed an ability to obtain reliable statistics from the hand trades.

The census for 1899 devoted 77 pages of text to the emergence of a "factory system" and to formation of 185 "industrial combinations" or "trusts," consisting of 2,040 plants in 12 industrial groups and 36 States. All but eight of the "combinations" had been formed between 1890 and 1899. After 1899, the census was confined to the "factory system." Its frequency increased and emphasis shifted to the organization and structure of manufactures.

The formulation of net value of products as the sum of raw materials and value added had required that data be collected separately for raw materials and for fabricated materials and, as is shown in table A, data were obtained on many other expenses. The problem of allocating net value of products among industries and areas was discussed extensively in the census for 1899 but a satisfactory solution was not found. "Value added" was adopted, almost reluctantly, for this purpose in the census for 1904, but only the cost of materials consumed directly was subtracted from value of products to arrive at the value added used for that year. Materials consumed by the manufacturing process (e.g., mill supplies, fuels, etc.), but not embodied in the product, were not subtracted even though information on their magnitude was available in the census.

Table A.--Approaches to Value Added, Selected Census Years 1869 to 1958

[In millions of dollars. The entries are from the original reports for the years shown. Estimates adjusted for changes in the scope of manufactures are shown in table 1, General Summary. The exclusion of the hand trades and neighborhood operations from the 1899 census reduced the value added shown in this table by 44 percent; the adjustments for 1809 and later censuses were about 4 percent.]

\*Subtracted from value of product in computing value added by manufacture.

- Represents zero.

<sup>1</sup>Includes only items named in a request for separate information.

<sup>2</sup>For 1947, value of shipments; for 1958, value of shipments and miscellaneous receipts, sales of goods bought and resold without further manufacture, and changes in inventories of work in process and finished goods.

<sup>3</sup>Includes all materials consumed in the manufacture of products plus an increasingly comprehensive list of supplies consumed currently in the operation of the plant.

<sup>4</sup>Specifically mentioned as included in item 2, but not shown separately.

<sup>5</sup>Obtained separately but combined with item 7 for publication.

<sup>6</sup>Information requested but no mention of it was found in publication.

<sup>7</sup>Excluded from value of product and, thus, from value added. Data on excise taxes were obtained for 1947 and published as a memorandum item in the tables for industry, but have not been requested since 1947.

<sup>8</sup>Data were obtained in a sample survey conducted in connection with the census for 1958 and relate to 1957.

<sup>9</sup>Specifically mentioned as included in item 15.

<sup>10</sup>Items 13 and 14 were combined and requested as item 12.

<sup>11</sup>The instructions for 1899 and 1904 requested the inclusion of the following expenses: Federal excise taxes, rent of office and buildings, interest paid, insurance premiums paid, advertising, ordinary repairs of buildings and machinery, all other sundries. The instructions for 1909 modified this list by requesting the separate reporting of Federal excise taxes, dropping interest paid, and adding traveling expenses, royalties, use of patents.

<sup>12</sup>Published only for individual industries; total not shown for all industries.

<sup>13</sup>For 1869, labeled, "excess of value over materials;" for 1899, labeled, "net value of product."

The chief concern of those first deciding upon the appropriate definition of value added was to circumvent the problem discussed in most censuses under the heading, "Duplication in cost of materials and value of products." To them, it *must* have seemed undesirable to subtract from value of products anything not essential to reduce "duplication" to manageable proportions. The considerations which went into the decisions to subtract additional costs from value of products are incompletely recorded, but there is no doubt that such decisions were taken. By 1909, mill supplies and fuels, including rented heat and power, were subtracted. To this list were added purchased electricity in 1929, and the cost of contract work, partially in 1935, and fully in 1939. Beginning with the 1947 Census of Manufactures, Federal excise taxes were excluded from value of shipments and thus from value added by manufacture. In a special table in the 1954 Census of Manufactures (Volume I, General Summary, table 2B), the concept of adjusted value added was introduced. Value added by resales was added to standard value added by manufacture and the total further adjusted by the change in finished products and work-in-process inventories. During the 1955 to 1959 Annual Surveys of Manufactures, both adjusted and unadjusted value added were calculated for each industry. Since the 1958 census, only adjusted value added has been used.

While there was an increase in the range of costs subtracted from value of product in arriving at value added since 1869, there was also a curtailment of the *detailed information* obtained on costs. Why some items were dropped is not known precisely but *perhaps* the following information is relevant. The census reports contain testimony that difficulty had been experienced in collecting data on costs or expenses and that respondents had

complained about the burden of providing such information. The reports also contain statements, with increasing emphasis, that *profits* could not be calculated from published figures; such statements also appear in the reports for 1899 and 1904, the years when maximum detail was requested. There may have been more effort by the Census Bureau to obtain data essential to a "key" measure, such as value added, than there was for data to be presented only as supplementary information. Too, the introduction, in 1921, of the biennial census of manufactures, coupled with uncertain and fluctuating appropriations, may have led to the adoption of a policy to concentrate on a minimum number of key measures. The appropriations for the census for 1933, for example, were too small even to cover the key measures.

It is not clear whether the inclusion of fuels and electricity in the value to be subtracted from value of product was simply to reduce "duplication" within the manufacturing sector or is evidence of a growing awareness of the contribution of other sectors to the value of manufactured product, a contribution that must be subtracted to arrive at value added by *manufacture*. During the opening decades of this century, coke and manufactured gas had a larger share of the fuels market and much of the electricity consumed by manufactures was produced in manufacturing plants. On the other hand, a continuous attempt was made from the early censuses to exclude transportation costs from the value of products and value added, by requesting that products be valued f.o.b. the plant and that materials costs include the cost of transporting them to the plant. Item 6, table A, was provided as "correction" to costs of materials which were reported exclusive of delivery costs.

## Appendix B

### INDUSTRY DESCRIPTIONS

This appendix is included in Volume I, Summary and Subject Statistics, and in Volume III, Area Statistics, but has been omitted from this volume. The appendix shows the industry descriptions and the primary product coverage and specialization ratios for each industry. Similar but more extensive information of this type is contained elsewhere in this volume: Industry descriptions are shown in the text preceding the tables for each industry, and the ratios in table 5A for each industry.

## Appendix C

### COMPOSITION OF INDUSTRIES IN THE 1963 STANDARD INDUSTRIAL CLASSIFICATION

The 1963 and 1958 Censuses of Manufactures covered all establishments primarily engaged in manufacture as defined in the revised edition of the **Standard Industrial Classification Manual** (SIC), issued by the Bureau of the Budget. For 1958, the published census statistics were for the manufacturing industries as defined in the 1957 edition of the SIC Manual. For 1963, statistics are for the manufacturing industries as defined in an amended version of the 1957 edition.

The 1957 revised edition of the classification represented a considerable revision from the previously existing structure. Several appendixes in the published volumes of the 1958 Census of Manufactures dealt with the contents of that revision as it affected the manufacturing sector. (See 1958 Appendix A, "Notes on Comparability of 1954 and 1958 Data for Selected Industries and Industry Groups;" Appendix B, "Industry Descriptions;" and Appendix C, "Composition of Industries in the New SIC.") Several appendixes to the 1963 Census of Manufactures volumes, including this appendix, likewise make reference to the relatively minor revisions of the SIC following the issuance of the 1957 revised edition.

Presented in two parts, this appendix traces, in part 1, the industries as defined for 1963 in terms of their 1958 counterparts and, in part 2, the industries as defined for 1958 in terms of their 1963 equivalents. Where no change in code or definition occurred, the short industry title and 4-digit code apply to both census years. Most of the industries fall into this category. Where change occurred, the title for a line showing only a 1958 code is a 1958 title and that for a line showing only a 1963 code, a 1963 title. In these instances of change in the SIC (a new industry

broken out of an existing industry, existing industries combined into one, or products shifted between existing industries) the relationship between the two periods is clarified by the manner of presentation. For example, in part 2, in the columns under "Industry code," the 1958 SIC industry 2025, "Special Dairy Products," is shown as part of 1963 industry 2022, "Natural and Process Cheese." This situation, that is, being part of an industry in the other year, is notated by an asterisk (\*). Part 2 also indicates that 1958 industry 2022, "Natural Cheese," is likewise a part of 1963 industry 2022. Part 1 shows that, for 1963, industry 2022 encompasses 1958 industries 2022 and 2025. Thus, to determine comparability between the years, parts 1 and 2 of this appendix should be studied together. In both parts, 1963 data shown are for the following items: Number of establishments (total and those with 20 employees or more); employment; and value added by manufacture.

The manner of coding products and classifying establishments in the 1963 Census of Manufactures (utilizing only 1963 SIC codes) did not, in general, permit a tabulation of 1963 data in terms of 1958 industry definitions. Thus, in part 2 it was not possible to show the data for that part of 1963 industry 2022 which is equivalent to 1958 industry 2025. However, where the change in industry definition between the two years was such as to subdivide an old SIC industry into two new industries, the 1963 data for the former industry can be derived by summing the figures for the component parts; e.g., the 1958 industry 2649, "Paper and Board Products, N.E.C.," consists of the 1963 industries 2647 and 2649, and totals for 2647 and 2649 are added together in part 2 to show their 1958 SIC industry equivalent.

Manufacturing industry codes used by the Bureau of the Census are identical to the SIC industry codes, with a single exception: SIC industries 3711 (Motor Vehicles), 3712 (Passenger Car Bodies), and 3714 (Motor Vehicle Parts and Accessories) are combined by Census into a single industry, number 3717, entitled "Motor Vehicles and Parts."

# Composition of Industries in the 1963 SIC

## Part 1. Derivation of 1963 SIC Industries from 1958 SIC Industries

Industry code		Industry title	Establishments		All employees (number)	Value added by manufacture (\$1,000)
1963 SIC	1958 SIC		Total (number)	With 20 employees or more (number)		
2011	2011	Meat slaughtering plants.....	2,992	976	180,873	1,908,309
2013	2013	Meat processing plants.....	1,341	483	48,599	563,362
2015	2015	Poultry dressing plants.....	967	559	70,104	410,909

## Appendix D

### CENSUS REPORT FORMS AND PUNCH CARDS

In the 1963 Census of Manufactures, approximately 180 standard length report forms were employed in collecting data from all "annual survey of manufactures" establishments and from all of the larger "non-annual survey" establishments. A typical report form, MC-35Q, sent to establishments primarily producing industrial furnaces and ovens, is reproduced on pages D-2 to D-13 of this appendix. Inquiry items 1 to 16 were identical on all forms. Differences among forms are reflected in items 17 and 18, requesting information, respectively, on materials consumed in manufacture and products and services of the establishment. These items were "tailored" to reporting by establishments primarily utilizing the selected materials shown and primarily producing the products or performing the manufacturing services listed. Items 19, 20, and 21 are similarly different among forms and were intended to secure information of special significance to the industries primarily covered on the report form. For annual survey establishments, the front sheet of the 1963 report form was the annual survey report form used for 1962 and 1963 with provisions for entering figures for 1963.

In addition to the standard length forms, 50 short or abbreviated forms were used for smaller establishments. A copy of one such short form, MC-36Z, covering electrical machinery, equipment and supplies, is reproduced on pages D-22 to D-24 of this appendix. The size cut-off for the use of these short forms varied by industry, in most instances below 6 and in the others below 10 employees. The abbreviated forms requested information on a few key items: Number of employees; payrolls; total

cost of materials; and value of shipments by class of product. For those few industries in which small plants constituted a significant proportion of the total value of shipments, modified short forms were designed to collect some detail on the individual products shipped and less frequently on the types of materials used. The appendix also reproduces the general instructions for completing the standard length report forms. No instructions accompanied the short forms; all reporting instructions were contained on the form itself.

Copies of the basic punch cards utilized for tabulating the data reported on the 1963 Census of Manufactures forms are shown on page D-25. One card was used for punching data reported on the standard length form; the other for the short form.

For the 1963 Census of Manufactures, additional report forms were used to cover separately operated central administrative offices and auxiliary units, plants under construction but not operated in 1963, etc. Copies of these forms are not shown in this appendix but are described in the introductory text appearing at the beginning of this volume.

A copy of Form MC-D3, covering Department of Defense owned and operated establishments, primarily engaged in manufacture or in research and development, will be found on pages D-26 to D-29 of this appendix. Statistics developed from these forms will be found in the special report section of this volume.

On pages D-30 to D-31 is a copy of supplemental report form MA-175, Report on Shipments to or Receipts for Work Done for Federal Government Agencies and Their Contractors and Suppliers in 1963. Pages D-32 to D-33 contain a copy of supplemental form MA-161, Exports of Manufactured Products 1963. Data from both of these supplemental surveys are published in the special reports section of this volume.

U.S. DEPARTMENT OF COMMERCE  
BUREAU OF THE CENSUS

# 1963 CENSUS OF MANUFACTURES

INDUSTRIAL FURNACES AND OVENS

## PLEASE NOTE:

- The Census Bureau reviews your report for omissions, inconsistencies, and unusual ratios. Incomplete and inaccurate answers will result in correspondence which is both costly and time consuming. Be sure to **complete every item**. Enter "0" in Items 2-8 if appropriate.
- If book records are not available, reasonably accurate estimates for most items are acceptable for the statistical purposes of this survey.
- Please complete and return this form in the envelope provided to the **Jeffersonville Census Operations Office, Jeffersonville, Indiana**. If filing by due date causes an undue burden, a request for extension should be directed to that office.
- SEE SUPPLEMENTAL INSTRUCTIONS ON PAGE 6.
- PLEASE READ INSTRUCTIONS BEFORE COMPLETING REPORT.

## ITEM 1. GENERAL INFORMATION

### A. NAME OF ESTABLISHMENT

**B. PHYSICAL LOCATION OF ESTABLISHMENT on December 31, 1963.** (Your answers to this item should relate to the ACTUAL PHYSICAL LOCATION of this establishment which may be different from the mailing address.)

(1) Street and number at establishment location\*

\*If establishment location cannot be described by street and number, give name (and number, if any) of road or highway and sufficient information to locate establishment, e.g., Rt. 25, 3 miles south of Charlottesville.

(2) Place (Check type of place and enter name)

Type (Check first applicable one)	Name of place
<input type="checkbox"/> City	
<input type="checkbox"/> Village or Borough	
<input type="checkbox"/> Town	
<input type="checkbox"/> Township	
<input type="checkbox"/> Other (Specify)	

(3) Is the establishment within the legal boundary of the place reported in (2) above? ☐ Yes ☐ No

## ITEM 2. NUMBER OF EMPLOYEES

**Production Workers**—Workers (up through the working foreman level) engaged in fabricating, processing, assembling, inspecting, receiving, packing, warehousing, shipping (but not delivering), maintenance, repair, janitorial, watchman services, product development, auxiliary production for plant's own use (e.g., powerplant), recordkeeping, and other closely associated services. Exclude proprietors and partners.

**All Other Employees**—Nonproduction personnel, including those engaged in the following activities: supervision above working foreman level, sales (including driver salesmen), sales delivery (truck drivers and helpers), advertising, credit collection, installation and servicing of own products, clerical and routine office functions, executive, purchasing, finance, legal, personnel (incl. cafeteria, etc.), professional and technical. Exclude proprietors and partners.

(See Supplemental Instructions on Page 6)

**IMPORTANT:** Figures for dollars, man-hours and KWH (in Items 3-8) should be rounded to THOUSANDS. If you wish you may report to the nearest unit. In either case, **please be careful to enter your figures in the CORRECT COLUMNS.**

(See example at right)

## ITEM 3. PAYROLLS

Enter the total (before deductions) of wages, salaries, bonuses, commissions, and other remunerations paid in 1963 to "Production Workers," and "All Other Employees," as defined in Item 2 above. Exclude payments to proprietors and partners.

(See Supplemental Instructions on Page 6)

**CONFIDENTIAL**—Response to this inquiry is required by Act of Congress (13 U.S.C.). The report you submit to the Census Bureau is confidential and may be seen only by sworn Census employees. It may not be used for purposes of taxation, investigation or regulation. Copies retained in your files are also immune from legal process.

In correspondence pertaining to this report please refer to the 11-digit file number in the box above your name.

MC-35Q (3517)

(Please correct if mailing address has changed)

Key	1963		Number of production workers during pay period ended nearest 15th of—

(5) State

C. FORM OF OWNERSHIP AT END OF 1963

(Check one)

1 ☐ Individual proprietor

2 ☐ Partnership

0 ☐ Corporation (Do not include any form of cooperative association)

8 ☐ Cooperative association (corporate or non-corporate)

9 ☐ Other (Specify) \_\_\_\_\_

D. FEDERAL SOCIAL SECURITY IDENTIFICATION NUMBER

Enter identification number used for this establishment (as shown on Employer's Quarterly Federal Tax Return, Treasury form 941).

\_\_\_\_\_

E. COMPANY ORGANIZATION

(1) Does this company operate more than one place of business under the same Identification Number shown in D above?

Yes ☐

No ☐

(2) Does this company own or control another company?

Yes ☐

No ☐

(3) Is this company owned or controlled by another company?

Yes ☐

No ☐

(If "Yes" is checked in Part (3), give name and address of owning or controlling company.)

\_\_\_\_\_

FOR CENSUS USE ONLY

1	2	3	4	5	6	7	8
	10	11	12	13	14	15	16

ITEM 4. PLANT MAN-HOURS OF PRODUCTION WORKERS BY QUARTER

Enter the total number of plant man-hours of production workers (as defined in Item 2 above) for each calendar quarter (or comparable 13-week period) of 1963. Do not include hours for paid vacations, holidays or sick leave.

	Mil.	Thous.	Per.	XXX
a. January through March 1963				1-4
b. April through June 1963				1-5
c. July through September 1963				1-6
d. October through December 1963				1-7
e. TOTAL PRODUCTION WORKERS' MAN-HOURS (Sum of Lines a-d)				1-8

ITEM 5. COST OF MATERIALS, FUELS, ELECTRICITY AND CONTRACT WORK

On Lines a and c, report the cost of all items actually consumed or put into production in 1963, whether purchased, withdrawn from inventories, or received from other establishments of this company. Purchase records instead of consumption records may be used if purchases closely approximate consumption. "Cost" refers to amounts actually paid or payable after discounts, and includes freight and other direct charges incurred in acquiring the items.

(See Supplemental Instructions on Page 6)

	Mil.	Thous.	Per.	XXX
a. Cost of materials, parts, components, containers, supplies, etc., consumed				2-1
b. Cost of goods sold without further manufacture, processing or assembly				2-2
c. Cost of fuels consumed				2-3
d. Cost of purchased electricity				2-4
e. Cost of contract work done for you by others on your materials				2-5
f. TOTAL COST (Sum of Lines a-e)				2-6

ITEM 6. INVENTORIES OF THIS ESTABLISHMENT

Report all inventories of this establishment at the beginning and end of 1963 on a comparable basis. The reported figures should be in terms of cost (if feasible, on a current cost basis).

Key	Type of inventory	Beginning of 1963	End of 1963	XXX
3		Mil. Thous.	Mil. Thous.	
3-1	Finished products	\$		3-5
3-2	Work-in-process	\$		3-6
3-3	Materials, supplies, fuels, etc.	\$		3-7
3-4	d. TOTAL (Sum of a, b, & c)	\$		3-8

ITEM 7. CAPITAL EXPENDITURES (Exclude land)

Expenditures refer to all costs actually incurred during 1963 which are chargeable to the fixed assets accounts and which are of the type for which depreciation accounts are ordinarily maintained. Do not include the cost of maintenance and repairs charged as current operating expense. If you did not make any expenditure of the kind described, enter "0" on Line d.

	Mil.	Thous.	Per.	XXX
a. New structures and additions to plant				4-1
b. New machinery and new equipment				4-2
c. Used plant and used equipment acquired from others				4-3
d. TOTAL CAPITAL EXPENDITURES (Sum of Lines a, b, and c)				4-4

D-3

**ITEM 13**

**CHECKS TO ASSURE A COMPLETE AND ACCURATE REPORT (Please complete this item after you have answered all items on the report.)**

The Census Bureau reviews your report for omissions, inconsistencies, and unusual ratios. To save you future correspondence about these problems, please make the following checks before returning your report:

- Review the report carefully to see that no items are omitted for the year being covered.
- Enter the results after calculating the four "reasonableness" checks (described below) and review the results.
- Correct your report for any errors you find; explain unusual figures in Remarks Section.

"Reasonableness" checks		Calculation required for each check (Use figures reported in "Millions and Thousands" columns)	Resulting figures for 1963
(1) Average hourly wages per production worker		Item 3a (Production workers' wages) ÷ Item 4e (Total man-hours)	\$
(2) Hours worked per year per production worker		Item 4e (Total man-hours) × 1000 ÷ Item 2f (Average number of production workers)	Hrs.
(3) Salaries and wages per dollar of shipments		Item 3c (Total payroll) ÷ Item 18 (Total value of shipments)	¢
(4) Materials cost per dollar of shipments		Item 5f (Total materials cost) ÷ Item 18 (Total value of shipments)	¢

- (5) Is the total for value of shipments (Item 18) greater than the sum for payroll (Item 3c) plus total cost of materials, etc. (Item 5f)?

☐ Yes ☐ No (If "No," please explain in Remarks Section)

**ITEM 14**

**REMARKS PERTAINING TO THE REPORT**

**ITEM 15**

Not applicable to this form.

## 1963 CENSUS OF MANUFACTURES

## INDUSTRIAL FURNACES AND OVENS—Continued

Name of establishment (Same as address box)

## ITEM 16

## INDUSTRIAL WATER USE DURING 1963

a. The total quantity of water intake (fresh and brackish) in this establishment during the entire year 1963— (Check one box only.)

1 ☐ Under 1 million gallons3 ☐ 10 to 19 million gallons5 ☐ 100 million gallons or over2 ☐ 1 to 9 million gallons4 ☐ 20 to 99 million gallonsb. Was your principal source of water (1) from a publicly- or privately-owned utility; or, (2) from other source? . . . 1 ☐ Utility 2 ☐ Other source

## ITEM 17

## CONSUMPTION OF SELECTED MATERIALS DURING 1963

REPORT SEPARATELY FOR EACH LISTED MATERIAL THAT WAS ACTUALLY CONSUMED OR PUT IN PRODUCTION DURING 1963

## Section A—CONSUMPTION OF MATERIALS PURCHASED OR RECEIVED FROM OTHER ESTABLISHMENTS

## INSTRUCTIONS

The sum (Line 17) of the costs of the listed items, including that for "All other materials, parts, containers, and supplies consumed," should be the same as Item 5a.

Detailed instructions regarding the valuation of materials transferred from other establishments of your company are included in the Instruction Manual.

If consumption records are unavailable, figures may be derived from purchase or receipt records. (See Instruction Manual)

For items produced in this establishment and consumed or incorporated in products made in this establishment, enter quantities in Section B of Item 17, Page 4.

**NOTE:** Cost figures preferably should be rounded to THOUSANDS OF DOLLARS. If you wish, you may report to the nearest dollar. Please be careful to enter your figures in the CORRECT COLUMNS. (See example at right)

## EXAMPLE

If the material cost for  
Line 1 is \$1,948,376:

		Delivered cost (D)	
		Mil- lions	Thou- sands
		000	000
		\$ 1	948
		\$ 1	948

Preferred method  
Acceptable method**If \$5,000 or more of the listed item was consumed—****Column (C)—Quantity**—Enter the quantity in the unit of measure specified in Column (B-2). Omit quantities if column is shaded.**Column (D)—Delivered Cost**—Enter the amount paid or payable, including delivery cost (freight-in).**If some but less than \$5,000 of the listed item was consumed—****Column (E)**—Enter an "X" in the box opposite the listed item. (Include the cost of materials checked with "All other materials, components, etc." Line 16.)

7		7-1		7-2		7-3		7-4	
Materials, parts and supplies		Census material code		Consumption of purchased materials and of materials received from other establishments of your company		Consumption of purchased materials and of materials received from other establishments of your company		Consumption of purchased materials and of materials received from other establishments of your company

16	Steel castings (rough and semi-finished)	332300	3	Short tons		\$			<input type="checkbox"/> 1

Please continue on Page 4

## Section A—CONSUMPTION OF MATERIALS PURCHASED OR RECEIVED FROM OTHER ESTABLISHMENTS—Continued

See example on Page 3 (instructions) for reporting values) =

Line number	7	7-1	Unit of measure for quantities (B-2)	7-2				7-3				7-4
				Consumption of purchased materials and of materials received from other establishments of your company								
				Quantity (C)	Delivered cost (D)			If \$5,000 or more of the listed item was consumed—	If you consumed some but less than \$5,000 worth of the listed item— (Enter an "X" in the box) (E)			
					Mil-lions 000	Thou-sands 000	Dol-lars 000			Cen-t XX		
16	(A) Materials, parts and supplies  All other materials and components, parts, containers, and supplies consumed. (List the three principal "All other materials, etc." included in the above.)	970099	8		\$							
17	TOTAL (Sum of Lines 1-16 should be same as Item 5a)				\$							

## Section B—CONSUMPTION OF CASTINGS PRODUCED IN THIS ESTABLISHMENT AND CONSUMED IN MANUFACTURING OTHER PRODUCTS MADE IN THIS ESTABLISHMENT

Report below the quantity of each listed item produced in this establishment and consumed in manufacturing other products made in this establishment.

**Materials used to produce the items specified below should be reported in Section A of Item 17 above.**

Quantities produced for sale as such and not for incorporation in other products should be reported in Item 18 below.

Purchases or receipts of the items specified below should be reported only in Section A above.

**Report quantities in the unit of measure specified in Column (B-2).**

Item (A)	7	7-1XXXX		7-5
	Census material code (B-1)		Unit of measure for quantities (B-2)	Quantities produced in this establishment and consumed in manufacturing other products made in this establishment (F)
Steel castings (rough and semi-finished)	332300	3	Short tons	

PLEASE READ THE ENTIRE LIST OF PRODUCTS AND SERVICES BELOW BEFORE ANSWERING THIS INQUIRY

## INSTRUCTIONS

**Report on Lines 1-20 for all products made;** and on Lines 21-26 for **services and other activities** performed at this establishment during 1963.

**DO NOT COMBINE PRODUCT LINES.** If any of your products are not included in the listed items, report these on Lines 17-20.

**Products shipped and other receipts**—Report the quantity and value of each product made and physically shipped during 1963 from this establishment, **including products shipped to other plants**, sales branches, retail stores, or warehouses of your company and on consignment. Deduct returned goods. Also report the value of services performed at this establishment.

**Column (D)—Quantity**—Report quantities in number of units. Omit quantities if column is shaded.

**NOTE:** Value figures preferably should be rounded to THOUSANDS OF DOLLARS. If you wish, you may report to the nearest dollar. **Please be careful to enter your figures in the CORRECT COLUMNS.** (See example at right)

## EXAMPLE

If the value of products for Line 3 is \$1,125,328.28:

Preferred method →  
Acceptable method →

Value, f.o.b. plant (£)			
Mil- lions	Thou- sands	Dol- lars	Cen- ts
000	000	000	XX
\$ 1	125		XX
\$ 1	125	328	XX

Report on Line 26 the selling value, f.o.b. plant, of products which were resold as originally purchased and not used in further manufacturing, processing, or assembling of products made in this establishment.

**Column (E)—Value, f.o.b. plant**—Report totals based on net selling values, f.o.b. plant. Net selling values should not include discounts, allowances, freight charges, and excise taxes.

**Companies transferring products from this establishment to other manufacturing plants, sales branches, retail stores, or warehouses, should carefully study and follow instructions appearing in the Instruction Manual.**

**Installation (or construction of product)**—See Supplemental Instructions on Page 6.

Line number	Products and services		Census product code (B-1)	Quantity (Number of units) (D)	Value, f.o.b. plant (£)			
	Products shipped and other receipts				Value, f.o.b. plant (£)			
					Mil- lions	Thou- sands	Dol- lars	Cen- ts
1	ELECTRIC INDUSTRIAL FURNACES	Electric furnaces (excluding induction)	35671 11 45		\$			XX
2	AND OVENS, METAL PROCESSING	Metal processing and heat treating (such as annealing, hardening, carburizing, and porcelain enameling furnaces)	35671 21 35		\$			XX
3		Electric, including infrared, industrial ovens	35671 43 75		\$			XX

Please continue on Page 5

100147 OF-4

# 1963 CENSUS OF MANUFACTURES

## INDUSTRIAL FURNACES AND OVENS—Continued

ITEM 18

### PRODUCTS AND SERVICES OF THIS ESTABLISHMENT DURING 1963—Continued

See example on Page 4 (instructions) for reporting values.

Line number	Products and services	(A)	Census product code (B-1)	Quantity (Number of units) (D)	Value, f.o.b. plant (E)			B-3	B-4
					Mil- lions	Thou- sands	Ex- cess		
4	FUEL FIRED INDUSTRIAL FURNACES AND OVENS, METAL-PROCESSING	Metal melting, including blast furnaces and cupolas	35672 11	25		\$			XX
5		Metal processing and heat treating (such as annealing, hardening, carburizing, and porcelain enameling furnaces)	35672 21	15			\$		XX
6		Industrial ovens	35672 41	95			\$		XX
7		Hot rolling, forging, forming, and extruding	35672 61	75			\$		XX
8	INDUCTION AND DIELECTRIC HEATING EQUIPMENT, AND PARTS, ATTACHMENTS AND COMPONENTS	Induction furnaces and heating equipment							
9		Radio frequency type, including spark gap	35673 13	65			\$		XX
10		Line and motor-generator set frequency types	35673 15	15			\$		XX
11		Dielectric heating equipment (corresponds to Code 3567331 on Census Annual Form MA 36N, Selected Electronic and Associated Products for 1963)	35673 31	85			\$		XX
12		Other electrical equipment for industrial use, except soldering irons							
		Industrial electric heating units and devices (except heating units for electric furnaces)							
		Tubular heaters	35673 51	65			\$		XX
		All other industrial electric heating units and devices (include strip, space, and ring heaters; water and oil immersion heaters; glue and compound pots, etc.)	35673 59	95			\$		XX

13		Parts, attachments, and components for industrial furnaces and ovens, including electric heating units (sold separately)	35673 91 25						XX
14	Electric nonmetallic processing industrial furnaces and ovens, including kilns and lehrs		35595 91 72				\$		XX
15	Fuel fired kilns (cement, wood, and chemical processing)		35595 92 52				\$		XX
16	Other nonmetallic processing industrial furnaces and ovens, including kilns and lehrs		35595 33 82				\$		XX
17	ALL OTHER PRODUCTS MADE IN THIS ESTABLISHMENT	Describe and report separately for each product whose value was \$50,000 or more and not listed above. (Specify unit of measure for quantity.) For all remaining products describe and report a single total value.					\$		XX
18							\$		XX
19							\$		XX
20							\$		XX
21	CONTRACT WORK	Receipts for work done for others on their own materials. (Describe products worked on and kind of work)	93000 00 85				\$		XX
22	MISCELLANEOUS RECEIPTS	Sales of scrap and refuse	99980 13 86				\$		XX
23		Receipts for repair work	99980 61 76				\$		XX
24		Receipts for installation (or construction of products of this establishment) (See instructions on Page 6 for reporting of installation costs in Items 2, 3, 5, and 18)	99980 31 06				\$		XX
25		Other miscellaneous receipts	99980 98 96				\$		XX
26	RESALES	Sales of products bought and resold without further manufacture, processing or assembly in this establishment. (The cost of such items should be reported in Item 5b.)	99989 00 66				\$		XX
27	TOTAL (Sum of figures on Lines 1-26, Column (E))		77000 00 88				\$		XX

Please complete form, including Item 13, and sign certification on Page 6

100147 OF-5

**ITEM 19****FACTORY AND FIELD ASSEMBLY OF INDUSTRIAL FURNACES AND OVENS**

Page 6

Report the 1963 value of shipments for field and factory assembly of industrial furnaces and ovens reported in Item 18, Column (E), Lines 1-16. (See example on Page 4, Item 18 (Instructions), for reporting value of shipments in Column (C).)

Line No.	Industrial furnaces and ovens (A)	Code (B)	Value of shipments (C)	
			Millions 000	Thousands 000
1	Field assembled	44	\$	
2	Factory assembled	55	\$	

**ITEM 20****SELECTED METALWORKING AND RELATED OPERATIONS PERFORMED IN THIS ESTABLISHMENT DURING 1963**

**Section A** — Were any of the specified metalworking operations listed below performed in this establishment in 1963?

Key	Yes	No
	9-1	9-2
	<input type="checkbox"/> 20	<input type="checkbox"/> 1 <input type="checkbox"/> 2

(Check one box)

**Section B** — If "Yes," indicate in Column (C) by checking appropriate boxes, which of the specified operations were performed in this establishment during 1963. A check should be entered either in the "Yes" box or "No" box for each operation. Where the "Yes" box is checked, show in Column (D) the approximate number of production workers on all shifts usually engaged in the specified operation.

Line number	Operation (A)	9	9-1	9-2		9-3
		Census Code (B)	Was this operation performed in this establishment during 1963? (C)		Number of production workers (on all shifts) usually employed when operated (estimate if necessary) (D)	
Yes	No					
1	Machine shop	09	<input type="checkbox"/> 1	<input type="checkbox"/>		
2	Plate or structural fabrication	12	<input type="checkbox"/> 1	<input type="checkbox"/>		
3	Stamping, blanking and forming of metals	13	<input type="checkbox"/> 1	<input type="checkbox"/>		
4	Painting, lacquering and enameling on metals	14	<input type="checkbox"/> 1	<input type="checkbox"/>		

**ITEM 21**

Not applicable to this form.

## REMARKS

PERIOD OF REPORT	This report covers the period from _____ to _____		
ITEM 22	Name of person to be contacted regarding this report	Address	Telephone No.
ITEM 23	<b>CERTIFICATION</b> —This report is substantially accurate and has been prepared in accordance with instructions.		
	Name of company	Address	
	Signature of authorized official	Title	Date

## Supplemental Instructions

## The following instructions supplement the "General Instructions to Manufacturers for Preparing Reports"

## INSTALLATION (OR CONSTRUCTION) OF PRODUCTS OF YOUR OWN MANUFACTURE

(These instructions apply to companies engaged in installing or erecting their own manufactured products)

**Where your product is installed or erected by a labor force separate from the regular force attached to your manufacturing establishment, do not include installation costs.**—The separate labor force may consist either of a distinct group of your employees not attached to your manufacturing plant, or of local labor hired by you in the field, or a combination of both of these. This labor force should be omitted from the sections on employment and payrolls (Items 2 and 3); the value of the installation services should not be included in the section on products shipped (Item 18); and, the amounts reported for cost of materials, etc. (Item 5), should be restricted to factory operations. However, include in Items 2g and 3b engineering and supervisory personnel on your regular plant payroll who may be engaged in installing or testing your products. If your records do not provide exact figures to serve as the basis for segregating these installation costs, carefully prepared estimates will be acceptable.

**When your product is installed or erected by the regular labor force of your manufacturing plant, operating out of the plant itself, installation costs and the value of installation services should be included.**—In installations of this type the employees will not be a separate group of workers located away from the premises of the manufacturing plant.

Include these workers engaged in installing your products in Items 2 and 3, "Employment and Payrolls 1963."

Receipts for installation services should be reported separately on Line 24, Item 18.

Do not include these receipts in the value of industrial furnaces and ovens as reported on Lines 1-16, Item 18.

If your records do not provide exact figures on the value of installation work, carefully prepared estimates will be acceptable.

In no case should installation costs (or the value of the service) be included in your report where the installing or erecting is performed by a separate company, whether the services of that company have been contracted for by your customer or by yourself.

**Please state in the Remarks Section of this form whether you install or erect your manufactured products.**—If you do such installing or erecting, you should further indicate whether or not the installation costs and value of such services are included in your report (using the above instructions as the basis for reporting).

## 1963 CENSUS OF MANUFACTURES

## REPORTING INSTRUCTIONS

*In all correspondence with the Census Bureau, please include the 11-digit file number which appears in the address box of the report form. High-speed electronic equipment will be used to identify both the correspondence and the reports in the 1963 Economic Censuses. If your correspondence does not include the Census file number, it will be returned for the addition of that number. Address all correspondence to JEFFERSONVILLE CENSUS OPERATIONS OFFICE, 1208 East 10th Street, Jeffersonville, Indiana.*

*Please do not mark or mar the two lines of symbols above the address on each form. These symbols or rectangles which are unique to each establishment will be photographed and used to record mechanically the receipt of your report form.*

*As you complete the reports for each establishment, please enter the 11-digit file number at the top of the odd numbered pages as requested.*

This booklet is provided to assist you in filling out the enclosed Census of Manufactures form(s) MC19A through MC39L. Please read these instructions and those appearing on the individual report forms for each item before entering your figures.

#### A. Who Should Report?

The Census of Manufactures reports are required by an Act of Congress (13 U.S.C.). The reports submitted are confidential and may be seen only by sworn Census employees. They may not be used for purposes of taxation, investigation, or regulation. Copies retained in your files are also immune from legal process.

Every concern is required to submit a separate Census report for each of its manufacturing establishments in the United States, the Virgin Islands, and Guam. Enterprises with more than one establishment must submit a separate report for each establishment operated during all or any part of 1963. Reports should be returned to the Jeffersonville Census Operations Office as shown on the enclosed envelope.

Based on Census Bureau records, a report form is provided for each establishment which your company operated in 1963. If you have not received sufficient forms to cover all the manufacturing establishments operated by your company, write for additional copies. Be sure to describe the type of activity carried on at the establishments for which you request additional forms.

#### 1. What Is a Manufacturing Establishment?

For purposes of the Census, a manufacturing establishment is defined as a single physical location where manufacturing operations are performed; for example, a factory, mill, or plant. Since the information reported will be summarized to totals for each industry, State, county and standard metropolitan statistical area, separate reports are required for different physical locations even though the establishments may be engaged in the same line of manufacturing.

If your company operates two or more units in distinctly different lines of manufacturing at the same location, you should also file a separate establishment report for each unit, provided separate records are maintained or substantially accurate reports for these separate activities can be prepared. It is not necessary to file separate reports for departments or organizational subdivisions within an establishment.

In completing your reports, a limited amount of prorating or estimating is acceptable when book records are not readily available.

#### 2. How To Report for Establishments not in Operation During 1963?

If any of your company's manufacturing establishments were not in operation at all during 1963, you should nevertheless return the report for each such establishment with a notation as to its status in Item 12 "Changes in ownership or operation of the establishment." If a manufacturing location was not in production, but had custodial employees, maintained inventories, or made shipments during the year, the information should be reported in the appropriate section of the report form.

#### B. What Activities Should Be Reported?

Each report should cover all the activities (manufacturing, fabricating, processing, and assembling) conducted within the establishment. The reported figures should also include activities such as the maintenance of plant and equipment, receiving, shipping, warehousing, storage, research, record keeping, health, safety, cafeteria, and other services, when carried on at the same physical location by the manufacturing establishment. The manufacturing establishment reports should exclude sales branches, sales offices, research laboratories, retail stores, mining activities, and general administrative offices, if they are operated as separate establishments. However, separate Census of Business, Census of Mineral Industries, or Central office or auxiliary reports should be submitted for each of these establishments.

Please note that establishments engaged in the activities listed below are considered to be manufacturing for the purposes of this Census:

Apparel jobbing and contracting  
Assembling from purchased components  
Commission processing of materials owned by others  
Job casting, stamping, machinery  
Lapidary work  
Logging camps and logging  
Machine shops, including those operating on a job order basis  
Manufacturing and delivering ready-mixed concrete  
Milk pasteurizing and bottling  
Plating, galvanizing, polishing materials owned by others etc.  
Poultry dressing  
Printing  
Publishing: Book, magazine, periodical, etc.  
Rebuilding on a factory basis  
Sawmills  
Seafood, fresh packaged or frozen  
Ship and boat repairing  
Wood preserving

#### C. What Period Should Each Report Cover?

Each report should cover the calendar year 1963. If your book records are not on a calendar year basis, carefully prepared estimates will be acceptable. If reporting on a calendar year basis will involve considerable additional costs, and your fiscal year covers at least 10 months of calendar year 1963 (i.e., ends between October 31, 1963 and February 29, 1964), you may report on a fiscal basis. However, all employment, payroll, and man-hour figures should relate to the calendar year rather than the fiscal year. (These calendar year payroll records should be available from your tax records.)

In the certification, the dates should show the exact period which the report covers. Thus, if an establishment began to operate or ceased to operate within the year, the dates should span only that part of the year during which the plant was in operation. If the ownership changed during the year, complete the report only for that part of 1963 in which your company owned and operated the establishment. Report in Item 12 the appropriate information on changes in ownership or operations.

#### D. How Should Multiple Establishment Companies Determine Transfer Values of Products and Materials from One Establishment to Another ("Interplant Transfers")?

One of the important statistical measures of manufacturing activity is "value added by manufacture," which is derived by the Census Bureau from the figures reported for value of shipments, cost of materials and inventories.

In order for statistics on value added and other subjects to be comparable from industry to industry or area to area, it is necessary that the operations of each establishment of a multiple establishment organization be reported as though the establishment were a separate "economic" unit. This means that the value of interplant transfers within a company should include, in addition to

direct costs of production, a reasonable proportion of "all other costs (company overhead) and profits." The establishments receiving such transfers should report them as materials consumed (or inventories of materials, etc.) at the same value plus costs of freight and other direct handling charges. (See Item 5.)

#### ITEMS ON THE REPORT FORM

##### Item 1. (See instructions on Form.)

Item 2. Number of employees.—(You may follow the definition of employees specified by your State Employment Security Agency.)—Report employees at the establishment who worked or received pay for any part of the pay period (preferably one week) ending nearest the 15th of the specified months (i.e., March, May, August, and November of 1963 for "production workers" and March only for "all other employees"). Include all persons on paid sick leave, paid holidays, and paid vacation during these pay periods; exclude members of armed forces and pensioners carried on your active rolls. Include officers at this establishment, if a corporation; if an unincorporated concern, exclude proprietor or partners.

Items 2e and 2f.—Divide the total on Line 2e by FOUR and enter the result on Line 2f; divide by FOUR even if the establishment did not operate in all four periods.

Item 3. Payrolls. (You should follow the definition of salaries and wages that is used for calculating the withholding tax.) Report the gross earnings paid in calendar year 1963 to employees on the payroll at the establishment prior to such deductions as employee's Social Security contributions, withholding taxes, group insurance premiums, union dues, and savings bonds. Include in gross earnings commissions, dismissal pay, pay bonuses, vacation and sick-leave pay, and the cash equivalent of compensation paid in kind. Include salaries of officers of this establishment, if a corporation; if an unincorporated concern, exclude payments to proprietor or partners. Exclude payments to agricultural employees, fishermen, members of armed forces, and pensioners carried on your active payroll.

Item 4. Plant Man-Hours of Production Workers, by Quarter.—"Plant man-hours" of production workers are designed to measure the over-all activity of the plant during each quarter. The figures should include all man-hours worked or paid for, except hours paid for vacations, holidays, or sick leave. If an employee elects to work during the vacation period, report only actual hours worked by such employee. Overtime hours should be reported as actual hours worked, not straight-time equivalent hours.

Item 5. Cost of Materials, Fuels, Electricity and Contract Work.—The entries in this item are used by the Census Bureau to calculate the 1963 value added by manufacture. The figures reported, therefore, should represent the total cost of materials, supplies, semi-finished goods, fuels, etc., actually consumed or put into production during 1963.

If your records do not show the amounts actually consumed or put into production during 1963, the reported figures may be derived from purchase and other records. Cost of purchases may be used if these do not differ significantly from the amounts actually used. However, if

consumption of any major item differs significantly from purchases, the amount used may be estimated by adding beginning inventories to the amounts purchased and subtracting from this total the cost of goods on hand at the end of the year.

Cost is delivered cost and should be the amount actually paid or payable after discounts and should include freight and other direct charges incurred by the establishment in acquiring materials and supplies consumed. The cost figures for consumption should represent receipts from all sources, i.e., amounts purchased from other establishments, withdrawn from inventories, or obtained from other establishments of the same company. However, if intermediate products were made in this establishment in 1963 and incorporated into other products also made in this establishment, the reported figures should only include the costs of the materials from which the semi-finished items were made.

For materials, parts, and supplies received from other establishments of your company, cost should be checked against the values reported for the plant producing and transferring the codes (see Item D above). Freight and other direct handling charges should be added.

**Item 5a. Cost of Materials, Parts, Components, Containers, Supplies, Etc., Consumed.**--The delivered cost figures reported in Item 5a should cover all raw materials, containers, scrap, and supplies, etc., which were: (1) put into production, (2) used as operating supplies, (3) used in repair and maintenance. Include also cost of materials owned by you but consumed by other companies to make products for your establishment under contract. Amounts paid to other companies for such contract work should be reported on Line 5e and should include freight in and out. If semi-finished goods, parts, or components were produced during 1963 and incorporated into finished products at the same plant during 1963, include the cost of raw materials used rather than the value of the intermediate products.

Include only physical goods used or put into production. Exclude services used or overhead charges. Exclude cost of such services as advertising, telephone, telegram and cable, insurance, developmental and research services or engineering, management, marketing and other professional consultants, etc., unless charges for such services are included in the prices paid for materials. Exclude also such overhead items as depreciation charges against plant and equipment; rent and rental allowances, interest payments, royalties, and patent fees. Exclude materials, supplies, machinery, and equipment which were used in the construction of new structures or additions to your plant, or new machinery and equipment, and which are chargeable to fixed assets accounts. Exclude products purchased and resold without further manufacture or processing or assembly; their costs should be included in Item 5b.

**Item 5b. Cost of Goods Sold Without Further Manufacture, Processing or Assembly in this Establishment.**--Report the cost of all products bought and resold in the same condition as when purchased and not made part of another product manufactured by this establishment. (Total sales value of all products resold is to be reported in Item 18 on the line for "Resales.")

**Item 5c. Fuel Consumed.**--Report the total amount actually paid or payable during 1963 for all fuels consumed for heat, power, or the generation of electricity. Do not include the estimated cost of fuels, such as sawdust or blast furnace gas, produced as a byproduct of your manufacturing activities. Include anthracite and bituminous coal, coke, natural and manufactured gas, fuel, oil, liquefied petroleum gas, gasoline, and all other fuels including purchased steam. For selected industries, such as Carbon Black, Blast Furnaces and Coke Ovens, special reporting instructions on the report form provide that the above fuel types should be reported as materials in Item 5a rather than as a fuel Item 5c.

**Item 5d. Purchased Electric Energy.**--Report the total amount actually paid or payable for electric energy purchased during 1963 from other companies, or received from other establishments of your company. Exclude the value of electricity generated and used at this establishment.

**Item 5e. Cost of Work Done for You by Others on Your Own Materials (Contract Work).**--If any work was done by others on materials furnished by your establishment, report the total payments made during 1963 for such work, including freight out and in. Exclude the cost of materials worked on, which should be included in Item 5a.

**Item 6. Inventories of this Establishment.**--See report form.

**Item 7. Capital Expenditures for This Establishment (Exclude Expenditures for Land).**--Capital expenditures during 1963 may be determined by the following computation: The cost of additions completed during the year, plus construction-in-progress at the end of the year, minus construction-in-progress at the beginning of the year.

**Item 7a. New Structures and Additions to Plant.**--Report total expenditures during 1963 for new construction, (whether constructed on contract or by your own forces) major alterations, capitalized repairs, and improvement of buildings (including all new elevators, cranes, heating and ventilating equipment, essentially a part of the buildings), other fixed structures (such as blast furnaces, brick kilns, fractionating towers, shipways, and similar types of structures), and site improvements (such as roads, docks, tracks, parking lots, fences, utilities.)

**Item 7b. New Machinery and New Equipment.**--Report total expenditures at this establishment for new production machinery and equipment and other new machinery and equipment. Include replacements as well as additions to capacity. Include the value of improvements and capitalized repairs to machinery and equipment transferred from other establishments of this company or produced and used at this establishment. Include all new motors, lathes, punch presses and similar machinery and equipment for use in production, as well as all new office machines and fixtures, furniture, cafeteria and dressing room furnishings, automobiles and trucks, and other similar equipment.

**Item 7c. Used Plant and Used Equipment Acquired from Others.**--Report total expenditures at this establishment for old or existing plants and for second-hand equipment acquired from others (including the U.S. Government). Include at approximate market value machinery or equipment transferred from other plants of your company.

Item 8. Quantity of Electricity.—All quantities for electricity preferably should be reported in thousands of kilowatt hours. Please be careful to enter your figures in the CORRECT COLUMNS.

Item 8a. Purchased Electricity.—Report the quantity for which cost is reported in Item 5d.

Item 8b. Generated Electricity.—Enter the total quantity of electric energy generated in this plant (gross less generating station use) during 1963.

When totals are reported on this line, data relating to the activity of the power stations would also be included in other sections of this report. For example, the number of employees assigned to the power station, their wages and man-hours should be included in the figures reported in Items 2, 3, and 4; and the cost of fuels used to generate electricity, in Item 5c.

Item 8c. Electricity Sold or Transferred.—Enter the quantity of electric energy, which was also included in Items 8a and 8b but which was sold to other companies or transferred, to other manufacturing or non-manufacturing establishments of your company.

Items 9-11.—Not applicable to these forms.

Items 12-15.—See Report forms.

Item 16. Industrial Water Use During 1963 (See Instructions on Forms).—A selected group of establishments, consisting mainly of those consuming large quantities of water, will be required to supply the following additional detail on water consumed during 1964: total intake during the year distributed by source and type of use; quantity discharged; quantity recirculated; and quantity treated.

Items 17-23.—(See instructions on form.)

Period of Report.—Enter the month and day of the beginning and the end of period your report covers. If a calendar year report: "From January 1 to December 31, 1963;" if a fiscal year, specify which (such as "From December 1, 1962 to November 30, 1963).". If a part year report is submitted because the establishment was not in operation or under your company's control for the entire year, specify the actual period covered: For example, January 1, 1963 to August 15, 1963 or June 1 to December 31, 1963.

U.S. DEPARTMENT OF COMMERCE BUREAU OF THE CENSUS		FORM MA-100		ANNUAL SURVEY OF MANUFACTURES		(For 1963 this is the front sheet of the 1963 Census of Manufactures form)					
<p><b>CONFIDENTIAL</b> - Response to this inquiry is required by Act of Congress (13 U.S.C.). The report you submit to the Census Bureau is confidential and may be seen only by sworn Census employees. It may not be used for purposes of taxation, investigation, or regulation. Copies retained in your files are also immune from legal process.</p> <p>In correspondence pertaining to this report please refer to the 11-digit file number in the box <b>V</b> above your name.</p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="border: 1px solid black; padding: 2px;">V</div> <div style="border: 1px solid black; padding: 2px;">1</div> </div>				<p>(Please correct if mailing address has changed)</p>				<p>1962</p> <p>1963</p> <p>1964</p>		<p>Key</p> <p>0-1</p> <p>0-2</p> <p>0-3</p> <p>0-4</p> <p>0-5</p> <p>0-6</p> <p>0-7</p> <p>0-8</p>

## ITEM 9A - VALUE OF PRODUCTS SHIPPED AND OTHER RECEIPTS (\$000)

Additional product classes of this establishment (Describe)	Product Class Code (See manual) 5	1962	1963	1964
a. _____				
b. _____				
c. _____				
d. _____				
e. TOTAL  (Transfer to Item 9, Line h)				

9	9-1	333	End of 1962	End of 1963	End of 1964	Key
			9-2	9-3		

a. Gross (book) value of fixed assets as of end of the year (original cost of buildings, structures, machinery, equipment, and other depreciable fixed assets). (See Instruction Manual)

b. Rental payments during year

Does this establishment use any rented or leased buildings, structures, or transportation, production or office equipment in its operations? . . . . . 1 ☐ Yes 2 ☐ No  
(If "Yes," please complete Lines (1) and (2) below)

(1) Rental payments (or equivalent charges) for use of buildings and structures (exclude payment for land).

(2) Rental payments (or equivalent charges) for use of transportation, production, and office equipment by this establishment.

NOTE: If rental payments are not made directly from the establishment's accounts but are handled centrally at a company or division level, please report the share of overhead or estimate the share of rental charges appropriate to the operation of this establishment.

(Please check proper box and furnish information requested below for each year)

a. Did the physical location of the establishment change since 1963?  
(If "Yes," please report the new location in Item 14)

b. If the answer to Item 1E(2) (Page 1) was "No," did the company have any plants under construction but not yet in operation?

c. Changes in ownership or operation of this establishment during the year  
1. Purchased (Enter date, name, and address of former owner in Item 14)

2. Sold (Enter date, name, and address of purchaser in Item 14)

3. Went out of business (Specify date in Item 14)

4. Reorganized (Describe in Item 14, e.g., partnership change or change in corporate status)

5. Started new business (no previous owner)

6. Remained the same as in the previous year

ITEM 13 CHECKS TO ASSURE A COMPLETE AND ACCURATE REPORT		The Census Bureau reviews your report for omissions, inconsistencies, and unusual ratios. To save you future correspondence about these problems, please make the following checks before returning your report: (a) Review the report carefully to see that no items are omitted for the year being covered. (b) Calculate the four "reasonableness" checks described below, entering the figures for each, and review the results. (c) Correct your report for any errors you find; explain unusual figures in Item 14.			
		"Reasonableness" checks	Calculation required for each check	Resulting figures for the year --	
				1963	1964
		1. Average hourly wages per production worker	Item 3a (Production workers' wages) ÷ Item 4e (Total man-hours)	\$	\$
		2. Hours worked per year per production worker	Item 4e (Total man-hours) x 1000 ÷ Item 2f (Average number of production workers)	Hrs.	Hrs.
		3. Salaries and wages per dollar of shipments	Item 3c (Total payroll) ÷ Item 9f (Total value of shipments)	\$	\$
		4. Materials cost per dollar of shipments	Item 5f (Total materials cost) ÷ Item 9f (Total value of shipments)	\$	\$
		5. Is the total for value of shipments (Item 9f) greater than the sum for payroll (Item 3c) plus total cost of materials, etc. (Item 5f)? . . . . . <input type="checkbox"/> Yes <input type="checkbox"/> No (If "No," please explain in Item 14)			
ITEM 14 REMARKS PERTAINING TO THE REPORT FOR THE SPECIFIED YEAR		<div>1963</div> <div>1964</div>			
ITEM 15 CERTIFICATION		Name of person to contact if questions arise regarding this report		Address (Revise when necessary)	
1963 →		CERTIFICATION - This report is substantially accurate, and covers -- Period covered From To Signature of authorized person Title Date			
1964 →		From To Signature of authorized person Title Date

FORM MC-36Z  
(3630) U.S. DEPARTMENT OF COMMERCE  
BUREAU OF THE CENSUS

## 1963 CENSUS OF MANUFACTURES

## ELECTRICAL MACHINERY, EQUIPMENT AND SUPPLIES

## PLEASE NOTE:

- A. The Census Bureau reviews your report for omissions, inconsistencies, and unusual ratios. Incomplete and inaccurate answers will result in correspondence which is both costly and time consuming. Be sure to complete every item. Enter "0" in Items B-D, if appropriate.
- B. If book records are not available, reasonably accurate estimates for most items are acceptable for the statistical purposes of this survey.
- C. Please complete and return this form in the envelope provided to the Jeffersonville Census Operations Office, Jeffersonville, Indiana. If filing by due date causes an undue burden, a request for extension should be directed to that office.

- D. PLEASE READ INSTRUCTIONS BEFORE COMPLETING REPORT
- Figures for dollars, (Items C, D, and E) should be rounded to THOUSANDS. If you wish you may report to the nearest unit. In either case, please be careful to enter your figures in the CORRECT COLUMNS. (See example below)

EXAMPLE	If the payroll is \$1,125,628.28:	Preferred method		Acceptable method	
		Mil- lions	Thou- sands	Dol- lars	Cen- t
		000	000	000	XX
		\$ 1	126		XX
		\$ 1	125	628	XX

## ITEM A - GENERAL INFORMATION

1. NAME OF ESTABLISHMENT
2. LOCATION OF ESTABLISHMENT
- a. Street and number at establishment location
- b. Place (City, Village, Town, Township)
- c. Is the establishment within the legal boundary of the place reported in (b) above?..... ☐ Yes ☐ No
- d. County
- e. State

3. FORM OF OWNERSHIP AT END OF 1963 (Check one)
- 1 ☐ Individual proprietor
- 2 ☐ Partnership
- 0 ☐ Corporation (Do not include any form of cooperative association)
- 8 ☐ Cooperative association (corporate or noncorporate)
- 9 ☐ Other (Specify) \_\_\_\_\_

CONFIDENTIAL - Response to this inquiry is required by Act of Congress (13 U.S.C.). The report you submit to the Census Bureau is confidential and may be seen only by sworn Census employees. It may not be used for purposes of taxation, investigation, or regulation. Copies retained in your files are also immune from legal process.

In correspondence pertaining to this report please refer to the 11-digit file number in the box above your name.

MC-36Z (3630)

(Please correct if mailing address has changed)

## ITEM E - VALUE OF ALL PRODUCTS SOLD OR SHIPPED, AND OTHER RECEIPTS

1. Please describe the work that is done at this establishment (plant)
- Examples: Make mica parts for radios; assemble electric sockets.

2. Not applicable to this form.

## 3. PRODUCTS AND SERVICES

Line No.	8 Report the value of products made in this establishment in 1963. (If your products are not printed in the list below, describe them on the blank lines, and enter the amount sold or shipped.) (See instructions on reverse side)	8-1XX Census product code (B-1)	8-4 Value of products shipped and other receipts	
			Mil- lions	Dol- lars
1	Test equipment for testing electrical, radio, and communication circuits, and motors	36112 20	91	\$
2	Electrical measuring instruments, except integrating	36113 30	61	\$
3	Switchgear and switchboard apparatus	36130 00	37	\$
4	Industrial controls	36220 99	48	\$

#### 4. FEDERAL SOCIAL SECURITY IDENTIFICATION NUMBER

Enter identification number used for this establishment (as shown on Employer's Quarterly Federal Tax Return, Treasury Form 941).

#### ITEM B - NUMBER OF EMPLOYEES (Exclude proprietor and partners)

Report the total number of paid employees during pay period ended nearest the 15th of:

1. March 1963

2. May 1963

3. August 1963

4. November 1963

#### ITEM C - PAYROLLS (Exclude payments to proprietor and partners)

Salaries and wages paid in 1963

TOTAL

#### ITEM D - COST OF MATERIALS, PARTS, SUPPLIES, FUELS, ELECTRICITY, AND CONTRACT WORK

Cost of materials, parts, components, supplies, containers, fuels, and electricity consumed in 1963. (Include the cost of work done for you by others on your own materials, and the cost of products bought and resold without further manufacture, processing, or assembly.)

#### FOR CENSUS USE ONLY

1	2	3	4	5	6	7	8
9	10	11	12	13	14	15	16

Total number of paid employees

Key

1. March 1963

2. May 1963

3. August 1963

Date

## INSTRUCTIONS

**Item B - Number of Employees**—Report the total number of employees paid during the pay period ending nearest the 15th of the specified months. If an unincorporated business, exclude proprietor and partners from the reported totals.

**Item C - Payrolls**—Report the total paid as wages, salaries, bonuses and commission during 1963. If an unincorporated business, exclude payment to proprietor or partners. The definition of salaries and wages used for calculating the withholding tax may be followed.

**Item D - Cost of Materials, Parts, Supplies, Fuels, Electricity, and Contract Work**—Report the cost of all materials, parts, supplies, and containers consumed during 1963, which were used (a) directly to produce products, (b) as operating supplies, and (c) for repair and maintenance. Include the cost of goods bought for resale, the value for which is reported separately in Item E, Line 20. Include also the cost of fuels and electricity purchased.

The total reported should also include the cost of materials owned by you but processed by other companies which make products under contract for your firm and the cost of such contract work.

**Item E-3 - Value of All Products Sold or Shipped, and Other Receipts**—Enter on Line 21, Column (E), the total receipts from products sold or shipped, or services performed by this establishment during 1963. Account for all receipts of this establishment. Then report separately on Lines 1-12 in Column (E) the value of shipments of each product listed. **Do not combine pre-printed product lines.**

**Lines 13-17**—If some of the products you made in 1963 are not listed, please list each such product on a separate line under "All other products," and enter in Column (E) the 1963 value of shipments.

**Line 20**—Report sales of products which were resold as originally purchased and not used in further manufacturing, processing, or assembling of products made in this establishment.

**After completing this schedule, would you please—**

- (a) Review to see that entries have been made for all applicable items.
- (b) Compare the sum reported for payrolls (Item C) and Materials (Item D) with the total reported in Item E-3, Total Value of Products Shipped and Other Receipts.
- (c) If the sum for Items C and D exceeds the total on Line 21, Item E-3, please explain in "Remarks."

Remarks

**PLEASE NOTE:** In all correspondence with the Census Bureau, please include the 11-digit file number which appears in the address box of the report form. High-speed electronic equipment will be used to identify both the correspondence and the reports in the 1963 Economic Censuses. If your correspondence does not include the Census file number it **will be returned** for the addition of that number. Address all correspondence to JEFFERSONVILLE CENSUS OPERATIONS OFFICE, 1201 East 10th Street, Jeffersonville, Indiana.

Please **do not mark or mar** the two lines of symbols above the address on each form. These symbols or rectangles which are unique to each establishment will be photographed and used to record mechanically the receipt of your report form.

FORM MC-D3  
(12-24-63)U.S. DEPARTMENT OF COMMERCE  
BUREAU OF THE CENSUS

**1963 CENSUS OF MANUFACTURES**  
**DEPARTMENT OF DEFENSE ESTABLISHMENTS**  
**PRIMARILY ENGAGED IN MANUFACTURING AND**  
**ASSEMBLY AND/OR RESEARCH AND DEVELOPMENT**  
**OWNED AND OPERATED BY**  
**THE DEPARTMENT OF DEFENSE**  
(Includes shipyards)

**INSTRUCTIONS** - This report is to be prepared by those Department of Defense establishments whose primary activities are manufacture and assembly and/or research and development. All shipyards are included.

The information requested is based upon reports now regularly prepared by most such establishments.

**CONFIDENTIAL** - Response to this inquiry is required by Act of Congress (13 U.S.C.). The report you submit to the Census Bureau is confidential and may be seen only by sworn Census employees. It may not be used for purposes of taxation, investigation, or regulation. Copies retained in your files are also immune from legal process.

In correspondence pertaining to this report please refer to the 11-digit file number in the box above your name.

Form MC-D3

**KEEP THIS COPY FOR YOUR FILES**  
**PLEASE COMPLETE AND RETURN THE FORM WHICH**  
**SHOWS YOUR NAME AND ADDRESS**

(Please correct if mailing address has changed)

**ITEM 1 - NAME AND PHYSICAL LOCATION OF ESTABLISHMENT ON DECEMBER 31, 1963****a. Name of establishment**

Your answers to parts b, c, d, e, and f of this item should relate to the ACTUAL PHYSICAL LOCATION of this establishment which may be different from the mailing address.

**b. Street and number at establishment location \***

\* If establishment location cannot be described by street and number, give name and number, if any, of road or highway and sufficient information to locate establishment, e.g. Rt. 25, 3 miles south of Charleaville.

**c. Type and name of place in which located (Check first applicable type and enter name of place.)**

Type	Name of place
<input type="checkbox"/> City	
<input type="checkbox"/> Village or borough	
<input type="checkbox"/> Town	
<input type="checkbox"/> Township	
<input type="checkbox"/> Other (Specify)	

**d. Is this establishment physically located within the legal boundaries of the place named in "c"?**☐ Yes☐ No**e. County in which located****f. State****g. Telephone number of establishment****ITEM 3 - NATURE OF ACTIVITY**

Describe briefly the kind of activity of this establishment.  
If a manufacturing plant, list the three most important products.

ITEM 4 EMPLOYMENT AND PAYROLLS IN CALENDAR YEAR 1963 (Civilian employees only)	Class of employee	Number of civilian employees in 1963					Total wages and salaries of civilian employees (Thousands) (G)	
		At end of month (As reported on Civil Service form SF-113*)				Sum of columns A, B, C, and D (E)		Column E divided by 4 (F)
		March (A)	June (B)	September (C)	December (D)			
	a. Wage Board employees						\$	
	b. All others						\$	
	c. TOTAL CIVILIAN EMPLOYEES (Sum of lines a and b)						\$	
* The number of Wage Board employees (line a) should be the same as reported on line 7 of SF-113. The total (line c) should be the same as reported on line 1 of SF-113.								
ITEM 5 MAN-DAYS OF WAGE BOARD EMPLOYEES BY CALENDAR QUARTER 1963	Enter the total number of man-days of Wage Board employees for each calendar quarter of 1963. Do not include days paid for vacations, holidays, or sick leave.					1963 Quarterly period	Man-Days (Thousands) (A)	Estimated number of man-hours** (Thousands) (B)
						a. January through March		
						b. April through June		
						c. July through September		
						d. October through December		
						e. TOTAL, 1963 (Sum of lines a, b, c, and d)		
** Obtain figure for column (B) by multiplying column (A) by average number of hours per day per Wage Board employees in this establishment .....								

Enter below the specified classes of billings of this establishment for calendar year 1963.			
ITEM 6 BILLINGS BY THIS ESTABLISH- MENT DURING CALENDAR YEAR 1963	Billings for products and services (including progress billings)	Line No.	Value (Thousands of dollars)
	Manufacture and assembly	1	\$
	Construction and conversion	2	\$
	Overhaul, repair and renovation	3	\$
	Alteration and modification	4	\$
	Research and development	5	\$
	Other billings	6	\$
	Total billings for products and services	7	\$
	Increase or decrease in unbilled costs of work in progress	8	\$
	<b>TOTAL EARNED REVENUE</b> —————→	9	\$
ITEM 7 COSTS DURING CALENDAR YEAR 1963	Types of costs incurred	Line No.	Costs (Thousands of dollars)
	Materials, supplies and parts used	1	\$
	Salaries and wages (Same as item 4c, column (G))	2	\$
	Contractual services and other costs	3	\$
	<b>TOTAL COSTS INCURRED</b> —————→	4	\$

**ITEM 8  
CHECKS TO  
ASSURE A  
COMPLETE  
AND  
ACCURATE  
REPORT**

(Please  
complete  
this item  
after you  
have answered  
all items on  
this report.)

The Census Bureau reviews your report for omissions, inconsistencies, and unusual ratios. To save you future correspondence about these problems, please make the following checks before returning your report:

- Review this report carefully to see that no items are omitted.
- Calculate and enter the four "reasonableness" checks (described below), then review the resulting figures.
- Correct your report for any errors you find; explain unusual figures in "Remarks" section.

"Reasonableness" checks	Calculation required for each check	Resulting figures for 1963
(1) Average hourly wages per Wage Board employee	Item 4a, column G (Wages paid Wage Board employees) ÷ item 5e, column B (Total estimated man-hours)	\$
(2) Man-days per year per Wage Board employee	Item 5e, column A (Wage Board man-days in thousands) x 1,000 ÷ item 4a, column F (Average number of Wage Board employees)	Man-days
(3) Wages and salaries per dollar of earned revenue	Item 7, line 2, (Wages and salaries of civilian employees) ÷ item 6, line 9 (Total earned revenue)	\$
(4) Is the total earned revenue (item 6, total) greater than total costs incurred (item 7, total)?	..... <input type="checkbox"/> Yes <input type="checkbox"/> No (If "No," please explain in "Remarks" section.)	

**ITEM 9  
REMARKS  
PERTAINING  
TO THIS  
REPORT**

**PERIOD  
OF REPORT**

This report covers the period from \_\_\_\_\_ to \_\_\_\_\_.

<p><b>FORM MA-175</b> (6-29-64)</p> <p style="text-align: center;">U.S. DEPARTMENT OF COMMERCE BUREAU OF THE CENSUS</p> <p style="text-align: center;"><b>REPORT ON SHIPMENTS TO OR RECEIPTS FOR WORK DONE FOR FEDERAL GOVERNMENT AGENCIES AND THEIR CONTRACTORS AND SUPPLIERS IN 1963</b></p> <p style="text-align: center;">(Based on the Total Shipment Figures from the Annual Survey of Manufactures, Census Form MA-100)</p> <p><b>TO:</b> Bureau of the Census, Industry Division Washington, D.C. 20233</p>	<p><b>CONFIDENTIAL</b> - Response to this inquiry is required by Act of Congress (13 U.S.C.). The report you submit to the Census Bureau is confidential and may be seen only by sworn Census employees. It may not be used for purposes of taxation, investigation, or regulation. Copies retained in your files are also immune from legal process.</p> <p><b>ITEM 1</b> - In correspondence about the report for this establishment, please refer to your 11-digit file number below.</p> <p style="text-align: center;">↓</p>	
<p><b>(PLEASE RETURN THIS COPY)</b></p>		
<p><b>ITEM 2</b></p>	<p>Please check the box which describes the 1963 receipts for shipments or other work done in this plant for Federal Government agencies and their contractors and suppliers:</p> <p style="text-align: center;"> <input type="checkbox"/> None                      <input type="checkbox"/> Up to \$100,000                      <input type="checkbox"/> \$100,000 or more         </p> <p>For purposes of this report, such receipts will include payments received by you for work done by you on Federal Government prime contracts as well as the value of materials, components, subassemblies, and services supplied by you to Federal Government contractors and suppliers for use in their performance of Federal Government contracts.</p> <p>If your response to this question was "\$100,000 or more," please complete the form on the reverse side. Otherwise, sign the form in the space provided below and return it.</p>	
<p style="text-align: center;"><b>INTRODUCTORY NOTE</b></p> <p>The Census Bureau is conducting this survey to develop a measure of the level of industrial activity generated by the expenditures made by Federal Government agencies. Special attention is directed toward expenditures made by the Department of Defense (DOD), the National Aeronautics and Space Administration (NASA), and the Atomic Energy Commission (AEC).</p> <p>Industrial activity generated by Federal Government expenditures is being measured in terms of receipts (including value of shipments) for work done, or for value of products shipped to Federal agencies, their contractors, subcontractors and suppliers. For each plant covered by the report such receipts will consist of two kinds of payments. The first is payments received for work done directly for Federal agencies on Government prime contracts. The second is payments received for work done for other Government contractors and suppliers for use in the performance of Federal Government contracts. Subcontract receipts reported will normally be based on payments made for work done on Government subcontracts when subject to the Renegotiation Act of 1951, as amended. These receipts should include the value of materials, components, subassemblies, and services supplied to other plants of the company (interplant transfers) as well as to contractors and suppliers outside the company for use in the performance of contracts. This is in accord with standard Census reporting procedures.</p> <p>This survey is being conducted on an establishment or plant basis. This method of reporting is necessary so that the data reported by each plant may be tabulated by the geographic area in which the work is actually being performed. Additionally, it will permit the data to be classified by appropriate product class and Standard Industrial Classification.</p>		
<p style="text-align: center;"><b>SPECIFIC INSTRUCTIONS</b></p> <p>Except as may be specifically requested, a report should be submitted for each establishment for which you received a preaddressed form. If additional forms are needed, please write to us specifying the address of the establishment for which a blank form is required. If you have any questions about the survey, write to the Bureau of the Census, Washington, D.C., 20233, referring to form MA-175 and to the file number in the upper right-hand corner of the address box. The basic concepts used in this survey (establishment, shipments, receipts, materials consumed, employment, etc.) are the same as those used in the Annual Survey of Manufactures (Form MA-100), and related figures reported on each form should agree.</p> <p><b>Columns (1), (2), and (3)</b> - These entries--lines a through l--should correspond with those entered in item 9 and item 9A for the Product Class Description, the Product Class Code, and the 1963 data column from the related Census form MA-100 for 1963.</p> <p>The three lines "i," "j," and "k" that follow specific product class entries, are in the same position in which they appear on form MA-100. Only "i" is expected to be of particular importance on form MA-175; "i" is an item primarily of interest to manufacturing industries not covered by form MA-175, such as textiles and apparel, coating and engraving, etc.; "k" is used by manufacturers to list the shipments of products they buy and ship without any manufacturing or assembling, usually to round out a product line. Line "j" on the other hand, can be very important in this survey. Receipts for research and development that have not been separately identified on form MA-100 should be reported here. (Note that research and development receipts for certain aerospace activities are to be supplied in lines "a" - "h" in the appropriate class of product (37216, 37223, 37226, 37293, 37294, 19253).) Line "j" would also be used for reporting receipts for installation or testing. Installation or testing costs of more than \$1 million done at other locations should not be reported on the form for the manufacturing plant. Instead, a separate MA-175 form should be filed for each such installation or test site. If you have such cases, it would be desirable to write to the Census Bureau describing the situation before completing the MA-175 forms.</p>		
<p>Name of person to contact regarding this report</p>	<p>Address (Number and street, city, State, ZIP code)</p>	<p>Telephone No.</p>

## INSTRUCTIONS

### INTRODUCTORY NOTE

We are conducting this survey to obtain statistics on the origin of exports of manufactured goods by States and smaller areas. This information is needed by various branches of government to assess the impact of foreign trade on the economy. If you have any questions about the survey, please write to the Bureau of the Census, Washington, D.C., 20233, referring to form MA-161 and to the 11-digit file number in the address box.

This survey is being conducted on an establishment or plant basis. This method of reporting is necessary so that export figures reported by each plant may be tabulated in the proper geographic area. A report is required for each establishment for which you received a preaddressed form. If additional forms are needed, please write to us, specifying the address of the establishment for which a blank form is required.

If the figures requested are not readily available from your records, carefully prepared estimates will be accepted.

### DEFINITION OF EXPORTS

The following description of exports is consistent with definitions used in compiling official foreign trade statistics of the United States. It is provided as a guide for respondents. A manufacturer would be expected to report according to his own definitions except where major differences might be expected. In such cases, he would be expected to estimate rather than compile revised data from detailed records.<sup>1</sup>

Exports as understood in this survey include shipments from the United States to foreign countries of products which are not subjected to further manufacture, fabrication, or assembly in this country before being shipped abroad. Exports include shipments to foreign subsidiaries or divisions of your company and its affiliates. Sales to the United States Government for shipment abroad are considered an export if the products are for a foreign nation. They are not classified as an export if for use by the United States Armed Forces.

<sup>1</sup> For example, some manufacturers are known to treat sales to Post Exchanges or to Puerto Rico differently than here described. These differences in most cases are not statistically significant.

Sales (shipments) to customers in Canada are classified as exports. Shipments to Alaska and Hawaii are not exports. Shipments to Puerto Rico are not classified as exports.

Exports do not include products shipped to domestic customers or other plants of your company who will further manufacture, fabricate, or assemble them. Please note, however, that the breaking down of bulk shipments of your products into smaller lots or packages by a wholesale exporter or by other units of your company is not considered to be further manufacturing, processing, or assembly.

### EXPORT VALUES

The export values to be reported on this form should be on the same basis as the values in item 3a, total shipments of the plant in 1963.

### EXPORTS OF THE PRODUCTS OF THIS PLANT BY THIS FIRM (item 3b)

**Item 3b will include**—Export shipments of your products by this establishment and export shipments of the products of this establishment by or on order of other parts of your company or its affiliates such as sales branches, sales offices, warehouses, export offices, and export subsidiaries.

**It will also include**—Sales for export of your products to or on order of export firms, and other sales known to you to be for export. Also, sales to the United States Government in this country for shipment abroad under military and economic assistance programs.

### 1960 EXPORTS

The value of products shipped for export by this establishment in 1960 has been entered in item 5, wherever the 1960 report form could be precisely matched. Please be sure the figure posted for 1960 is consistent with the 1963 figure entered in item 3b. Make revision, if necessary.

If no figure has been posted but the 1960 export figure is readily available, please enter the 1960 figure in item 5, otherwise leave the item blank.

# Appendix E

## **AUTHORITY FOR CENSUS: TITLE 13, UNITED STATES CODE**

(Codification of August 1954 amended by Acts of August 1957, September 1960, and June and October 1962)

### **Collection and publication: Five-year periods (131)**

The Secretary shall take, compile, and publish censuses of manufactures, of mineral industries, and of other businesses . . . in the year 1954 and every fifth year thereafter, and each such census shall relate to the year immediately preceding the taking thereof: **Provided**, That the censuses of manufactures, of mineral industries, and of other businesses, including the distributive trades and service establishments, directed to be taken in the year 1954 relating to the year 1953, shall be taken instead in the year 1955 relating to the year 1954.

### **Geographic scope of censuses (191a)**

Each of the censuses authorized by this chapter (other than censuses of population) shall include each State, the District of Columbia, Alaska, Hawaii, the Virgin Islands, Guam, and the Commonwealth of Puerto Rico, and as may be determined by the Secretary, such other possessions and areas over which the United States

exercises jurisdiction, control, or sovereignty. Censuses of population shall include all geographic areas referred to in the preceding sentence. Inclusion of other areas over which the United States exercises jurisdiction or control shall be subject to the concurrence of the Secretary of State.

### **Failure to answer questions affecting companies, businesses, religious bodies, and other organizations: False answers (224)**

Whoever, being the owner, official, agent, person in charge, or assistant to the person in charge, of any company, business, institution, establishment, religious body, or organization of any nature whatsoever, neglects or refuses, when requested by the Secretary or other authorized officer or employee of the Department of Commerce or bureau or agency thereof, whether such request be made by registered mail, by certified mail, by telegraph, by visiting representative, or by one or more of these methods, to answer completely and correctly to the best of his knowledge all questions relating to his company, business, institution, establishment, religious body, or other organization, or to records or statistics in his official custody, contained on any census or other schedule prepared and submitted to him under the authority of this title, shall be fined not more than \$500 or imprisoned not more than sixty days, or both; and if he willfully gives a false answer to any such question, he shall be fined not more than \$10,000 or imprisoned not more than one year, or both.

## STANDARD METROPOLITAN STATISTICAL AREAS

(Area titles and definitions of the 2 Standard Consolidated Areas and the 217 Standard Metropolitan Statistical Areas in the United States established by the Bureau of the Budget as of August 4, 1964)

<b>Chicago, Ill.-Northwestern Indiana Standard Consolidated Area</b> .....	Consists of Chicago, Ill., and Gary-Hammond-East Chicago, Ind., Standard Metropolitan Statistical Areas
<b>New York, N.Y.-Northeastern New Jersey Standard Consolidated Area</b> .....	Consists of the following Standard Metropolitan Statistical Areas: New York, N.Y.; Newark, N.J.; Jersey City, N.J.; Paterson-Clifton-Passaic, N.J.; and of Middlesex and Somerset Counties, N.J.
<b>Abilene, Tex.</b> .....	Consists of Jones and Taylor Counties, Tex.
<b>Akron, Ohio</b> .....	Consists of Portage and Summit Counties, Ohio
<b>Albany, Ga.</b> .....	Coextensive with Dougherty County, Ga.
<b>Albany-Schenectady-Troy, N.Y.</b> .....	Consists of Albany, Rensselaer, Saratoga, and Schenectady Counties, N.Y.
<b>Albuquerque, N. Mex.</b> .....	Coextensive with Bernalillo County, N. Mex.
<b>Allentown-Bethlehem-Easton, Pa.-N.J.</b> .....	Consists of Lehigh and Northampton Counties, Pa.; and Warren County, N.J.
<b>Altoona, Pa.</b> .....	Coextensive with Blair County, Pa.
<b>Amarillo, Tex.</b> .....	Consists of Potter and Randall Counties, Tex.
<b>Anaheim-Santa Ana-Garden Grove, Calif.</b> .....	Coextensive with Orange County, Calif.
<b>Ann Arbor, Mich.</b> .....	Coextensive with Washtenaw County, Mich.
<b>Asheville, N.C.</b> .....	Coextensive with Buncombe County, N.C.
<b>Atlanta, Ga.</b> .....	Consists of Clayton, Cobb, De Kalb, Fulton, and Gwinnett Counties, Ga.
<b>Atlantic City, N.J.</b> .....	Coextensive with Atlantic County, N.J.
<b>Augusta, Ga.-S.C.</b> .....	Consists of Richmond County, Ga., and Aiken County, S.C.
<b>Austin, Tex.</b> .....	Coextensive with Travis County, Tex.
<b>Bakersfield, Calif.</b> .....	Coextensive with Kern County, Calif.
<b>Baltimore, Md.</b> .....	Consists of Baltimore city and Anne Arundel, Baltimore, Carroll, and Howard Counties, Md.
<b>Baton Rouge, La.</b> .....	Coextensive with East Baton Rouge Parish, La.
<b>Bay City, Mich.</b> .....	Coextensive with Bay County, Mich.
<b>Beaumont-Port Arthur, Tex.</b> .....	Consists of Jefferson and Orange Counties, Tex.
<b>Billings, Mont.</b> .....	Coextensive with Yellowstone County, Mont.
<b>Binghamton, N.Y.-Pa.</b> .....	Consists of Broome and Tioga Counties, N.Y., and Susquehanna County, Pa.
<b>Birmingham, Ala.</b> .....	Coextensive with Jefferson County, Ala.
<b>Boise City, Idaho</b> .....	Coextensive with Ada County, Idaho
<b>Boston, Mass.</b> .....	Consists of all of Suffolk County; Beverly, Lynn, Peabody, and Salem cities, and Danvers, Hamilton, Lynnfield, Manchester, Marblehead, Middleton, Nahant, Saugus, Swampscott, Topsfield, and Wenham towns in Essex County; Cambridge, Everett, Malden, Medford, Melrose, Newton, Somerville, Waltham, and Woburn cities, and Arlington, Ashland, Bedford, Belmont, Burlington, Concord, Framingham, Lexington, Lincoln, Natick, North Reading, Reading, Sherborn, Stoneham, Sudbury, Wakefield, Watertown, Wayland, Weston, Wilmington, and Winchester towns in Middlesex County; Quincy city, and Braintree, Brookline, Canton, Cohasset, Dedham, Dover, Holbrook, Medfield, Millis, Milton, Needham, Norfolk, Norwood, Randolph, Sharon, Walpole, Wellesley, Westwood, and Weymouth towns in Norfolk County; and Duxbury, Hanover, Hingham, Hull, Marshfield, Norwell, Pembroke, Rockland, and Scituate towns in Plymouth County, Mass.
<b>Bridgeport, Conn</b> .....	Consists of Bridgeport and Shelton cities, and Easton, Fairfield, Monroe, Stratford, and Trumbull towns in Fairfield County; and Milford town in New Haven County, Conn.
<b>Brockton, Mass.</b> .....	Consists of Easton town in Bristol County; Avon and Stoughton towns in Norfolk County; and Brockton city, and Abington, Bridgewater, East Bridgewater, Hanson, West Bridgewater, and Whitman towns in Plymouth County, Mass.
<b>Brownsville-Harlingen-San Benito, Tex.</b> .....	Coextensive with Cameron County, Tex.
<b>Buffalo, N.Y.</b> .....	Consists of Erie and Niagara Counties, N.Y.
<b>Canton, Ohio</b> .....	Coextensive with Stark County, Ohio
<b>Cedar Rapids, Iowa</b> .....	Coextensive with Linn County, Iowa
<b>Champaign-Urbana, Ill.</b> .....	Coextensive with Champaign County, Ill.
<b>Charleston, S.C.</b> .....	Consists of Berkeley and Charleston Counties, S.C.
<b>Charleston, W. Va.</b> .....	Coextensive with Kanawha County, W. Va.
<b>Charlotte, N.C.</b> .....	Consists of Mecklenburg and Union Counties, N.C.
<b>Chattanooga, Tenn.-Ga.</b> .....	Consists of Hamilton County, Tenn., and Walker County, Ga.

# STANDARD METROPOLITAN STATISTICAL AREAS—Continued

Chicago, Ill. ....	Consists of Cook, Du Page, Kane, Lake, McHenry, and Will Counties, Ill.
Cincinnati, Ohio-Ky.-Ind. ....	Consists of Clermont, Hamilton, and Warren Counties, Ohio; Boone, Campbell, and Kenton Counties, Ky.; and Dearborn County, Ind.
Cleveland, Ohio ....	Consists of Cuyahoga, Geauga, Lake, and Medina Counties, Ohio
Colorado Springs, Colo. ....	Coextensive with El Paso County, Colo.
Columbia, S.C. ....	Consists of Lexington and Richland Counties, S.C.
Columbus, Ga.-Ala. ....	Consists of Chattahoochee and Muscogee Counties, Ga., and Russell County, Ala.
Columbus, Ohio ....	Consists of Delaware, Franklin, and Pickaway Counties, Ohio
Corpus Christi, Tex. ....	Coextensive with Nueces County, Tex.
Dallas, Tex. ....	Consists of Collin, Dallas, Denton, and Ellis Counties, Tex.
Davenport-Rock Island-Moline, Iowa-Ill. ....	Consists of Scott County, Iowa, and Henry and Rock Island Counties, Ill.
Dayton, Ohio. ....	Consists of Greene, Miami, Montgomery, and Preble Counties, Ohio
Decatur, Ill. ....	Coextensive with Macon County, Ill.
Denver, Colo. ....	Consists of Adams, Arapahoe, Boulder, Denver, and Jefferson Counties, Colo.
Des Moines, Iowa ....	Coextensive with Polk County, Iowa
Detroit, Mich. ....	Consists of Macomb, Oakland, and Wayne Counties, Mich.
Dubuque, Iowa ....	Coextensive with Dubuque County, Iowa
Duluth-Superior, Minn.-Wis. ....	Consists of St. Louis County, Minn., and Douglas County, Wis.
Durham, N.C. ....	Coextensive with Durham County, N.C.
El Paso, Tex. ....	Coextensive with El Paso County, Tex.
Erie, Pa. ....	Coextensive with Erie County, Pa.
Eugene, Oreg. ....	Coextensive with Lane County, Oreg.
Evansville, Ind.-Ky. ....	Consists of Vanderburgh and Warrick Counties, Ind., and Henderson County, Ky.
Fall River, Mass.-R.I. ....	Consists of Fall River city, and Somerset, Swansea, and Westport towns in Bristol County, Mass.; and Tiverton town in Newport County, R.I.
Fargo-Moorhead, N. Dak.-Minn. ....	Consists of Cass County, N. Dak., and Clay County, Minn.
Fitchburg-Leominster, Mass. ....	Consists of Shirley and Townsend towns in Middlesex County; and Fitchburg and Leominster cities, and Lunenburg and Westminster towns in Worcester County, Mass.
Flint, Mich. ....	Consists of Genesee and Lapeer Counties, Mich.
Fort Lauderdale-Hollywood, Fla. ....	Coextensive with Broward County, Fla.
Fort Smith, Ark.-Okla. ....	Consists of Crawford and Sebastian Counties, Ark.; and LeFlore and Sequoyah Counties, Okla.
Fort Wayne, Ind. ....	Coextensive with Allen County, Ind.
Fort Worth, Tex. ....	Consists of Johnson and Tarrant Counties, Tex.
Fresno, Calif. ....	Coextensive with Fresno County, Calif.
Gadsden, Ala. ....	Coextensive with Etowah County, Ala.
Galveston-Texas City, Tex. ....	Coextensive with Galveston County, Tex.
Gary-Hammond-East Chicago, Ind. ....	Consists of Lake and Porter Counties, Ind.
Grand Rapids, Mich. ....	Consists of Kent and Ottawa Counties, Mich.
Great Falls, Mont. ....	Coextensive with Cascade County, Mont.
Green Bay, Wis. ....	Coextensive with Brown County, Wis.
Greensboro-High Point, N.C. ....	Coextensive with Guilford County, N.C.
Greenville, S.C. ....	Consists of Greenville and Pickens Counties, S.C.
Hamilton-Middletown, Ohio ....	Coextensive with Butler County, Ohio
Harrisburg, Pa. ....	Consists of Cumberland, Dauphin, and Perry Counties, Pa.
Hartford, Conn. ....	Consists of Hartford city, and Avon, Bloomfield, Canton, East Granby, East Hartford, East Windsor, Enfield, Farmington, Glastonbury, Granby, Manchester, Newington, Rocky Hill, Simsbury, South Windsor, Suffield, West Hartford, Wethersfield, Windsor, and Windsor Locks towns in Hartford County; Cromwell town in Middlesex County; and Andover, Bolton, Coventry, Ellington, and Vernon towns in Tolland County, Conn.
Honolulu, Hawaii ....	Coextensive with Honolulu County, Hawaii
Houston, Tex. ....	Coextensive with Harris County, Tex.
Huntington-Ashland, W. Va.-Ky.-Ohio ....	Consists of Cabell and Wayne Counties, W. Va.; Boyd County, Ky.; and Lawrence County, Ohio
Huntsville, Ala. ....	Consists of Limestone and Madison Counties, Ala.
Indianapolis, Ind. ....	Consists of Hamilton, Hancock, Hendricks, Johnson, Marion, Morgan, and Shelby Counties, Ind.
Jackson, Mich. ....	Coextensive with Jackson County, Mich.
Jackson, Miss. ....	Consists of Hinds and Rankin Counties, Miss.
Jacksonville, Fla. ....	Coextensive with Duval County, Fla.
Jersey City, N.J. ....	Coextensive with Hudson County, N.J.

# STANDARD METROPOLITAN STATISTICAL AREAS—Continued

Johnstown, Pa. ....	Consists of Cambria and Somerset Counties, Pa.
Kalamazoo, Mich. ....	Coextensive with Kalamazoo County, Mich.
Kansas City, Mo.-Kans. ....	Consists of Cass, Clay, Jackson, and Platte Counties, Mo., and Johnson and Wyandotte Counties, Kans.
Kenosha, Wis. ....	Coextensive with Kenosha County, Wis.
Knoxville, Tenn. ....	Consists of Anderson, Blount, and Knox Counties, Tenn.
Lafayette, La. ....	Coextensive with Lafayette Parish, La.
Lake Charles, La. ....	Coextensive with Calcasieu Parish, La.
Lancaster, Pa. ....	Coextensive with Lancaster County, Pa.
Lansing, Mich. ....	Consists of Clinton, Eaton, and Ingham Counties, Mich.
Laredo, Tex. ....	Coextensive with Webb County, Tex.
Las Vegas, Nev. ....	Coextensive with Clark County, Nev.
Lawrence-Haverhill, Mass.-N.H. ....	Consists of Lawrence and Haverhill cities, and Andover, Georgetown, Groveland, Merrimac, Methuen, North Andover, and West Newbury towns in Essex County, Mass.; and Newton, Plaistow, and Salem towns in Rockingham County, N.H.
Lawton, Okla. ....	Coextensive with Comanche County, Okla.
Lewiston-Auburn, Maine ....	Consists of Auburn and Lewiston cities, and Lisbon town in Androscoggin County, Maine
Lexington, Ky. ....	Coextensive with Fayette County, Ky.
Lima, Ohio. ....	Coextensive with Allen County, Ohio
Lincoln, Nebr. ....	Coextensive with Lancaster County, Nebr.
Little Rock-North Little Rock, Ark. ....	Coextensive with Pulaski County, Ark.
Lorain-Elyria, Ohio ....	Coextensive with Lorain County, Ohio
Los Angeles-Long Beach, Calif. ....	Coextensive with Los Angeles County, Calif.
Louisville, Ky.-Ind. ....	Consists of Jefferson County, Ky., and Clark and Floyd Counties, Ind.
Lowell, Mass. ....	Consists of Lowell city, and Billerica, Chelmsford, Dracut, Tewksbury, Tyngsborough, and Westford towns in Middlesex County, Mass.
Lubbock, Tex. ....	Coextensive with Lubbock County, Tex.
Lynchburg, Va. ....	Consists of Lynchburg city, and Amherst and Campbell Counties, Va.
Macon, Ga. ....	Consists of Bibb and Houston Counties, Ga.
Madison, Wis. ....	Coextensive with Dane County, Wis.
Manchester, N.H. ....	Consists of Manchester city, and Bedford and Goffstown towns in Hillsborough County; and Hooksett town in Merrimack County, N.H.
Memphis, Tenn.-Ark. ....	Consists of Shelby County, Tenn., and Crittenden County, Ark.
Meriden, Conn. ....	Coextensive with Meriden city in New Haven County, Conn.
Miami, Fla. ....	Coextensive with Dade County, Fla.
Midland, Tex. ....	Coextensive with Midland County, Tex.
Milwaukee, Wis. ....	Consists of Milwaukee, Ozaukee, and Waukesha Counties, Wis.
Minneapolis-St. Paul, Minn. ....	Consists of Anoka, Dakota, Hennepin, Ramsey, and Washington Counties, Minn.
Mobile, Ala. ....	Consists of Baldwin and Mobile Counties, Ala.
Monroe, La. ....	Coextensive with Ouachita Parish, La.
Montgomery, Ala. ....	Consists of Elmore and Montgomery Counties, Ala.
Muncie, Ind. ....	Coextensive with Delaware County, Ind.
Muskegon-Muskegon Heights, Mich. ....	Coextensive with Muskegon County, Mich.
Nashville, Tenn. ....	Consists of Davidson, Sumner, and Wilson Counties, Tenn.
New Bedford, Mass. ....	Consists of New Bedford city, and Acushnet, Dartmouth, and Fairhaven towns in Bristol County; and Marion and Mattapoisett towns in Plymouth County, Mass.
New Britain, Conn. ....	Consists of New Britain city, and Berlin, Plainville, and Southington towns in Hartford County, Conn.
New Haven, Conn. ....	Consists of New Haven city, and Bethany, Branford, East Haven, Guilford, Hamden, North Branford, North Haven, Orange, West Haven, and Woodbridge towns in New Haven County, Conn.
New London-Groton-Norwich, Conn. ....	Consists of New London and Norwich cities, and East Lyme, Griswold, Groton, Ledyard, Lisbon, Montville, Old Lyme, Preston, Sprague, Stonington, and Waterford towns in New London County, Conn.
New Orleans, La. ....	Consists of Jefferson, Orleans, St. Bernard, and St. Tammany Parishes, La.
New York, N.Y. ....	Consists of New York City, and Nassau, Rockland, Suffolk, and Westchester Counties, N.Y.
Newark, N.J. ....	Consists of Essex, Morris, and Union Counties, N.J.
Newport News-Hampton, Va. ....	Consists of Newport News and Hampton cities, and York County, Va.
Norfolk-Portsmouth, Va. ....	Consists of Chesapeake, Norfolk, Portsmouth, and Virginia Beach cities, Va.

# STANDARD METROPOLITAN STATISTICAL AREAS—Continued

Norwalk, Conn. -----	Consists of Norwalk city, and Westport and Wilton towns in Fairfield County, Conn.
Odessa, Tex. -----	Coextensive with Ector County, Tex.
Ogden, Utah -----	Coextensive with Weber County, Utah
Oklahoma City, Okla. -----	Consists of Canadian, Cleveland, and Oklahoma Counties, Okla.
Omaha, Nebr.-Iowa -----	Consists of Douglas and Sarpy Counties, Nebr., and Pottawattamie County, Iowa
Orlando, Fla. -----	Consists of Orange and Seminole Counties, Fla.

Springfield, Mo. -----	Coextensive with Greene County, Mo.
Springfield, Ohio -----	Coextensive with Clark County, Ohio
Springfield-Chicopee-Holyoke, Mass.-Conn. --	Consists of Chicopee, Holyoke, Springfield, and Westfield cities, and Agawam, East Longmeadow, Hampden, Longmeadow, Ludlow, Monson, Palmer, Southwick, West Springfield, and Wilbraham towns in Hampden County; Northampton city, and Easthampton, Granby, Hadley, and South Hadley towns in Hampshire County; and Warren town in Worcester County, Mass.; and Somers town in Tolland County, Conn.
Stamford, Conn. -----	Consists of Stamford city, and Darien, Greenwich, and New Canaan towns in Fairfield County, Conn.
Steubenville-Weirton, Ohio-W. Va. -----	Consists of Jefferson County, Ohio, and Brooke and Hancock Counties, W. Va.
Stockton, Calif. -----	Coextensive with San Joaquin County, Calif.
Syracuse, N.Y. -----	Consists of Madison, Onondaga, and Oswego Counties, N.Y.
Tacoma, Wash. -----	Coextensive with Pierce County, Wash.
Tampa-St. Petersburg, Fla. -----	Consists of Hillsborough and Pinellas Counties, Fla.
Terre Haute, Ind. -----	Consists of Clay, Sullivan, Vermillion, and Vigo Counties, Ind.
Texarkana, Tex.-Ark. -----	Consists of Bowie County, Tex., and Miller County, Ark.
Toledo, Ohio-Mich. -----	Consists of Lucas and Wood Counties, Ohio, and Monroe County, Mich.
Topeka, Kans. -----	Coextensive with Shawnee County, Kans.
Trenton, N.J. -----	Coextensive with Mercer County, N.J.
Tucson, Ariz. -----	Coextensive with Pima County, Ariz.
Tulsa, Okla. -----	Consists of Creek, Osage, and Tulsa Counties, Okla.
Tuscaloosa, Ala. -----	Coextensive with Tuscaloosa County, Ala.
Tyler, Tex. -----	Coextensive with Smith County, Tex.
Utica-Rome, N.Y. -----	Consists of Herkimer and Oneida Counties, N.Y.
Vallejo-Napa, Calif. -----	Consists of Napa and Solano Counties, Calif.
Waco, Tex. -----	Coextensive with McLennan County, Tex.
Washington, D.C.-Md.-Va. -----	Consists of Washington, D.C.; Montgomery and Prince Georges Counties, Md.; and Alexandria, Fairfax, and Falls Church cities, and Arlington and Fairfax Counties, Va.
Waterbury, Conn. -----	Consists of Thomaston, Watertown, and Woodbury towns in Litchfield County; and Waterbury city, Naugatuck borough, and Beacon Falls, Cheshire, Middlebury, Prospect, and Wolcott towns in New Haven, County, Conn.
Waterloo, Iowa -----	Coextensive with Black Hawk County, Iowa
West Palm Beach, Fla. -----	Coextensive with Palm Beach County, Fla.
Wheeling, W. Va.-Ohio -----	Consists of Marshall and Ohio Counties, W. Va., and Belmont County, Ohio
Wichita, Kans. -----	Consists of Butler and Sedgwick Counties, Kans.
Wichita Falls, Tex. -----	Consists of Archer and Wichita Counties, Tex.
Wilkes-Barre-Hazleton, Pa. -----	Coextensive with Luzerne County, Pa.
Wilmington, Del.-N.J.-Md. -----	Consists of New Castle County, Del., Salem County, N.J., and Cecil County, Md.
Winston-Salem, N.C. -----	Coextensive with Forsyth County, N.C.
Worcester, Mass. -----	Consists of Worcester city, and Auburn, Berlin, Boylston, Brookfield, East Brookfield, Grafton, Holden, Leicester, Millbury, Northborough, Northbridge, North Brookfield, Oxford, Paxton, Shrewsbury, Spencer, Sterling, Sutton, Upton, Westborough, and West Boylston towns in Worcester County, Mass.
York, Pa. -----	Consists of Adams and York Counties, Pa.
Youngstown-Warren, Ohio -----	Consists of Mahoning and Trumbull Counties, Ohio

# Appendix G

## CURRENT INDUSTRIAL REPORTS (CIR) COMMODITY STATISTICS

This appendix lists the 1963 Current Industrial Reports (CIR), a series of commodity surveys conducted by the Bureau of the Census, together with their frequency of publication. From many of these CIR's, selected data for 1963 were included in table 6 of the industry chapters of Volume II of the 1963 Census of Manufactures. The extreme right column lists the page numbers in the volume, including page numbers for data-containing footnotes, where

CIR data (as published in the 1963 census) may be found. Where the column for page number reference is blank, it signifies that no data from that CIR were published in the 1963 Census of Manufactures. It is to be noted that the CIR numbers and titles in this appendix relate to designations as separate published reports. References in the 1963 census volume itself will usually be in terms of the number and title of the CIR survey forms as mailed to the respondent for reporting in 1963.

For "frequency of publication," the letter symbols have the following meaning: M = Monthly; Q = Quarterly; SA = Semiannually; and A = Annually. In the extreme right column "Ftn." represents "footnote," on the page shown immediately to the left.

# Current Industrial Reports Commodity Statistics Included in Volume II of 1963 Census of Manufactures

CIR series number	Title	Frequency of publication	Pages of Volume II containing CIR data	CIR series number	Title	Frequency of publication	Pages of Volume II containing CIR data
M20A	Flour Milling Products	M		M30E	Plastics Bottles	M

# Appendix H

## COMPARABILITY OF PRODUCT CLASSES BETWEEN THE 1963 AND 1958 CENSUSES OF MANUFACTURERS

This appendix lists those classes of products which were changed in coverage and/or in code between the 1958 and 1963 censuses of manufactures. Part 1 traces the comparability of classes as defined in 1963 and as changed from 1958; Part 2 shows comparability of classes as existing in 1958, and as altered for 1963.

The changed relationship between the classes of products between 1958 and 1963 resulted partly from a revision of the Standard Industrial Classification (SIC) (published early in 1963 as a supplement to the SIC Manual), on which classification codes and procedures employed by the Bureau of the Census are based. The supplement and manual referred to are published by the Bureau of the Budget and are available from the U.S. Government Printing Office, Washington, D.C. 20402. The 1963 revision was a limited one, confined to some reordering of 4-digit industries within 3-digit groups. In addition to product class changes resulting from the deletion of some industries defined in the Manual in 1958, and the defining of new industries out of existing industries, there were a considerable number of changes in product classes within the boundaries of unchanged 4-digit industries. These resulted from (1) an effort to isolate important product classes in growing areas, (2) a desire to recognize different end-uses or markets, and (3) a reexamination of the detailed commodity structure of some industries (for example, 2821, plastics materials, etc., and 2834, pharmaceutical preparations). All of these changes

are reflected in the accompanying tabular presentation of product class comparability.

Product classes, coded to five digits, represent an intermediate level of classification between the 4-digit establishment industry coding of the SIC and the 7-digit level used for product coding by the Bureau of the Census for the census of manufactures and for the more than 100 Current Industrial Reports published by the Bureau. Product classes, representing relatively homogeneous groupings of products, are utilized for requesting output data in the Annual Survey of Manufactures (ASM). In addition to data published in the ASM, production and/or shipments information for product classes are shown in the table 6 series of the industry chapters of the Census of Manufactures for 1963 (Volume II, **Industry Statistics**) and, for product-class specialization, in the general statistics in table 8. Production, shipments, inventory, and other data by product class will be found in numerous publications in the Current Industrial Reports series. Where applicable, table 6A of the industry chapters of the census of manufactures carries product data obtained from the Current Industrial Reports.

In the two parts of this appendix, the codes and descriptions of product classes affected by revision between 1958 and 1963 are given. In each of the parts, the product class or classes shown on the left are comparable to the class or classes shown on the right. For example, in Part 1, product classes 20221 and 20222 for 1963 are the equivalent in coverage to classes 20220 and 20252 for 1958. In Part 2, the reverse situation is the case. Where a product class shown in the left column is part of a product class in the right column, the class code in the right column contains an asterisk (\*). Thus, it is evident that a product class in one year may be a part of several product classes in the other year. Where such situations exist, comparability between the censuses becomes difficult at the product class level.

## Comparability of Product Classes

### Part 1. 1963 Census of Manufactures as Related to 1958 Census of Manufactures

1963		1958 equivalent	
Product class code	Product class description	Product class code	Product class description
19291	Ammunition except for small arms, n.e.c.	19210	Artillery ammunition over 30 mm.(or over 1.18 inches)
19292	Receipts for ammunition loading and assembly, over 30 mm. (or over 1.18 inches)	19220	Receipts for ammunition loading and assembly, over 30 mm. (or over 1.18 inches)
19253	Research and development on guided missiles and space vehicles	19253	Research and development on guided missiles (complete)
19255	All other services on complete missiles and space vehicles

## ALPHABETIC INDEX OF MANUFACTURED PRODUCTS

This index is designed to assist in locating statistics on manufactured products as published in table 6A, "Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958," in the respective industry chapters of the 1963 Census of Manufactures volumes. The product code or codes and the page or pages in the industry chapters where statistics will be found are shown for each of the products or groups of products. The index covers the almost 6,000 coded products as reported in the 1963 Census of Manufactures and several thousand products covered by the Bureau of the Census Current Industrial Reports series of commodity surveys for 1963, which are also included in table 6A. Typically, the products alphabetized in this index are of a broad nature; more detail by size, material components, end use, etc., will be found in

table 6A itself. Occasionally, the same product or group of products will appear under more than one industry; page numbers so indicate. To assist in locating statistics for particular products, cross references or alternate ways of describing products are included in this index.

Product codes are based on the 1957 revised edition of the **Standard Industrial Classification Manual** (SIC), as amended, issued by the Bureau of the Budget. Bureau of the Census expansion of the 4-digit industry coding of the SIC to 5-digit product classes and 7-digit products, as published in table 6A, is used as the basis for this alphabetic index.

Assorted product information is contained in tables other than 6A but no references to such other tables are shown here. For example, summary product information at the industry level may be found in table 5A and at the product class level in table 5B. Product class information may also be found in tables 6B to 6D and in table 8. Occasionally, detailed product information may be contained in tables other than 6A, typically in the table 6 series.
